Good afternoon Jenny,

Apologies for the delay in our response.

We have no further comments regarding the proposal. However, would like to refer back to our letter dated 21 July 2022 (attached). Particularly in relation to the following points:

- *In the context of future development, self-evacuation of the community should be achievable in a manner which is consistent with the NSW SES's principles for evacuation.*
- *Development must not conflict with the NSW SES's flood response and evacuation strategy for the existing community.*
- *Evacuation must not require people to drive or walk through flood water.*
- *Development strategies relying on deliberate isolation or sheltering in buildings surrounded by flood water are not equivalent, in risk management terms, to evacuation.*
- *Development strategies relying on an assumption that mass rescue may be possible where evacuation either fails or is not implemented are not acceptable to the NSW SES.*
- *NSW SES is opposed to development strategies that transfer residual risk, in terms of emergency response activities, to NSW SES and/or increase capability requirements of the NSW SES.*
- *The preferred emergency strategy for school sites prone to flooding is early closure prior to the commencement of flooding and before the start of the school day"*

Kind regards,
Elle

Hi Jenny

Thank you for your response in our request for an extension and we will endeavour to get a response to you as soon as possible.

Kind regards
Sharon Ladeira
