Lendlease Building have however prepared Validation Report submitted is based on data from two weekend closures only and this report can be made available. Following clarification from the Post Approval team, that this Validation Report did not satisfy the condition was received and we indicated that we would advise of the next 2 rescheduled trial weekends.

These weekends identified above will form the final two weeks of the 'Trial Period', and a Validation Report will be submitted to the Department in accordance with C11 shortly thereafter.

C9(b) requires that the Construction Noise Vibration Management Sub-Plan (CNVMSP) is submitted prior to the works commencing. Attached is the current version which was updated in March 2020.

Also attached is the previous notice issued to the adjoining properties which outlined upcoming works relating to SSD10339 between July - December 2020 (including some weekend activity). In addition to that, a reminder notice is also being distributed (currently being printed for distribution Monday).
