OUTLINE OF BUILT WORKS SHOWN IN WHITE

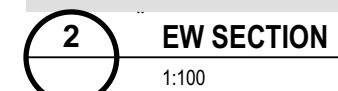

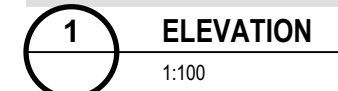

The main street frontage on Bradley's Head rd will have a large timber fence/screen to provide the animals with visual and acoustic privacy. The scale of this screen will be lessened by pulling the top edge down where possible reducing the overall scale. The screen will also be softened by the use of natural timbers and with a landscaping strip in front of the screen to help break up the scale and soften the appearance from the street.

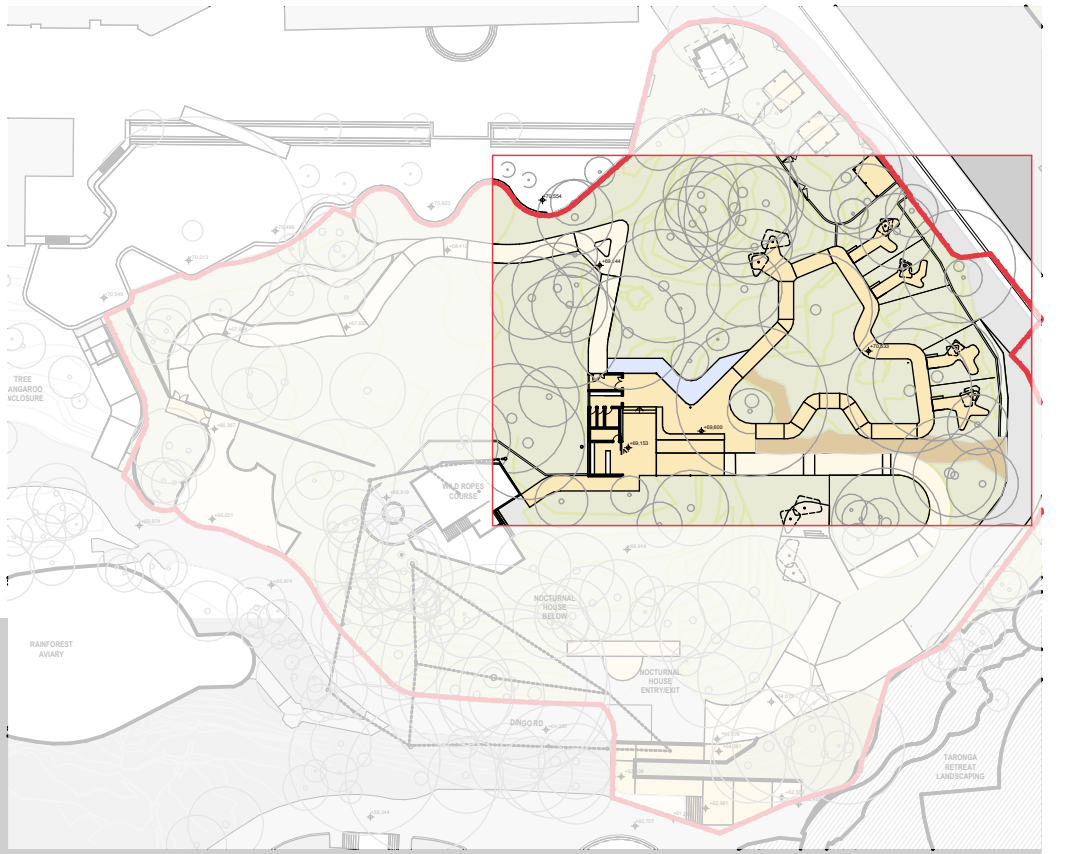

APPROXIMATE EXTENTS OF SITE SHOWN DASHED

Situated within a dense existing tree canopy the proposed structures are not expected to be visible from Sydney Harbour as they will be obscured from view by existing trees.
