

16 July 2021

David Read

Avid Project Management Pty Ltd

David.read@avidpm.com.au

Hi David,

Further to our meeting on site at the Newcastle Jockey Club on Tuesday 13 July, please find following Pest Management recommendations for the proposed New Stables corner Darling & Chapman Streets Broadmeadow.

PEST MANAGEMENT RECOMMENDATIONS

- RODENT CONTROL

It is a recommendation of industry standards and H.A.C.C.P that Rodent Bait Stations should be placed at intervals of no more than 9 metres. Advanced Pest Control Australia recommend a monthly service be carried out in which we inspect all bait stations, clean, rebait and record all activity findings, so monitoring of activity can be gauged.

- EXTERNAL WEBBING SPIDERS & COCKROACH CONTROL

Initial spray for external webbing spiders & cockroach treatment to be carried out. Advanced Pest Control Australia recommend 3 monthly maintenance programme.

- SNAKES

As requested.

If you have any questions regarding our recommendations, please do not hesitate to contact me on 0403340727.

Kind regards,

Steve Podgorelec
