

(PIRMP) Pollution Incident Response Management Plan

POLLUTION INCIDENT RESPONSE MANAGEMENT PLAN EPA LICENSE # 20444

(PIRMP) Pollution Incident Response Management Plan

1. Purpose and Scope

The purpose of the PIRMP is to ensure compliance with the requirements of the Protection of the Environment Legislation Amendment Act 2011 (POELA Act)2.

This Pollution Incident Response Management Plan (PIRMP) has been developed to describe response to a potential pollution incident of **Enviro Waste Services Group** and to meet the requirements of the Protection of the Environment Operations Act (POEO Act 1997).

The PIRMP covers the **property at 14 Kiora Crescent, YENNORA**

The plan covers description of potential hazards, actions to be taken to prevent additional environmental harm and details of communication required in the event of an incident.

The plan is based on a risk assessment of the site.

2. Facility Details

Enviro Waste Services Group Pty Ltd is an Australian owned and operated Company. We specialise in various wastes such as:

- Grease traps
- Septic/sewer
- Stormwater pits
- Oily Water

We are also a Treatment Facility for such waste.

The waste is stored in the relevant tanks while it gets treated and is ready to be disposed of.

3. Definition of Pollution Incident

The definition of “pollution incident” means an incident or set of circumstances during or because of which there is likely to be a leak, spill or other escape or deposit of a substance because of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on a premise, but it does not include an incident of circumstances involving the emission of any noise.

A pollution incident is required to be notified if there is a risk of “material Harm to the environment” which is defined in Section 147 of the PEOA as:

- a) Harm to the environment is material if:
 - i) It involves actual or potential harm to the health & safety of human beings or to the ecosystems that is not trivial

(PIRMP) Pollution Incident Response Management Plan

ii) It results in actual or loss of property damage to an amount, or amounts in aggregate, exceeding \$10,000 (or such amount as is prescribed by the regulations) and

b) Loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

Inventory of possible pollutants

PRODUCT NAME	LOCATION OF STORAGE	MAXIMUM QTY STORED
Caustic Soda	On a pallet in bundied area	800 kg
Degreaser	In an IBC in bundied area	1000 litres
Hydrated Lime	On a pallet in bundied area	800 kg

- Safety Data Sheets for these chemicals are displayed in the Warehouse.

4. Description and Likelihood of Hazards /Pollution Identification

Due to the nature of the business, the products that are stored and used onsite are considered potential pollutants.

Even though the utmost care is taken when dealing with such pollutants, there has been measures in place to ensure the correct procedure is used to deal with any mishaps that may occur.

At Enviro Waste Services Group Pty Ltd, the following chemicals may be potential pollutants:

5. Hazards Identification & Prevention:

Chemical Name	Hazards Identified	Precaution
Caustic Soda	Severe burns, risk of damage to eyes	Avoid contact with skin and eyes. Protective clothing, gloves & masks must be worn
Degreaser	Severe burns, risk of damage to eyes, may cause respiratory irritation	Avoid contact with skin and eyes. Protective clothing, gloves & masks must be worn
Hydrated Lime	Irritating to eyes, respiratory system and skin	Avoid contact with skin and eyes. Protective clothing, gloves & masks must be worn

6. Pre-Emptive Action

Failure of Containment Tanks

In the event of this occurring:

- Shut off the valve,
- Employees will vacate the premises.
- The correct Authorities will be notified.

Depending on the incident that may occur, the correct action will be taken to clean up and remove any hazards.

In the case of spills, a Vacuum truck will be used to suck up the waste/spill.

7. Transportation of Waste

All transporters of liquid waste comply with the following regulations to avoid any incidents occurring in relation to transporting of liquid waste:

- The transportation of waste must be carried out in a manner that avoids the spillage of waste
- Any vehicle or plant used for the transportation of the waste must be constructed and maintained to prevent spillage of the waste
- Any container used to transport the waste must be secured safely on the vehicle used for the transportation of waste.
- Incompatible waste must not be mixed or transported together
- Liquid waste must not be mixed with other wastes
- The waste must be able to be sampled by the release of suitable and accessible valves on the top and where appropriate bottom of any container used to transport the waste

8. Spill Response

There may be a risk of spills and contamination of surface during transportation of liquid waste.

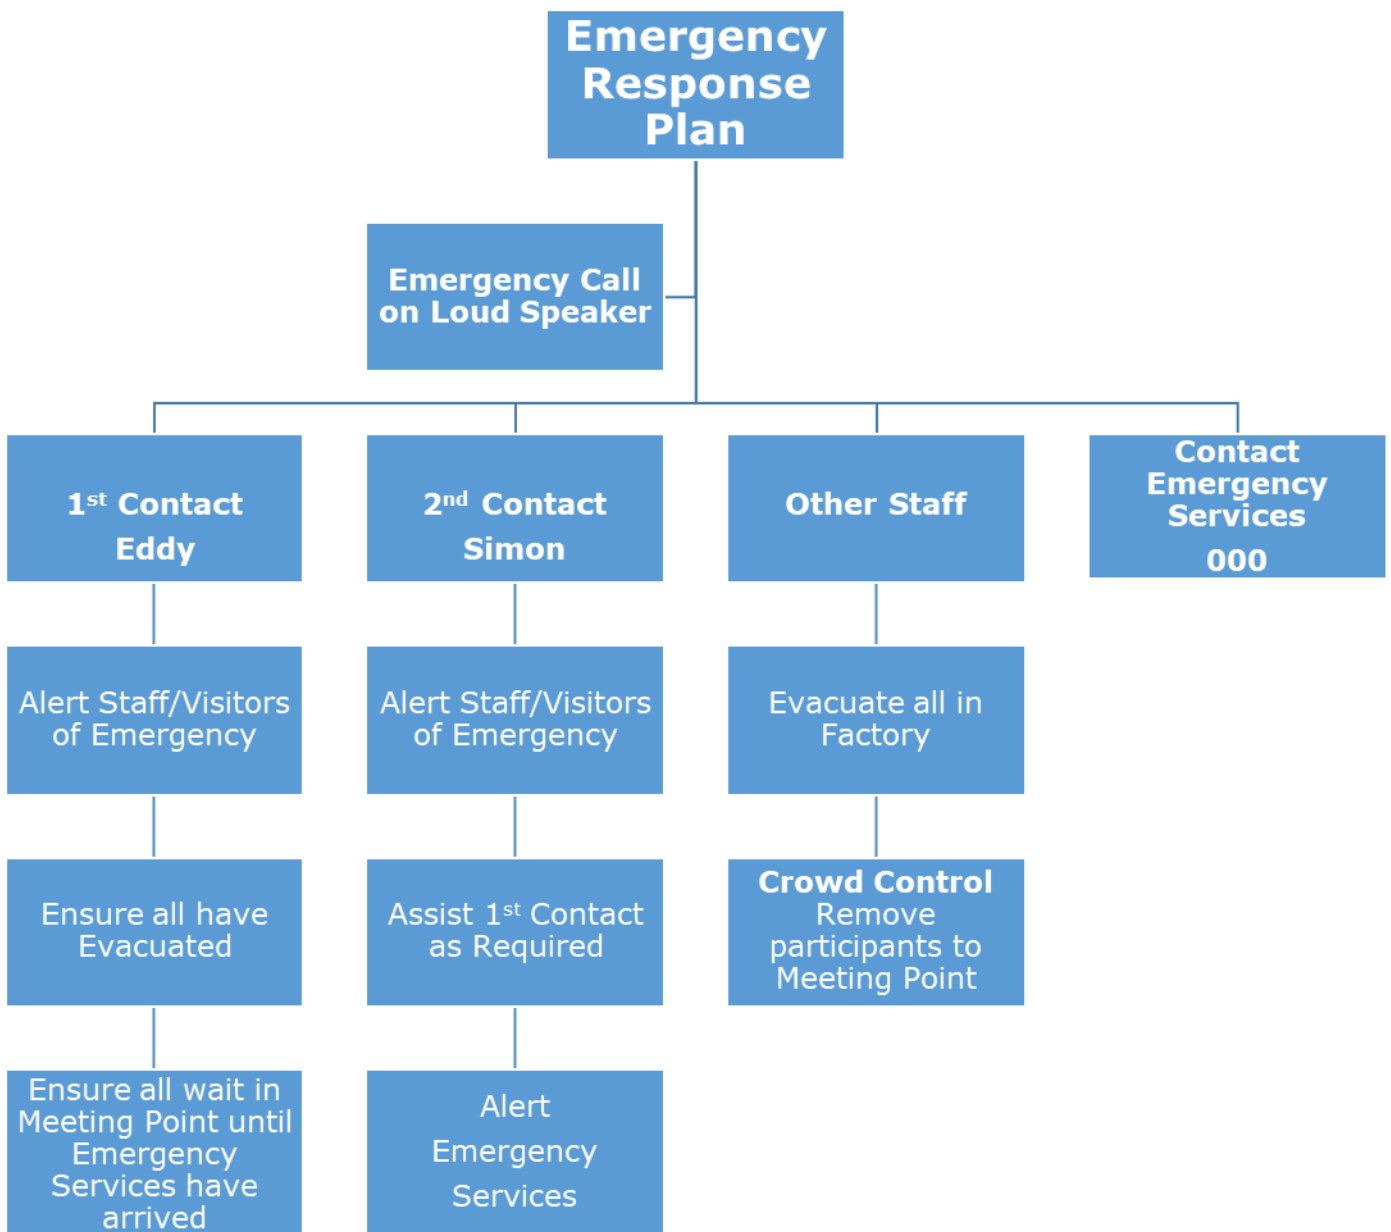

- All trucks are loaded and unloaded within a bundy area to prevent any spills from spreading.
- If an incident was to occur during the transportation of waste, a spill kit will be used and if necessary, emergency contacts will be notified.

(PIRMP) Pollution Incident Response Management Plan

9. Incident Response Plan

This section provides details in which will be used in the event of an incident that has resulted in a material impact to the environment and/or human health.

It will also include communication in which will be used to notify Emergency Services and surrounding neighbours.

(PIRMP) Pollution Incident Response Management Plan

10. Managing Response

All incidents are to be reported to the General Manager or Director immediately.

Key Contact	Position	Contact Number
Eddy Hawach	Managing Director	0420 511 727
Simon Saba	General Manager	0467 777 646

11. Details for the appropriate relevant Authorities

The following Agencies will be contacted in the event that an incident may occur:

Ambulance, Fire or Police	000
Guildford Fire Station	9632 6856
Environment Protection Authority	131 555
Work Cover Authority	13 10 50

Information to be notified to the authorities:

- The time, date, nature, duration and location of the incident;
- The location of the place where pollution is occurring or is likely to occur;
- The nature, the estimated quantity or volume and the concentration of any pollutants involved, if known;
- The circumstances in which the incident occurred, including the cause of the incident, if known;
- The action taken or proposed to be taken to deal with the incident and any resulting pollution or threatened pollution, if known; and Other information prescribed by the regulations.

12. Details for Surrounding Neighbours

Contact details are as follows:

SBN Building Construction	0425 838 116
Farmlink Engineering	9632 1588
J.B Manufacturing	9632 9158

(PIRMP) Pollution Incident Response Management Plan

In the event of an Emergency, our neighbours will be notified immediately via phone and/or message if unable to contact them directly on their site. Enviro Waste Services Group will consult with the above contacts in relation to the incident that has occurred.

13. Maps

A detailed hard copy of the map showing the location of the premises, the surrounding area which is likely to be affected by a pollution incident and the location of potential pollutants on the premises as well as stormwater drains on the premises is available on site (and as an attachment to this document).

14. Staff Training/Awareness

All Enviro Waste Services Group employees will receive explanation on all relevant information contained in our PIRMP. This will be communicated during our regular staff meeting.

For all new employees, the information will also be explained upon induction.

All employees are made aware of the requirements in this plan and are encouraged to enforce all regulations and safety procedures to minimise any incidents that may occur on site at all times.

Details of this plan are also provided to the key contacts on and off site and a hard copy is available in the Main Office upon request.

15. Testing and Review

The testing of our PIRMP will be undertaken to ensure that the information provided is accurate and up to date.

This will take place on a 12-month basis. However, contact details and other such relevant details will be regularly updated when & if required.

Also, a practical exercise will be implemented to ensure all employees understand the nature of PIRMP and to ensure correct procedures are followed.

(PIRMP) Pollution Incident Response Management Plan

Records of all training will be kept on file in the main office.

It will detail:

- The procedure in which the test was managed
- Dates in which the test was performed
- The details of the person who carried out the testing
- The details (date, description etc) of any amendments or updates made to our PIRMP
