*Trachelospermum jasminoides*  
Star Jasmine

**GENERAL NOTES**

**PREPARATION**

**Weed eradication**

Herbicide: Eradicate weeds using environmentally acceptable methods, such as a non-residual glyphosate herbicide in any of its registered formulae, at the recommended maximum rate.  
Removal: Regularly remove, by hand, rubbish and weed growth throughout grassed, planted and mulched areas. Remove weed growth from an area 750 mm diameter around the base of the trees in grassed areas. Continue eradication throughout the course of the works and during the planting establishment period.

**Vegetative spoil**

Disposal: Remove vegetative spoil from site. Do not burn.

**PLANTING**

**Locations**

General: If it appears necessary to vary plant locations and spacings to avoid service lines, or to cover the area uniformly, or for other reasons, give notice.

**Planting conditions**

Do not plant in unsuitable weather conditions such as extreme heat, cold, wind or rain. In other than sandy soils, suspend excavation when the soil is wet, or during frost periods.

**Watering**

Before planting begins, thoroughly water the trees and planting areas. Keep the areas moist during planting. Water the trees immediately after planting and thereafter as required to maintain growth rates free of stress.

**Handling**

All plants shall be handled at all times in such a manner as to prevent any damage in transit.

**Plants Set Out**

As soon as possible after delivery, the plants shall be set out in the positions for planting as indicated on the landscape layout plan, ready for inspection. The Construction manager will inspect the planting beds, set out with their full complement of plants, and will make sure minor changes of placement as necessary. Following this inspection, the landscape contractor is to immediately plant out the beds. Where all planting cannot be achieved in one day, this work will be staged.

**Planting Hole**

All species to be planted into an individual prepared hole. Each hole shall be dug with a shovel, backhoe or similar tool. Individual holes shall be excavated to suit the pot size while allowing the root system to sit flat on the excavated hole. Excavate hole to allow suitable clearance to each side of the root system. Cultivate the subsoil to 100mm below planting hole.

**Depth of Planting**

When the plant is in its final position in its hole or bed, the topsoil level of the plant root ball shall be level with the finished surface of the soil surrounding the hole or bed. Test the depth by inserting the plant, still in its container, into the hole.

**Placing**

When the hole or bed appears to be of correct size, and not before, remove the plant from the container with minimum disturbance to the root ball and place it in its final position. Root prune to ensure all circling roots have been either severed or aligned radially into the surrounding soil. Plant shall be set plumb, with the root ball set slightly below the final soil level. Compact lightly so as to minimise subsidence without compacting the backfill. Avoid mixing mulch with topsoil.

**Backfilling**

Soil shall be progressively firmed during backfilling to avoid air pockets. Backfilling shall be with Planting Soil Mix as specified to the specified depths.

**Watering**

Thoroughly water the plants before planting, immediately after planting, and as required to maintain growth rates free of stress.

**Placing mulch**

General: Place mulch to the required depth, clear of plant stems, and rake to an even surface flush with the surrounding finished levels. Spread and roll mulch so that after settling, or after rolling, it is smooth and evenly graded between design surface levels sloped towards the base of plant stems in plantation beds, and not closer to the stem than 50mm in the case of gravel mulches.

**NOTE:**  
VERIFY ALL DIMENSIONS ON SITE BEFORE COMMENCING WORK. REPORT ALL DISCREPANCIES TO LANDSCAPE ARCHITECT PRIOR TO CONSTRUCTION. FIGURED DIMENSIONS TO BE TAKEN IN PREFERENCE TO SCALED DRAWINGS. DRAWINGS MADE TO LARGER SCALES AND THOSE SHOWING PARTICULAR PARTS OF THE WORKS SHALL TAKE PRECEDENCE OVER DRAWINGS MADE TO SMALLER SCALE AND THOSE FOR GENERAL PURPOSES. ALL WORK IS TO CONFORM TO RELEVANT AUSTRALIAN STANDARDS AND OTHER CODES AS APPLICABLE TOGETHER WITH OTHER AUTHORITIES' REQUIREMENTS AND REGULATIONS. DESIGN DRAWINGS BY OTHER DISCIPLINES HAVE BEEN INCLUDED FOR COORDINATION ONLY. THIS DRAWING AND DESIGN IS SUBJECT TO COPYRIGHT AND MAY NOT BE REPRODUCED WITHOUT PRIOR WRITTEN CONSENT.
