Dear Sir

**SUBJECT: STUBBO SOLAR FARM- INFRASTRUCTURE DEVELOPMENT UPGRADE OF BLUE SPRINGS ROAD**

I refer to the need to upgrade Blue Springs Road for the development of the Stubbo Solar Farm.

The proposed works include:

- Intersection treatments.
- Upgrading on the road geometry including improvement of super elevations and pavement widening on curves
- Maintenance of wildlife corridors in remnant bushland in road reserves
- Widening of road pavement in other locations where required
- Development of two entrances at the solar farm Site (one being an alternate option).
- Adjustment and extension of culverts where required and construction of better table drains.

Drawings of the proposed works have been prepared by BTE Consulting detailing all of the engineering aspects for work. The drawing are identified as BTE -210038 for future reference purposes.

The drawings meet Council's design standards and specifications for works of this class.

The permits for 80 kph construction zones at the entrance to the wind farm can be granted by Council under delegated authority.

Yours sincerely

**DON COTTEE**  
**DEVELOPMENT ENGINEER COORDINATOR**
