| <b>Objectives:</b> <ol style="list-style-type: none"> <li>To encourage buildings that are of architectural merit, diversity, scale and high quality built form.</li> <li>To encourage a built form that contributes to the visual amenity of the site.</li> </ol>                                                                                                                                                                                                                                                    | As demonstrated through this assessment and the wider SSDA package including the Urban Design Report at <b>Appendix E</b> , the development is considered to be of a high level of architectural merit relative to the proposed use and function of the development.                                                                                                                                                                                                                                               |
| <b>Controls:</b> <ol style="list-style-type: none"> <li>Applicants are to give consideration to optimising building orientation and siting to natural elements such as topography, wind and sunlight, energy efficiency and to maximise weather conditions for loading and unloading.</li> </ol>                                                                                                                                                                                                                     | The proposal is consistent with this control, having been designed in accordance with a detailed site analysis. This is demonstrated in the Architectural Plans at <b>Appendix A</b> .                                                                                                                                                                                                                                                                                                                             |
| <ol style="list-style-type: none"> <li>Applicants are to consider a range of fascia treatments, facade treatments, rooflines and building materials to reduce the impact of walls facing the street.</li> </ol>                                                                                                                                                                                                                                                                                                      | A number of façade treatments have been proposed as part of the development.                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <ol style="list-style-type: none"> <li>The maximum building height is 14m. Taller buildings will be permitted where it can be demonstrated that: <ul style="list-style-type: none"> <li>the proposed height is in keeping with the character of the locality;</li> <li>the building, or any part thereof, is not visually obtrusive; and</li> <li>the overall design of the development, including landscaping and building materials, reduces the impact of height and bulk of the building.</li> </ul> </li> </ol> | The proposed development complies with the 14m maximum building height control.                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <ol style="list-style-type: none"> <li>Goods, plant, equipment and other material resulting from the development are to be stored within a building or will be suitably screened from view from residential areas.</li> </ol>                                                                                                                                                                                                                                                                                        | Proposal complies.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <ol style="list-style-type: none"> <li>Development which can be viewed from residential properties will require special attention regarding the scale, form and external finishes of buildings, to reduce their visual impact.</li> </ol>                                                                                                                                                                                                                                                                            | The proposal will have a direct interface with surrounding residential properties however, there is minimal view due to slope (proposed building sits lower (8-10m) than the natural level of Bringelly and Stuart Road).                                                                                                                                                                                                                                                                                          |
| <ol style="list-style-type: none"> <li>Development should incorporate the Crime Prevention Through Environmental Design (CPTED) principles where appropriate.</li> </ol>                                                                                                                                                                                                                                                                                                                                             | The proposed development has been designed in consideration of the relevant CPTED principles, noting it is proposed in a now well-established area with highly active uses surrounding the site (including the Bunnings to the north of Skyline Terrace).                                                                                                                                                                                                                                                          |
| <ol style="list-style-type: none"> <li>Prominent elevations, such as those with a frontage to the street or public reserves, must present a building form of significant architectural and design merit.</li> </ol>                                                                                                                                                                                                                                                                                                  | The proposed southern elevation, being the elevation, which presents towards Bringelly Road, has been designed in a manner which has significant architectural and design merit. Specifically, different elevations of the building have been designed to make use of different materiality, articulation and positioning to provide for a positive presentation. It is noted that Bringelly Road sits higher than the site which presents a screening opportunity to reduce the bulk and scale of the built form. |
| <ol style="list-style-type: none"> <li>Large elevations should be articulated by structural variations and/or a blend of external finishes. Additionally, the landscape design should consider the scale of the building and where appropriate, the location of and careful selection of plants may aid in reducing the bulk and scale of the building form.</li> </ol>                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <ol style="list-style-type: none"> <li>Particular care should also be taken in: <ul style="list-style-type: none"> <li>designing roof elements; and</li> <li>locating plant and mechanical equipment including exhausts, so as to screen them from a public place.</li> </ul> </li> </ol>                                                                                                                                                                                                                            | Proposal complies. The proposed roof has been carefully designed to minimise potential impacts, and roof plant has been incorporated into the building design.                                                                                                                                                                                                                                                                                                                                                     |
| <b>2.4 External Materials and Colours</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Objectives:</b> <ol style="list-style-type: none"> <li>To encourage a high standard of contemporary architectural design, utilising quality materials and finishes appropriate to the locality.</li> <li>To ensure that new development contributes to the creation of a visually cohesive urban environment.</li> <li>To encourage the innovative use of materials.</li> </ol>                                                                                                                                   | The materials used in the proposed development are of a high standard and are appropriate within the surrounding context.                                                                                                                                                                                                                                                                                                                                                                                          |

| <b>Controls:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                   |
| 1. Fencing may be positioned along the front property boundary only if: <ul style="list-style-type: none"> <li>it is decorative fencing that has an open style appearance (metal, pool type fencing); and</li> <li>the fencing is complementary to the landscaping.</li> </ul>                                                                                                                                                                                                                                                                                  | The use of black powdercoated palisade fence to complement the whole business hub has been provided along the front boundary fence line.                          |
| 2. Solid front fences must have a maximum height of 1.2m.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Not applicable. No solid fencing is proposed.                                                                                                                     |
| 3. Front fences higher than 1.2m shall be consistent with the following: <ul style="list-style-type: none"> <li>maximum height of 2m;</li> <li>transparent; and</li> <li>dark colour.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                | The proposed front fence is a 2.7m high black palisade design, and will be screened via the proposed landscaping in this area.                                    |
| 4. Fences should not prevent surveillance by the building's occupants of the main open or communal areas within the property or street frontage.                                                                                                                                                                                                                                                                                                                                                                                                                | The proposal complies with this control.                                                                                                                          |
| 5. Chain wire, metal sheeting, brushwood or electric fences are not permitted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Not applicable.                                                                                                                                                   |
| 6. Cyclone fencing may be used on side and rear boundaries which do not front roads.                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Not applicable.                                                                                                                                                   |
| 7. Fencing required for acoustic mitigation purposes shall be suitably screened with landscaping or the like.                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Not applicable.                                                                                                                                                   |
| <b>2.8 Signage and Lighting</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                   |
| <b>Objectives:</b> <ol style="list-style-type: none"> <li>To promote an integrated design approach to all signage in character with the locality, and it's architectural and landscape features.</li> <li>To prevent the proliferation of advertising signs.</li> <li>To prevent distraction to motorists and minimise the potential for traffic conflicts.</li> </ol>                                                                                                                                                                                          | The proposed development includes a coordinated approach to the provision of future signage at the site, which is consistent with the objectives of this control. |
| <b>Controls:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                   |
| 1. All advertising is to be: <ul style="list-style-type: none"> <li>constructed of high quality, durable materials;</li> <li>considered in conjunction with the design and construction of buildings; and</li> <li>contained wholly within the site.</li> </ul>                                                                                                                                                                                                                                                                                                 | No advertising is proposed as part of this application.                                                                                                           |
| 2. In the case of strata titled factory units: <ul style="list-style-type: none"> <li>each factory unit development should have a directory board within or near the landscape area listing each firm and their unit number within the complex;</li> <li>subject to compliance with the exempt development requirements; and</li> <li>each firm is entitled to have: <ul style="list-style-type: none"> <li>a sign located on or over the door of the unit so occupied; and</li> <li>another sign placed on the face of the building(s).</li> </ul> </li> </ul> | Not applicable. The proposal will not be strata titled.                                                                                                           |
| 3. Lighting must be provided to external entry path, common lobby, driveway and car park to a building using vandal resistant, high mounted light fixtures.                                                                                                                                                                                                                                                                                                                                                                                                     | The proposal will confirm compliance as part of detailed design.                                                                                                  |
| 4. The lighting in car park areas must conform to AS 1158.1, 1680 and 2890.1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | The proposal will confirm compliance as part of detailed design.                                                                                                  |
| 5. External lighting must give consideration to the impact of glare on adjoining residents.                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Lighting is to be positioned to shine inwards onto the site, minimising light spillage onto adjoining properties.                                                 |

| Control                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Compliance                                                                                                                                                                                                                                                                                                                                                                                   |

| 3.2 Site Access and Movement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                       |
| <p><b>Objectives:</b></p> <p>1. To ensure the safe and efficient movement of vehicles and pedestrians within a development site.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <p>The proposal has been designed to ensure that the movement of vehicles and pedestrians can be safely accommodated.</p>                             |
| <p><b>Controls:</b></p> <p>1. Truck access, manoeuvring and loading areas are to be separated from car parking areas.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>The truck access, manoeuvring and loading areas will be separate from the proposed car parking area, including separate entry and exit points.</p> |
| <p>2. Development shall, where appropriate, be designed to:</p> <ul style="list-style-type: none"> <li>allow all vehicles to either leave or enter the site in a forward direction;</li> <li>accommodate heavy vehicle parking and manoeuvring areas;</li> <li>avoid conflict with staff, customer and visitor vehicular movements; and</li> <li>ensure satisfactory and safe operation with the adjacent road system.</li> </ul>                                                                                                                                                                                                                        | <p>The proposal complies with each of these controls. Trucks will be able to enter and leave the site in a forward direction.</p>                     |
| <p>3. In determining access, servicing and car parking requirements, Council will take the following into consideration:</p> <ul style="list-style-type: none"> <li>the location, type and scale of the proposed development;</li> <li>the compatibility of the location and design of the car park with adjoining properties;</li> <li>the Traffic Authority Guidelines and comments of the Local or Regional Traffic Committee(s); and</li> <li>the potential for the land use to generate heavy vehicle movements.</li> </ul> <p>Full details of the volume, frequency and type of vehicle movements shall be submitted with future applications.</p> | <p>Compliant. A Transport Assessment has been prepared for the proposed development and is included with the EIS at <b>Appendix H</b>.</p>            |
| <p>4. Where the nature of the development will attract clients/visitors to the site, the following elements shall be included in the car park design:</p> <ul style="list-style-type: none"> <li>the internal (vehicular) circulation network is to be free of disruption to</li> </ul>                                                                                                                                                                                                                                                                                                                                                                  | <p>N/A – The nature of the development is unlikely to attract many clients/visitors.</p>                                                              |

| Control                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Compliance                                                                                                                                                                                                                                                                                                                     |                                  |                     |                                                                                                         |                        |                                                                                                                                                                                                                                                                                                                                |                                                                                  |
