**SHOALHAVEN CITY COUNCIL – MAJOR PROJECT 09_0088 – MIXED USE SUBDIVISION,
WEST CULBURRA**

Dear Madam

Reference is made to your email dated 24 April 2014 regarding the subject project application forwarded to Roads and Maritime Services (RMS) for consideration.

RMS has reconsidered its position and would accept a roundabout and the associated necessary speed reduction to 80km/h to facilitate access to the development subject to the following:

- The proponent providing a design which demonstrates that appropriate sight distance will be available to roundabout prior to determination of the project. Given that the roundabout will be located immediately after the transition from the 100km/h speed zone, RMS considers that the design speed for sight distances needs to be 10km/h above the intended posted limit. Therefore sight distance will need to comply with Austroads standards for a 90km/h speed environment. This includes appropriate sight distance to the layout of the roundabout for both eastbound and westbound vehicles. The location of the roundabout and demonstration of compliance with sight distance requirements would need to be based on survey and design.
- The proponent identifying, and committing to a suite of measures on Culburra Road prior to determination of the project to reinforce the change of environment from a rural environment to an urban environment. This would need to commence on the eastbound appropriate to the roundabout and continue through the roundabout into the existing township.

RMS would be willing to meet with the proponent and Council further to discuss the above matters. If you have any questions please contact Chris Millet on 4221 2570.

Yours faithfully

Adam Berry
