INTRODUCTION

Landscape Statement

The site is characterised by an existing one storey industrial buildings and large established trees along Bourke Road. As Alexandria develops it is becoming a precinct that incorporates a varied range of uses, including health, technology and education.

Two mature Broad-leaved Paperbarks (Melaleuca quinquenervia) and a young Brush Box (Lophostemon confertus) are located within the existing verge in front of the site. The tree to the south (Paperbark) is proposed to be removed to facilitate the access road into the new development, in accordance with Council's laneway design. To mitigate the loss of this tree there are four new trees (Eleocarpus eumundi) proposed along the orientation site boundary in the deep soil zone. This strategy will help increase shade along the street, improving comfort levels on site and softening the front facade of the building. These trees will provide habitat for and attract nectar and seed-eating birds. Planting extends from beneath the street trees towards the building, with an elevated planting area, providing further buffer to the street. These planted areas include a mix of native plants, sandstone boulders and timber logs to provide habitat for small birds, insects and other animals - this will all benefit the local urban ecology. The softscape areas will assist with onsite infiltration of stormwater.

A seating area abuts the arrival space and provides a shaded, green retreat for visitors to rest.

The local active transport infrastructure of the separated cycleway along Bourke Street and extends into this site with end of trip facilities provided on level one of the building, promoting healthy and active living in line with Greener Places design framework.

As part of this report the following documents were reviewed:

- City of Sydney's Public Domain Manual,
- Sydney Streets Code 2021
- Sydney Street Tree Masterplan
- Sydney Streets Technical Specification
- Inclusive and Accessible Public Domain Policy and Guidelines
- Sydney Lights: Public Domain Design Code.
- Greener Place

Development Description

Development consent is sought for a concept proposal for the 'Alexandria Health Centre' comprising medical centre uses and anchored by a mental health hospital. Specifically, the application seeks concept approval for:

- In principle arrangements for the demolition of existing structures on the site and excavation to accommodate a single level of basement car parking (partially below ground level).
- A building envelope to a maximum height of 45 m (RL 53.41) (including architectural roof features and building plant). The podium will have a maximum height of RL 28.41
- A maximum gross floor area of 11,442.20 sgm, which equates to a maximum FSR of 3.85:1. The total FSR will comprise a base FSR of 2:1, a community infrastructure bonus FSR of 1.5:1 and a 10% design excellence bonus FSR (subject to a competitive design alternatives process).
- Indicative use of the building as follows:
- Mental health hospital at levels 5-7.
- Medical centre uses at levels 1-4; and
- Ground level reception/lobby and pharmacy.
- Principles for future vehicular ingress and egress from Bourke Road along the site's western frontage.
- Subject to agreement on a public benefit offer submitted with this application, the proposal includes the indicative dedication of the following land to Council as envisaged by the Draft Sydney Development Control Plan 2012 - Southern Enterprise Area Amendment (Draft DCP):
 - A 2.4m wide strip of land along the site's frontage to Bourke Road for the purpose of footpath widening
- A 3m wide lane along the site's western boundary contributing towards a 6m wide lane (it is noted that the concept proposal will allocate an additional 3 m strip of land within the site along the western boundary to enable two-way vehicle movement into and out of the site).
- 3m wide lane along the site's southern boundary, contributing towards a 9m wide lane.
