EXECUTIVE SUMMARY

In July 2020, Health Infrastructure NSW (the proponent) engaged Artefact Heritage Services Pty Ltd (Artefact Heritage) to prepare an Aboriginal Archaeological Survey Report (ASR) for The Sutherland Hospital Operating Theatre Upgrade Project (TSHOTUP). The ASR found that the study area is unlikely to contain Aboriginal objects and that no further archaeological investigations would be required.

Health Infrastructure NSW lodged an application with the Minister of Planning for TSHOTUP to be considered a State Significant Development (SSD), this was granted on 10 December 2020 (SSD-11099584). Health Infrastructure NSW will prepare an Environmental Impact Statement (EIS) for the project in accordance with the Secretary's Environment Assessment Requirements (SEARs). The SEARs include the following requirements for the assessment of Aboriginal heritage:

Provide an Aboriginal Cultural Heritage Assessment Report (ACHAR) that:

-) identifies and describes the Aboriginal cultural heritage values that exist across the site*
-) includes surface surveys and test excavations where necessary*
-) has been prepared in accordance with the Guide to investigating, assessing and reporting on Aboriginal Cultural Heritage in NSW (OEH, 2011) and Code of Practice for Archaeological Investigations of Aboriginal Objects in NSW (OEH, 2010)*
-) incorporates consultation with Aboriginal people in accordance with Aboriginal Cultural Heritage Consultation Requirements for Proponents (Department of Environment, Climate Change and Water, 2010)*
-) documents the significance of cultural heritage values of Aboriginal people who have a cultural association with the land*
-) identifies, assesses and documents all impacts on the Aboriginal cultural heritage values*
-) demonstrates attempts to avoid any impact upon cultural heritage values and identify any conservation outcomes. Where impacts are unavoidable, the ACHAR and EIS must outline measures proposed to mitigate impacts. Any objects recorded as part of the assessment must be documented and notified to the Environment, Energy and Science Group of the Department of Planning, Industry and Environment.*

Any Aboriginal objects recorded as part of the Aboriginal Cultural Heritage Assessment must be documented and notified to the Aboriginal Heritage Information Management System (AHIMS) within Heritage NSW of the Department of Premier and Cabinet.

Health Infrastructure NSW have engaged Artefact Heritage to prepare an Aboriginal Cultural Heritage Assessment Report (ACHAR) for inclusion in the EIS.

Overview of findings

-)] No previously unrecorded Aboriginal sites were identified within the study area
-)] All sections of the study area have been subjected to high levels of ground disturbance
-)] All sections of the study area were found to have a low archaeological potential
-)] No direct impacts from the project on Aboriginal cultural heritage have been identified.

Recommendations

-)] No further archaeological investigation is required
-)] An unexpected finds policy should be developed and implemented, with the following conditions:
 - Stop work within the affected area, protect the potential archaeological find, and inform environment staff or supervisor
 - Contact a suitably qualified archaeologist to assess the potential archaeological find
 - If Aboriginal archaeological material is identified, works in the affected area should cease, and the South Metropolitan Heritage NSW, Department of Premier and Cabinet (DPC) should be informed. Further archaeological mitigation may be required prior to works recommencing
 - If Aboriginal objects are located as unexpected finds in other parts of the project site during construction, they will be recorded and registered on the Aboriginal Heritage Information Management Systems (AHIMS) database
 - If any human remains are discovered and/or harmed in, on or under the land, the following actions must be taken:
 - The remains must not be harmed/ further harmed
 - immediately cease all work at the particular location
 - notify site manager and project archaeologist
 - notify NSW Police
 - notify South Metropolitan Heritage NSW, DPC's Environment Line on 131 555 as soon as practicable and provide available details of the remains and their location
 - not recommence any work at the location until cleared.

1.0 INTRODUCTION

1.1 Background

In July 2020, Health Infrastructure NSW (the proponent) engaged Artefact Heritage Services Pty Ltd (Artefact Heritage) to prepare an Aboriginal Archaeological Survey Report (ASR) for The Sutherland Hospital Operating Theatre Upgrade Project (TSHOTUP). The ASR found that the study area is unlikely to contain Aboriginal objects and that no further archaeological investigations would be required.

Health Infrastructure NSW lodged an application with the Minister of Planning for TSHOTUP to be considered a State Significant Development (SSD), this was granted on 10 December 2020 (SSD-11099584) and will prepare an Environmental Impact Statement (EIS) for the project in accordance with the Secretary's Environment Assessment Requirements (SEARs). SEARs, SSD-11099584 were issued for the project on 10 December 2020 and include the following requirements for the assessment of Aboriginal heritage:

-)] Completion of an Aboriginal Cultural Heritage Assessment Report (ACHAR) in accordance with the Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (Office of Environment and Heritage [OEH] 2011)
-)] Comprehensive stakeholder consultation in accordance with the Aboriginal Cultural Heritage Consultation Requirements for Proponents (Department of Environment Climate Change and Water [DECCW] 2010a)

Health Infrastructure NSW have engaged Artefact Heritage to prepare an Aboriginal Cultural Heritage Assessment Report (ACHAR) for inclusion in the EIS.

1.2 Study area

The study area covers approximately 11.9 ha and is identified as the Sutherland Hospital (Lot 1, DP 119519, Lot DP 398975 and Lot 1, DP 432283) (Figure 1). The study area is within the Parish of Sutherland and County of Cumberland. The study area falls within the Sutherland Shire Local Government Area (LGA) and the boundaries of La Perouse Local Aboriginal Land Council (LALC).

1.3 Proposal

Health Infrastructure propose to increase the capacity of Sutherland Hospital from five to eight operating theatres and from one to two endoscopy suites, as well as recovery and other perioperative supporting spaces. The project will be constructed utilising a combination of newly constructed and refurbished areas. The project is not expected to have significant subsurface impact.

1.4 Objectives of this assessment

The objectives of this report are to:

-)] Assess the Aboriginal cultural heritage values of the study area, including archaeological and community cultural values, and the significance of identified values

-)] Identify Aboriginal cultural heritage values that may be impacted by the proposed works, including consideration of cumulative impacts, and measures to avoid significant impacts
-)] Ensure appropriate Aboriginal community consultation in the assessment process
-)] Identify any recommended further investigations, mitigation and management measures required, should the project proceed.

This report includes:

-)] A description of the scope of the project and the extent of the study area.
-)] A description of the Aboriginal community involvement and Aboriginal consultation
-)] A significance assessment of the study area including cultural and archaeological values
-)] A description of the statutory requirements for the protection of Aboriginal heritage
-)] An impact assessment for recorded Aboriginal sites and areas of archaeological potential
-)] Provision of measures to avoid, minimise, and if necessary, offset the predicted impacts on Aboriginal heritage values.

This ACHAR has been prepared in accordance with the following requirements and guidelines:

-)] Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales (Code of Practice) (DECCW 2010a)
-)] The Burra Charter (Australia ICOMOS 2013)
-)] Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)
-)] Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010(DECCW 2010b) (consultation requirements).

1.5 Limitations

This ACHAR is based on the findings of ASR (Artefact Heritage 2020) and the Aboriginal consultation process undertaken by Artefact Heritage (Section 3.0, Appendix 2 and 3) for the proposed works.

1.6 Authorship and acknowledgements

The report was prepared by Gareth Holes (Heritage Consultant, Artefact Heritage) and Ryan Taddeucci (Senior Heritage Consultant, Artefact Heritage) with management input and review by Sandra Wallace (Managing Director, Artefact Heritage).

1.7 Report structure

The purpose of this report is to document the results of an investigation of Aboriginal heritage at the study area. As such, the structure of this report includes:

-)] Section 1 – Introduction
-)] Section 2 – Legislative Context: outlines relevant legislation for this assessment

-) Section 3 – Consultation: provides information on the Aboriginal consultation process and results
-) Section 4 – Environmental Context: provides an overview of the environmental conditions to provide context for the predictive model
-) Section 5 – Archaeological Context: presents the results of the background research and database searches used to develop a predictive model
-) Section 6 – Archaeological Survey: presents the methodology and results of previous Aboriginal archaeological surveys completed within the study area
-) Section 7 – Aboriginal Cultural Heritage Assessment: outlines the methodology for conducting an Aboriginal cultural heritage assessment and heritage values identified through background research and stakeholder consultation
-) Section 8 – Significance Assessment: an assessment of the cultural, historic, scientific and aesthetic significance of the study area
-) Section 9 – Impact Assessment: discussion of how the proposed works will impact the identified Aboriginal site and how to mitigate against the loss of heritage value
-) Section 10 – Management and Mitigation Measures: Outlines the proposed method of mitigating against loss of cultural value
-) Section 11 – Recommendations: summary of recommendations for further investigations and mitigation against loss of heritage values
-) Section 12 – References.

Figure 1: Location of the study area

2.0 LEGISLATIVE CONTEXT

2.1 State legislation

2.1.1 *National Parks and Wildlife Act 1974*

The *National Parks and Wildlife Act 1974* (NPW Act), administered by South Metropolitan Heritage NSW, Department of Premier and Cabinet (DPC) provides statutory protection for all Aboriginal 'objects' (consisting of any material evidence of the Aboriginal occupation of NSW), and for 'Aboriginal Places' (areas of cultural significance to the Aboriginal community).

The protection provided to Aboriginal objects applies irrespective of the level of their significance or issues of land tenure. However, areas are only gazetted as Aboriginal places if the Minister is satisfied that sufficient evidence exists to demonstrate that the location was and/or is of special significance to Aboriginal culture.

There are no gazetted Aboriginal places in the study area. All Aboriginal objects, whether recorded or not are protected under the NPW Act.

Section 86 of the NPW Act identifies that it is an offence to harm or desecrate an Aboriginal object and/or an Aboriginal place. Section 86 outlines penalty units applicable where it is identified that a person or corporation is in breach of Section 86.

The NPW Act defines harm to an object or place as any act or omission that:

-
- a) *destroys, defaces or damages the object or place, or*
 - b) *in relation to an object moves the object from the land on which it had been situated, or*
 - c) *is specified by the regulations, or*
 - d) *causes or permits the object or place to be harmed in a manner referred to in paragraph (a), (b) or (c)*
-

A section 90 permit is the only Aboriginal Heritage Impact Permit (AHIP) available under the NPW Act is granted by South Metropolitan Heritage NSW, DPC. Various factors are considered by South Metropolitan Heritage NSW, DPC in the AHIP application process, such as site significance, Aboriginal consultation requirements, Ecological Sustainable Development (ESD) principles, project justification and consideration of alternatives. The penalties and fines for damaging or defacing an Aboriginal object were increased in 2010.

As this project is being assessed under Part 4 Division 4.1 of the *Environmental Planning and Assessment Act 1979* (EP&A Act) permits issued under the NPW Act are not required for impacts approved by South Metropolitan Heritage NSW, DPC under the SSD. Impacts to Aboriginal objects will be authorised by the Conditions of Approval for the project issued by South Metropolitan Heritage NSW, DPC under the EP&A Act.

2.1.2 *Environmental Planning and Assessment Act 1979*

The EP&A Act establishes the framework for cultural heritage values to be formally assessed in the land use planning, development assessment and environmental impact assessment

processes. The EP&A Act consists of three main parts of direct relevance to Aboriginal cultural heritage; Part 3 which governs the preparation of planning instruments, Part 4 which relates to development assessment processes for local government (consent) authorities, and Part 5 which relates to activity approvals by governing (determining) authorities.

Part 3, Division 3.4 deals with the development of Local Environmental Plans (LEPs). Planning decisions within LGAs are guided by LEPs. Each LGA is required to develop and maintain an LEP that includes Aboriginal and historical heritage items which are protected under the EP&A Act and the *Heritage Act 1977*. The study area is located within the boundaries of the Sutherland Shire Council LGA and is covered by the Sutherland Shire LEP. No Aboriginal heritage items listed on the Sutherland Shire LEP are located within the study area.

The proposal will be assessed under Part 4, Division 4.1 of the EP&A Act, which establishes an assessment and approval regime for SSD. Part 4, Division 4.1 applies to development that is declared to be SSD by a State Environmental Planning Policy (SEPP). Section 4.41 (previously section 89J(c)) of the EP&A Act specifies that approvals or permits under section 90 of the NPW Act 1974 are not required for approved SSD.

Health Infrastructure NSW lodged an application with the Minister of Planning for TSHOTUP to be considered a SSD, this was granted on 10 December 2020 (SSD-11099584). Health Infrastructure NSW will prepare an EIS for the project in accordance with the SEARs. The requirements for the assessment of Aboriginal heritage included in the SEARs are presented in Table 1.

Table 1: Secretary's Environmental Assessment Requirements

Item	Secretary's Environmental Assessment Requirements	Where addressed in this report
9	Provide an Aboriginal Cultural Heritage Assessment Report (ACHAR) that:	This report
9.a	Identifies and describes the Aboriginal cultural heritage values that exist across the site	Section 5.0 of this report
9.b	Includes surface surveys and test excavations where necessary	Section 6.0 of this report
9.c	Has been prepared in accordance with the Guide to investigating, assessing and reporting on Aboriginal Cultural Heritage in NSW (OEH, 2011) and Code of Practice for Archaeological Investigations of Aboriginal Objects in NSW (OEH, 2010)	Throughout this report
9.d	Incorporates consultation with Aboriginal people in accordance with Aboriginal Cultural Heritage Consultation Requirements for Proponents (Department of Environment, Climate Change and Water, 2010)	Section 3.0 of this report
9.e	Documents the significance of cultural heritage values of Aboriginal people who have a cultural association with the land	Section 3.0 of this report

Item	Secretary's Environmental Assessment Requirements	Where addressed in this report
9.f	Identifies, assesses and documents all impacts on the Aboriginal cultural heritage values	Section 8.0 and Section 9.0 of this report
9.g	Demonstrates attempts to avoid any impact upon cultural heritage values and identify any conservation outcomes. Where impacts are unavoidable, the ACHAR and EIS must outline measures proposed to mitigate impacts. Any objects recorded as part of the assessment must be documented and notified to the relevant team within Heritage NSW – Aboriginal Cultural Heritage.	Section 10.0 of this report
10	Any Aboriginal objects recorded as part of the Aboriginal Cultural Heritage Assessment must be documented and notified to the Aboriginal Heritage Information Management System (AHIMS) within Heritage NSW of the Department of Premier and Cabinet.	No Aboriginal objects were recorded as part of the ACHAR.

2.1.3 Aboriginal Lands Right Act 1983

The *Aboriginal Land Rights Act 1983* (ALR Act) established Aboriginal Land Councils (at State and Local levels). These bodies have a statutory obligation under the ALR Act to:

(a) take action to protect the culture and heritage of Aboriginal persons in the council's area, subject to any other law, and

(b) promote awareness in the community of the culture and heritage of Aboriginal persons in the council's area.

The study area is within the boundary of the La Pouse LALC.

2.2 Commonwealth legislation

2.2.1 Native Title Act 1994

The main purpose of the *Native Title Act 1993* is to recognise and protect native title. Native title is the rights and interests in land and waters that Aboriginal and Torres Strait Islanders have under their traditional laws and customs.

The following list is indicative of the type of land, which might be subject to native title:

-)] Vacant Crown land and any other public or Crown lands including oceans and inland waterways, beaches and foreshores, State forests, national parks and public reserves
-)] Pastoral leases
-)] Land held by government agencies
-)] Land held in trust for Aboriginal communities.

Under the amended *Native Title Act 1993*, Native Title is extinguished by the following:

-)] Private freehold land, valid grants of private freehold land or waters
-)] Residential, commercial or exclusive possession leases
-)] Mining dissection leases
-)] Community purpose leases (e.g. religious, sporting or charitable purposes)
-)] Scheduled interests that give exclusive possession
-)] Public works (e.g. schools, public amenities, hospitals etc.).

Section 24KA of the *Native Title Act 1993*, requires that native title claimants are notified of any 'future act' which may result in a change in land use for Crown lands affected by claims. 'Future act' is defined in section 233 of the Act as a proposed activity or development on land and/or waters that may affect native title, by extinguishing (removing) it or creating interests that are inconsistent with the existence or exercise of native title. If after one month there was no response, then the proponent will be deemed to have fulfilled their obligations under the Act.

A search of the National Native Title Tribunal database was completed on 31 July 2020. There are no Native Title claims currently registered in the study area.

2.2.2 Environment Protection and Biodiversity Conservation Act 1999

The *Environment and Heritage Legislation Amendment Act (No.1) 2003* amends the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) to include 'national heritage' as a matter of National Environmental Significance and protects listed places to the fullest extent under the Constitution. It also establishes the National Heritage List (NHL) and the Commonwealth Heritage List (CHL).

The *Australian Heritage Council Act 2003* (AHC Act) establishes a new heritage advisory body - the Australian Heritage Council (AHC), to the Minister for the Environment and Heritage and retains the Register of the National Estate (RNE).

The *Australian Heritage Council (Consequential and Transitional Provisions) Act 2003* repeals the *Australian Heritage Commission Act 1975*, amends various Acts as a consequence of this repeal and allows the transition to the current heritage system.

Together the above three Acts provide protection for Australia's natural, Indigenous and non-Indigenous heritage. The new features include:

-)] A new NHL of places of national heritage significance
-)] A new CHL of heritage places owned or managed by the Commonwealth
-)] The creation of the AHC, an independent expert body to advise the Minister on the listing and protection of heritage places
-)] Continued management of the RNE.

A summary of register searches is outlined below:

-)] No items listed on the NHL are located within the study area
-)] No items listed on the CHL are located within the study area
-)] No items listed on the RNE are located within the study area.

2.2.3 *Aboriginal and Torres Strait Islander Heritage Protection Act 1984*

The Commonwealth *Aboriginal and Torres Strait Islander Heritage Protection Act 1984* (ATSIHP Act) deals with Aboriginal cultural property (intangible heritage) in a wider sense. Such intangible heritage includes any places, objects and folklore that 'are of particular significance to Aboriginals in accordance with Aboriginal tradition'. These values are not currently protected under the NPW Act.

There is no cut-off date and the ATSIHP Act may apply to contemporary Aboriginal cultural property as well as ancient sites. The ATSIHP Act takes precedence over state cultural heritage legislation where there is conflict. The Commonwealth Minister who is responsible for administering the ATSIHP Act can make declarations to protect these areas and objects from specific threats of injury or desecration. The responsible Minister may make a declaration under Section 10 of the ATSHIP Act in situations where state or territory laws do not provide adequate protection of intangible heritage.

Where an Aboriginal individual or organisation is concerned that intangible values within the proposal are not being adequately protected, they can apply to the Minister for a declaration over a place.

No intangible places were identified during this assessment.

3.0 CONSULTATION

Aboriginal community consultation is being undertaken in accordance with the Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010 (DECCW 2010b).

3.1 Registration of Aboriginal parties

In accordance with Stage 4.1.2 of the Consultation Requirements, correspondence was sent on 6 August 2020 to the following organisations requesting details of Aboriginal people who may hold cultural knowledge relevant to determining the Aboriginal significance of Aboriginal objects and/or places within the Sutherland Shire Council LGA:

-)] Sutherland Shire Council
-)] National Native Title Service Provider for Aboriginal Traditional Owners in New South Wales and the Australian Capital Territory (NTSCorp)
-)] South Metropolitan Heritage NSW, DPC
-)] Greater Sydney Local Land Services
-)] La Perouse LALC
-)] National Native Title Tribunal
-)] The Registrar, ALR Act

In accordance with Stage 4.1.3 of the Consultation Requirements, an advertisement was placed in the Sutherland Shire Leader on 2 September 2020. The advertisement invited all Aboriginal persons and organisations who hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the study area to register their interest by 16 September 2020.

In accordance with Stage 4.1.3 of the Consultation Requirements, letters and/or emails were sent on 26 August 2020 to all Aboriginal persons and organisations identified through responses from the agencies contacted during Step 4.1.2. The letters provided details on the location and nature of the proposal, an invitation to register as an Aboriginal stakeholder, and notice that their details would be provided to South Metropolitan Heritage NSW DPC and the La Perouse LALC.

Those Aboriginal stakeholders listed in Table 2 registered an interest in the project.

Table 2: List of registered stakeholders

Group	Name
Didge Ngunawal Clan	Lillie Carroll & Paul Boyd
Thoorga Nura	John Carriage (Chief Executive Officer)
Kamilaroi Yankuntjatjara Working Group	Phil Khan

Group	Name
Yulay Cultural Services	Arika Jalomaki (Manager)
Barking Owl Aboriginal Corporation	Mrs Jody Kulakowski (Director)
Wailwan Aboriginal Group	Philip Boney
A1 Indigenous Services	Carolyn Hickey
Butucarbin Aboriginal Corporation	Lowanna Gibson

In accordance with Step 4.1.6 of the Consultation Requirements, a list of the Registered Aboriginal Parties (RAPs), a copy of the newspaper advertisement, and a copy of the invitation to register an interest was forwarded to both the South Metropolitan Heritage NSW, DPC Regional Operations Group and the La Pouse LALC on 16 October 2020.

3.2 Project updates

On 7 September 2020, correspondence was sent to all agencies contacted during Step 4.1.2 and all potential stakeholders identified through Step 4.1.2 consultation, to advise that the provided contact details for the proponent were incorrect. The correspondence included the correct name and contact details of the proponent.

3.3 ACHAR methodology

A copy of the proposed ACHAR methodology was distributed to RAPs on 15 September 2020, with a 28-day period for review and comment. The document included project details, and a summary of proposed ACHAR assessment methodology. At the end of the review period three RAPs have provided comment, see Table 3 for a summary of the RAP comments and responses.

Table 3: Summary of RAP comments on ACHAR methodology

Organisation	Comments	Response
Arika Jalomaki (Yulay Cultural Services)	Agrees with the proposed ACHAR methodology	Noted
Carolyn Hickey (A1 Indigenous Services)	Supports the ACHAR methodology.	Noted
Kadibulla Khan (Kamilaroi Yankuntjatjara Working Group)	The study area is highly significant to Aboriginal People and should be investigated further in the way of test excavations	The results of the ASR have found that the study area is unlikely to contain Aboriginal objects. Test

Organisation	Comments	Response
		excavations are unlikely to result in the retrieval of any Aboriginal objects.

3.4 Site survey

Steven Ella (Cultural Heritage Officer, La Perouse LALC) attended the survey. No particular areas of cultural significance were identified during the survey.

3.5 Review of draft ACHAR

A copy of the draft ACHAR was distributed to the RAPs on 7 January 2021.

Kadibulla Khan of the Kamilaroi Yankuntjatjara Working Group, agreed with the recommendations, but would like to see the addition of monitoring. They believe there is potential for finds and intact soils to be present beneath the buildings.

No other comments were forthcoming from other RAPs.

Table 4: Summary of RAP comments on Draft ACHAR

Organisation	Comments	Response
Kadibulla Khan (Kamilaroi Yankuntjatjara Working Group)	Agrees with recommendations, would like to see monitoring of groundworks.	The ASR determined that the study area has been subject to high levels of ground disturbance, as such it has been determined that the survival of Aboriginal material or intact natural soils is unlikely, therefore monitoring is not recommended.

4.0 ENVIRONMENTAL CONTEXT

The environmental context of the study area is to assist in the prediction of:

-)] The potential of the landscape over time to have accumulated and preserved Aboriginal objects
-)] The ways Aboriginal people have used the landscape in the past with reference to the presence of resource areas, surfaces for art, other focal points for activities and settlement
-)] The likely distribution of the material traces of Aboriginal land use based on the above.

4.1 Soils and geology

Soils across the study area consist of the GyMEA and Blacktown soil landscape (OEH 2014). The GyMEA soils are shallow to moderately deep (0.3-1 m) yellow earths and earthy sands on crests, siliceous sands on benches, and leached sands along drainage lines. The Blacktown soils are shallow to moderately deep (>1 m) hard-setting mottled texture contrast soils, red and brown podzolic soils on crests grading to yellow podzolic soils on lower slopes and in drainage lines.

The geology underlying the hospital precinct consists of the Hawkesbury Sandstone and Shale laminate formation. Hawkesbury Sandstone underlies the southern half of Sutherland Hospital and is characterised by medium to coarse-grained quartz sandstone, very minor shale and laminate lenses. The Shale laminate deposit underlies the northern half of Sutherland hospital and is characterised by claystone, siltstone, and laminite (shale lenses) (Rose 1966).

The local topography consists of undulating to rolling rises and low hills on Hawkesbury Sandstone. Local relief 20-80 m, slopes 10-25%. Broad convex crests, moderately inclined side slopes with wide benches, localised rock outcrops on low broken scarps. The sandstone foreshores along the Hacking and Georges rivers have weathered into overhangs that allowed for Aboriginal inhabitants of the region to take shelter from the elements and carry out various activities including but limited to sleeping, eating, camping and sometimes burial. These rocky foreshores are often fringed by mud and sand flats.

4.2 Hydrology

The study area is situated on a broad high crest that slopes south toward Yowie Bay and into the Hacking River catchment and gently to the north toward the Georges River catchment.

The Hacking River has cut a course through foreshores of Triassic Hawkesbury sandstone formations which rise to steep escarpments around the multiple headlands along its course. The meandering tributaries leading to the river from the west converge south of the suburb of Grays Point and then snake westwards as the Hacking River. The heads of the Hacking River are found between Cronulla to the north and Bundeena to the south.

The Georges River rises on the western slopes of the Illawarra range south of Appin and meanders for 96 km to Botany Bay where the river mouth is adjacent to Dolls Point (Lawrence et al. 1999). Tributaries that converge into the Georges River and the wider catchment include but are not limited to: Prospect Creek, Williams Creek, Yeramba Lagoon, Salt Pan Creek, Little Salt Pan Creek, Woronora River, Forbes Creek and Boggywell Creek (Mary Dallas Consulting Archaeologists 2004).

4.3 Vegetation

The vegetation within the study area would have originally comprised a combination of Sydney Coastal Dry Sclerophyll Forest and Sydney Coastal Heaths.(Keith et al. 2006). The Sydney Dry Sclerophyll Forest grows on sandstone landscapes in areas below 700 m elevation, where average rainfall varies from 1 – 1.3 m (Keith et al. 2006). This vegetation type encompasses a wide range of related forest and woodland communities. The eucalypt canopy includes Sydney red gum, red bloodwood and Sydney peppermint, brown stringybark, broadleaved scribbly gum and old man banksia.(Keith et al. 2006). The prominent and diverse sclerophyll shrub understory is shorter and more open on ridges than in gullies, while the open ground layer is dominated by sclerophyll sedges.

The region surrounding the study area would have provided an abundance of native animals. Mammals such as kangaroos and wallabies and arboreal mammals such as possums can be used as a food source and for tool making. For example, tail sinews are known to have been used as a fastening cord, whilst 'bone points' which would have functioned as awls or piercers are an abundant part of the archaeological record (Attenbrow 2010). Ethnographic observations of early European settlers noted that Aboriginal people used a variety of animal parts, such as claws, talons, bone, skin, teeth, shell, fur and feathers for a variety of tools and non-utilitarian functions. The nearby coastline would have provided an abundance of marine resources, including eels, fish, shellfish and birds. In summary, the study area would have provided a variety of resource and suitable climatic conditions for year round occupation by traditional Aboriginal groups inhabiting the area.

Aboriginal communities living within the Sutherland Shire would have had access to an abundance of food resources. Central to their diets would have been the resources gathered from the estuarine and freshwater Georges and Hacking Rivers along with their associated tributaries. Archaeological deposits from middens in the area have shown that species consumed by local Aboriginal groups were snapper and bream, along with to a lesser extent, flathead, whiting, groper, mullet, wrasse, and leatherjacket.(Turbet 1788 and Attenbrow 2010). Midden excavations near the Georges River reveal that a variety of shellfish and crustacean were procured and utilised by local Aboriginal groups, these included rock oysters, mud oysters, cockles, mussels, spiny oysters, winks, chamas and horned shells, abalone, limpets, Hercules whelks, periwinkles, nerites and pippies.

The diets of Aboriginal communities in this region would not have been limited to sea or river foods, as animal bones recorded in middens in the Royal National Park and at Mill Creek include food species such as bandicoot, possum, wallaby, potoroo, water rat, snake, skink and lizard (Turbet 1788). Smaller animals, insects, seeds, berries and fruits were collected to supplement the protein rich meats and would have enabled a varied diet to be maintained (Mary Dallas Consulting Archaeologists 2004).

4.4 Historical land use history

After the British colony at Sydney Cove was established in 1788, the headlands around Botany Bay were slow to be settled by Europeans. The territory that was to become the modern day Sutherland Shire was separated from the Sydney and St George District by the Georges River and Botany Bay. This physical barrier combined with tense relations between the Aboriginal peoples of the region and Europeans, significantly hindered the expansion of European activity south of the Georges River.(Larkin 1998).

By 1856 land within the Sutherland Shire was released for sale by the Crown. John Connell Junior purchased several large parcels of property in the Caringbah/Burraneer Bay areas. His

nephew John Connell Laycock did the same. By 1860 Thomas Holt's era in the Sutherland Shire began, following the bankruptcy of John Connell Laycock. Thomas Holt's vast estate began to be subdivided around 1900 and these smaller parcels were commonly used to grow fruit or raise poultry. Prior to the First World War Caringbah had been known as Highfield. The establishment of the 'Caringbah' Post Office in 1912 and the continual use of that name by the residents effectively displaced that of Highfield to become the suburb's name.(Hutton Neve 2000).

From the 1940s a campaign was made for the development of the Sutherland District Hospital. By 1955 the foundation stone for the Sutherland Hospital was laid and construction was completed on 2 April 1958. Numerous additions were made to the original four storey bow-tie hospital design throughout the following decades. By the early 2000s the building had become stretched beyond its means and the necessity of new hospital facilities saw the construction of the contemporary hospital on land behind original building. Shortly after the completion of the new hospital in 2004 the original structure (within the study area) was demolished.

5.0 ARCHAEOLOGICAL CONTEXT

5.1 Aboriginal histories of the Locality

Prior to the appropriation of their land by Europeans, Aboriginal people lived in small family or clan groups that were associated with territories or places. It seems that territorial boundaries were fluid, although details are not known. There is debate about the nature, territory, and range of pre-contact language groups of the Sydney region due to the serious impacts European settlement had on Aboriginal culture. More recent research indicates that Aboriginal people in the current Sydney seaboard identified as part of a large coastal population with frequent exchange and travel often over large distances (Irish 2017 and Curby 2020).

Aboriginal people who inhabited the territory that would later become the Sutherland Shire belonged to two main language groups, Dharawal and Gandangarra. The Dharawal language group appears to have once extended from Kurnell to Nowra in the south, and west to Camden (Mary Dallas Consulting Archaeologists 2004). The southern area of the Cumberland Plain, west of the Georges River, and to the southern Blue Mountains is believed to have been the territory in which the Gandangarra language was spoken. The language groups that abutted these territories were the Darug to the north and the Yuin to the south.

5.2 Aboriginal material culture

The existing archaeological record is limited to certain materials and objects that were able to withstand degradation and decay. As a result, the most common type of Aboriginal objects remaining in the archaeological record are stone artefacts. Archaeological analyses of these artefacts in their contexts have provided the basis for the interpretation of change in material culture over time. Technologies used for making tools changed, along with preference of raw material. Different types of tools appeared at certain times, for example ground stone hatchets are first observed in the archaeological record around 4,000 years before present (BP) in the Sydney region (Attenbrow 2010). It has been argued that these changes in material culture were an indication of changes in social organisation and behaviour.

The Eastern Regional Sequence was first developed by McCarthy in 1948 to explain the typological differences he was seeing in stone tool technology in different stratigraphic levels during excavations such as Lapstone Creek near the foot of the Blue Mountains (McCarthy 1948). The sequence had three phases that corresponded to different technologies and tool types (the Capertian, Bondaian and Eloueran). The categories have been refined through the interpretation of further excavation data and radiocarbon dates (Hiscock and Attenbrow 2005). It is now thought that prior to 8,500 BP tool technology remained fairly static with a preference for silicified tuff, quartz and some unheated silcrete. Bipolar flaking was rare with unifacial flaking predominant. No backed artefacts have been found of this antiquity. After 8,500 BP silcrete was more dominant as a raw material, and bifacial flaking became the most common technique for tool manufacture. From about 4,000 BP to 1,000 BP backed artefacts appear more frequently. Tool manufacture techniques become more complex and bipolar flaking increases. It has been argued that from 1,400 to 1,000 years before contact there is evidence of a decline in tool manufacture. This reduction may be the result of decreased tool making, an increase in the use of organic materials, changes in the way tools were made, or changes in what types of tools were preferred (Attenbrow 2010). The reduction in evidence coincides with the reduction in frequency of backed blades as a percentage of the assemblage.

Historical sources record that a wide range of other materials were utilised by Aboriginal people, shell was used for skinning animals (Miller 1886) and fish hooks, bark for canoes and string and

nets, as well as a variety of woods for spear shafts, shields clubs and digging sticks, among many others (Brayshaw 1987).

5.3 Aboriginal Heritage Information Management System

The locations and details of Aboriginal sites are considered culturally sensitive information. It is recommended that this information, including the AHIMS data and GIS imagery, is removed from this report if it is to enter the public domain.

An extensive search of the Aboriginal Heritage Information Management System (AHIMS) database was undertaken on 22 June 2020 (Client ID: 514296).

An area of approximately 4 kilometres (km) (east-west) by 4 km (north-south) was included in the search. The AHIMS search provides archaeological context for the area and identifies whether any previously recorded Aboriginal sites are located within or near the study area. The parameters of the search were as follows:

GDA 1994 MGA 56	323849mE – 327873mE 6230108mN – 6234147mN
Buffer	50 m
Number of sites	21
AHIMS Search ID	514296

A total of 21 sites were identified in the extensive AHIMS search area. The distribution of recorded sites within the AHIMS search area is shown in Figure 2. DPC lists 20 standard site features that can be used to describe a site registered with AHIMS, and more than one feature can be used for each site. The frequency of recorded site types is summarised in Table 5. For the 21 sites within the search area, 11 site features were recorded. The majority of recorded sites were either Shell (n=4, 19.05%) or Shell and Artefact (n=4, 19.05%).

Table 5: Frequency of site types from AHIMS data (AHIMS Search ID 514296)

Site type	Frequency	Percentage (%)
Art (Pigment or Engraved), Habitation Structure	1	4.76
Art (Pigment or Engraved), Shell	1	4.76
Artefact	3	14.29
Grinding Groove	1	4.76
Habitation Structure, Hearth, Shell	1	4.76
Habitation Structure, Shell	1	4.76
Potential Archaeological Deposit (PAD)	3	14.29
PAD, Shell	1	4.76

Site type	Frequency	Percentage (%)
Shell	4	19.05
Shell, Artefact	4	19.05
Shell, Artefact, Burial	1	4.76
Total	21	100.00

The nature and location of the registered sites is a reflection of the past Aboriginal occupation from which they derive, but is also influenced by historical land-use, and the nature and extent of previous archaeological investigations. Although Aboriginal occupation covered the whole of the landscape, the availability of fresh water, and associated resources, was a significant factor in repeated and long-term occupation of specific areas within the landscape. Certain site types, such as culturally modified trees, are particularly vulnerable to destruction through historical occupation, while others, such as stone artefacts, are more resilient.

There is a particularly high density of sites around Gynea Bay, 2 km southwest of the study area, with nine sites located around the fringe of the small bay and three further sites located along Alcheringa Creek which drains into the bay from the north.

The four closest registered sites to the study area are located approximately 1 km from the study area, along the sandstone shoreline of Yowie Bay. There is a cluster of three sites recorded by Mary Dallas that are identified as PADs. These three are located on Matson Crescent on the northern shoreline of the western fork of Yowie Bay. The other site recorded as a Shell and Artefact is located within Kareena Park on the western shore of Yowie Bay (Figure 3).

The overall spatial patterning of sites indicate that most sites are situated outside of the developed areas; located within surrounding bushland and relatively under-developed local reserves with particular focus towards waterways and coastlines.

Figure 2: Extensive AHIMS search results

Figure 3: AHIMS sites within the vicinity of the study area

5.4 Previous archaeological assessments

5.4.1 Previous archaeological assessments

Mary Dallas Consulting Archaeologists (2002) – Sutherland Shire Council Aboriginal Cultural Heritage Study.

Mary Dallas Consulting Archaeologists (2002) conducted a cultural heritage study of the Sutherland Shire Council LGA focusing on the Port Hacking Catchment (excluding Royal National Park but including Maianbar and Bundeena) and the Kurnell Peninsula to inform future planning and development control processes. The study provides a historical outline for the area, a current state of knowledge about Aboriginal archaeological sites in the district in order to produce Archaeological Sensitivity Maps for the Kurnell Peninsula and Port Hacking.

Mary Dallas Consulting Archaeologists (2004) – Sutherland Shire Council Aboriginal Cultural Heritage Study: Georges and Woranora Rivers.

Mary Dallas Consulting Archaeologists (2004) was engaged by Sutherland Shire Council to inform future land planning and development control processes and to ensure ongoing protection and management of Aboriginal places. Focus of this study is on the western portion of the Sutherland Shire and aims to compliment the previous 2002 study (above) which covered the eastern portion within the Port Hacking catchment.

5.5 Sutherland Shire Council Archaeological Potential

Sutherland Shire Council has generated online mapping of Aboriginal archaeological sensitivity, which identified where Aboriginal sites are more likely to be present. ('Shire Maps' 2009) The areas have been divided into four categories:

-)] **High Archaeological sensitivity (brown)** areas are generally along the foreshore and rivers/creeks. These are the areas where there is the greatest probability of an Aboriginal object being identified.
-)] **Medium Archaeological sensitivity (yellow)** areas are areas where there is some probability of an Aboriginal object being identified.
-)] **Low Archaeological sensitivity (green)** areas are areas where this is a low probability of an Aboriginal object being identified.
-)] **Disturbed land (white)** is generally urbanized, industrialized areas which have been highly disturbed and there is no original land surface or subsurface.

The study area is situated in a small pocket of highly disturbed land (white) within a broader landscape of low archaeological potential (green) (Figure 4).

Figure 4: Archaeological sensitivity within study area in red. Source. Sutherland Shire Council

5.6 Likely archaeological sensitivity

The Due Diligence Code of Practice (DECCW 2010a) also outlines a range of landscape features that have higher potential to contain Aboriginal objects. It is necessary to also consider whether there are landscape features of undisturbed land that may contain Aboriginal objects.

These include land that is:

-)] within 200 m of water
-)] located within a sand dune system
-)] located on a ridge top, ridge line or headland
-)] located within 200 m below or above a cliff face; or
-)] within 20 m of a cave, rock shelter or cave mouth.

The current study area is situated on a broad high crest that would qualify as one of the potential landscape features identified within the Code of Practice.

5.7 Predictive model

Predictive models are important and provide assessments on the most likely areas of archaeological potential within a given subject site. These models also indicate the likely types of archaeological evidence, if present, with a given locations and / or subject site.

The predictive model comprises a series of statements about the nature and distribution of evidence of Aboriginal land use that is expected in the study area. These statements are based on the information gathered regarding:

-)] Landscape context and landform units
-)] Ethno historical evidence of Aboriginal land use

-)] Distribution of natural resources
-)] Results of previous archaeological work in the vicinity of the study area

Predictive statements are as follows:

-)] Low density artefact scatters, isolated finds will be the most likely Aboriginal site type
-)] Aboriginal sites will be located in areas of least ground disturbance

The potential for Aboriginal sites is reduced by the high levels of ground surface disturbance across the study area.

Rock shelters and grinding features are unlikely to be present, as the study area has been previously impacted. Shell deposits are unlikely to be located within the study area, as it is elevated land that is a significant distance from the nearest waterline. Scarred trees are unlikely to be present as almost all original vegetation has been cleared from the study area. Areas of PAD would not be identified across steep slopes and areas that had been previously disturbed.

6.0 ARCHAEOLOGICAL SURVEY

6.1 Aims

The study area is located within a developed, urban environment. Therefore, this survey did not aim to identify or determine the extent of any areas of PAD. The aims of the archaeological survey were to:

-)] Cover the entire study area and to include all areas that will potentially be impacted by the proposed works
-)] Record the landform, general soil information, surface conditions and vegetation conditions encountered during the survey and how these impact on the visibility of objects
-)] Record any Aboriginal objects observed during the survey
-)] Identify areas of disturbance which may have impacted the presence of intact soils and archaeological features
-)] Collect information to ascertain whether further archaeological investigations are required

6.2 Timing and personnel

An archaeological survey was undertaken on 6 July 2020. The survey was supervised by Ryan Taddeucci (Senior Heritage Consultant, Artefact Heritage) with Sophie Barbera (Heritage Consultant, Artefact Heritage), Steph Rossi (Assistant Project Manager, CBRE Group) and Steven Ella (Cultural Heritage Officer, La Perouse LALC) also in attendance.

6.3 Methodology and coverage

A full coverage survey was completed within a single survey unit due to the nature of the disturbed and well defined impact area. The survey was completed on foot in accordance with the Code of Practice.

A handheld Global Positioning System (GPS) was used to track the path of the survey team and record the coordinates of survey transect. Detailed aerial maps marked with grid coordinates for the survey unit was carried by the survey team. The coordinate system projection used for all data recording was GDA94 MGA 56.

A photographic record was kept during the survey. Photographs were taken to record aspects of survey unit including disturbance and recorded Aboriginal sites. Scales were used for photographs where appropriate.

A summary of survey coverage, in accordance with the Code of Practice, is outlined in Table 6 and Table 7 below.

Table 6: Survey coverage summary

Survey unit	Landform	Survey unit area (sq. m)	Visibility (%)	Exposure (%)	Effective coverage Area (sq. m)	Effective coverage (%)
1	Modified slope	119,074	0	0	0	0

Table 7: Survey landform summary

Landform	Landform Area	Effective Survey Coverage (sq. m)	% of landform effectively surveyed	Number of sites	Number of artefacts/features
Modified slope	119,074	0	0	0	0

6.4 Survey results

The study area is covered entirely by the existing buildings, access road and car park. No ground exposures or remnant vegetation was identified during the survey. The study area is situated on a broad flat crest with the terrain sloping away gently to the north. Evidence of land modification in the form of ground levelling around Carpark 3 was noticed during site visit. Evidence of underground utilises was identified and it is likely that the study area has been subject to major earthworks. No Aboriginal objects or areas of unsealed ground surface were identified during the survey. It was considered that the study area has a low potential to contain Aboriginal objects or archaeological deposits.

7.0 ABORIGINAL CULTURAL HERITAGE ASSESSMENT

7.1 Methodology

The cultural assessment in this report includes information collected through desktop assessment, and consultation conducted throughout the ACHAR. This information was collected by Ryan Taddeucci (Senior Heritage Consultant, Artefact Heritage) and Gareth Holes (Heritage Consultant, Artefact Heritage).

7.2 Cultural landscape

The World Heritage Convention of United Nations Educational, Scientific and Cultural Organisation (UNESCO) defines a cultural landscape as one which has 'powerful religious, artistic or cultural associations of the natural element rather than material cultural evidence, which may be insignificant or even absent' (UNESCO 1991). The relationship between Aboriginal Australians and the land is conceived in spiritual terms rather than primarily in material terms (Andrews et al 2006). Aboriginal cultural knowledge has been defined as:

Accumulated knowledge which encompasses spiritual relationships, relationships with the natural environment and the sustainable use of natural resources, and relationships between people, which are reflected in language, narratives, social organisation, values, beliefs and cultural laws and custom (Andrews et al 2006).

Aboriginal cultural knowledge was traditionally bequeathed through oral traditions from generation to generation. Within all Aboriginal communities there was a time of dislocation and upheaval associated with the arrival of colonial settlers. This widespread disruption resulted in much of the detailed knowledge and understanding of many of the elements of the cultural landscape being lost from the Aboriginal community, nonetheless many Aboriginal people maintain a strong connection to the land of their ancestors and collectively possess a wealth of knowledge passed down through the generations.

7.3 Identified Aboriginal cultural heritage values

Table 8 summarises the cultural heritage values identified for the study area and surrounding region.

Table 8: Cultural heritage values identified for the study area and surrounds

Cultural heritage value	Description	Source
Biddy Giles	A Dharawal woman who lived on country for her entire life, Biddy Giles acted as a guide for travellers and shooting parties throughout the Sutherland area and became known for her skill in finding fish, controlling her hunting dogs and cooking meals using local produce.	Dictionary of Sydney
Holt- Sutherland Estate	A large estate covering much of what is now Sutherland Shire, Aboriginal people worked on the estate and nearby oyster beds.	Dictionary of Sydney

8.0 SIGNIFICANCE ASSESSMENT

No Aboriginal sites or areas of PAD have been identified throughout the pedestrian survey. A significance assessment of the scientific, social, historic and aesthetic values of the study area is included below.

8.1 Significance assessment criteria

An assessment of the cultural heritage significance of an item or place is required in order to form the basis of its management. The Guide (OEH 2011: 10) provides guidelines, in accordance with the Burra Charter (Australia ICOMOS 2013) for significance assessment with assessments being required to consider the following criteria:

- J Social values – does the area have a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons
- J Historic values – is the area important to the cultural or natural history of the local area and/or region and/or state
- J Scientific values - does the area have the potential to yield information that will contribute to an understanding of the cultural and natural history of the local area and/or region and/or state
- J Aesthetic values – is the area important in demonstrating aesthetic characteristics in the local and/or region and/or state.

Scientific values should be considered in light of the following criteria:

- J Research potential - does the evidence suggest any potential to contribute to an understanding of the area and/or region and/or state's natural and cultural history?
- J Representativeness - how much variability (outside and/or inside the subject area) exists, what is already conserved, how much connectivity is there?
- J Rarity - is the subject area important in demonstrating a distinctive way of life, custom, process, land-use, function or design no longer practised? Is it in danger of being lost or of exceptional interest?
- J Education potential - does the subject area contain teaching sites or sites that might have teaching potential?

It is important to note that heritage significance is a dynamic value.

8.2 Significance assessment

8.2.1 Social and cultural value

Social/cultural heritage significance should be addressed by the Aboriginal people who have a connection to, or interest in, the area. As part of the consultation process the registered Aboriginal stakeholder groups were asked to provide appropriate information on the cultural significance of the study area.

Kadibulla Khan, of the Kamilaroi Yankuntjatjara Working Group, highlighted the whole study area as being of significance to Aboriginal people. In addition they highlighted that, the heavily developed nature of the area means that this may be the last opportunity to uncover aboriginal culture.

No comments regarding the social/cultural heritage significance were received from the other RAPs.

8.2.2 Historic value

Historic values refer to the association of the place with aspects of Aboriginal history. Historic values are not necessarily reflected in physical objects, but may be intangible and relate to memories, stories or experiences.

The study area is not known to be associated with any people, events or activities of historical importance to the Aboriginal community. The project site is considered not to be of any specific historical significance.

No comments were received regarding the historic value of the study area from the RAPs.

8.2.3 Scientific value

No Aboriginal sites or areas of PAD have been identified within the study area. Therefore, the study area is not considered to hold any scientific significance.

8.2.4 Aesthetic value

Aesthetic values refer to the sensory, scenic, architectural and creative aspects of the place. These values may be related to the landscape and are often closely associated with social/cultural values. The study area was substantially modified from the landscape used and lived in by Aboriginal people in the area prior to non-Aboriginal contact. As such, the study area cannot be described as retaining aesthetic values in connection with pre-contact Aboriginal heritage.

No comments were received regarding the Aesthetic value of the study area from the RAPs.

8.3 Statement of significance

At the time this report was prepared, no specific aesthetic or historic values associated with the project site were identified. As no Aboriginal archaeological sites or areas of PAD were identified, the study area possesses low scientific significance. However, the scientific significance of the study area would need to be reassessed if Aboriginal objects were encountered during the proposed works.

Kadibulla Khan, of the Kamilaroi Yankuntjatjara Working Group, highlighted the whole study area as being of significance to Aboriginal people.

No comments regarding the significance of the study area were received from the other RAPs.

9.0 IMPACT ASSESSMENT

9.1 Proposed works

Health Infrastructure are increasing the capacity of the Sutherland Hospital operating theatres from five to eight operating theatres and one to two endoscopy suites, as well as recovery and other perioperative clinical and supporting spaces. The project will be constructed utilising a combination of newly constructed and refurbished areas. As this development will not have significant subsurface impacts there are no expected impacts to Aboriginal heritage.

Concept design option 1D has been endorsed, which involves the western expansion of the structure towards the Ambulance Station and Carpark 3 site. The development will maintain Ambulance access to the road below (Figure 5).

9.2 Potential impacts to Aboriginal heritage

No Aboriginal places or objects were identified within the study area. Due to the highly disturbed nature of the study area, intact archaeological deposits are not likely to be present below the ground surface. Therefore, the project is unlikely to impact any Aboriginal heritage items or places, or potential Aboriginal archaeology.

As no impacts to Aboriginal sites, places or archaeology associated with the project have been identified, direct and/or indirect impacts (including cumulative impacts and visual impacts) to Aboriginal places or objects are considered unlikely.

Figure 5: Proposed design options

9.3 Ecologically sustainable development principles

The Guide (OEH 2011) specifies that ESD principles must be considered when assessing harm and recommending mitigation measures in relation to Aboriginal objects.

The following relevant ESD principles are outlined in Section 3A of the Commonwealth EPBC Act:

- J Decision-making processes should effectively integrate both long term and short term economic, environmental, social and equitable considerations (the 'integration principle')
- J If there are threats of serious or irreversible environmental damage, lack of full scientific certainty should not be used as a reason for postponing measures to prevent environmental degradation (the 'precautionary principle')
- J The present generation should ensure that the health, diversity and productivity of the environment is maintained or enhanced for the benefit of future generations (the 'principle of intergenerational equity').

9.3.1 The integration principle

Decision-making processes should effectively integrate both long term and short term economic, environmental, social and equitable considerations (the 'integration principle'). The proposal would comply with the integration principle in regard to Aboriginal heritage. There are no identified areas of archaeological significance within the study area that will be impacted.

9.3.2 The precautionary principle

If there are threats of serious or irreversible environmental damage, lack of full scientific confidence should not be used as a reason for postponing measures to prevent environmental degradation (the 'precautionary principle'). Current and previous assessments of the study area have identified the study area as heavily disturbed and subsequently demonstrating low archaeological potential.

9.3.3 The principle of intergenerational equity

The present generation should ensure that the health, diversity and productivity of the environment is maintained or enhanced for the benefit of future generations (the 'principle of intergenerational equity'). The project would adhere, as closely as possible, to the principle of intergenerational equity by collating scientific and cultural information on former Aboriginal occupation of the project site through the previous investigations into the ASR (Artefact Heritage 2020) and this ACHAR.

9.4 Cumulative impacts

As no Aboriginal objects or areas of PAD were identified within the study area, it is unlikely that the proposed works will pose a cumulative impact to the regional archaeological context. However as noted in Section 5.3 archaeological resources are rare within the regional context. Therefore, impact to unexpected finds would pose a major cumulative impact to the regional archaeological context

10.0 MANAGEMENT AND MITIGATION MEASURES

10.1 Changes to the proposed works

This ACHAR is based upon the most recent information made available to Artefact Heritage as of the date of preparation of this report. Any changes made to the proposal should be assessed by an archaeologist in consultation with the RAPs. Any changes that may impact areas not assessed during the current study may warrant further investigation and result in changes to the recommended management and mitigation measures.

10.2 Unexpected finds

It is recommended that an unexpected finds policy be developed. The unexpected find policy could include the follow protocols:

-)] Stop work within the affected area, protect the potential archaeological find, and inform environment staff or supervisor
-)] Contact a suitably qualified archaeologist to assess the potential archaeological find
-)] If Aboriginal archaeological material is identified, works in the affected area should cease, and the South Metropolitan Heritage NSW, DPC should be informed. Further archaeological mitigation may be required prior to works recommencing
-)] If Aboriginal objects are located as unexpected finds in other parts of the project site during construction, they will be recorded and registered on the AHIMS database
-)] If any human remains are discovered and/or harmed in, on or under the land, the following actions must be taken:
 - The remains must not be harmed/ further harmed
 - Immediately cease all works at the particular location
 - Secure the area so as to avoid further harm to the remains
 - Notify site manager and project archaeologist
 - Notify the NSW Police and South Metropolitan Heritage NSW, DPC's Environment Line on 131 555 as soon as practicable and provide any available details of the remains and their location
 - Do not recommence any work at the particular location unless authorised in writing by South Metropolitan Heritage NSW, DPC.

11.0 RECOMMENDATIONS

The following recommendations are based on consideration of:

-)] Statutory requirements under the NPW Act
-)] The results of the background research, site survey and assessment
-)] The likely impacts of the proposed development.

It was found that:

-)] No previously unrecorded Aboriginal sites were identified within the study area
-)] All sections of the study area have been subjected to high levels of ground disturbance
-)] All sections of the study area were found to have a low archaeological potential
-)] No direct impacts from the project on Aboriginal cultural heritage have been identified.

The following recommendations are made:

-)] No further archaeological investigation is required
-)] an unexpected finds policy should be developed and implemented, with the following conditions:
 - Stop work within the affected area, protect the potential archaeological find, and inform environment staff or supervisor
 - Contact a suitably qualified archaeologist to assess the potential archaeological find
 - If Aboriginal archaeological material is identified, works in the affected area should cease, and the South Metropolitan Heritage NSW, DPC should be informed. Further archaeological mitigation may be required prior to works recommencing
 - If Aboriginal objects are located as unexpected finds in other parts of the project site during construction, they will be recorded and registered on the AHIMS database
 - If any human remains are discovered and/or harmed in, on or under the land, the following actions must be taken:
 - The remains must not be harmed/ further harmed
 - immediately cease all work at the particular location
 - notify site manager and project archaeologist
 - notify NSW Police
 - notify South Metropolitan Heritage NSW, DPC's Environment Line on 131 555 as soon as practicable and provide available details of the remains and their location
 - not recommence any work at the location until cleared.

During the review process Kadibulla Khan, of the Kamilaroi Yankuntjatjara Working Group recommended monitoring of groundworks, due to the high level of ground disturbance within the study area it is unlikely that either Aboriginal material or intact natural soils will remain in situ, therefore archaeological monitoring is not considered necessary.

La Perouse Local Aboriginal Land Council

1 Elaroo Avenue
La Perouse NSW 2036

Dear Sir or Madam,

Re: Section 4.1.2 – Identification of Interested Aboriginal Parties – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres. The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Services Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

In line with the relevant consultation guidelines, I am writing to you to request the names and contact details that your organisation has for Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the suburb of Sutherland Shire Please forward any information that you have before **20 August 2020 to:**

Dear Sir or Madam,

Re: Section 4.1.2 – Identification of Interested Aboriginal Parties – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres. The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Services Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

In line with the relevant consultation guidelines, I am writing to you to request the names and contact details that your organisation has for Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the suburb of Sutherland Shire. Please forward any information that you have before **20 August 2020 to:**

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

Gareth Holes

Subject: Automated Response

Thank you for your email to Heritage NSW, Department of Premier and Cabinet. We will respond to your email as soon as possible.

Coronavirus (COVID 19)

Given the rapid spread of coronavirus (COVID-19) Heritage NSW has taken steps to protect the safety, health and wellbeing of our staff, partners and communities. We have implemented a number of safeguards that meet official Australian Government COVID-19 guidelines. Whilst our offices remain open, we have well established flexible working arrangements for our teams across NSW, and we will continue to adapt as necessary as these guidelines continue to evolve. Face-to-face meetings and field work/site visits with our customers are now subject to new rules on gatherings and social distancing measures. There may also be some short delays in processing postage in the coming weeks.

We are committed to supporting our communities during this developing situation and we thank you for your patience and understanding.

Aboriginal cultural heritage regulation is now part of Heritage NSW

From 1 July 2020 Heritage NSW began managing Aboriginal cultural heritage regulatory functions under the *National Parks and Wildlife Act 1974*. Now the government functions for the management of Aboriginal cultural heritage is within the one State government agency. All the staff that previously carried out these functions in the Department of Planning, Industry and Environment have been welcomed into Heritage NSW.

Applications

If you have submitted an application under the *Heritage Act 1977* or the *National Parks and Wildlife Act 1974*, it will first be reviewed for completeness and then allocated to the appropriate assessment team. An officer will contact you if any additional information is required. The completeness check is generally completed within 7-14 business days.

We aim to process applications within the timeframes below:

Application Type	Timeframe (Commences once an application is complete)
Section 57(2) Exemption Notification	14 days
Planning Proposals Section 139 Exceptions Section 140 Permits Section 4.55 Modifications	21 days
Integrated Development Applications	If advertised: 21 days following receipt of submissions, or advice there were no submissions, or If not advertised: 40 days
Section 60 Applications Section 65A Modifications	40 days (or 60 days if advertised)
Section 90 Aboriginal Heritage Impact Permit	60 days

State Heritage and Aboriginal Place Nominations

Nominations for listing under the *Heritage Act 1977* (State Heritage Register) must accompany a nomination form available on our website (<https://www.heritage.nsw.gov.au/protecting-our-heritage/nominate-listing-on-the-state-heritage-register/>). SHR Nominations are considered by the State Heritage Register Committee who will decide whether the nomination will proceed to the next stage of assessment.

Nominations for Aboriginal Place listings under the *National Parks and Wildlife Act 1974*, are allocated to the relevant team within 2 business days. An officer will contact you if any additional information is required. The Aboriginal Place proposal form is available on our website: <https://www.heritage.nsw.gov.au/protecting-our-heritage/nominating-an-aboriginal-place/>

Aboriginal Cultural Heritage Conservation and Repatriation

Programs supported by Heritage NSW include the ACH Conservation and Repatriation of Aboriginal ancestors and objects. This work is managed by staff located across NSW. Enquiries into these programs are sent to the relevant team within 2 business days. One of our staff will respond to you directly. Please advise us of any requests to modify our projects or timeframes to better accommodate your needs.

A new Heritage Management System is coming!

We are working to improve our systems to make it easier for you to work with us. Early next year, we will be releasing a new Heritage Management System, which will provide:

- Improved heritage search tools, and
- The ability to submit, pay and track the progress of applications online

Further updates will be provided as work progresses.

Further information is also available at <https://www.heritage.nsw.gov.au/>

Sincerely

**Premier
& Cabinet**

Native title search – NSW Parcels – Lot 1 on DP432283, Lot 1 on DP398975 & Lot 1 on DP119519
Your ref: Sutherland Hospital - Our ref: SR20/768

Dear Gareth Holes,

Thank you for your search request received on 06 August 2020 in relation to the above area.

Please note: Records held by the National Native Title Tribunal as at 07 August 2020 indicate that the identified parcels appear to be freehold, and freehold tenure extinguishes native title.

The National Native Title Tribunal does not hold data sets for freehold tenure; consequently, we **cannot** conduct searches over freehold. For confirmation of freehold data, please contact the NSW Land and Property Information office or seek independent legal advice.

For further information, please visit our [website](#).

If you have any further queries, please do not hesitate to contact us on the free call number 1800 640 501.

Subject: RE: Section 4.1.2 – Identification of Interested Aboriginal Parties – Proposed Development, Sutherlands Hospital

UNCLASSIFIED

Good Afternoon Gareth,

Thank you for your enquiry regarding Register Searches. To enable us to complete the search appropriately and adequately, please forward your request, along with a Geospatial Search Form, to the following email address: GeospatialSearch@NNTT.gov.au

A Geospatial Search Form must accompany your request. Search request forms are available for download from our website at: http://www.nntt.gov.au/assistance/Geospatial/Pages/Geospatial_Searches.aspx

Further information on searching our Registers is available at: <http://www.nntt.gov.au/assistance/Pages/Searches-and-providing-Register-information.aspx>

Please note:

Freehold Land - The National Native Title Tribunal does not hold data sets for freehold tenure. For further information on freehold land and native title claims, please visit our website at: <http://www.nntt.gov.au/nativetitleclaims/Pages/Native-title-claims-and-freehold-land.aspx>

Cultural Heritage - The existence or otherwise of native title is quite separate to any matters relating to Aboriginal cultural heritage. In NSW, the National Native Title Tribunal has undertaken steps to remove itself from the formal list of sources for information about indigenous groups in development areas.

Kind Regards

Madeline

Dear Sir or Madam,

Re: Section 4.1.2 – Identification of Interested Aboriginal Parties – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres. The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Services Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

In line with the relevant consultation guidelines, I am writing to you to request the names and contact details that your organisation has for Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the suburb of Sutherland Shire Please forward any information that you have before **20 August 2020 to:**

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

Dear Gareth

I refer to your correspondence regarding Artefact Heritage notification in relation to Aboriginal cultural heritage assessment at Sutherland Hospital.

Council uses the list of Registered Aboriginal Parties provided by DPIE or the La Perouse Local Aboriginal Land Council if we need to consult with the Aboriginal community regarding any proposed development. Council also has an Aboriginal Advisory Committee that address Aboriginal cultural and heritage issues in the Sutherland Shire. However the State significant development at Sutherland Hospital is likely to be beyond the scope of the committee.

Yours sincerely

Brendon Graham - Senior Natural Areas Officer

Dear Gareth,

Thank you for your letter dated 6 August 2020 to the Department Premier and Cabinet (DPC) regarding obtaining a list of the Aboriginal stakeholders that may have an interest in the proposed development at The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519).

Please find attached the list of Aboriginal stakeholders known to DPC that may have an interest in the project.

As the Planning and Assessment Group in the Department is the approval authority for this project, the consultation process should be in accordance with the relevant guidelines as stipulated by the Group.

If you wish to discuss any of the above matter further please email

heritagemailbox@environment.nsw.gov.au

Yours sincerely

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for, the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

If you hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the area of Sutherland Shire, we invite you to register your interest in the process of community consultation. Please forward your interest in writing before **9 September 2020 to:**

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

Please be advised that, in accordance with the consultation requirements, if you are registering an interest in the project your contact details will be forwarded to Heritage NSW Department of Premier and Cabinet (DPC) and the La Perouse Local Aboriginal Land Council unless specify that you do not wish for your contact details to be released.

As part of your registration of interest, I would appreciate it if you could address the following points:

- Name and contact details of the organisation registering.
- An outline of the connection of the organisation to the Sutherland region.

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

Dear Sir or Madam,

Re: Section 4.1.3 – Registration of Interest – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres (Figure 1). The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for, the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. Dear Sir or Madam,

Re: Section 4.1.3 – Registration of Interest – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres (Figure 1). The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for, the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

If you hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the area of Sutherland Shire, we invite you to register your interest in the process of community consultation. Please forward your interest in writing before **9 September 2020 to:**

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

Please be advised that, in accordance with the consultation requirements, if you are registering an interest in the project your contact details will be forwarded to Heritage NSW Department of Premier and Cabinet (DPC) and the La Perouse Local Aboriginal Land Council unless specify that you do not wish for your contact details to be released.

As part of your registration of interest, I would appreciate it if you could address the following points:

- Name and contact details of the organisation registering.
- An outline of the connection of the organisation to the Sutherland region.

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

26 August 2020

Munyunga
Kaya Dawn Bell

Dear Sir or Madam,

Re: Section 4.1.3 – Registration of Interest – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres (Figure 1). The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for, the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

If you hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the area of Sutherland Shire, we invite you to register your interest in the process of community consultation. Please forward your interest in writing before **9 September 2020 to:**

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

Please be advised that, in accordance with the consultation requirements, if you are registering an interest in the project your contact details will be forwarded to Heritage NSW Department of Premier and Cabinet (DPC) and the La Perouse Local Aboriginal Land Council unless specify that you do not wish for your contact details to be released.

As part of your registration of interest, I would appreciate it if you could address the following points:

- Name and contact details of the organisation registering.
- An outline of the connection of the organisation to the Sutherland region.

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

From: Gareth Holes

Dear Sir or Madam,

Re: Section 4.1.3 – Registration of Interest – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres (Figure 1). The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for, the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

If you hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the area of Sutherland Shire, we invite you to register your interest in the process of community consultation. Please forward your interest in writing before **9 September 2020 to:**

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

Please be advised that, in accordance with the consultation requirements, if you are registering an interest in the project your contact details will be forwarded to Heritage NSW Department of Premier and Cabinet (DPC) and the La Perouse Local Aboriginal Land Council unless specify that you do not wish for your contact details to be released.

As part of your registration of interest, I would appreciate it if you could address the following points:

- Name and contact details of the organisation registering.
- An outline of the connection of the organisation to the Sutherland region.

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

Unknown To address

How to Fix It

The address may be misspelled or may not exist. Try one or more of the following:

- Send the message again following these steps: In Outlook, open this non-delivery report (NDR) and choose **Send Again** from the Report ribbon. In Outlook on the web, select this NDR, then select the link "**To send this message again, click here.**" Then delete and retype the entire recipient address. If prompted with an Auto-Complete List suggestion don't select it. After typing the complete address, click **Send**.
- Contact the recipient (by phone, for example) to check that the address exists and is correct.
- The recipient may have set up email forwarding to an incorrect address. Ask them to check that any forwarding they've set up is working correctly.
- Clear the recipient Auto-Complete List in Outlook or Outlook on the web by following the steps in this article: [Fix email delivery issues for error code 5.1.1 in Office 365](#), and then send the message again. Retype the entire recipient address before selecting **Send**.

If the problem continues, forward this message to your email admin. If you're an email admin, refer to the **More Info for Email Admins** section below.

Hi Gareth,

Thank you for informing us that **Artefact Heritage** will be involved in an Aboriginal Cultural Heritage Assessment **Sutherland Hospital** &, that you are inviting Aboriginal organisations to register, if they wish too be involved in the community consultation process.

As a senior Aboriginal person for the past 40yrs, I actively participate in the protection of the Aboriginal Cultural Heritage throughout the Sydney Basin, & particularly throughout Western Sydney, on behalf of Kamilaroi Yankuntjatjara Working Group I wish to provide to you my organisation's registration of interest.

I wish to be involved & participate in all levels of consultation/project involvement. I wish to attend all meetings, participate in available field work & receive a copy of the report.

I have attached a copy of Kamilaroi Yankuntjatjara Working group's Public Liability Insurance & Workers Compensation certificate.

Should you wish me to provide further information, please do not hesitate to contact me on 0434545982 or Stefeanie on 0451068480.

Kind Regards
Phil Khan

Dear Sir or Madam,

Re: Section 4.1.3 – Registration of Interest – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres (Figure 1). The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for, the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

If you hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the area of Sutherland Shire, we invite you to register your interest in the process of community consultation. Please forward your interest in writing before **9 September 2020** to:

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

Please be advised that, in accordance with the consultation requirements, if you are registering an interest in the project your contact details will be forwarded to Heritage NSW Department of Premier and Cabinet (DPC) and the La Perouse Local Aboriginal Land Council unless specify that you do not wish for your contact details to be released.

As part of your registration of interest, I would appreciate it if you could address the following points:

- Name and contact details of the organisation registering.
- An outline of the connection of the organisation to the Sutherland region.

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

Gareth Holes

Dear Sir or Madam,

Re: Section 4.1.3 – Registration of Interest – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres (Figure 1). The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for, the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman

Senior Project Director

Health Infrastructure

tim.schoolman@health.nsw.gov.au

0412 739 836

If you hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the area of Sutherland Shire, we invite you to register your interest in the process of community consultation. Please forward your interest in writing before **9 September 2020 to:**

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

Please be advised that, in accordance with the consultation requirements, if you are registering an interest in the project your contact details will be forwarded to Heritage NSW Department of Premier and Cabinet (DPC) and the La Perouse Local Aboriginal Land Council unless specify that you do not wish for your contact details to be released.

As part of your registration of interest, I would appreciate it if you could address the following points:

- Name and contact details of the organisation registering.
- An outline of the connection of the organisation to the Sutherland region.

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

Gareth Holes

Via email: butuheritage@gmail.com

Re: The Sutherland Hospital Operating Theatre Upgrade Project (TSHOTUP): Notification of Registered Aboriginal Stakeholders

Dear Lowanna Gibson,

Thank you for registering as a stakeholder for TSHOTUP. I am looking forward to working with you on this project. Included below are details of the project, and the proposed assessment methodology for preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for your review.

If you would like to comment on the Aboriginal cultural heritage of the study area or the proposed methodology, please provide your response by **13 October 2020**. Please address your response to me at:

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Rd,
Pyrmont NSW 2009

Or via email: gareth.holes@artefact.net.au

In your response, please consider the following points:

- Do you know of any objects or places of value to Aboriginal people in the study area or locality?
- Are there any protocols that you would like incorporated into the assessment methodology?
- Are there any access requirements or restrictions that should be applied to the information you are providing?

Please also note that consultation will not necessarily involve paid engagement, as this is not a requirement of the consultation guidelines issued by the Heritage New South Wales (NSW) Department of Premier and Cabinet (DPC).

1.1 Proposed works

Health Infrastructure NSW propose to increase the capacity of Sutherland Hospital from five to eight operating theatres and from one to two endoscopy suites, as well as recovery and other perioperative supporting spaces. The project will be constructed utilising a combination of newly constructed and refurbished areas. The project is not expected to have significant subsurface impact. The study area covers approximately 11.9 ha and is identified as the Sutherland Hospital (Lot 1, DP 119519, Lot DP 398975 and Lot 1, DP 432283) (Figure 1).

1.2 Background

Health Infrastructure NSW is planning to lodge an application with the Minister of Planning for TSHOTUP to be considered a State Significant Development (SSD) and therefore to be assessed under the *Environmental Planning and Assessment Act 1979*. Artefact Heritage was engaged to complete an Archaeological Survey Report (ASR) to support the SSD application. The ASR found that the study area is unlikely to contain Aboriginal objects.

Health Infrastructure NSW will be preparing an Environmental Impact Statement (EIS) for the project in accordance with the Secretary's Environment Assessment Requirements (SEARs). The SEARs have not yet been issued for the project, however it is assumed that the SEARs will include the following requirements for the assessment of Aboriginal heritage:

- Completion of an ACHAR in accordance with the Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)
- Comprehensive stakeholder consultation in accordance with the Aboriginal Cultural Heritage Consultation Requirements for Proponents (Department of Environment Climate Change and Water (DECCW) 2010a)

Health Infrastructure NSW have engaged Artefact Heritage to prepare an Aboriginal Cultural Heritage Assessment Report (ACHAR) for inclusion in the EIS.

1.3 Proposed assessment methodology

The ACHAR will be completed in accordance with the following guidelines and procedures:

- Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)
- Aboriginal Cultural Heritage Consultation Requirements for Proponents (DECCW 2010a)
- Code of Practice for Archaeological Investigation of Aboriginal Objects In New South Wales (OEH 2010)

The ACHAR will consist of the following components:

- Aboriginal community consultation. The initial stages of this process have been completed, and a list of Registered Aboriginal Parties (RAPs) has been compiled. The present letter provides all RAPs with project information and the proposed assessment methodology for review. The next stage of the consultation process will include the opportunity for comment on the proposed works and the assessment.
- Review of background information. This will address the physical environment of the study area, previous ground disturbance, relevant archaeological reports, and available historical information regarding past Aboriginal land use.
- Significance and impact assessment. The Aboriginal heritage significance of the study area will be assessed, based on comments received from the RAPs and the results of the ASR. The potential impact of the proposed development on this significance will be assessed, and management recommendations will be developed accordingly.

I would like to ask you to review the above information and let me know if you have any comments to make. As

mentioned, I would appreciate if you could provide comments by **13 October 2020**.

A draft copy of the ACHAR will be sent out for your review prior to finalisation of the document, in line with Clause 60 Section 8 of the NPW Regulation 2019.

Thank you very much for your involvement in the project. If you require any additional information, please do not hesitate to contact me.

Kind Regards,

Gareth Holes

Re: The Sutherland Hospital Operating Theatre Upgrade Project (TSHOTUP): Notification of Registered Aboriginal Stakeholders

Dear Carolyn Hickey,

Thank you for registering as a stakeholder for TSHOTUP. I am looking forward to working with you on this project. Included below are details of the project, and the proposed assessment methodology for preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for your review.

If you would like to comment on the Aboriginal cultural heritage of the study area or the proposed methodology, please provide your response by **13 October 2020**. Please address your response to me at:

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Rd,
Pyrmont NSW 2009

Or via email: gareth.holes@artefact.net.au

In your response, please consider the following points:

- Do you know of any objects or places of value to Aboriginal people in the study area or locality?
- Are there any protocols that you would like incorporated into the assessment methodology?
- Are there any access requirements or restrictions that should be applied to the information you are providing?

Please also note that consultation will not necessarily involve paid engagement, as this is not a requirement of the consultation guidelines issued by the Heritage New South Wales (NSW) Department of Premier and Cabinet (DPC).

1.1 Proposed works

Health Infrastructure NSW propose to increase the capacity of Sutherland Hospital from five to eight operating theatres and from one to two endoscopy suites, as well as recovery and other perioperative supporting spaces. The project will be constructed utilising a combination of newly constructed and refurbished areas. The project is not expected to have significant subsurface impact. The study area covers approximately 11.9 ha and is identified as the Sutherland Hospital (Lot 1, DP 119519, Lot DP 398975 and Lot 1, DP 432283) (Figure 1).

1.2 Background

Health Infrastructure NSW is planning to lodge an application with the Minister of Planning for TSHOTUP to be considered a State Significant Development (SSD) and therefore to be assessed under the *Environmental Planning and Assessment Act 1979*. Artefact Heritage was engaged to complete an Archaeological Survey Report (ASR) to support the SSD application. The ASR found that the study area is unlikely to contain Aboriginal objects.

Health Infrastructure NSW will be preparing an Environmental Impact Statement (EIS) for the project in accordance with the Secretary's Environment Assessment Requirements (SEARs). The SEARs have not yet been issued for the project, however it is assumed that the SEARs will include the following requirements for the assessment of Aboriginal heritage:

- Completion of an ACHAR in accordance with the Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)
- Comprehensive stakeholder consultation in accordance with the Aboriginal Cultural Heritage Consultation Requirements for Proponents (Department of Environment Climate Change and Water (DECCW) 2010a)

Health Infrastructure NSW have engaged Artefact Heritage to prepare an Aboriginal Cultural Heritage Assessment Report (ACHAR) for inclusion in the EIS.

1.3 Proposed assessment methodology

The ACHAR will be completed in accordance with the following guidelines and procedures:

- Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)
- Aboriginal Cultural Heritage Consultation Requirements for Proponents (DECCW 2010a)
- Code of Practice for Archaeological Investigation of Aboriginal Objects In New South Wales (OEH 2010)

The ACHAR will consist of the following components:

- Aboriginal Cultural Heritage Consultation Requirements for Proponents (DECCW 2010a)
- Code of Practice for Archaeological Investigation of Aboriginal Objects In New South Wales (OEH 2010)

The ACHAR will consist of the following components:

- Aboriginal community consultation. The initial stages of this process have been completed, and a list of Registered Aboriginal Parties (RAPs) has been compiled. The present letter provides all RAPs with project information and the proposed assessment methodology for review. The next stage of the consultation process will include the opportunity for comment on the proposed works and the assessment.
- Review of background information. This will address the physical environment of the study area, previous ground disturbance, relevant archaeological reports, and available historical information regarding past Aboriginal land use.
- Significance and impact assessment. The Aboriginal heritage significance of the study area will be assessed, based on comments received from the RAPs and the results of the ASR. The potential impact of the proposed development on this significance will be assessed, and management recommendations will be developed accordingly.

I would like to ask you to review the above information and let me know if you have any comments to make. As

mentioned, I would appreciate if you could provide comments by **13 October 2020**.

A draft copy of the ACHAR will be sent out for your review prior to finalisation of the document, in line with Clause 60 Section 8 of the NPW Regulation 2019.

Thank you very much for your involvement in the project. If you require any additional information, please do not hesitate to contact me.

Kind Regards,

Gareth Holes

Re: The Sutherland Hospital Operating Theatre Upgrade Project (TSHOTUP): Notification of Registered Aboriginal Stakeholders

Dear Lillie Carroll & Paul Boyd,

Thank you for registering as a stakeholder for TSHOTUP. I am looking forward to working with you on this project. Included below are details of the project, and the proposed assessment methodology for preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for your review.

If you would like to comment on the Aboriginal cultural heritage of the study area or the proposed methodology, please provide your response by **13 October 2020**. Please address your response to me at:

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf
26-32 Pirrama Rd,
Pyrmont NSW 2009

Or via email: gareth.holes@artefact.net.au

In your response, please consider the following points:

- Do you know of any objects or places of value to Aboriginal people in the study area or locality?
- Are there any protocols that you would like incorporated into the assessment methodology?
- Are there any access requirements or restrictions that should be applied to the information you are providing?

Please also note that consultation will not necessarily involve paid engagement, as this is not a requirement of the consultation guidelines issued by the Heritage New South Wales (NSW) Department of Premier and Cabinet (DPC).

1.1 Proposed works

Health Infrastructure NSW propose to increase the capacity of Sutherland Hospital from five to eight operating theatres and from one to two endoscopy suites, as well as recovery and other perioperative supporting spaces. The project will be constructed utilising a combination of newly constructed and refurbished areas. The project is not expected to have significant subsurface impact. The study area covers approximately 11.9 ha and is identified as the Sutherland Hospital (Lot 1, DP 119519, Lot DP 398975 and Lot 1, DP 432283) (Figure 1).

1.2 Background

Health Infrastructure NSW is planning to lodge an application with the Minister of Planning for TSHOTUP to be considered a State Significant Development (SSD) and therefore to be assessed under the *Environmental Planning and Assessment Act 1979*. Artefact Heritage was engaged to complete an Archaeological Survey Report (ASR) to support the SSD application. The ASR found that the study area is unlikely to contain Aboriginal objects.

Health Infrastructure NSW will be preparing an Environmental Impact Statement (EIS) for the project in accordance with the Secretary's Environment Assessment Requirements (SEARs). The SEARs have not yet been issued for the project, however it is assumed that the SEARs will include the following requirements for the assessment of Aboriginal heritage:

- Completion of an ACHAR in accordance with the Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)
- Comprehensive stakeholder consultation in accordance with the Aboriginal Cultural Heritage Consultation Requirements for Proponents (Department of Environment Climate Change and Water (DECCW) 2010a)

Health Infrastructure NSW have engaged Artefact Heritage to prepare an Aboriginal Cultural Heritage Assessment Report (ACHAR) for inclusion in the EIS.

1.3 Proposed assessment methodology

The ACHAR will be completed in accordance with the following guidelines and procedures:

- Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)
- Aboriginal Cultural Heritage Consultation Requirements for Proponents (DECCW 2010a)
- Code of Practice for Archaeological Investigation of Aboriginal Objects In New South Wales (OEH 2010)

The ACHAR will consist of the following components:

- Aboriginal community consultation. The initial stages of this process have been completed, and a list of Registered Aboriginal Parties (RAPs) has been compiled. The present letter provides all RAPs with project information and the proposed assessment methodology for review. The next stage of the consultation process will include the opportunity for comment on the proposed works and the assessment.
- Review of background information. This will address the physical environment of the study area, previous ground disturbance, relevant archaeological reports, and available historical information regarding past Aboriginal land use.
- Significance and impact assessment. The Aboriginal heritage significance of the study area will be assessed, based on comments received from the RAPs and the results of the ASR. The potential impact of the proposed development on this significance will be assessed, and management recommendations will be developed accordingly.

I would like to ask you to review the above information and let me know if you have any comments to make. As

mentioned, I would appreciate if you could provide comments by **13 October 2020**.

A draft copy of the ACHAR will be sent out for your review prior to finalisation of the document, in line with Clause 60 Section 8 of the NPW Regulation 2019.

Thank you very much for your involvement in the project. If you require any additional information, please do not hesitate to contact me.

1.1

Proposed works

Health Infrastructure NSW propose to increase the capacity of Sutherland Hospital from five to eight operating theatres and from one to two endoscopy suites, as well as recovery and other perioperative supporting spaces. The project will

be constructed utilising a combination of newly constructed and refurbished areas. The project is not expected to have significant subsurface impact. The study area covers approximately 11.9 ha and is identified as the Sutherland Hospital (Lot 1, DP 119519,

Lot DP 398975 and Lot 1, DP 432283) (Figure 1).

1.2

Background

Health Infrastructure NSW is planning to lodge an application with the Minister of Planning

for TSHOTUP to be considered a State Significant Development (SSD) and therefore to be assessed under the

Environmental Planning and Assessment Act 1979. Artefact Heritage was engaged to complete an Archaeological Survey Report (ASR) to support the SSD application. The ASR found that the study area is unlikely to contain Aboriginal objects.

Health Infrastructure NSW will be preparing an Environmental Impact Statement (EIS) for the project in accordance with the Secretary's Environment Assessment Requirements (SEARs). The SEARs have not yet been issued for the project, however

it is assumed that the SEARs will include the following requirements for the assessment of Aboriginal heritage:

Completion of an ACHAR in accordance with the

Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW

(OEH 2011)

Comprehensive stakeholder consultation in accordance with the Aboriginal Cultural Heritage Consultation Requirements for Proponents (Department of Environment Climate Change and Water (DECCW) 2010a)

Health Infrastructure NSW have engaged Artefact Heritage to prepare an Aboriginal Cultural Heritage Assessment Report (ACHAR) for inclusion in the EIS.

1.3

Proposed assessment methodology

The ACHAR will be completed in accordance with the following guidelines and procedures:

- Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)
- Aboriginal Cultural Heritage Consultation Requirements for Proponents (DECCW 2010a)
- Code of Practice for Archaeological Investigation of Aboriginal Objects In New South Wales (OEH 2010)

The ACHAR will consist of the following components:

- Aboriginal community consultation. The initial stages of this process have been completed, and a list of Registered Aboriginal Parties (RAPs) has been compiled. The present letter provides all RAPs with project information

and the proposed assessment methodology for review. The next stage of the consultation process will include the opportunity for comment on the proposed works and the assessment.
- Review of background information. This will address the physical environment of the study area,

previous ground disturbance, relevant archaeological reports, and available historical information regarding past Aboriginal

land use.

•

Significance and impact assessment. The Aboriginal heritage significance of the study area will be assessed, based on comments received from the RAPs and the results of the ASR. The potential impact of the proposed development

on this significance will be assessed, and management recommendations will be developed accordingly.

I would like to ask you to review the above information and let me know if you have any comments to make. As mentioned, I would appreciate if you could provide comments by

13 October 2020.

A draft copy of the ACHAR will be sent out for your review prior to finalisation of the document, in line with Clause 60 Section 8 of the NPW Regulation 2019.

Thank you very much for your involvement in the project. If you require any additional information, please do not hesitate to contact me.

Re: The Sutherland Hospital Operating Theatre Upgrade (TSHOTUP): Aboriginal Cultural Heritage Assessment

Health Infrastructure (the proponent) is proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres. The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds. The proponent will be making an application to the Minister of Planning for the project to be considered State Significant Development (SSD).

Artefact Heritage has been engaged to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for the project in accordance with the 'Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW' (OEH 2011). Preparation of the ACHAR will include consultation with Registered Aboriginal Parties (RAPs) in accordance with the 'Aboriginal cultural heritage consultation requirements for proponents 2010' (Department of Environment Climate Change and Water (DECCW) 2010).

In accordance with Section 4.1.6 of the consultation requirements, please find below a list of Registered Stakeholders for the project.

There are 8 RAPs for the project.

- A1 Indigenous Services
- Barking Owl Aboriginal Corporation
- Didge Ngunawal Clan
- Kamilaroi Yankuntjatjara Working Group
- Thoorga Nura
- Wailwan Aboriginal Group
- Yulay Cultural Services
- Butucarbin

Also included is a copy of the published Step 4.1.3 advertisement and letter providing an invitation to register interest in the project. The registration of interest letters were issued on 6 August 2020 with registration requested by 20 August 2020. The advertisement was placed in the Sutherland Shire Leader and St George Leader on Wednesday 2 September 2020 with a request to register by 16 September 2020. Please note that the letter and advertisement contained erroneous proponents contact details, an update with the correct details was subsequently issued. (Appendix A)

If you require any additional information, please do not hesitate to contact me.

Yours sincerely,

Gareth Holes
Heritage Consultant
Artefact Heritage Services Pty Ltd
Gareth.holes@artefact.net.au

Appendix A: Advertisement and Letters

**Aboriginal Cultural Heritage Assessment
– Invitation to Register an Interest**

On behalf of Health Infrastructure (the proponent), Artefact Heritage is undertaking an Aboriginal cultural heritage assessment of the Sutherland Hospital (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519), in advance of a proposed operating theatre upgrade. The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds. The proponent's contact details are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

The project will be assessed under the Environmental Planning and Assessment Act 1979 as a State Significant Development and will not require an Aboriginal Heritage Impact Permit under the National Parks and Wildlife Act 1974.

The proponent is inviting Aboriginal groups and individuals who hold cultural knowledge relevant to determining the significance of Aboriginal objects and/or places in the locality to register an interest in a process of community consultation with the proponent regarding the proposed activity. The purpose of community consultation is to assist the proponent in the preparation of the Aboriginal cultural heritage assessment report for inclusion in an Environmental Impact Statement.

Please register your interest in the project by 16 September 2020 by contacting:

Gareth Holes
Artefact Heritage, Suite 56, Jones Bay Wharf,
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

Please note that the consultation guidelines require the proponent to provide details of registered Aboriginal parties to Heritage NSW, Department of Premier and Cabinet (DPC) and the La Perouse Local Aboriginal Land Council. In your response could you please advise if you would not like your details to be provided.

6 August 2020

[company]
[Name here]
[Address here]

Dear Sir or Madam,

Re: Section 4.1.2 – Identification of Interested Aboriginal Parties – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres. The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Services Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

In line with the relevant consultation guidelines, I am writing to you to request the names and contact details that your organisation has for Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the suburb of Sutherland Shire. Please forward any information that you have before **20 August 2020 to:**

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf

26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

Gareth Holes
Heritage Consultant
Artefact Heritage Services Pty Ltd
Gareth.holes@artefact.net.au

To Whom It May Concern;

On 6 August 2020, Artefact Heritage issued a request for the names and contact details of any Aboriginal stakeholders who may hold cultural knowledge of the Sutherland area. Artefact Heritage wishes to advise that incorrect contact details were provided for the proponent. Please find below the correct contact details:

Tim Shoolman
Senior Project Director
Health Infrastructure
tim.shoolman@health.nsw.gov.au

Artefact Heritage apologises for any inconvenience that this may have caused and asks that you update your records with the proponent's correct contact details.
Please direct all consultation queries directly to:

Ryan Taddeucci
Senior Heritage Consultant
Artefact Heritage
0423 381 482
ryan.taddeucci@artefact.net.au

Apologies again for any inconvenience or confusion that this may have caused.

Kind Regards,

Subject: Re: The Sutherland Hospital Operating Theatre Upgrade (TSHOTUP): Aboriginal Cultural Heritage Assessment

15 October 2020

Heritage NSW

Re: The Sutherland Hospital Operating Theatre Upgrade (TSHOTUP): Aboriginal Cultural Heritage Assessment

Health Infrastructure (the proponent) is proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres. The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds. The proponent will be making an application to the Minister of Planning for the project to be considered State Significant Development (SSD).

Artefact Heritage has been engaged to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for the project in accordance with the 'Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW' (OEH 2011). Preparation of the ACHAR will include consultation with Registered Aboriginal Parties (RAPs) in accordance with the 'Aboriginal cultural heritage consultation requirements for proponents 2010' (Department of Environment Climate Change and Water (DECCW) 2010).

In accordance with Section 4.1.6 of the consultation requirements, please find below a list of Registered Stakeholders for the project.

There are 8 RAPs for the project.

- A1 Indigenous Services
- Barking Owl Aboriginal Corporation
- Didge Ngunawal Clan
- Kamilaroi Yankuntjatjara Working Group
- Thoorga Nura
- Wailwan Aboriginal Group
- Yulay Cultural Services
- Butucarbin

Also included is a copy of the published Step 4.1.3 advertisement and letter providing an invitation to register interest in the project. The registration of interest letters were issued on 6 August 2020 with registration requested by 20 August 2020. The advertisement was placed in the Sutherland Shire Leader and St George Leader on Wednesday 2 September 2020 with a request to register by 16 September 2020. Please note that the letter and advertisement contained erroneous proponents contact details, an update with the correct details was subsequently issued. (Appendix A)

If you require any additional information, please do not hesitate to contact me.

Yours sincerely,

Gareth Holes
Heritage Consultant
Artefact Heritage Services Pty Ltd
Gareth.holes@artefact.net.au

Appendix A: Advertisement and Letters

**Aboriginal Cultural Heritage Assessment
– Invitation to Register an Interest**

On behalf of Health Infrastructure (the proponent), Artefact Heritage is undertaking an Aboriginal cultural heritage assessment of the Sutherland Hospital (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519), in advance of a proposed operating theatre upgrade. The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds. The proponent's contact details are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

The project will be assessed under the Environmental Planning and Assessment Act 1979 as a State Significant Development and will not require an Aboriginal Heritage Impact Permit under the National Parks and Wildlife Act 1974.

The proponent is inviting Aboriginal groups and individuals who hold cultural knowledge relevant to determining the significance of Aboriginal objects and/or places in the locality to register an interest in a process of community consultation with the proponent regarding the proposed activity. The purpose of community consultation is to assist the proponent in the preparation of the Aboriginal cultural heritage assessment report for inclusion in an Environmental Impact Statement.

Please register your interest in the project by 16 September 2020 by contacting:

Gareth Holes
Artefact Heritage, Suite 56, Jones Bay Wharf,
26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

Please note that the consultation guidelines require the proponent to provide details of registered Aboriginal parties to Heritage NSW, Department of Premier and Cabinet (DPC) and the La Perouse Local Aboriginal Land Council. In your response could you please advise if you would not like your details to be provided.

[company]
[Name here]
[Address here]

Dear Sir or Madam,

Re: Section 4.1.2 – Identification of Interested Aboriginal Parties – Proposed Development, Sutherlands Hospital

Health Infrastructure (the proponent) are proposing to increase the operating capacity of The Sutherland Hospital (TSH) (Lot 1 DP432283, Lot 1 DP398975 and Lot 1 DP119519) from five to eight theatres. The purpose of the proposal is to meet increasing demand from an aging population with an associated increase in chronic and complex diseases in the Sutherland Shire and its surrounds.

An application will be made to Minister of Planning for the proposed works to be considered State Significant Development (SSD) and thus will be assessed under the *Environmental Planning and Assessment Act 1979*. An Environmental Impact Statement (EIS) will be prepared for the project. Health Infrastructure has engaged Artefact Heritage Services Pty Ltd (Artefact Heritage) to complete an Aboriginal Cultural Heritage Assessment Report (ACHAR) for the EIS.

Artefact Heritage, on behalf of the proponent, wishes to consult with any Aboriginal persons or organisations that hold cultural knowledge relevant to determining the significance of Aboriginal objects and places in the Sutherland Shire area. The purpose of community consultation is to assist in the preparation of an ACHAR for the proposed development.

Contact details for the proponent are:

Tim Schoolman
Senior Project Director
Health Infrastructure
tim.schoolman@health.nsw.gov.au
0412 739 836

In line with the relevant consultation guidelines, I am writing to you to request the names and contact details that your organisation has for Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or places in the suburb of Sutherland Shire. Please forward any information that you have before **20 August 2020 to:**

Gareth Holes
Artefact Heritage
Suite 56, Jones Bay Wharf

26-32 Pirrama Road Pyrmont NSW 2009
or email: gareth.holes@artefact.net.au

If you require any additional information, please don't hesitate to contact me.

Kind Regards,

Gareth Holes
Heritage Consultant

To Whom It May Concern:

On 6 August 2020, Artefact Heritage issued a request for the names and contact details of any Aboriginal stakeholders who may hold cultural knowledge of the Sutherland area. Artefact Heritage wishes to advise that incorrect contact details were provided for the proponent. Please find below the correct contact details:

Tim Shoolman
Senior Project Director
Health Infrastructure
tim.shoolman@health.nsw.gov.au

Artefact Heritage apologises for any inconvenience that this may have caused and asks that you update your records with the proponent's correct contact details.
Please direct all consultation queries directly to:

Subject: Automated Response

Heritage NSW

Thank you for your email to Heritage NSW, Department of Premier and Cabinet. We will respond to your email as soon as possible.

Coronavirus (COVID 19)

Given the rapid spread of coronavirus (COVID-19) Heritage NSW has taken steps to protect the safety, health and wellbeing of our staff, partners and communities. We have implemented a number of safeguards that meet official Australian Government COVID-19 guidelines. Whilst our offices remain open, we have well established flexible working arrangements for our teams across NSW, and we will continue to adapt as necessary as these guidelines continue to evolve. Face-to-face meetings and field work/site visits with our customers are now subject to new rules on gatherings and social distancing measures. There may also be some short delays in processing postage in the coming weeks.

We are committed to supporting our communities during this developing situation and we thank you for your patience and understanding.

Aboriginal cultural heritage regulation is now part of Heritage NSW

From 1 July 2020 Heritage NSW began managing Aboriginal cultural heritage regulatory functions under the *National Parks and Wildlife Act 1974*. Now the government functions for the management of Aboriginal cultural heritage is within the one State government agency. All the staff that previously carried out these functions in the Department of Planning, Industry and Environment have been welcomed into Heritage NSW.

Applications

If you have submitted an application under the *Heritage Act 1977* or the *National Parks and Wildlife Act 1974*, it will first be reviewed for completeness and then allocated to the appropriate assessment team. An officer will contact you if any additional information is required. The completeness check is generally completed within 7-14 business days.

We aim to process applications within the timeframes below:

Application Type	Timeframe (Commences once an application is complete)
Section 57(2) Exemption Notification	14 days
Planning Proposals Section 139 Exceptions Section 140 Permits Section 4.55 Modifications	21 days
Integrated Development Applications	If advertised: 21 days following receipt of submissions, or advice there were no submissions, or If not advertised: 40 days
Section 60 Applications Section 65A Modifications	40 days (or 60 days if advertised)
Section 90 Aboriginal Heritage Impact Permit	60 days

State Heritage and Aboriginal Place Nominations

Nominations for listing under the *Heritage Act 1977* (State Heritage Register) must accompany a nomination form available on our website (<https://www.heritage.nsw.gov.au/protecting-our-heritage/nominate-listing-on-the-state-heritage-register/>). SHR Nominations are considered by the State Heritage Register Committee who will decide whether the nomination will proceed to the next stage of assessment.

Nominations for Aboriginal Place listings under the *National Parks and Wildlife Act 1974*, are allocated to the relevant team within 2 business days. An officer will contact you if any additional information is required. The Aboriginal Place proposal form is available on our website:

<https://www.heritage.nsw.gov.au/protecting-our-heritage/nominating-an-aboriginal-place/>

Aboriginal Cultural Heritage Conservation and Repatriation

Programs supported by Heritage NSW include the ACH Conservation and Repatriation of Aboriginal ancestors and objects. This work is managed by staff located across NSW. Enquiries into these programs are sent to the relevant team within 2 business days. One of our staff will respond to you directly. Please advise us of any requests to modify our projects or timeframes to better accommodate your needs.

A new Heritage Management System is coming!

We are working to improve our systems to make it easier for you to work with us. Early next year, we will be releasing a new Heritage Management System, which will provide:

- Improved heritage search tools, and
- The ability to submit, pay and track the progress of applications online

Further updates will be provided as work progresses.

Further information is also available at <https://www.heritage.nsw.gov.au/>

Sincerely

Premier
& Cabinet

EXECUTIVE SUMMARY

In December 2014, Health Infrastructure NSW was issued, was issued the Secretary's Environmental Assessment Requirements (SEARs) for Stage 1 of the Sutherlands Hospital Redevelopment for the new emergence Department (State Significant Development [SSD] 6847). Subsequently, Health Infrastructure NSW engaged Artefact Heritage Services Pty Ltd (Artefact Heritage) to prepare an Aboriginal Heritage Assessment for Stage 1 of the Sutherland Hospital Redevelopment to satisfy Requirement 6 of the issued SEARs. The Aboriginal Heritage Assessment found that the Stage 1 study area was of low archaeological potential and recommended that the works proceed without further archaeological investigations. Development Consent for the Stage 1 works was issued in October 2015 and works were completed in 2017.

Artefact Heritage has been engaged to complete an Aboriginal Archaeological Survey Report (ASR) for The Sutherland Hospital Operating Theatre Upgrade Project (TSHOTUP) to support a Review of Environmental Factors (REF) for additional works.

This ASR has found that no Aboriginal archaeological sites or areas of Potential Archaeological Deposit (PAD) are located within TSHOTUP study area. No areas of cultural heritage values were identified by the La Perouse LALC.

It is therefore recommended that:

- No further assessment is required as no known Aboriginal objects or areas of PAD will be impacted by the project.
- An unexpected archaeological finds policy be implemented, with the following conditions:
 - Stop work within the affected area, protect the potential archaeological find, and inform environment staff or supervisor.
 - Contact a suitably qualified archaeologist to assess the potential archaeological find.
 - If Aboriginal archaeological material is identified, works in the affected area should cease, and the NSW Heritage, Department of Premier and Cabinet (DPC) should be informed. Further archaeological mitigation may be required prior to works recommencing.
 - If human remains are found:
 - Immediately cease all work at the particular location.
 - Notify site manager and project archaeologist.
 - Notify NSW Police.
 - Notify NSW Heritage, DPC on the Environment Line on 131 555 as soon as practicable and provide available details of the remains and their location.
 - Do not recommence any work at the location until cleared.

1.0 INTRODUCTION

1.1 Background

In December 2014, Health Infrastructure NSW was issued, was issued the Secretary's Environmental Assessment Requirements (SEARs) for Stage 1 of the Sutherlands Hospital Redevelopment for the new emergence Department (State Significant Development [SSD] 6847). Subsequently, Health Infrastructure NSW engaged Artefact Heritage Services Pty Ltd (Artefact Heritage) to prepare an Aboriginal Heritage Assessment for Stage 1 of the Sutherland Hospital Redevelopment to satisfy Requirement 6 of the issued SEARs. The Aboriginal Heritage Assessment found that the Stage 1 study area was of low archaeological potential and recommended that the works proceed without further archaeological investigations. Development Consent for the Stage 1 works was issued in October 2015 and works were completed in 2017.

Artefact Heritage has been engaged to complete an Aboriginal Archaeological Survey Report (ASR) for The Sutherland Hospital Operating Theatre Upgrade Project (TSHOTUP) to support a Review of Environmental Factors (REF) for additional works.

1.2 Study area

The study area covers approximately 11.9 ha and is identified as the Sutherland Hospital (Lot 1, DP 119519 and Lot 1, DP 432283). The study area is within the Parish of Sutherland and County of Cumberland. The study area falls within the Sutherland Shire Local Government Area (LGA) and the boundaries of La Perouse Local Aboriginal Land Council (La Perouse LALC).

1.3 Description of works

The proposed works will include the following:

- Removal (or lowering) of median of Kareena Road and associated civil works for the provision of a right-hand turn into the Sutherland Hospital
- Relocation and replacement of existing in-ground services and associated civil works, including:
 - Power and comms to Seals
 - Incoming NBN, Telstra and Optus (shared corridor)
 - Cold water supply from Kareena Road (shared corridor)
 - Sewer drainage line (shared corridor)
 - Fire services supply (shared corridor)
 - Stormwater and associated works
- Replacement of glazing to western fire stairs with compliant cladding.

1.4 Study scope and objectives

The scope of this study is to undertake an Aboriginal archaeological assessment in conjunction with representatives from the La Perouse LALC. The assessment will identify Aboriginal sites or areas of Potential Archaeological Deposit (PAD) in the study area and provide recommendations in an ASR for mitigation of any proposed impacts to identified values, or where required recommendations for further assessment.

The objectives of this study are to provide an ASR which:

- Assesses the Aboriginal cultural heritage values of the study area in accordance with the Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales (Department of Environment, Climate Change and Water [DECCW] 2010a) (the Code of Practice)
- Identifies Aboriginal archaeological and cultural heritage values that may be impacted by the project
- Identifies any further investigations, and mitigation and management measures that may be required, should the project proceed.

This ASR has been undertaken in accordance with the following requirements and guidelines:

- The Code of Practice
- Due Diligence Code of Practice for the Protection of Aboriginal Objects in New South Wales (DECCW 2010b) (the Due Diligence Code of Practice).

This report includes:

- A description of the project and the extent of the study area
- An archaeological significance assessment of the study area
- A description of the statutory requirements for the protection of Aboriginal heritage
- An impact assessment for recorded Aboriginal sites and areas of archaeological potential (if any)
- Provision of measures to avoid, minimise, and if necessary, offset the predicted impacts on Aboriginal heritage values (if any).

1.5 Limitations

Only the area within the study area was surveyed for Aboriginal sites.

1.6 Aboriginal consultation

Steven Ella (Cultural Heritage Officer, La Perouse LALC) attended the survey to inform a report of findings. No particular areas of cultural significance were identified during the survey. At the time this report was prepared, the La Perouse report had not been completed.

1.7 Authors

This report was prepared by Ryan Taddeucci (Senior Heritage Consultant, Artefact Heritage) and Michael Lever (Senior Heritage Consultant, Artefact Heritage), with management input and review from Sandra Wallace (Managing Director, Artefact Heritage).

Figure 1: Location of the study area

2.0 LEGISLATIVE CONTEXT

2.1 State heritage legislation

2.1.1 *National Parks and Wildlife Act 1974*

The *National Parks and Wildlife Act 1974* (NPW Act), administered by NSW Heritage, Department of Premier and Cabinet (DPC) provides statutory protection for all Aboriginal 'objects' (consisting of any material evidence of the Aboriginal occupation of NSW), and for 'Aboriginal Places' (areas of cultural significance to the Aboriginal community).

The protection provided to Aboriginal objects applies irrespective of the level of their significance or issues of land tenure. However, areas are only gazetted as Aboriginal places if the Minister is satisfied that sufficient evidence exists to demonstrate that the location was and/or is of special significance to Aboriginal culture.

There are no gazetted Aboriginal places in the study area. All Aboriginal objects, whether recorded or not are protected under the NPW Act.

Section 86 of the NPW Act identifies that it is an offence to harm or desecrate an Aboriginal object and/or an Aboriginal place. Section 86 outlines penalty units applicable where it is identified that a person or corporation is in breach of Section 86.

The NPW Act defines harm to an object or place as any act or omission that:

- (a) destroys, defaces or damages the object or place, or
- (b) in relation to an object moves the object from the land on which it had been situated, or
- (c) is specified by the regulations, or
- (d) causes or permits the object or place to be harmed in a manner referred to in paragraph (a), (b) or (c)

A section 90 permit is the only Aboriginal Heritage Impact Permit (AHIP) available under the *National Parks and Wildlife Act 1974* and is granted by NSW Heritage, DPC. Various factors are considered by NSW Heritage, DPC in the AHIP application process, such as site significance, Aboriginal consultation requirements, Ecological Sustainable Development (ESD) principles, project justification and consideration of alternatives. The penalties and fines for damaging or defacing an Aboriginal object were increased in 2010.

2.1.2 *Aboriginal Lands Right Act 1983*

The *Aboriginal Land Rights Act 1983* (ALR Act) established Aboriginal Land Councils (at State and Local levels). These bodies have a statutory obligation under the ALR Act to:

(a) take action to protect the culture and heritage of Aboriginal persons in the council's area, subject to any other law, and

(b) promote awareness in the community of the culture and heritage of Aboriginal persons in the council's area.

The study area is within the boundary of the La Perouse LALC.

2.1.3 Environmental Planning & Assessment Act 1979

The EP&A Act establishes the framework for cultural heritage values to be formally assessed in the land use planning, development assessment and environmental impact assessment processes. The EP&A Act consists of three main parts of direct relevance to Aboriginal cultural heritage; Part 3 which governs the preparation of planning instruments, Part 4 which relates to development assessment processes for local government (consent) authorities, and Part 5 which relates to activity approvals by governing (determining) authorities.

Part 3, Division 3.4 deals with the development of Local Environmental Plans (LEPs). Planning decisions within LGAs are guided by LEPs. Each LGA is required to develop and maintain an LEP that includes Aboriginal and historical heritage items which are protected under the EP&A Act and the *Heritage Act 1977*. The study area is located within the boundaries of the Sutherland Shire Council LGA and is covered by the Sutherland Shire LEP. No Aboriginal heritage items listed on the LEP are located within the study area.

2.2 Commonwealth legislation

2.2.1 Native Title Act 1994

The main purpose of the *Native Title Act 1993* is to recognise and protect native title. Native title is the rights and interests in land and waters that Aboriginal and Torres Strait Islanders have under their traditional laws and customs.

The following list is indicative of the type of land, which might be subject to native title:

- Vacant Crown land and any other public or Crown lands including oceans and inland waterways, beaches and foreshores, State forests, national parks and public reserves
- Pastoral leases
- Land held by government agencies
- Land held in trust for Aboriginal communities.

Under the amended *Native Title Act 1993*, Native Title is extinguished by the following:

- Private freehold land, valid grants of private freehold land or waters
- Residential, commercial or exclusive possession leases
- Mining dissection leases
- Community purpose leases (e.g. religious, sporting or charitable purposes)
- Scheduled interests that give exclusive possession
- Public works (e.g. schools, public amenities, hospitals etc.).

Section 24KA of the *Native Title Act 1993*, requires that native title claimants are notified of any 'future act' which may result in a change in land use for Crown lands affected by claims. 'Future act' is defined in section 233 of the Act as a proposed activity or development on land and/or waters that may affect native title, by extinguishing (removing) it or creating interests that are inconsistent with the existence or exercise of native title. If after one month there was no response, then the proponent will be deemed to have fulfilled their obligations under the Act.

A search of the National Native Title Tribunal database was completed on 7 July 2020. There are no Native Title claims currently registered in the study area.

2.2.2 *Environment Protection and Biodiversity Conservation Act 1999*

The *Environment and Heritage Legislation Amendment Act (No.1) 2003* amends the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) to include 'national heritage' as a matter of National Environmental Significance and protects listed places to the fullest extent under the Constitution. It also establishes the National Heritage List (NHL) and the Commonwealth Heritage List (CHL).

The *Australian Heritage Council Act 2003* (AHC Act) establishes a new heritage advisory body - the Australian Heritage Council (AHC), to the Minister for the Environment and Heritage and retains the Register of the National Estate (RNE).

The *Australian Heritage Council (Consequential and Transitional Provisions) Act 2003* repeals the *Australian Heritage Commission Act 1975*, amends various Acts as a consequence of this repeal and allows the transition to the current heritage system.

Together the above three Acts provide protection for Australia's natural, Indigenous and non-Indigenous heritage. The new features include:

- A new NHL of places of national heritage significance
- A new CHL of heritage places owned or managed by the Commonwealth
- The creation of the AHC, an independent expert body to advise the Minister on the listing and protection of heritage places
- Continued management of the RNE.

A summary of register searches is outlined below:

- No items listed on the NHL are located within the study area
- No items listed on the CHL are located within the study area
- No items listed on the RNE are located within the study area.

2.2.3 *Aboriginal and Torres Strait Islander Heritage Protection Act 1984*

The *Commonwealth Aboriginal and Torres Strait Islander Heritage Protection Act 1984* (ATSIHP Act), deals with Aboriginal cultural property (intangible heritage) in a wider sense. Such intangible heritage includes any places, objects and folklore that 'are of particular significance to Aboriginals in accordance with Aboriginal tradition'. These values are not currently protected under the NPW Act.

There is no cut-off date and the ATSIHP Act may apply to contemporary Aboriginal cultural property as well as ancient sites. The ATSIHP Act takes precedence over state cultural heritage legislation where there is conflict. The Commonwealth Minister who is responsible for administering the ATSIHP Act can make declarations to protect these areas and objects from specific threats of injury or desecration. The responsible Minister may make a declaration under Section 10 of the Commonwealth Act in situations where state or territory laws do not provide adequate protection of intangible heritage.

Where an Aboriginal individual or organisation is concerned that intangible values within the proposal are not being adequately protected, they can apply to the Minister for a declaration over a place.

No intangible places were identified during this assessment.

3.0 ENVIRONMENTAL CONTEXT

The environmental context of the study area is to assist in the prediction of:

- The potential of the landscape over time to have accumulated and preserved Aboriginal objects
- The ways Aboriginal people have used the landscape in the past with reference to the presence of resource areas, surfaces for art, other focal points for activities and settlement
- The likely distribution of the material traces of Aboriginal land use based on the above.

3.1 Soils and geology

Soils across the study area consist of the Gymea and Blacktown soil landscape (OEH 2015). The Gymea soils are shallow to moderately deep (0.3-1 m) yellow earths and earthy sands on crests, siliceous sands on benches, and leached sands along drainage lines. The Blacktown soils are shallow to moderately deep (>1 m) hard-setting mottled texture contrast soils, red and brown podzolic soils on crests grading to yellow podzolic soils on lower slopes and in drainage lines.

The geology underlying the hospital precinct consists of the Hawkesbury Sandstone and Shale laminate formation. Hawkesbury Sandstone underlies the southern half of Sutherland Hospital and is characterised by medium to coarse-grained quartz sandstone, very minor shale and laminate lenses. The Shale laminate deposit underlies the northern half of Sutherland hospital and is characterised by claystone, siltstone, and laminite (shale lenses) (NSW Department of Resources 1985).

The local topography consists of undulating to rolling rises and low hills on Hawkesbury Sandstone. Local relief 20-80 m, slopes 10-25%. Broad convex crests, moderately inclined side slopes with wide benches, localised rock outcrops on low broken scarps. The sandstone foreshores along the Hacking and Georges rivers have weathered into overhangs that allowed for Aboriginal inhabitants of the region to take shelter from the elements and carry out various activities including but limited to sleeping, eating, camping and sometimes burial. These rocky foreshores are often fringed by mud and sand flats.

3.2 Hydrology

The study area is situated on a broad high crest that slopes south toward Yowie Bay and into the Hacking River catchment and gently to the north toward the Georges River catchment.

The Hacking River has cut a course through foreshores of Triassic Hawkesbury sandstone formations which rise to steep escarpments around the multiple headlands along its course. The meandering tributaries leading to the river from the west converge south of the suburb of Grays Point and then snake westwards as the Hacking River. The heads of the Hacking River are found between Cronulla to the north and Bundeena to the south.

The Georges River rises on the western slopes of the Illawarra range south of Appin and meanders for 96 km to Botany Bay where the river mouth is adjacent to Dolls Point (Lawrence et al 1999, 121). Tributaries that converge into the Georges River and the wider catchment include but are not limited to: Prospect Creek, Williams Creek, Yeramba Lagoon, Salt Pan Creek, Little Salt Pan Creek, Woronora River, Forbes Creek and Boggywell Creek (Dallas 2004, 16).

3.3 Vegetation

The vegetation within the study area would have originally comprised a combination of Sydney Coastal Dry Sclerophyll Forest and Sydney Coastal Heaths (Keith 2004). The Sydney Dry Sclerophyll Forest grows on sandstone landscapes in areas below 700 m elevation, where average rainfall varies from 1 – 1.3 m (Keith 2004, 146). This vegetation type encompasses a wide range of related forest and woodland communities. The eucalypt canopy includes Sydney red gum, red bloodwood and Sydney peppermint, brown stringybark, broadleaved scribbly gum and old man banksia (Keith 2004, 146). The prominent and diverse sclerophyll shrub understory is shorter and more open on ridges than in gullies, while the open ground layer is dominated by sclerophyll sedges.

The region surrounding the study area would have provided an abundance of native animals. Mammals such as kangaroos and wallabies and arboreal mammals such as possums can be used as a food source and for tool making. For example, tail sinews are known to have been used as a fastening cord, whilst 'bone points' which would have functioned as awls or piercers are an abundant part of the archaeological record (Attenbrow 2010, 118). Ethnographic observations of early European settlers noted that Aboriginal people used a variety of animal parts, such as claws, talons, bone, skin, teeth, shell, fur and feathers for a variety of tools and non-utilitarian functions. The nearby coastline would have provided an abundance of marine resources, including eels, fish, shellfish and birds. In summary, the study area would have provided a variety of resource and suitable climatic conditions for year round occupation by traditional Aboriginal groups inhabiting the area.

Aboriginal communities living within the Sutherland Shire would have had access to an abundance of food resources. Central to their diets would have been the resources gathered from the estuarine and freshwater Georges and Hacking Rivers along with their associated tributaries. Archaeological deposits from middens in the area have shown that species consumed by local Aboriginal groups were snapper and bream, along with to a lesser extent, flathead, whiting, groper, mullet, wrasse, and leatherjacket (Turbet 2001, 31; Attenbrow 2002, 65). Midden excavations near the Georges River reveal that a variety of shellfish and crustacean were procured and utilised by local Aboriginal groups, these included rock oysters, mud oysters, cockles, mussels, spiny oysters, winks, chamas and horned shells, abalone, limpets, Hercules whelks, periwinkles, nerites and pippies.

The diets of Aboriginal communities in this region would not have been limited to sea or river foods, as animal bones recorded in middens in the Royal National Park and at Mill Creek include food species such as bandicoot, possum, wallaby, potoroo, water rat, snake, skink and lizard (Turbet 2001, 32). Smaller animals, insects, seeds, berries and fruits were collected to supplement the protein rich meats and would have enabled a varied diet to be maintained (Dallas 2004, 41).

3.4 Historical land use history

After the British colony at Sydney Cove was established in 1788, the headlands around Botany Bay were slow to be settled by Europeans. The territory that was to become the modern day Sutherland Shire was separated from the Sydney and St George District by the Georges River and Botany Bay. This physical barrier combined with tense relations between the Aboriginal peoples of the region and Europeans, significantly hindered the expansion of European activity south of the Georges River (Larkin 1998, 10).

By 1856 land within the Sutherland Shire was released for sale by the Crown. John Connell Junior purchased several large parcels of property in the Caringbah/Burraneer Bay areas. His nephew John Connell Laycock did the same. By 1860 Thomas Holt's era in the Sutherland Shire began, following the bankruptcy of John Connell Laycock. Thomas Holt's vast estate began to be subdivided around 1900 and these smaller parcels were commonly used to grow fruit or raise poultry. Prior to the First World War Caringbah had been known as Highfield. The establishment of the 'Caringbah' Post Office

in 1912 and the continual use of that name by the residents effectively displaced that of Highfield to become the suburb's name (Hutton Neve 2000, 9).

From the 1940s a campaign was made for the development of the Sutherland District Hospital. By 1955 the foundation stone for the Sutherland Hospital was laid and construction was completed on 2 April 1958. Numerous additions were made to the original four storey bow-tie hospital design throughout the following decades. By the early 2000s the building had become stretched beyond its means and the necessity of new hospital facilities saw the construction of the contemporary hospital on land behind original building. Shortly after the completion of the new hospital in 2004 the original structure (within the study area) was demolished.

4.0 ARCHAEOLOGICAL CONTEXT

4.1 Aboriginal material culture

The existing archaeological record is limited to certain materials and objects that were able to withstand degradation and decay. As a result, the most common type of Aboriginal objects remaining in the archaeological record are stone artefacts. Archaeological analyses of these artefacts in their contexts have provided the basis for the interpretation of change in material culture over time.

Technologies used for making tools changed, along with preference of raw material. Different types of tools appeared at certain times, for example ground stone hatchets are first observed in the archaeological record around 4,000 years before present (BP) in the Sydney region (Attenbrow 2010, 102). It has been argued that these changes in material culture were an indication of changes in social organisation and behaviour.

The Eastern Regional Sequence was first developed by McCarthy in 1948 to explain the typological differences he was seeing in stone tool technology in different stratigraphic levels during excavations such as Lapstone Creek near the foot of the Blue Mountains (McCarthy 1948). The sequence had three phases that corresponded to different technologies and tool types (the Capertian, Bondaian and Eloueran). The categories have been refined through the interpretation of further excavation data and radiocarbon dates (Hiscock & Attenbrow 2005; JMcDCHM 2005). It is now thought that prior to 8,500 BP tool technology remained fairly static with a preference for silicified tuff, quartz and some unheated silcrete. Bipolar flaking was rare with unifacial flaking predominant. No backed artefacts have been found of this antiquity. After 8,500 BP silcrete was more dominant as a raw material, and bifacial flaking became the most common technique for tool manufacture. From about 4,000 BP to 1,000 BP backed artefacts appear more frequently. Tool manufacture techniques become more complex and bipolar flaking increases (JMcDCHM 2006). It has been argued that from 1,400 to 1,000 years before contact there is evidence of a decline in tool manufacture. This reduction may be the result of decreased tool making, an increase in the use of organic materials, changes in the way tools were made, or changes in what types of tools were preferred (Attenbrow 2010, 102). The reduction in evidence coincides with the reduction in frequency of backed blades as a percentage of the assemblage.

4.2 Aboriginal histories of the locality

Prior to the appropriation of their land by Europeans, Aboriginal people lived in small family or clan groups that were associated with territories or places. It seems that territorial boundaries were fluid, although details are not known. There is debate about the nature, territory, and range of pre-contact language groups of the Sydney region due to the serious impacts European settlement had on Aboriginal culture. More recent research indicates that Aboriginal people in the current Sydney seaboard identified as part of a large coastal population with frequent exchange and travel often over large distances (Irish 2017; Curby 2020).

Aboriginal people who inhabited the territory that would later become the Sutherland Shire belonged to two main language groups, Dharawal and Gandangarra. The Dharawal language group appears to have once extended from Kurnell to Nowra in the south, and west to Camden (Dallas 2004). The southern area of the Cumberland Plain, west of the Georges River, and to the southern Blue Mountains is believed to have been the territory in which the Gandangarra language was spoken. The language groups that abutted these territories were the Darug to the north and the Yuin to the south.

4.3 Aboriginal Heritage Information Management System

The locations and details of Aboriginal sites are considered culturally sensitive information. It is recommended that this information, including the AHIMS data and GIS imagery, is removed from this report if it is to enter the public domain.

An extensive search of the Aboriginal Heritage Information Management System (AHIMS) database was undertaken on 22 June 2020 (Client ID: 514296).

An area of approximately 4 km (east-west) by 4 km (north-south) was included in the search. The AHIMS search provides archaeological context for the area and identifies whether any previously recorded Aboriginal sites are located within or near the study area. The parameters of the search were as follows:

GDA 1994 MGA 56	323849mE – 327873mE 6230108mN – 6234147mN
Buffer	50 m
Number of sites	21
AHIMS Search ID	514296

A total of 21 sites were identified in the extensive AHIMS search area. The distribution of recorded sites within the AHIMS search area is shown in Figure 2. NSW Heritage, DPC lists 20 standard site features that can be used to describe a site registered with AHIMS, and more than one feature can be used for each site. The frequency of recorded site types is summarised in Table 1. For the 21 sites within the search area, 11 site features were recorded. The majority of recorded sites were either Shell (n=4, 19.05%) or Shell and Artefact (n=4, 19.05%).

Table 1: Frequency of site types from AHIMS data (AHIMS Search ID 514296)

Site type	Frequency	Percentage (%)
Art (Pigment or Engraved), Habitation Structure	1	4.76
Art (Pigment or Engraved), Shell	1	4.76
Artefact	3	14.29
Grinding Groove	1	4.76
Habitation Structure, Hearth, Shell	1	4.76
Habitation Structure, Shell	1	4.76
Potential Archaeological Deposit (PAD)	3	14.29
Potential Archaeological Deposit (PAD), Shell	1	4.76
Shell	4	19.05
Shell, Artefact	4	19.05

Site type	Frequency	Percentage (%)
Shell, Artefact, Burial	1	4.76
Total	21	100.00

The nature and location of the registered sites is a reflection of the past Aboriginal occupation from which they derive, but is also influenced by historical land-use, and the nature and extent of previous archaeological investigations. Although Aboriginal occupation covered the whole of the landscape, the availability of fresh water, and associated resources, was a significant factor in repeated and long-term occupation of specific areas within the landscape. Certain site types, such as culturally modified trees, are particularly vulnerable to destruction through historical occupation, while others, such as stone artefacts, are more resilient.

There is a particularly high density of sites around Gynea Bay, 2 km southwest of the study area, with nine sites located around the fringe of the small bay and three further sites located along Alcheringa Creek which drains into the bay from the north.

The four closest registered sites to the study area are located approximately 1 km from the study area, along the sandstone shoreline of Yowie Bay. There is a cluster of three sites recorded by Mary Dallas that are identified as PADs. These three are located on Matson Crescent on the northern shoreline of the western fork of Yowie Bay. The other site recorded as a Shell and Artefact is located within Kareena Park on the western shore of Yowie Bay (Figure 3).

The overall spatial patterning of sites indicate that most sites are situated outside of the developed areas; located within surrounding bushland and relatively under-developed local reserves with particular focus towards waterways and coastlines.

Figure 2: Extensive AHIMS search results

Figure 3: AHIMS sites within the vicinity of the study area

4.4 Previous archaeological work

Mary Dallas Consulting Archaeologists (2002) – Sutherland Shire Council Aboriginal Cultural Heritage Study.

Mary Dallas Consulting Archaeologists (2002) conducted a cultural heritage study of the Sutherland Shire Council LGA focusing on the Port Hacking Catchment (excluding Royal National Park but including Maianbar and Bundeena) and the Kurnell Peninsula to inform future planning and development control processes. The study provides a historical outline for the area, a current state of knowledge about Aboriginal archaeological sites in the district in order to produce Archaeological Sensitivity Maps for the Kurnell Peninsula and Port Hacking.

Mary Dallas Consulting Archaeologists (2004) – Sutherland Shire Council Aboriginal Cultural Heritage Study: Georges and Woranora Rivers.

Mary Dallas Consulting Archaeologists (2004) was engaged by Sutherland Shire Council to inform future land planning and development control processes and to ensure ongoing protection and management of Aboriginal places. Focus of this study is on the western portion of the Sutherland Shire and aims to compliment the previous 2002 study (above) which covered the eastern portion within the Port Hacking catchment.

4.5 Sutherland Shire Council Archaeological Potential

Sutherland Shire Council has generated online mapping of Aboriginal archaeological sensitivity, which identified where Aboriginal sites are more likely to be present (SHC 2014). The areas have been divided into four categories:

- **High Archaeological sensitivity (brown)** areas are generally along the foreshore and rivers/creeks. These are the areas where there is the greatest probability of an Aboriginal object being identified.
- **Medium Archaeological sensitivity (yellow)** areas are areas where there is some probability of an Aboriginal object being identified.
- **Low Archaeological sensitivity (green)** areas are areas where this is a low probability of an Aboriginal object being identified.
- **Disturbed land (white)** is generally urbanized, industrialized areas which have been highly disturbed and there is no original land surface or subsurface.

The study area is situated in a small pocket of highly disturbed land (white) within a broader landscape of low archaeological potential (green) (Figure 4).

Figure 4: Archaeological sensitivity within study area in red. Source. Sutherland Shire Council

4.6 Predictive model

Predictive models are important and provide assessments on the most likely areas of archaeological potential within a given subject site. These models also indicate the likely types of archaeological evidence, if present, with a given locations and / or subject site.

The predictive model comprises a series of statements about the nature and distribution of evidence of Aboriginal land use that is expected in the study area. These statements are based on the information gathered regarding:

- Landscape context and landform units.
- Ethno historical evidence of Aboriginal land use.
- Distribution of natural resources.
- Results of previous archaeological work in the vicinity of the study area.

Predictive statements are as follows:

- Low density artefact scatters, isolated finds will be the most likely Aboriginal site type.
- Aboriginal sites will be located in areas of least ground disturbance.

The potential for Aboriginal sites is reduced by the high levels of ground surface disturbance across the study area.

Rock shelters and grinding features are unlikely to be present, as the study area has been previously impacted. Shell deposits are unlikely to be located within the study area, as it is elevated land that is a significant distance from the nearest waterline. Scarred trees are unlikely to be present as almost all original vegetation has been cleared from the study area. Areas of PAD would not be identified across steep slopes and areas that had been previously disturbed.

5.0 ARCHAEOLOGICAL SURVEY

5.1 Aims

The study area is located within a developed, urban environment. Therefore, this survey did not aim to identify or determine the extent of any areas of PAD. The aims of the archaeological survey were to:

- Cover the entire study area and to include all areas that will potentially be impacted by the proposed works.
- Record the landform, general soil information, surface conditions and vegetation conditions encountered during the survey and how these impact on the visibility of objects.
- Record any Aboriginal objects observed during the survey.
- Identify areas of disturbance which may have impacted the presence of intact soils and archaeological features.
- Collect information to ascertain whether further archaeological investigations are required.

5.2 Timing and personnel

An archaeological survey was undertaken on 6 July 2020. The survey was supervised by Ryan Taddeucci (Senior Heritage Consultant, Artefact Heritage) with Sophie Barbera (Heritage Consultant, Artefact Heritage), Steph Rossi (Assistant Project Manager, CBRE Group) and Steven Ella (Cultural Heritage Officer, La Perouse LALC) also in attendance.

5.3 Site definition and recording

An Aboriginal site is generally defined as an Aboriginal object or place. An Aboriginal object is the material evidence of Aboriginal land use, such as stone tools, scarred trees or rock art. Some sites, or Aboriginal places can also be intangible and although they might not be visible, these places have cultural significance to Aboriginal people.

NSW Heritage, DPC guidelines state in regard to site definition that one or more of the following criteria must be used when recording material traces of Aboriginal land use:

- The spatial extent of the visible objects, or direct evidence of their location.
- Obvious physical boundaries where present, e.g. mound site and middens (if visibility is good), a ceremonial ground.
- Identification by the Aboriginal community on the basis of cultural information.

For the purposes of this study an Aboriginal site would be defined by recording the spatial extent of visible traces or the direct evidence of their location.

5.4 Survey methodology

A full coverage survey was completed within a single survey unit due to the nature of the disturbed and well defined impact area. The survey was completed on foot in accordance with the Code of Practice.

A handheld Global Positioning System (GPS) was used to track the path of the survey team and record the coordinates of survey transect. Detailed aerial maps marked with grid coordinates for the survey unit was carried by the survey team. The coordinate system projection used for all data recording was GDA94 MGA 56.

A photographic record was kept during the survey. Photographs were taken to record aspects of survey unit including disturbance and recorded Aboriginal sites. Scales were used for photographs where appropriate.

5.5 Survey coverage

A summary of survey coverage, in accordance with the Code of Practice, is outlined in Table 2 and Table 3 below.

Table 2: Survey coverage summary

Survey unit	Landform	Survey unit area (sq. m)	Visibility (%)	Exposure (%)	Effective coverage Area (sq. m)	Effective coverage (%)
1	Modified slope	119,074	0	0	0	0

Table 3: Survey landform summary

Landform	Landform Area	Effective Survey Coverage (sq. m)	% of landform effectively surveyed	Number of sites	Number of artefacts/features
Modified slope	119,074	0	0	0	0

5.6 Survey results

The study area is covered entirely by the existing buildings, access road and car park (Figures 5 – 8). No ground exposures or remnant vegetation was identified during the survey. The study area is situated on a broad flat crest with the terrain sloping away gently to the north. Evidence of land modification in the form of ground levelling around Carpark 3 was noticed during site visit. Evidence of underground utilises was identified and it is likely that the study area as been subject to major earthworks. No Aboriginal objects or areas of unsealed ground surface were identified during the survey.

Figure 5: View southeast of existing operating theatre

Figure 6: View northeast of the existing Ambulance Station

Figure 7: View south west of Carpark 3

Figure 8: View east of Carpark 3

6.0 ASSESSMENT OF ARCHAEOLOGICAL POTENTIAL

6.1 Ground disturbance

Archaeological potential is closely related to the levels of ground disturbance within a given area. However, other factors are also taken into account when assessing archaeological potential, such as whether artefacts were located on the surface, and whether the area is within a sensitive landform unit according to the predictive statements.

This assessment has identified that a large portion of the study area has been subject to past ground disturbance. *The Code of Practice for Archaeological Investigation of Aboriginal Objects in NSW* (OEH 2010) defines what comprises disturbed land:

(4) For the purposes of this clause, land is disturbed if it is has been the subject of human activity that has changed the lands surface, being changes that remain clear and observable.

This includes disturbed land via:

(c) construction of roads, trails and tracks (including fire trails and tracks and walking tracks),

(d) clearing of vegetation,

(e) construction of buildings and the erection of other structures,

(f) construction or installation of utilities and other similar services (such as above or below ground electrical infrastructure, water or sewerage pipelines, stormwater drainage and other similar infrastructure),

(h) construction of earthworks associated with anything referred to in paragraphs (a)-(g).

The study area has been subject to extensive land disturbance activities as described by the Code of Practice. A majority of the area has been disturbed via the development of existing structures, roads and subsurface utilities. The broad crest had been extensively excavated during the construction of the original 1950's hospital building, disturbing the natural soil profile. The subsequent demolition of the outdated facility and construction of the present configuration of carparks and services would have contributed further to the reduction of archaeological potential within the study area.

6.2 Analysis of archaeological potential

The archaeological potential of an area is determined by its landform, its location and the level of disturbance. Certain landforms, such as gentle slopes, are conducive to Aboriginal occupation while others, such as steep slopes, are not. The location of appropriate landforms in relation to natural resources, in particular their proximity to a permanent water source, increases levels of potential. Correlations between site location and proximity to a water source have been proven in previous archaeological investigations where the number of sites and their densities is highest in close proximity to a water source.

In areas where there is high level of disturbance however, the archaeological potential is lowered. It is unlikely that surface finds in these areas are in their original context and it is unlikely that subsurface archaeological deposits are intact. The archaeological potential of an area is rated high, moderate or low, based on all of the above considerations.

- High - Intact archaeological material is likely to be found in this area.

- Moderate - Intact archaeological material may be found in this area.
- Low - It is unlikely that intact archaeological material will be found in this area.

Based on this background information, Aboriginal site distributions in the region, and known levels of disturbance at the site, it is considered that the study area has a low potential to contain Aboriginal objects or archaeological deposits.

7.0 ANALYSIS AND DISCUSSION

7.1 Regional archaeological context

The archaeological understanding of the early Aboriginal settlement of the Sydney Basin and surrounds is constantly expanding and developing. At present, the earliest dated evidence for occupation in the Sydney area is associated with deposits on the Parramatta and Nepean Rivers, which were dated to c.25-30,000 years before present (JMCHM 2005) and 36,000 years before present (AHMS 2015). The archaeological material record provides evidence of this long occupation, but also provides evidence of a dynamic culture that has changed through time.

The existing archaeological record is limited to certain materials and objects that were able to withstand degradation and decay. As a result, the most common type of Aboriginal objects remaining in the archaeological record are stone artefacts, followed by bone and shell. There is potential for Aboriginal objects to occur across the landscape. The nature of the underlying geology and proximity of water sources to portions of the study area indicates the potential for the occurrence of artefact sites and/ or midden sites.

Stone artefacts are one of the most common types of Aboriginal objects remaining in the archaeological record. Archaeological analyses of these artefacts in their contexts have provided the basis for the interpretation of change in material culture over time. Technologies used for making tools changed, along with preference of raw material. Different types of tools appeared at certain times. It is argued that changes in material culture were an indication of changes in social organisation and behaviour.

Within the Sydney Basin, the most widely used terminology for the phases within what is currently known as the Eastern Regional Sequence are the Capertian, followed by the Early, Middle and Late Bondaian. This sequence continues to be refined by ongoing archaeological work in the region.

The Capertian comprises large, heavy stone artefacts. Tool types include uniface pebble tools, core tools, denticulate saws, scrapers, hammerstones, some bipolar and burins. The change from the Capertian to the Bondaian took place sometime after 5,000 years Before Present (BP) and is largely characterised by a shift in raw material use (and the proportions of raw materials), in addition to a developing predominance of smaller implements.

The three phases which are generally recognised within the Bondaian sequence are primarily based upon the introduction and subsequent decline of backed implements and the use of a bipolar flaking technique. Other technological innovations which are evident during the Bondaian include the introduction of ground-edge implements around 4,000 years BP and shellfish hooks during the last 1,000 years.

During the Early Bondaian, which is dated to between approximately 5,000 years BP and 2,800 years BP, the predominant raw materials for artefact manufacture appear to have been fine-grained siliceous cherts and silcretes. Features of the Capertian appear to have continued in many sites but backed and edge ground implements were also introduced.

The Middle Bondaian which dates between approximately 2,800 years BP and 1,600 years BP, displays a greater percentage of Bondi points (backed and pointed artefacts which are generally characteristic of Bondaian assemblages) to bipolar pieces. The proportion of quartz artefacts (a raw material which is frequently 'reduced' by employing bipolar techniques) appears to increase within assemblages of this time frame. Some sites have also produced edge-ground implements.

The Late Bondaian which dates from approximately 1,600 years to the present, is dominated by artefacts of quartz, although other raw materials are present. Bondi points are absent. Eloueras and bipolar pieces are predominant within assemblages of this period. Edge-ground implements are also more common. Bone and shell implements occur in some sites.

At contact, European observations of Aboriginal life around the Sydney region suggest that toolkits were fashioned largely on organic materials, such as wood, bark, palm leaves, shell and bone. The use of stone does not figure prominently within the early-European descriptions.

7.2 Local archaeological context

No Aboriginal archaeological objects or areas of PAD were identified within the study area. However, archaeological evidence indicates that Botany Bay, the Georges River and its tributaries were a focus for intensive Aboriginal occupation, due to the combination of maritime, estuarine and terrestrial resources available in the area. The terraces surrounding these waterways are likely to have functioned as camp sites from which past Aboriginal people could have exploited these resources. The survivability of this archaeological evidence is dependent on low levels of soil disturbance (from both natural and anthropogenic factors).

8.0 SIGNIFICANCE ASSESSMENT

An assessment of the cultural heritage significance of an item or place is required in order to form the basis of its management. The OEH (2011) provides guidelines for heritage assessment with reference to the Burra Charter (Australia ICOMOS 2013) and the Heritage Office guidelines (2001). OEH requires consideration that includes the following:

- Research potential: does the evidence suggest any potential to contribute to an understanding of the area and/or region and/or state's natural and cultural history?
- Representativeness: how much variability (outside and/or inside the subject area) exists, what is already conserved, how much connectivity is there?
- Rarity: is the subject area important in demonstrating a distinctive way of life, custom, process, land-use, function or design no longer practised? Is it in danger of being lost or of exceptional interest?
- Education potential: does the subject area contain teaching sites or sites that might have teaching potential?

It is important to note that heritage significance is a dynamic value.

8.1 Archaeological significance assessment

The survey did not result in the identification of any Aboriginal sites or areas of PAD. No particular areas of cultural significance were identified by the La Perouse LALC. Therefore, the study area is of no archaeological significance.

9.0 IMPACT ASSESSMENT

9.1 Proposed works

The proposed works will include the following:

- Removal (or lowering) of median of Kareena Road and associated civil works for the provision of a right-hand turn into the Sutherland Hospital
- Relocation and replacement of existing in-ground services and associated civil works, including:
 - Power and comms to Seals
 - Incoming NBN, Telstra and Optus (shared corridor)
 - Cold water supply from Kareena Road (shared corridor)
 - Sewer drainage line (shared corridor)
 - Fire services supply (shared corridor)
 - Stormwater and associated works
- Replacement of glazing to western fire stairs with compliant cladding.

9.2 Potential impacts to Aboriginal heritage

No Aboriginal places or objects were identified within the study area. Due to the highly disturbed nature of the study area, intact archaeological deposits are not likely to be present below the ground surface. Therefore, the project is unlikely to impact any Aboriginal heritage items or places, or potential Aboriginal archaeology.

As no impacts to Aboriginal sites, places or archaeology associated with the project have been identified, direct and/or indirect impacts (including cumulative impacts and visual impacts) to Aboriginal places or objects are considered unlikely.

Figure 9: Proposed design

10.0 MANAGEMENT MEASURES

The proposal is unlikely to impact any Aboriginal objects therefore no further archaeological investigation or mitigation is required.

An unexpected finds policy would be implemented in the event of any unexpected finds of Aboriginal sites, objects or archaeological deposits being identified during construction.

An unexpected archaeological finds policy would involve the following actions:

- Stop work within the affected area, protect the potential archaeological find, and inform environment staff or supervisor.
- Contact a suitably qualified archaeologist to assess the potential archaeological find.
- If Aboriginal archaeological material is identified, works in the affected area should cease, and NSW Heritage, DPC should be informed. Further archaeological mitigation may be required prior to works recommencing.
- If human remains are found:
 - Immediately cease all work at the particular location.
 - Notify site manager and project archaeologist.
 - Notify NSW Police.
 - Notify NSW Heritage DPC on the Environment Line on 131 555 as soon as practicable and provide available details of the remains and their location.
 - Do not recommence any work at the location until cleared.

11.0 RECOMMENDATIONS

The following recommendations were based on consideration of:

- Statutory requirements under the National Parks and Wildlife Act 1974.
- The requirements of the relevant guidelines: Code of Practice (DECCW 2010a), and the Due Diligence Code of Practice (DECCW 2010b).
- The results of the background research and archaeological survey results.
- The currently unknown nature of impacts of the proposal.

It was found that no Aboriginal archaeological sites or areas of PAD are located within the study area. No areas of cultural heritage values were identified by the La Perouse LALC.

It is therefore recommended that:

- No further assessment is required as no known Aboriginal objects or areas of PAD will be impacted by the project.
- An unexpected finds policy would be implemented, as outlined in Section 9.2.
