

Planning Secretary's Environmental Assessment Requirements

Cowra Meat Processors Upgrade

Application Number	SSD-105450710
Project Name	Cowra Meat Processors Upgrade
Development	Construction and operation of a new livestock processing plant (abattoir) across two stages with the capacity to process up to 600 head of beef cattle and 5,000 head of small stock per day (lamb, mutton, goat). The proposal includes a rendering plant, wastewater irrigation, biogas production and reuse, office, amenities, internal roads and parking
Location	6649 Olympic Highway, Cowra within the Cowra local government area Lots 7, 9 & 10 DP 111800, Lot 1 DP 367292, Lots 98, 99, 111, 212, 213, 296, 299 & 396 DP 752948, Lots 193 & 194 DP 752947, Lots 7 & 10 DP 111800, Lot 10 DP 874022, Lot 2 DP 806356, Lot 4 DP 806358, Lot 6 DP 810871 and Lot 8 DP 813383
Applicant	Cowra Meat Processors Pty Ltd
Date of Issue	3 March 2026
General Requirements	The Environmental Impact Statement (EIS) for the development must: • comply with these assessment requirements • meet the form and content requirements in sections 190 and 192 of the Environmental Planning and Assessment Regulation 2021 (the Regulation) • have regard to the Department's <i>State Significant Development Guidelines (2021)</i>. In addition, the EIS must include: • a clear comprehensive description of the proposal for the site, including details of all activities and processes proposed to be carried out as part of the development • consideration of issues discussed in the public authority responses to request for key issues (see Attachment 2) • a detailed assessment of the key issues specified below, including: – a description of the existing environment, using sufficient baseline data – an assessment of the potential impacts of all stages and activities that form part of the development, including any cumulative impacts, taking into consideration relevant guidelines, policies, plans and statutes – a description of the measures that would be implemented to avoid, minimise, mitigate and if necessary, offset the potential impacts of the development, including proposals for adaptive management and/or contingency plans to manage significant risks to the environment. The EIS must also be accompanied by: • an Estimated Development Cost (EDC) Report prepared in accordance with the relevant planning circular using the Standard Form of EDC Report • an estimate of the retained and new jobs that would be created during the construction and operational phases of the development, including details of the methodology to determine the figures provided • high quality files of maps and figures of the subject site and proposal • certification that the information provided is accurate at the date of preparation • a declaration from a Registered Environmental Assessment Practitioner that your EIS includes the information specified in the Department's <i>Registered Environmental Assessment Practitioner Guidelines</i>.
Key issues	The EIS must address the following specific matters: • Statutory and Strategic Context – including: – details of any proposed consolidation or subdivision of land – a detailed description of the history of the site, including the relationship between the proposed development and all development consents and approved plans previously and/or currently applicable to the site, including any associated with the existing abattoir

- demonstration that the proposal is consistent with all relevant planning strategies, environmental planning instruments, adopted precinct plans, draft district plan(s) and adopted management plans and justification for any inconsistencies. This includes, but is not limited to:
 - State Environmental Planning Policy (Biodiversity and Conservation) 2021
 - State Environmental Planning Policy (Industry and Employment) 2021
 - State Environmental Planning Policy (Planning Systems) 2021
 - State Environmental Planning Policy (Primary Production) 2021
 - State Environmental Planning Policy (Resilience and Hazards) 2021
 - State Environmental Planning Policy (Transport and Infrastructure) 2021
- **Suitability of the Site** – including:
 - a detailed justification for the proposal and that the site can accommodate the proposed development having regard to its potential environmental impacts, permissibility, strategic context and existing site constraints, including its relationship to the adjoining abattoir and any shared infrastructure as well as associated cumulative impacts and relevant mitigation measures
 - a Land Use Conflict Risk Assessment (LUCRA) of the development in accordance with DPI's *Land Use Conflict Risk Assessment (LUCRA) Guide*, particularly, separation distances and management practices to minimise odour, dust and noise from sensitive receivers.
- **Community and Stakeholder Engagement** – a community and stakeholder engagement strategy consistent with the Department's *Undertaking Engagement Guidelines for State Significant Projects* for all stages of the development, including (but not limited to):
 - details of how issues raised, and feedback provided during engagement activities have been considered and responded to in the development
 - details of the proposed approach to future community and stakeholder engagement based on the results of consultation.
- **Air Quality and Odour** – a quantitative assessment of the potential air quality, dust and odour impacts of the development (construction and operation) on surrounding landowners, businesses and sensitive receptors, in accordance with relevant Environment Protection Authority guidelines, including:
 - details of buildings, air handling systems and gas boilers
 - evidence of appropriate meteorological data for use in dispersion modelling, using real and local meteorological data where possible
 - an investigation and assessment of odour impacts likely to be associated with 'cold air drainage' effects on all identified and potential receivers
 - inclusion of 'worst case' emission scenarios and sensitivity analyses
 - a contingency plan to address unpredicted operational odour impacts
 - a description and appraisal of air quality and odour impact monitoring, emission control techniques and mitigation measures
 - details of an odour impact assessment completed in accordance with the Approved Methods for Modelling and Assessment of Air Pollutants in NSW (EPA, 2022) and Assessment and Management of Odour from Stationary Sources in NSW (DEC, 2006).
- **Wastewater** – including:
 - a detailed description of the wastewater treatment requirements for the development including design/layout, the volumes of wastewater generated, treated, reused/recycled, or stored and its relationship to the adjoining abattoir's operations
 - details of the key pollutant concentrations of the wastewater before and after treatment with reference to relevant water quality guidelines
 - details of the proposed irrigation area, including baseline data on soil characteristics, a technical assessment of the suitability of the soil to sustain on-going wastewater irrigation and assessment of potential impacts to nearby rivers/creeks and groundwater systems
 - an irrigation land capability assessment which assesses long-term effluent use in accordance with EPA Guidelines
 - an irrigation management plan detailing proposed irrigation practices and soil nutrient and water balance
 - a detailed assessment of wastewater management strategies in accordance with relevant guidelines.
- **Waste** – including:

- details of the quantities and classification of all waste streams to be generated on site during the development
- details of waste storage, handling and disposal during the development
- details of the measures that would be implemented to ensure that the development is consistent with the aims, objectives and guidance in the *NSW Waste and Sustainable Materials Strategy 2041*.
- **Traffic and Transport** – a quantitative transport impact assessment, that includes:
 - consideration of all deliverables and actions for construction and operation of the development in Appendix E – Scoping checklist of the GTIA
 - an estimate of trip generation, mode split, arrival/departure profiles and trip distribution
 - an assessment of cumulative traffic impact on road performance and safety implications at key intersections using an appropriate modelling framework (including the consideration of existing base case, future base case and project case scenarios)
 - plans demonstrating how all vehicles likely to be generated during construction and operation and awaiting loading, unloading or servicing can be accommodated on the site to avoid queuing in the street network
 - details and plans of any proposed internal road network, access points, loading dock provision and servicing, on-site parking provisions, and sufficient pedestrian and cyclist facilities, in accordance with the relevant Australian Standards and Austroads/TfNSW technical guidelines
 - swept path diagrams for the largest vehicles manoeuvring through site access points, internal roads, hardstand areas and nearby intersections (where necessary)
 - details of road upgrades, traffic control measures, new roads or access points required for the development if necessary (including approval-in-principle from the relevant road authority, where relevant)
 - details of the likely construction trip generation, construction vehicle routes, access and parking arrangements and measures to mitigate any construction traffic and parking impacts detailed in a draft Construction Traffic Management Plan.
- **Biosecurity, Disease Management and Animal Welfare** – including:
 - details of how the proposed development would comply with relevant animal welfare, biosecurity and disease management legislation, codes and guidelines
 - the potential for increased risk in the transmission of diseases (such as Q fever) as a result of the transportation, handling and processing of livestock
 - details of all disease control measures
 - details of contingency measures that would be implemented for any required disposal of animals in the event of a disease outbreak or a bush fire event.
- **Human Health** – a Human Health Risk Assessment (HHRA) which assesses health impacts to the community relating to air emissions, odour, noise and water quality in accordance with guidelines for Assessing Human Health Risks from Environmental Hazards (enHealth 2012) and the Health Impact Assessment Guidelines (Commonwealth Department of Health and Aged Care 2017).
- **Water Management** – an integrated water management strategy, including:
 - a detailed site water balance including a description of the water demands and breakdown of water supplies, measures to minimise water use and any water licensing requirements
 - a description of groundwater and surface water conditions and all works/activities that may intercept, extract, use, divert or receive surface water and/or groundwater (both temporary and permanent)
 - an assessment of potential surface and groundwater impacts (both quality and quantity) associated with the development, including potential impacts on watercourses, riparian areas, groundwater, and groundwater-dependent communities nearby in accordance with relevant water quality guidelines and the Department of Climate Change, Energy, the Environment and Water - Water Group (DCCEEW-Water) Groundwater Toolkit
 - details of the proposed stormwater/wastewater drainage design including the capacity of onsite detention system(s), onsite sewage management and measures to treat, reuse or dispose of water
 - where water and drainage infrastructure works are required that would be handed over to the local council, or other drainage or water authority, provide full hydraulic details and detailed plans and specification of proposed works that have been

- prepared in consultation with, and comply with the relevant standards, the local council or other drainage or water authority
 - a surface water discharge assessment in accordance with relevant EPA guidelines, including an assessment of potential impacts on watercourses and riparian areas, and characterisation of water quality at the point of discharge against the relevant water quality criteria using a MUSIC water quality model
 - details of any surface or groundwater mitigation, management and monitoring activities and methodologies.
- **Noise and Vibration** – a quantitative noise and vibration impact assessment undertaken by a suitably qualified acoustic consultant in accordance with the relevant Environment Protection Authority guidelines and Australian Standards which includes:
 - the identification of impacts associated with construction, site emission and traffic generation at noise affected sensitive receivers, including the provision of operational noise contours and a detailed sleep disturbance assessment
 - details of noise monitoring survey, background noise levels, noise source inventory and 'worst case' noise emission scenarios
 - consideration of annoying characteristics of noise and prevailing meteorological conditions in the study area
 - a cumulative impact assessment inclusive of impacts from other developments
 - details and analysis of the effectiveness of proposed management and mitigation measures to adequately manage identified impacts, including a clear identification of residual noise and vibration following application of these mitigation measures and details of any proposed compliance monitoring programs
 - if required, a road noise assessment in accordance with the NSW Road Noise Policy
- **Hazards and Risk** – including:
 - a preliminary risk screening completed in accordance with *State Environmental Planning Policy (Resilience and Hazards) 2021* and Applying SEPP 33 (DoP, 2011), that includes:
 - a clear indication of class, storage and handling quantities and location of all dangerous goods and hazardous materials associated with the development
 - any dangerous goods and hazardous materials located outside of the site associated with the operation of common effluent storage and irrigation area;
 - the quantity of refrigerants classified as dangerous goods.
 - a Preliminary Hazard Analysis (PHA) prepared in accordance with *Hazardous Industry Planning Advisory Paper No. 6 – Guidelines for Hazard Analysis* (DoP, 2011) and *Multi-Level Risk Assessment* (DoP, 2011), should the preliminary risk screening indicate that the project is "potentially hazardous".
- **Bush Fire** – a bush fire assessment report that addresses the aims and objectives of Planning for Bush Fire Protection 2019, and includes:
 - consideration of the storage of hazardous materials
 - details of proposed operational access for emergency services personnel
 - details of emergency and evacuation arrangements for occupants/visitors
 - a draft bush fire emergency management and evacuation plan that provides an outline of how the development will be managed / mitigated to address potential bush fire impacts.
- **Soils** – an assessment of potential impacts on soil resources and riparian land on and near the site, including:
 - impacts on soil erosion, salinity and acid sulfate soils
 - details of earthworks, including cut and fill volumes
 - description of the proposed erosion and sediment controls during construction.
- **Contamination** – a site contamination assessment in accordance with the Managing Land Contamination Planning Guidelines: SEPP 55 – Remediation of Land (DUAP, 1998), including:
 - characterisation of the nature and extent of any contamination on the site and surrounding area
 - a Detailed Site Investigation (DSI) and a Remedial Action Plan, if the Preliminary Site Investigation indicates contamination is present and a DSI is required.
- **Aboriginal Cultural Heritage** – an Aboriginal Cultural Heritage Assessment Report (ACHAR) prepared in accordance with the Code of Practice for Archaeological Investigation in NSW (DECCW 2010), and guided by the Guide to Investigating,

	Assessing and Reporting on Aboriginal Cultural Heritage in New South Wales (OEH 2011). The ACHAR must: – identify, describe and assess impacts on the Aboriginal cultural heritage values that exist across the development site – provide evidence and details of consultation with Aboriginal people in accordance with the Aboriginal Cultural Heritage Consultation Requirements for Proponents (DECCW 2010) – include results of a surface survey and any test excavations and an unexpected finds protocol. • Non-Aboriginal Cultural Heritage – a non-Aboriginal cultural heritage assessment (including both cultural and archaeological significance) which must detail potential impacts on heritage assets and any proposed management and mitigation measures. • Biodiversity – an assessment of the proposal's biodiversity impacts in accordance with the <i>Biodiversity Conservation Act 2016</i>, including the preparation of a Biodiversity Development Assessment Report (BDAR) where required under the Act, except where a waiver for preparation of a BDAR has been granted. • Social – including a social impact assessment in accordance with the Department's <i>Social Impact Assessment Guideline</i> • Economic – including an analysis of any potential economic impacts of the development, including a discussion of any potential economic benefits to the local and broader community. • Visual, including - a visual impact assessment, including: – photomontages and perspectives of the development layout and design (buildings and storage areas) – details of staging, site coverage, setbacks, open space, landscaping, height, colour, scale, building materials and finishes, façade design, signage and lighting – an assessment of the potential visual impacts of the development on the amenity of the surrounding area, including: ○ nearby public and private receivers ○ significant vantage points in the broader public domain – detailed plans showing suitable landscaping which incorporates endemic species. • Infrastructure Requirements – an infrastructure delivery, management and staging plan that includes: – an assessment of impacts of the development on existing utility infrastructure and service provider assets surrounding the site – a detailed written and/or graphical description of infrastructure required on the site, including any electrical substation/s and on-site switch yard/s – details of the existing capacity of the site to service the proposed development and any extension or augmentation, property tenure or staging requirements for the provision of utilities, including arrangements for electrical network requirements, drinking water, wastewater and recycled water – a description of how any upgrades will be co-ordinated, funded and delivered on time and be maintained to facilitate the development – identification of any existing infrastructure or easements on or off the site which may be impacted by construction or operation of the development and details of measures to be implemented to address any impacts. • Ecologically Sustainable Development – including: – identification of how ESD principles (as defined in section 193 of the EP&A Regulation) are incorporated in the design and ongoing operation of the development – demonstration of how the development will meet or exceed the relevant industry recognised building sustainability and environmental performance standards – demonstration of how the development minimises greenhouse gas emissions (reflecting the Government's goal of net zero emissions by 2050) and consumption of energy, water (including water sensitive urban design) and material resources • Planning Agreement/Development Contributions – consideration of any applicable State and local development contributions, such as the Housing and Productivity Contribution, draft contributions plan(s), and/or details of any Planning Agreement required should a contributions plan not be in place
Consultation	During the preparation of the EIS, you must consult with the relevant local, State or Commonwealth Government authorities, service providers, community groups and affected landowners.

	In particular you must consult with: • Cowra Shire Council • Department of Climate Change, Energy, the Environment and Water, specifically the: ○ Conservation Programs, Heritage and Regulation Group ○ Water Group ○ Environment Protection Authority • Heritage NSW • Department of Primary Industries and Regional Development – Agriculture and Biosecurity • Transport for NSW • Fire & Rescue NSW • NSW Health • NSW Rural Fire Service • SafeWork NSW • WaterNSW • Food Authority of NSW • Jemena • Essential Energy • surrounding local landowners, businesses and stakeholders • local and regional community and environmental groups • Traditional Owners • Cowra Local Aboriginal Land Council • any other public transport, utilities or community service providers.
SEARs Expiry	SEARs will expire two years after the date of issue (or the date they were last modified).
References	The assessment of the key issues listed above must take into account relevant guidelines, policies, and plans as identified. While not exhaustive, Attachment 1 contains a list of some of the guidelines, policies, and plans that may be relevant to the environmental assessment of this proposal.

ATTACHMENT 1

Technical and Policy Guidelines

The following guidelines may assist in the preparation of the environmental impact statement. This list is not exhaustive and not all of these guidelines may be relevant to your proposal.
