OFFICIAL

Hi Rebecka,

Thank you for providing the Jalco (SSD-21190804) submission to WSA for review and comment.

Generally, comments are closed out subject to conditions being included where identified within the Response to Submissions document.

However, it is unclear from Section 5.2 / Table 6 whether there would be any impact from the vertical air emissions on prescribed airspace at the height of the OLS. Therefore it is to be confirmed by the applicant whether the proposed vertical air emissions would result in a vertical air emissions impact at the Obstacle Limitation Surface. It is also requested that a condition be retained to ensure that any controlled activities require approval under the *Airports (Protection of Airspace) Regulations 1996*.

Kind regards,

Tim
