Hello Rebecka

I refer to the Department's below email of 6 June 2022 regarding the response to submissions (RtS) raised during the public exhibition of the Environmental Impact Statement (EIS) for State Significant Development SSD-21190804 Jalco Manufacturing Facility for 'Fit-out and operation of warehouse 1 of Lot 201 in the ESR Horsley Logistics Park for Jalco Home Care Manufacturing Facility producing, storage, and distribution of household cleaning and disinfection products' at 6 Johnston Crescent, Horsley Park (Lot 201 DP 1244593) in the Fairfield City Council Local Government Area (LGA). Submissions need to be made to the Department by 19 June 2022.

Endeavour Energy has noted the following in the RtS report.

Matter for Consideration	Response
Endeavour Energy	
Endeavour Energy has no objection to the development Application.	Noted.
Endeavour Energy is urging applicants/ customers to engage with an Electrical Consultant prior to finalising plans in order to assess and incorporate any required electricity infrastructure. In doing so, the consideration can also be given to its impact on the other aspects of the proposed development. This can assist in avoiding the making of amendments to the plan or possibly the need to later seek modification of an approved development application.	An application was submitted to Endeavour Energy and connection design prepared and constructed as per Endeavour Energy requirements, which in turn, provided an adequate connection point to Lot 201. The associated Endeavour Energy project numbers for this connection are UIL5973 and UIL6193.
It is unclear how the other reports provided within the EIS have taken into consideration the electricity infrastructure required to be facilitate the proposed development.	The fit out and electricity requirements of Jalco's proposed operation have been captured in all applications to Endeavour Energy. Adequate power supply is available, and this has been confirmed via the relevant applications to Endeavour Energy.
The applicant will need to complete the connection of load process for the provision of electricity supply to the proposed development.	This has been completed. Endeavour Energy are in the process of issuing a Letter of Acceptance for the project and a Permission to Connect Letter.

As the applicant is progressing through the application for connection of load process, Endeavour Energy has no further recommendations or comments. As previously advised the applicant should also have appropriate regard to Endeavour Energy's previous submission made to the Department via email on 5 June 2011 for the Secretary's Environmental Assessment Requirements (SEARs).

Should you wish to discuss this matter, or have any questions, please do not hesitate to contact me or the contacts identified in Endeavour Energy's previous submissions in relation to the various matters. Due to the high number of development application / planning proposal notifications submitted to Endeavour Energy, to ensure a response contact by email to property.development@endeavourenergy.com.au is preferred.

Kind regards
Cornelis Duba
