**Cowal Gold Underground Development Project
Modification 1 (SSD 10367 Mod 1)**

Evolution Mining (Cowal) Pty Limited has lodged a modification application with the Department of Planning and Environment under Section 4.55(2) of the Environmental Planning and Assessment Act 1979 for the Cowal Gold Underground Development Project.

The modification application (reference SSD 10367 Mod 1) involves:

- changing how the underground workings are accessed from the surface;
- minor changes to the location of access tunnels to the underground stopes; and
- increasing the annual production rate from 1.8 million tonnes per annum up to 2.6 Mtpa.

No changes are proposed to the approved underground mining method, the stoping areas, or the operation of the approved pastefill plant.

The modification application and Modification Report are available on the Department of Planning and Environment's website at <https://www.planningportal.nsw.gov.au/major-projects>. Details of how you can make comments on the application are also available using that link.

For general information about the Cowal Gold Operations, go to <https://evolutionmining.com.au/cowal/>

This notice is made in accordance with Section 98(4)(b) of the Environmental Planning and Assessment Regulation 2021.
