GLOSSARY

Term	Definition
Aboriginal cultural heritage	The tangible (objects) and intangible (dreaming stories, legends and places) cultural practices and traditions associated with past and present-day Aboriginal communities.
Aboriginal object(s)	As defined in the NPW Act, any deposit, object or material evidence (not being a handicraft made for sale) relating to the Aboriginal habitation of the area that comprises NSW, being habitation before or concurrent with (or both) the occupation of that area by persons of non-Aboriginal extraction, and includes Aboriginal remains.
Aboriginal place	As defined in the NPW Act, any place declared to be an Aboriginal place (under s.84 of the NPW Act) by the Minister administering the NPW Act, by order published in the NSW Government Gazette, because the Minister is of the opinion that the place is or was of special significance with respect to Aboriginal culture. It may or may not contain Aboriginal objects.
ACHA	Aboriginal Cultural Heritage Assessment.
ACHAR	Aboriginal Cultural Heritage Assessment Report.
AHIMS	Aboriginal Heritage Information Management System: a register of previously reported Aboriginal objects and places managed by the DPC.
AHIP	Aboriginal Heritage Impact Permit. A permit issued under Section 90, Division 2 of Part 6 of the *NPW Act.*
Archaeology	The scientific study of human history, particularly the relics and cultural remains of the distant past.
Art	Art sites can occur in the form of rock engravings or pigment on sandstone outcrops or within shelters. An engraving is some form of image which has been pecked or carved into a rock surface. Engravings typically vary in size and nature, with small abstract geometric forms as well as anthropomorphic figures and animals also depicted. Pigment art is the result of the application of material to a stone to leave a distinct impression. Pigment types include ochre, charcoal and pipeclay.
Artefact	An object made by human agency (e.g. stone artefacts).
Consultation Requirements	*Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW, 2010).
DCP	Development Control Plan.
DECCW	Department of Environment, Climate Change and Water NSW.
DPC	Department of Premier and Cabinet.

Term	Definition
EP&A Act	*NSW Environmental Planning and Assessment Act 1979.*
Grinding Grooves	The physical evidence of tool making, or food processing activities undertaken by Aboriginal people. The manual rubbing of stones against other stones creates grooves in the rock; these are usually found on flat areas of abrasive rock such as sandstone.
Harm	As defined in the NPW Act, to destroy, deface, damage or move an Aboriginal object or destroy, deface or damage a declared Aboriginal place. Harm may be direct or indirect (e.g. through increased visitation or erosion). Harm does not include something that is trivial or negligible.
Isolated find	A single artefact found in an isolated context.
LALC	Local Aboriginal Land Council: corporate body constituted under the *Aboriginal Land Rights Act 1983*, having a defined boundary within which it operates.
LEP	Local Environment Plan.
Midden	Midden sites are indicative of Aboriginal habitation, subsistence and resource extraction. Midden sites are expressed through the occurrence of shell deposits of edible shell species often associated with dark, ashy soil and charcoal. Middens may or may not contain other archaeological materials including stone tools.
NPW Act	*National Parks and Wildlife Act 1974.*
NPW Regulation	*National Parks and Wildlife Regulation 2019.*
PAD	Potential Archaeological Deposit: a location considered to have a potential for subsurface archaeological material.
RAPs	Registered Aboriginal Parties: Aboriginal persons or organisation who have registered to be consulted on the Project in accordance with the Consultation Requirements.
Scarred / Modified Trees	Trees which display signs of human modification in the form of scars left from intentional bark removal for the creation of tools, or which are carved for ceremonial purposes.

EXECUTIVE SUMMARY

The current report presents the results of an Aboriginal Cultural Heritage Assessment (ACHA) for Central Barangaroo, Hickson Road, NSW, legally referred to as Part Lot 52 Deposited Plan 1213772 ('the subject area'). The ACHA has been undertaken to support a State Significant Development Application (SSD-39578022) for early works within the subject area, consisting of the construction of a secant pile retention wall along Hickson Road. The proposed early works will include:

- Construction of a secant pile retention wall.
- Excavation of land related to the secant pile retention wall.
- Localised remediation related to the secant pile retention wall.
- Associated archaeological investigations in the area of excavation and works.
- Sydney Metro / Hickson Road interfaces – perimeter retention wall interface works and Hickson Road public domain interface works.

The ACHA was undertaken in accordance with Part 6 of the *National Parks and Wildlife Act 1974* (NPW Act) and Part 5 of the *National Parks and Wildlife Regulation 2019* (NPW Reg). The ACHA was further conducted in accordance with the following guidelines:

- *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (Department of Environment, Climate Change and Water (DECCW), 2010) (the Consultation Guidelines).
- *Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW* (Office of Environment and Heritage 2011) (the Assessment Guidelines).
- *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW 2010) (the Code of Practice).
- *The Australia ICOMOS Charter for Places of Cultural Significance, The Burra Charter, 2013* (Burra Charter).

The ACHA concluded that:

- No previously known Aboriginal objects or Aboriginal places have been identified within the subject area and no new Aboriginal objects or Aboriginal places have been identified.
- The subject area is located in a Disturbed Terrain landscape and consists of reclaimed land.
- As the subject area consists of reclaimed land it is determined to have nil to low potential for the retention of Aboriginal objects. There is therefore little potential for harm to any Aboriginal objects due to the proposed works.
- The subject area is assessed as having no Aboriginal cultural significance.

Based on the above conclusions, Urbis recommends the following mitigation measures:

- Consultation with RAPs should continue until the finalisation of the proposed development to ensure the opportunity for community input.
- No further archaeological assessment of the subject area is required.
- In accordance with the Government Architect's guidelines, the Proponent should prepare a 'Connecting with Country Framework for Central Barangaroo' that informs and guides the concept design and detailed design stages of the project. This framework should include a Cultural Interpretation Plan (CIP), as recommended by the RAPs.
- The development may proceed with caution, subject to the following archaeological chance finds and human remains procedures being implemented and followed:

Archaeological Finds Procedure

Should any archaeological deposits be uncovered during any site works, the following steps must be followed:

1. All works within the vicinity of the find must immediately stop and the area should be cordoned-off and secured. The find must not be moved 'out of the way' without assessment.
2. The site supervisor or another nominated site representative must contact either the project archaeologist (if relevant) or Heritage NSW (Enviroline 131 555) to contact a suitably qualified archaeologist.
3. The nominated archaeologist must examine the find, provide a preliminary assessment of significance, record the item and decide on appropriate management measures. Such management may require further consultation with Heritage NSW, preparation of a research design and archaeological investigation/salvage methodology and registration of the find with the Aboriginal Heritage Information Management System (AHIMS).
4. Depending on the significance of the find, reassessment of the archaeological potential of the subject area may be required and further archaeological investigation undertaken.
5. Reporting may need to be prepared regarding the find and approved management strategies.
6. Works in the vicinity of the find can only recommence upon receipt of approval from Heritage NSW.

Human Remains Procedure

In the unlikely event that human remains are uncovered during the proposed works, the following steps must be followed:

1. All works within the vicinity of the find must immediately stop and the area should be cordoned-off and secured. The find must be cordoned-off and signage installed to avoid accidental impact.
2. The site supervisor or other nominated manager must notify the NSW Police and Heritage NSW (Enviroline 131 555).
3. The find must be assessed by the NSW Police, which may include the assistance of a qualified forensic anthropologist.
4. Management recommendations are to be formulated by the NSW Police, Heritage NSW and site representatives.
5. Works are not to recommence until the find has been appropriately managed.

Darug Custodian Aboriginal Corporation and Kamilaroi Yankuntjatjara Working Group agreed with the methodology employed for the ACHA and endorsed the above conclusions and recommendations.

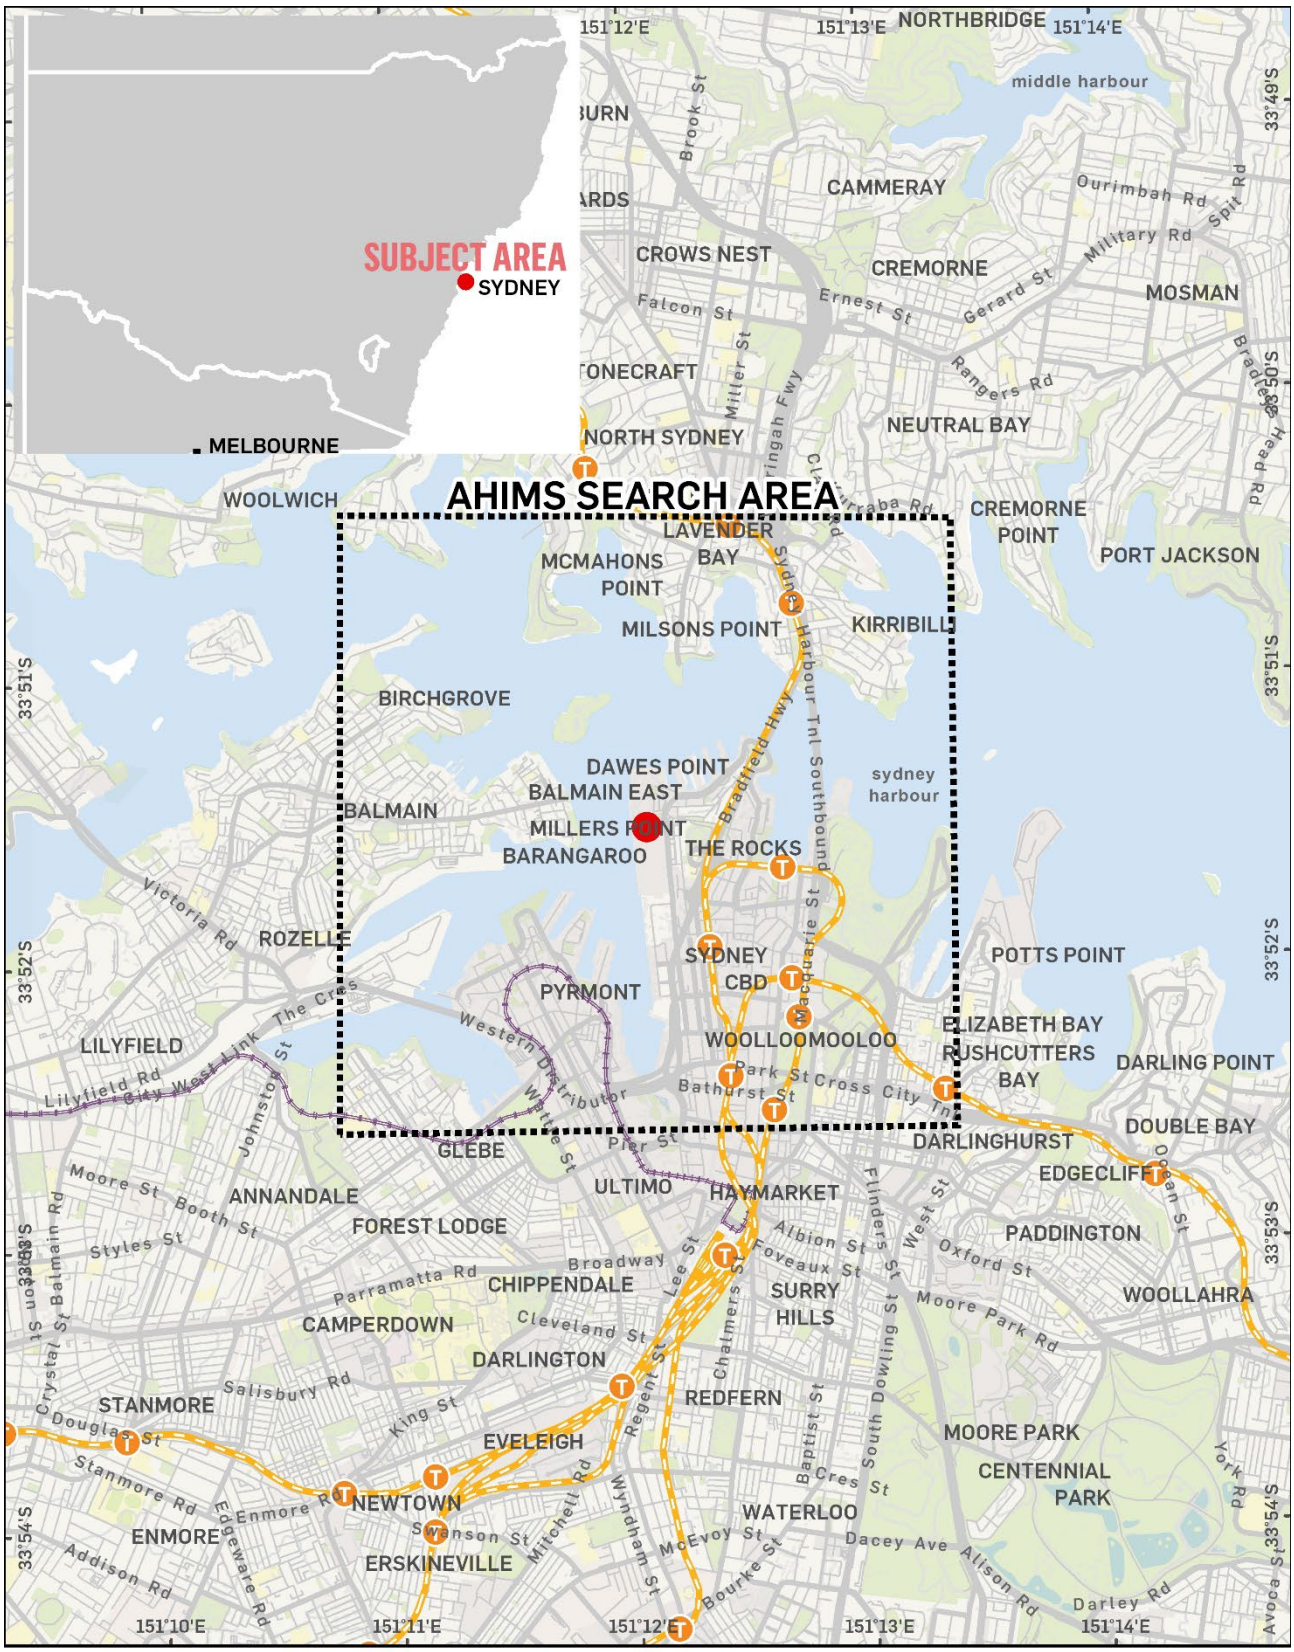

1. INTRODUCTION

Urbis has been engaged by Aqualand Pty Ltd ('the Proponent') to conduct an Aboriginal Cultural Heritage Assessment (ACHA) of Central Barangaroo, Hickson Road, NSW, legally referred to as Part Lot 52 Deposited Plan 1213772 ('the subject area') (see Figure 1 and Figure 2). The ACHA has been undertaken to support a State Significant Development Application (SSD-39578022) for early works within the subject area, consisting of the construction of a secant pile retention wall along Hickson Road.

The ACHA has been undertaken to investigate whether development of the subject area will harm Aboriginal objects or places that may exist within the subject area and determine whether the subject area presents any Aboriginal archaeological and heritage constraints. The current report Aboriginal Cultural Heritage Assessment Report (ACHAR) presents the results of the ACHA.

1.1. SUBJECT AREA

The subject area is located within the City of Sydney Local Government Area, on the traditional lands of the Gadigal people and within the boundaries of the Metropolitan Local Aboriginal Land Council. The subject area is approximately 5.2ha and is located within the Sydney CBD, on the east side of Darling Harbour (*Tumbalong*), approximately 300m south of Millers Point and 620m west of Circular Quay (see Figure 2). The subject area comprises reclaimed land resulting from dating to the 19th century. It is bordered by Darling Harbour to the west and north and by Hickson Road and Barton Street to the east and south respectively. It is currently zoned B4 – Mixed Use and RE1 – Public Recreation.

Central Barangaroo
Aqualand B Development Holding Pty Ltd

Figure 1 – Regional location

Figure 2 – Location of the subject area

1.2. PROPOSED WORKS

As showing in Figure 3, the proposed early works are confined to the south-east corner of the subject area at the boundary with Hickson Road. The proposed early works encompass construction of a secant pile retention wall on Hickson Road and will include (Figure 3, Figure 4 and Appendix A):

- Partial demolition of an existing shoring wall capping beam along Hickson Road.
- Construction of a new secant pile retention wall.
- Excavation of land related to the secant pile retention wall.
- Localised remediation related to the secant pile retention wall.
- Associated Archaeological Investigations in the area of excavation and works.
- Sydney Metro / Hickson Road interfaces – perimeter retention wall interface works, and Hickson Road public domain interface works.

It is understood that the exact depth of the proposed secant pile wall is yet to be determined but will extend into the underlying bedrock.

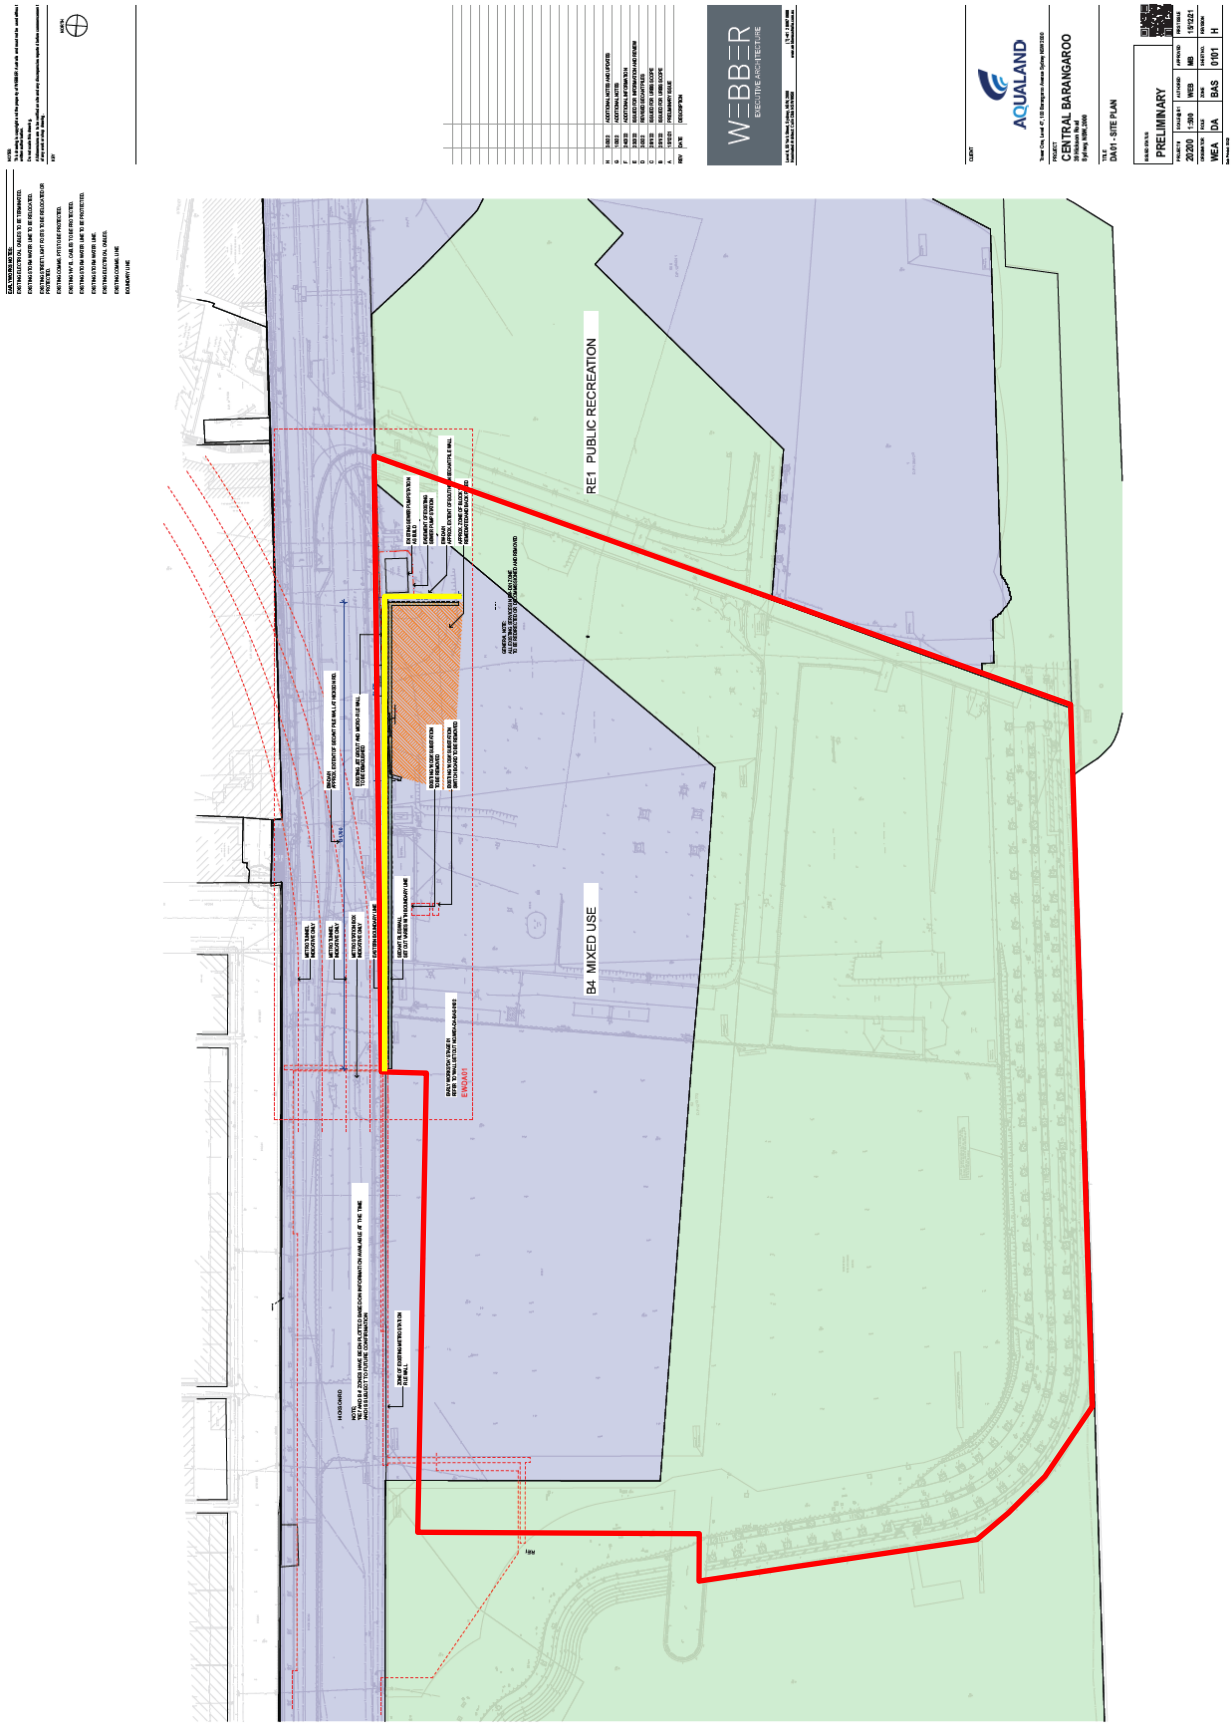

Figure 3 – Location of proposed secant pile wall (yellow line) within subject area (red polygon).
Source: Webber Executive Architecture, 2022

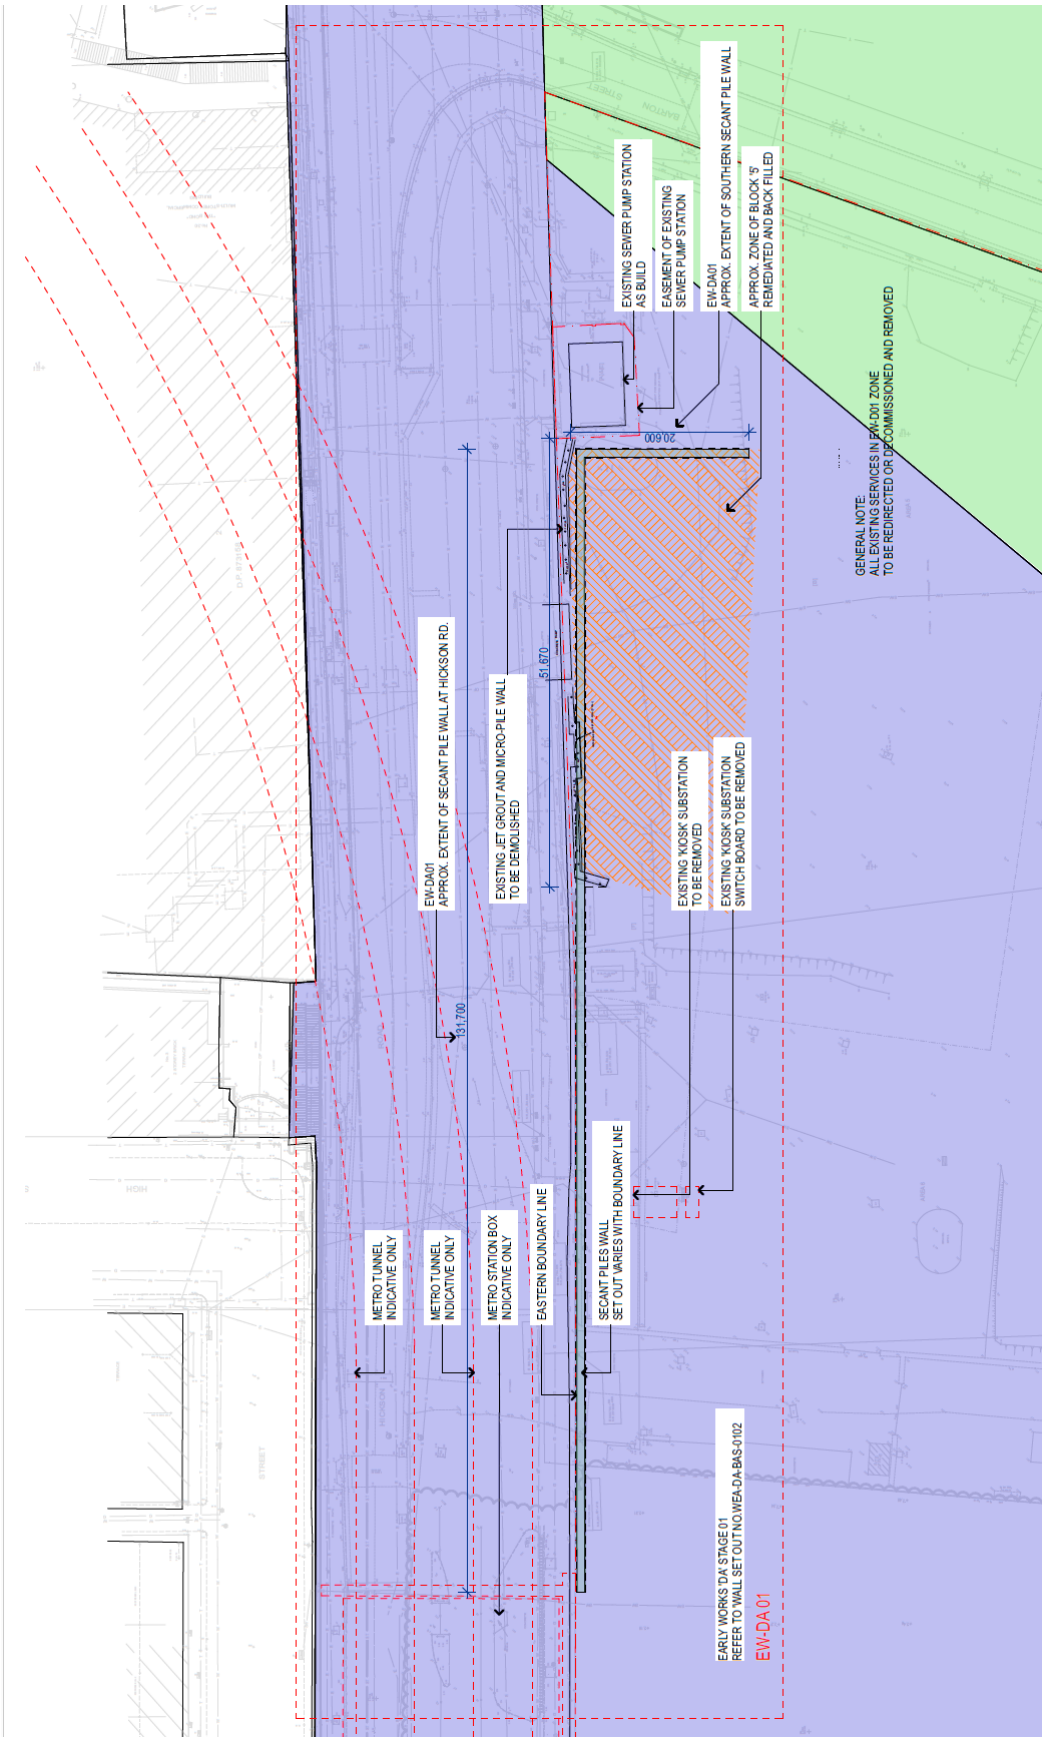

Figure 4 – Details of proposed secant pile wall.
Source: Webber Executive Architecture, 2022

1.3. METHODOLOGY

The Planning Secretary's Environmental Assessment Requirements (SEARs) for the proposed development were issued on 14 April 2022. The present ACHA report addresses SEARs Item 11, which is recited in Table 1 below.

Table 1 – SEARs requirements and relevant report sections

Issue and Assessment Requirements	Documentation
11. *Aboriginal Cultural Heritage* Provide an Aboriginal Cultural Heritage Assessment Report prepared in accordance with relevant guidelines, identifying, describing and assessing any impacts for any Aboriginal cultural heritage values on the site.	Aboriginal Cultural Heritage Assessment Report

The ACHA was undertaken in accordance with Part 6 of the *National Parks and Wildlife Act 1974* (NPW Act) and Part 5 of the *National Parks and Wildlife Regulation 2019* (NPW Reg. The ACHA was further conducted in accordance with the following guidelines:

- *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (Department of Environment, Climate Change and Water (DECCW, 2010c) (the Consultation Guidelines).
- *Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW* (Office of Environment and Heritage 2011) (the Assessment Guidelines).
- *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW 2010b) (the Code of Practice).
- *The Australia ICOMOS Charter for Places of Cultural Significance, The Burra Charter, 2013* (Burra Charter).

The objectives of the ACHA are to:

- Investigate the presence, or absence, of Aboriginal objects and/or places within and in close proximity to the subject area, and whether those objects and/or places would be impacted by the proposed development.
- Investigate the presence, or absence, of any landscape features that may have the potential to contain Aboriginal objects and/or sites and whether those objects and/or sites would be impacted by the proposed development.
- Document the nature, extent and significance of any Aboriginal objects and/or places and sites that may located within the subject area.
- Document consultation with the Registered Aboriginal Parties (RAPs) with the aim to identify any spiritual, traditional, historical or contemporary associations or attachments to the subject area and any Aboriginal objects and/or places that might be identified within the subject area.
- Provide management strategies for any identified Aboriginal objects and/or places or cultural heritage values.
- Provide recommendations for the implementation of the identified management strategies.
- Prepare an Aboriginal Cultural Heritage Assessment Report (ACHAR) to be included with an application for an Aboriginal Heritage Impact Permit for the proposed development, if required.

Section 3.1 of the Assessment Guidelines specifies the content requirements of an ACHAR, which includes the requirements of Regulation 61 of the NPW Reg. The requirements are listed in Table 2 below, together with the sections of the present ACHAR in which they are addressed.

Table 2 – ACHAR Requirements

Requirement	Section of Report
A description of the Aboriginal objects and declared Aboriginal places located within the area of the proposed activity	Section 3
A description of the cultural heritage values, including the significance of the Aboriginal objects and declared Aboriginal places, that exist across the whole area that will be affected by the proposed activity and the significance of these values for the Aboriginal people who have a cultural association with the land	Section 5
How the requirements for consultation with Aboriginal people have been met (as specified in clause 80C of the NPW Regulation)	Section 3
The views of those Aboriginal people regarding the likely impact of the proposed activity on their cultural heritage (if any submissions have been received as a part of the consultation requirements, the report must include a copy of each submission and your response)	Section 3 & Appendix D
Actual or likely harm posed to the Aboriginal objects or declared Aboriginal places from the proposed activity, with reference to the cultural heritage values identified	Section 6
Any practical measures that may be taken to protect and conserve those Aboriginal objects or declared Aboriginal places	Section 6
Any practical measures that may be taken to avoid or mitigate any actual or likely harm, alternatives to harm or, if this is not possible, to manage (minimise) harm.	Section 6

1.4. AUTHORSHIP

The present report has been prepared by Therese McCormick (Urbis Consultant Archaeologist) and Wade Goldwyer (Urbis Consultant Archaeologist) with review and quality control undertaken by Sam Richards (Associate Director).

Therese McCormick holds a Diploma of Art (Art History) from Griffith University, a Bachelor of Arts (Archaeology and Anthropology) from the Australian National University and a Masters (Archaeological Practice) from the University of the Highlands and Islands. Wade Goldwyer holds a Bachelor of Arts (Archaeology) from the University of Western Australia, Sam Richards holds a Bachelor of Arts (Archaeology) from the University of Liverpool, United Kingdom.

1.5. LIMITATIONS

The ACHA was limited to an assessment of the archaeological remains of Aboriginal cultural heritage and does not consider historical archaeological remains or built heritage items.

2. STATUTORY CONTEXT

2.1. HERITAGE CONTROLS

The protection and management of Aboriginal cultural heritage items, places and archaeological sites within New South Wales is governed by the relevant Commonwealth, State or local government legislation. These are discussed below in relation to the present subject area.

2.1.1. The National Parks and Wildlife Act 1974

Management of Aboriginal objects and places in NSW falls under the statutory control of the *National Parks and Wildlife Act 1974* (NPW Act). Application of the NPW Act is in accordance with the *National Parks and Wildlife Regulation 2019* (NPW Reg).

Section 5 of the NPW Act defines Aboriginal objects and Aboriginal places as follows:

> *Aboriginal object means any deposit, object or material evidence (not being a handicraft made for sale) relating to the Aboriginal habitation of the area that comprises New South Wales, being habitation before or concurrent with (or both) the occupation of that area by persons of non-Aboriginal extraction, and includes Aboriginal remains.*
>
> *Aboriginal place means any place declared to be an Aboriginal place under section 84 of the NPW Act.*

The NPW Act provides statutory protection for Aboriginal objects, defining two tiers of offence against which individuals or corporations who harm Aboriginal objects or Aboriginal places can be prosecuted. The highest tier offences are reserved for knowledgeable harm of Aboriginal objects or knowledgeable desecration of Aboriginal places. Second tier offences are strict liability offences - that is, offences regardless of whether or not the offender knows they are harming an Aboriginal object or desecrating an Aboriginal place - against which defences may be established under the *National Parks and Wildlife Regulation 2009* (NSW) (the NPW Regulation).

It is an offence under section 86 of the NPW Act to harm or desecrate an Aboriginal object or place. Section 87 of the NPW Act specifies that that it is a defence to a prosecution for an offence under section 86 of the NPW Act that the harm or desecration was authorised by an Aboriginal Heritage Impact Permit (AHIP), provided the conditions to which that AHIP was subject were not contravened.

Regulation 61(1) of the NPW Regulation specifies that an application for the issue of an Aboriginal heritage impact permit must be accompanied by an ACHAR. The scope of the ACHAR is specified in Regulation 61(2) and 61(3):

> *(2) A cultural heritage assessment report is to deal with the following matters—*
>
> *(a) the significance of the Aboriginal objects or Aboriginal places that are the subject of the application,*
>
> *(b) the actual or likely harm to those Aboriginal objects or Aboriginal places from the proposed activity that is the subject of the application,*
>
> *(c) any practical measures that may be taken to protect and conserve those Aboriginal objects or Aboriginal places,*
>
> *(d) any practical measures that may be taken to avoid or mitigate any actual or likely harm to those Aboriginal objects or Aboriginal places.*
>
> *(3) A cultural heritage assessment report must include—*
>
> *(a) if any submission has been received from a registered Aboriginal party under clause 60 (including any submission on the proposed methodology to be used in the preparation of the report and any submission on the draft report), a copy of the submission, and*
>
> *(b) the applicant's response to each such submission.*

The present ACHAR is prepared in accordance with the above requirements.

2.1.2. Environment Protection and Biodiversity Conservation Act 1999

In 2004, a new Commonwealth heritage management system was introduced under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act). The EPBC Act protects any items listed in the National Heritage List (NHL) and the Commonwealth Heritage List (CHL).

The National Heritage List (NHL) is a list of natural, historic and Indigenous places of outstanding significance to the nation. It was established to protect places that have outstanding value to the nation.

The Commonwealth Heritage List (CHL) was established to protect items and places owned or managed by Commonwealth agencies. The Australian Government Department of Sustainability, Environment, Water, Population and Communities (DSEWPC) is responsible for the implementation of national policy, programs and legislation to protect and conserve Australia's environment and heritage and to promote Australian arts and culture. Approval from the Minister is required for controlled actions which will have a significant impact on items and places included on the NHL or CHL.

2.1.3. State Environmental Planning Policy (Precincts – Eastern Harbour City) 2021

Barangaroo is subject to the *State Environmental Planning Policy (Precincts – Eastern Harbour City) 2021 (SEPP 2021)* which sets out, in Clause 21 of *Appendix 5 Barangaroo Site,* in regards to heritage conservation that:

> *(1) A person must not, in respect of a building, work, relic, tree or place that is a heritage item—*
>
> *(a) demolish, dismantle, move or alter the building, work, relic, tree or place, or*
>
> *(b) damage or remove the relic, or*
>
> *(c) excavate land for the purpose of discovering, exposing or moving the relic, or*
>
> *(d) damage or despoil the tree or place, or*
>
> *(e) erect a building on, or subdivide, land on which the building, work or relic is situated or that comprises the place, or*
>
> *(f) damage any tree, or land on which the building, work or relic is situated, or the land that comprises the place, or*
>
> *(g) make structural changes to the interior of the building or work,*
>
> *except with the consent of the consent authority.*
>
> *(2) However, consent under this section is not required if the proponent of the development has notified the consent authority of the proposed development and the consent authority has advised the proponent in writing before any work is carried out that it is satisfied that the proposed development—*
>
> *(a) is of a minor nature, or is for the maintenance of the heritage item, and*
>
> *(b) would not adversely affect the significance of the heritage item.*

The ACHA was undertaken to determine whether or not Aboriginal cultural heritage items are present within the subject area.

2.2. HERITAGE LISTS & REGISTERS

A review of relevant heritage lists and registers was undertaken to determine whether any Aboriginal cultural heritage items are located within the curtilage of, or in proximity to, the subject area.

2.2.1. Australian Heritage Database

The Australian Heritage Database is a database of heritage items included in the World Heritage List, the National Heritage List (NHL), the Commonwealth Heritage list (CHL) and places in the Register of the National Estate. The list also includes places under consideration, or that may have been considered, for any one of these lists.

A search of the Australian Heritage Database was undertaken on 7 March 2022. The search did not identify any Aboriginal objects or places within the curtilage of the subject area.

2.2.2. NSW State Heritage Inventory

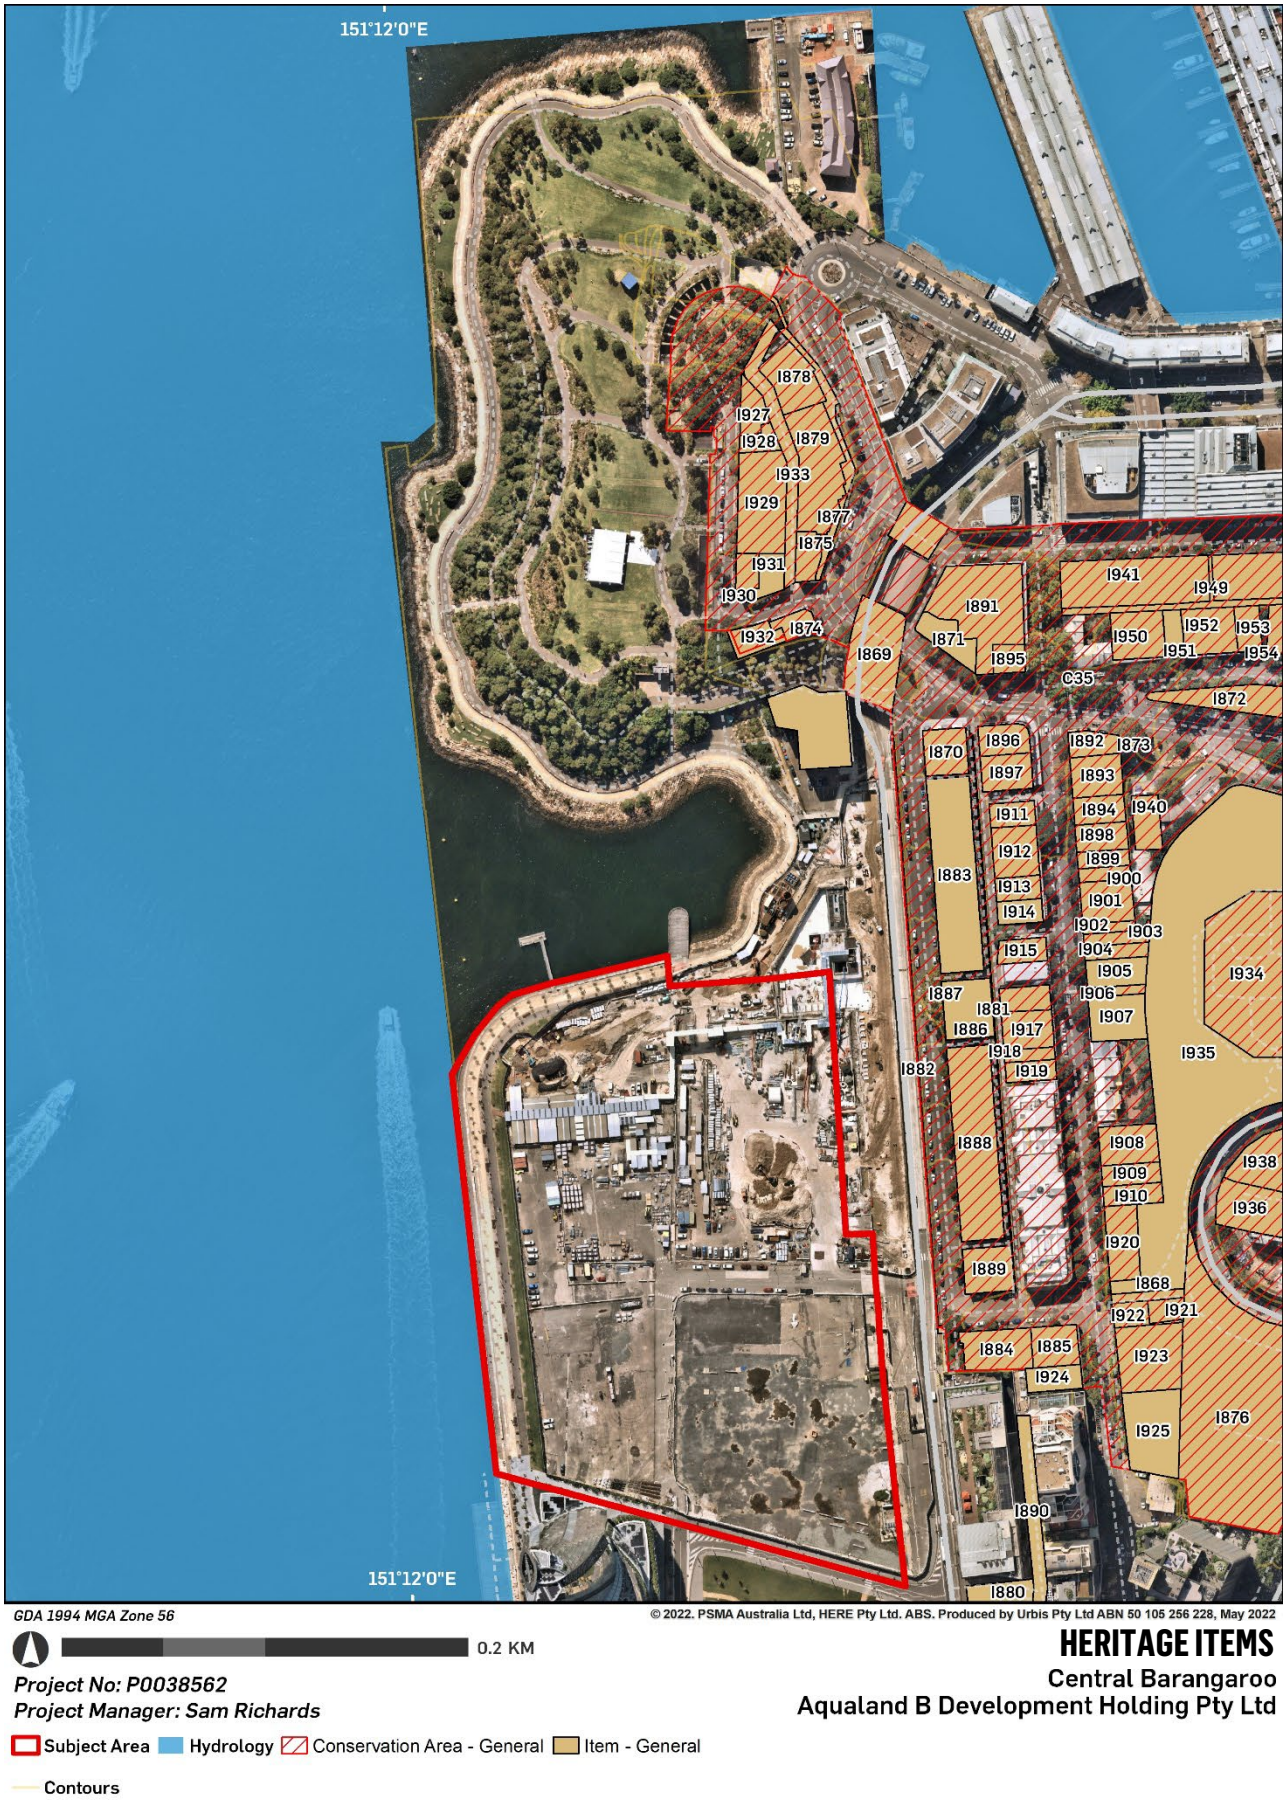

The State Heritage Inventory (SHI) is a database of heritage items in NSW which includes declared Aboriginal Places, items listed on the SHR, listed Interim Heritage Orders (IHOs) and items listed of local heritage significance on a local council's LEP.

A search of the SHI was undertaken on 7 March 2022. The search did not identify any Aboriginal objects or places within the curtilage of the subject area.

2.3. SUMMARY

The statutory context of the subject area is summarised as follows:

- The present ACHA aims to establish whether any Aboriginal archaeological resources would be harmed by the proposed development of the subject area, thus addressing s.87(2) of the NPW Act and Clause 21, Appendix 5 of the SEPP 2021.
- Searches of the State Heritage Inventory and Australian Heritage Database did not identify any heritage items within the curtilage of the subject area.

3. ABORIGINAL COMMUNITY CONSULTATION

In administering its statutory functions under Part 6 of the *NSW National Parks and Wildlife Act 1974*, the Department of Premier and Cabinet (DPC) requires that Proponent consult with Aboriginal people about the Aboriginal cultural heritage values (cultural significance) of Aboriginal objects and/or places within any given development area in accordance with Clause 80c of the *NSW National Parks and Wildlife Regulation 2019*.

The DPC maintains that the objective of consultation with Aboriginal communities about the cultural heritage values of Aboriginal objects and places is to ensure that Aboriginal people have the opportunity to improve ACHA outcomes by (DECCW 2010a):

- Providing relevant information about the cultural significance and values of Aboriginal objects and/or places.
- Influencing the design of the method to assess cultural and scientific significance of Aboriginal objects and/or places.
- Actively contributing to the development of cultural heritage management options and recommendations for any Aboriginal objects and/or places within the proposed subject area.
- Commenting on draft assessment reports before they are submitted by the Proponent to the DPC.

Consultation in line with the Consultation Requirements (DECCW 2010) is a formal requirement where a Proponent is aware that their development activity has the potential to harm Aboriginal objects or places. The DPC also recommends that these requirements be used when the certainty of harm is not yet established but a proponent has, through some formal development mechanism, been required to undertake a cultural heritage assessment to establish the potential harm their proposal may have on Aboriginal objects and places.

The Consultation Requirements outline a four-stage consultation process that includes the following:

- Stage 1 – Notification of project proposal and registration of interest.
- Stage 2 – Presentation of information about the proposed project.
- Stage 3 – Gathering information about the cultural significance.
- Stage 4 – Review of draft cultural heritage assessment report.

The document also outlines the roles and responsibilities of the DPC, Registered Aboriginal Parties (RAPs) including Local and State Aboriginal Land Councils, and proponents throughout the consultation process.

To meet the requirements of consultation it is expected that proponents will:

- Bring the RAPs, or their nominated representatives, together and be responsible for ensuring appropriate administration and management of the consultation process.
- Consider the cultural perspectives, views, knowledge and advice of the RAPs involved in the consultation process in assessing cultural significance and developing any heritage management outcomes for Aboriginal objects(s) and/or places(s).
- Provide evidence to the DPC of consultation by including information relevant to the cultural perspectives, views, knowledge and advice provided by the RAPs.
- Accurately record and clearly articulate all consultation findings in the final cultural heritage assessment report.
- Provide copies of the cultural heritage assessment report to the RAPs who have been consulted.

The consultation process undertaken to seek active involvement from relevant Aboriginal representatives for the project followed the current NSW statutory guideline, namely, the Consultation Requirements. Section 1.3 of the Consultation Requirements describes the guiding principles of the document. The principles have been derived directly from the principles section of the *Australian Heritage Commission's Ask First: A guide to respecting Indigenous heritage places and values* (Australian Heritage Commission 2002).

The following outlines the process and results of the consultation conducted during this assessment to ascertain and reflect the Aboriginal cultural heritage values of the subject area.

3.1. STAGE 1: NOTIFICATION OF PROJECT AND REGISTRATION OF INTEREST

The aim of Stage 1 of the community consultation process is to identify, notify and register Aboriginal people who hold cultural knowledge relevant to determining the cultural significance of Aboriginal objects and/or places in the subject area.

3.1.1. Native Title

A search of the National Native Title Tribunal (NNTT) registers and databases was undertaken on 17 February 2022. The search identified no Native Title claims or registrations for the subject area. The NNTT was also contacted by email on 17 February 2022 to request a formal search of the NNTT Register. A reply was received on 17 February 2022 indicating that there are no Native Title Determination Applications, Determinations of Native Title, or Indigenous Land Use Agreements over the identified area.

3.1.2. Identification of Cultural Knowledge Holders

To identify Aboriginal people who may be interested in registering as Aboriginal parties for the project, the organisations stipulated in Section 4.1.2 of the Consultation Guidelines were contacted on 17 February 2022. (Table 3). The template for the emails sent to the above-mentioned organisations is included in Appendix D. A total of 54 Aboriginal groups and individuals with a potential interest in the subject area were identified during this stage.

Table 3 – Contacted organisations

Organisation	Date Notification Sent	Date Response Received
Office of the Registrar, Aboriginal Land Rights Act 1983	17 February 2022	n/a
Heritage NSW, Department of Premier and Cabinet	17 February 2022	22 February 2022
NTS Corp	17 February 2022	n/a
Greater Sydney Local Land Services	17 February 2022	17 February 2022
Metropolitan Local Aboriginal Land Council	17 February 2022	n/a
City of Sydney Council	17 February 2022	18 February 2022

In accordance with Section 4.1.3 of the Consultation Guidelines, letters were sent to the 54 identified Aboriginal groups and individuals by either email or post on 20 April 2022 to notify them of the proposed project. The letters included a brief introduction to the project and the project location and set a deadline for response of 5 May 2022, providing more than the minimum 14 days to register an interest required by the Consultation Requirements. A copy of the letter template is included in Appendix D.

Further in accordance with Section 4.1.3 of the Consultation Guidelines, an advertisement was placed in one local online news service via News Corp Australia. The advertisement was published in the 19 April 2022 edition and registration was open until 5 May 2022, providing more than the minimum 14 days to register an interest required by the Consultation Requirements. A copy of the advertisement is included in Appendix D.

3.1.3. Registration of Interest

A total of 12 groups registered interest in the project as a result of this phase (Table 4). Acknowledgement emails or telephone calls were made by Urbis to all respondents to confirm registration had been received.

In accordance with Section 4.1.6 of the Consultation Guidelines, the list of Registered Aboriginal Parties (RAPs) was provided to Heritage NSW and the Metropolitan Local Aboriginal Land Council on 6 May 2022 (see Appendix D).

Table 4 – Registered Aboriginal Parties

Organisation/Individual	Contact Person
Metropolitan LALC	Kelly Smith
A1 Indigenous Services	Carolyn Hickey
Butucarbin Heritage	Lowanna Gibson
Corroboree Aboriginal Corporation	Marilyn Carroll-Johnson
Darug Custodian Aboriginal Corporation	Justine Coplin
Didge Ngunawal Clan	Paul Boyd & Lilly Carroll
Gunjeewong Cultural Heritage Aboriginal Corporation	Shayne Dickson
Kamilaroi Yankuntjatjara Working Group	Phil Khan
Thoorga Nura	John Carriage
Tocomwall	Scott Franks
Woka Aboriginal Corporation	Steven Johnson
Wori Wooilywa	Daniel Chalker

3.2. STAGE 2: PRESENTATION OF PROJECT INFORMATION

The aim of Stage 2 of the community consultation process is to provide registered Aboriginal parties with information about the scope of the proposed project and the proposed cultural heritage assessment process.

3.2.1. Information Pack

A Stage 2/3 information pack was sent to registered Aboriginal parties via email on 6 May 2022. The information pack was prepared as a combination of Stage 2 and 3 of the Consultation Guidelines, and included the following information:

- Project overview, location and purpose.
- Proposed works.
- Project history.
- Brief archaeological and environmental background.
- Protocol of gathering information on cultural heritage significance.
- Request for comment on methodology and recommendations for site investigation, and request for any cultural information the respondent wished to share.

A response to the Stage 2/3 information pack was requested by 4 June 2022, providing the 28 days to respond required by the Consultation Requirements. A copy of the Stage 2/3 information pack is included in Appendix D of this report.

3.2.2. Site Inspection and Meeting

A separate communication was sent on 9 June 2022 to all RAPs who responded to the Stage 2/3 information pack by the deadline. The communication invited the RAPs to register for a site inspection and meeting to be held on 14 June 2022, between 10am and 12pm, which formed part of Stage 2/3 of the ACHA process.

The site inspection and meeting were conducted by Sam Richards (Urbis Senior Archaeologist) and Aaron Olsen (Urbis Consultant Archaeologist). The RAPs present at the site inspection and meeting are listed in Table 5. Also present were representatives from Aqualand and Infrastructure NSW.

Table 5 – RAPs in attendance at site inspection and meeting

Group	Representative
Darug Custodian Aboriginal Corporation	Lana Wedgewood
Didge Ngunawal Clan	Lilly Carroll

The purpose of the site inspection and meeting was to conduct a thorough briefing with the RAPs about the proposed development, to conduct a walkover of the subject area with the RAPs, to discuss the information provided in the Stage 2/3 document provided and to discuss potential archaeological mitigation strategies.

The archaeological findings of the site inspection are discussed in Section 4.3 below.

3.3. STAGE 3: GATHERING CULTURAL INFORMATION

Stage 3 of the community consultation process is concerned with gathering feedback on a project, proposed methodologies, and obtaining any cultural information that registered Aboriginal parties wish to share. This may include ethno-historical information, or identification of significant sites or places in the local area.

3.3.1. Responses to Information Pack

Three responses were received in relation to the Stage 2/3 information pack. The responses are included in Appendix D and addressed in Table 6 below.

Table 6 – RAP responses to the Stage 2/3 Information Pack

RAP	Response	Urbis Response
Darug Custodian Aboriginal Corporation	Our group is a non- profit organisation that has been active for over forty years in Western Sydney, we are a Darug community group with over three hundred members. The main aim in our constitution is the care of Darug sites, places, wildlife and to promote our culture and provide education on the Darug history. Our group promotes Darug Culture and works on numerous projects that are culturally based as a proud and diverse group. It has been discussed by our group and with many consultants and researches that our history is generic and is usually from an early colonists perspective or solely based on archaeology and sites. These histories are adequate but they lack the people's stories and parts of important events and connections of the Darug people and also other Aboriginal people that now call this area home and have done so for numerous generations. This area is significant to the Darug people due to the evidence of continued occupation, within close proximity to this project site there is a complex of significant sites. Landscapes and landforms are significant to us for the information that they hold and the connection to Darug people. Aboriginal people (Darug) had a complex lifestyle that was based on respect and belonging to the land, all aspects of life and survival did not impact on the land but helped to care for and conserve land and the sustenance that the land provided. As Darug people moved through the land there were no impacts	Urbis thanks Darug Custodian Aboriginal Corporation (DCAC) for their comments and support for the recommendations made in the present report. Urbis acknowledges the importance landscape and landforms and the connectivity of all Aboriginal sites. These factors have been considered when assessing the archaeological potential and significance of the subject area.

	left, although there was evidence of movement and lifestyle, the people moved through areas with knowledge of their areas and followed signs that were left in the landscape. Darug people knew which areas were not to be entered and respected the areas that were sacred. Knowledge of culture, lifestyle and lore have been part of Darug people's lives for thousands of years, this was passed down to the next generations and this started with birth and continued for a lifetime. Darug people spent a lifetime learning and as people grew older they passed through stages of knowledge, elders became elders with the learning of stages of knowledge not by their age, being an elder is part of the kinship system this was a very complicated system based on respect. Darug sites are all connected, our country has a complex of sites that hold our heritage and past history, evidence of the Darug lifestyle and occupation are all across our country, due to the rapid development of Sydney many of our sites have been destroyed, our sites are thousands of years old and within the short period of time that Australia has been developed pre contact our sites have disappeared. The Aboriginal cultural heritage consultation requirements for proponents Section 4.1.8 refers to "Aboriginal organisations representing Aboriginal people who hold cultural knowledge". Recent consultation meetings have revealed that many of these Aboriginal organisations and individuals do not hold cultural knowledge of the Western Sydney area. The increasing involvement of such parties in cultural heritage management means that genuine local Aboriginal organisations are unable to properly care for our cultural heritage. Many Aboriginal organisations listed in the OEH response letter do not contribute to the Aboriginal community of Western Sydney. Individuals listed in the OEH response letter do not represent the community and while they may be consulted with, should not be employed for their own personal financial benefit. Our organisation is committed to providing benefits back to our local Aboriginal community through such measures as funding the local Aboriginal juniors' touch football team, painting classes for the local children and donating money to various charities. Employment in cultural heritage activities is source of income that organisations such as ours can use to contribute to beneficial activities and support within the community. Darug custodian Aboriginal Corporation's site officers have knowledge of Darug land, Darug Culture, Oral histories, landforms, sites, Darug history, wildlife, flora and legislative requirements. We have worked with consultants and developers for many years in Western Sydney (Darug Land) for conservation, site works, developments and interpretation/education strategies.	

	Darug Custodian Aboriginal Corporation have received and reviewed the report for Hickson Road, Barangaroo, NSW. We support the recommendations set out in this report.	
Didge Ngunawal Clan	In addition to sending insurance and liability documentation, Didge Ngunawal Clan (DNC) only responded to the questionnaire. The cultural connection of DNC to the subject area is connected to Phillip Carroll from the Gadigal and Eora tribe. Phillip Carroll is a Ngunawal Aboriginal elder (aged 82 years).	Urbis thanks Didge Ngunawal Clan (DNC) for their comments.
Kamilaroi Yankuntjatjara Working Group	Thank you for your Methodology at CENTRAL BARANGAROO – HICKSON ROAD, BARANGAROO, NSW. Here at KYWG we thrive on community engagement, conservation, and land management, within cultural heritage for over 50 years within the Sydney basin and wider area. Are aim being to protect sacred sites and country from urban development and it's in our best interest to pass on knowledge of the area to the best of our ability. For tens of thousands of years Aboriginal people have walked this land. Passing down oral history from generation to generation. This way of life is known to many indigenous people throughout the world, Aboriginal Australia is the oldest living culture to date. For this reason, we must grab hold of any cultural heritage as a last chance to unearth our rich history. As Aboriginal people we have a strong connection to mother earth, sky, water, and fire, we are spiritual beings who believe in a higher power of biamie. It is the ancient stories of how the earth and life was created long ago, the dreaming and how we continue to dream like our ancestors. This brings me to the importance of the intangible and the astatic aspects of country. Aboriginal people were good at giving back to mother earth, hence why not much is left behind. But the spiritual energy that country holds deep onto stains the land and can never be lost. This feeling we get when stepping foot on an Aboriginal site is aweing of emotions and energy this is intangible to us. The sky reflects the land, for thousands of years Aboriginal people navigated across the land reading the sky like a map, we can be considered the first astronomers. There are many dreaming story's connecting the sky and the land and how mother earth was made. We believe we come from the sky our spirts lived in the sky before coming to care for mother earth. A story that many Aboriginal language groups are connected to is the emu in the sky, better known as the milky way. The story gives us sessional knowledge of what occurs throughout the year when to go hunting and the weather for instance. The area is known to for the abundance saltwater resources allowing room for midden sites to be located possibly with in the area. Aboriginal people utilised natural resources to create tools and craft such as shellfish hooks for fishing. Aboriginal people utilised canoes to cross the water and to fish out at sea. Before colonisation there would have been fresh water sources	Urbis thanks Kamilaroi Yankuntjatjara Working Group (KYWG) for their response and acknowledges their recommendation for a cultural interpretation plan (CIP) following a Connection with Country Framework. The CIP following a Connection with Country Framework will be discussed with the client and considered if able to be accommodated within the usage of the project. Urbis acknowledges the significance of waterways, such as Darling Harbour, within the local area to Aboriginal people. These factors have been considered when assessing the archaeological potential and significance of the subject area.

	available to Aboriginal people, along with wells that were dug and claypans could have been utilised for fresh water. KYWG agree to your methodology and support your report, we highly recommend you have an interpretation plan following connecting with county framework. We look forward to working alongside you on this project."	

3.3.2. Feedback from Site Inspection and Meeting

During the site inspection and meeting of 14 June 2022, the RAPs in attendance were given the opportunity to provide verbal feedback. The feedback provided by RAPs during the site inspection and meeting is presented in Table 7 below.

Table 7 – RAP comments received during or following site inspection and meeting

RAP	Comment	Urbis Response
Didge Ngunawal Clan	Acknowledgement that the subject area was "destroyed" and comprises reclaimed land.	N/A

3.4. STAGE 4: REVIEW OF DRAFT ACHAR

The aim of Stage 4 of the community consultation process is to prepare and finalise an ACHAR with input from Registered Aboriginal Parties.

A draft of the present ACHAR was sent to RAPs via email on 23 June 2022 with comment on the draft ACHAR requested by 21 July 2022, providing the 28 days to respond required by the Consultation Requirements. It is noted that the time allowed for comment should reflect the size and complexity of the project.

Two responses were received in relation to the Stage 4 draft ACHAR. The responses are included in Appendix D and addressed in Table 8 below.

Table 8 – RAP responses to the Stage 4 Draft ACHAR

RAP	Response	Urbis Response
Darug Custodian Aboriginal Corporation	Our group is a non- profit organisation that has been active for over forty years in Western Sydney, we are a Darug community group with over three hundred members. The main aim in our constitution is the care of Darug sites, places, wildlife and to promote our culture and provide education on the Darug history. This area is an area our group has a vast knowledge of, we have worked and lived in for many years, this area is highly significant to the Darug people due to the connection of sites and the continued occupation. Our group has been involved in all previous assessments and works in this area as a traditional owner Darug group for the past 40 plus years. Our Darug land can only be assessed by Darug people, we have our song lines and creation places that only our people can identify, our connection to our nura is part of us and our country. Our histories are held by our people and places, when we are looking for cultural aspects of an area they are not only	Urbis thanks Darug Custodian Aboriginal Corporation (DCAC) for their letter supporting the recommendations of the ACHA.

	seen but felt, our spiritual connections are our culture and heritage that connect us to our old people through the evidence that we see on our site visits. People from other mobs should be respectful of our country and people if they are not respectful that the Darug are the knowledge holders then they are not cultural, therefore should not be involved on cultural heritage on Darug land. Darug Custodians have reviewed the report and support the recommendations.	
Kamilaroi Yankuntjatjara Working Group	Thank you for your ACHAR for Central Barangaroo project. Aboriginal people of this land for tens of thousands of years walked and cared for the land and still do today, we follow the land, sky and everything in between. Mother earth a giver of life and provides an abundance of natural resources that provided for my people. We practice lore, kinship, customs and have rich culture that is unique to each and every clan or tribe with similarities across the continent, made up of many countries having several languages and dialects. We have a spiritual believe system which we know today as the Dreaming which is continuance and passed down verbally and kinaesthetically. It is known that we were the first astronomers, bakers, scientists, doctors, craftsman and the lists go on. It is the ancient knowledge that our people passed on to generation to generation for tens of thousands of years practicing our rich culture that benefited the environment around us. The rich culture is a reflection of the people we are and why we were brought to mother earth through the dreaming, we are here to protect mother earth and all she holds the tangible an intangible. The study area is significant to our people the tangible and intangible aspects that come with the site we must consider this deep connection to country that we have as Aboriginal peoples. For this reason, we recommend interpretation as a chance to regain our cultural identity on country. When thinking about interpretation within the Sydney basin to acknowledge the many tribes and clans that make this area up its important to recognise that they can be different and therefore recognising many rather than just one. This shows that we are divers, resilient and civilised peoples. It is our understanding that in the Sydney basin the original peoples were moved around due to escaping battles between the first fleet, the stolen generation and being pushed of country forced to move to other tribes, clans or elsewhere that was not yet known to the first fleet. This in turn has had major effects on our people, causing generational trauma. It is for this reason here at KYWG we intent to raise awareness and acknowledge all Aboriginal people with in	Urbis thanks Kamilaroi Yankuntjatjara Working Group (KYWG) for their letter supporting the recommendations of the ACHA. Urbis notes the recommendation for monitoring and cultural training. However, the ACHA has determined that there is nil to low potential for the retention of Aboriginal objects within the subject area as it is reclaimed land. Accordingly, Urbis instead recommends implementation of an archaeological chance finds procedures a precaution. Urbis has recommended a Cultural Interpretation Plan (CIP) be prepared in accordance with the Government Architect's Connecting with Country Draft Framework should be considered by the Proponent and undertaken if feasible for future design stages of the project.

	the community and educating the wider community about the struggle our people are facing. It is for this reason we ask for monitoring of any works and or cultural training to be conducted to any contractors working at the site to be carried out by Aboriginal people. With this in mid we would like to agree to your recommendations and we support your report.	Urbis will be sure to keep KYWG updated throughout the consultation process.

4. ABORIGINAL CULTURAL HERITAGE

An assessment of Aboriginal cultural heritage within a particular subject area requires an understanding of the archaeological and environmental contexts in which the area is situated. The following is a review and analysis of those contexts for the present subject area.

4.1. ARCHAEOLOGICAL CONTEXT

A summary of background research for Aboriginal cultural heritage resources within and around the subject area is provided below, including search results from the Aboriginal Heritage Information Management System (AHIMS) and consideration of previous archaeological investigations pertinent to the subject area.

4.1.1. Past Aboriginal Land Use

Due to the absence of written records, much of our understanding of Aboriginal life pre-colonisation is informed by the histories documented in the late 18th and early 19th century by European observers. These histories provide an inherently biased interpretation of Aboriginal life both from the perspective of the observer but also through the act of observation. The social functions, activities and rituals recorded by Europeans may have been impacted by the Observer Effect, also known as the Hawthorne Effect. According to the Observer/Hawthorne Effect, individuals will modify their behaviour in response to their awareness of being observed. With this in mind, by comparing/contrasting these early observations with archaeological evidence is possible to establish a general understanding of the customs, social structure, languages and beliefs of Aboriginal people (Attenbrow 2010).

The archaeological record provides evidence of the long occupation of Aboriginal people in Australia. Current archaeological investigation establishes occupation of the Australian mainland by as early as 65,000 years before present (BP) (Clarkson et al. 2017). The oldest date for a site in the Sydney region is at Pitt Town on the Hawkesbury River, which is dated to around 36,000 BP (Williams et al. 2014). Older occupation sites along the now submerged coastline would have been flooded around 10,000 years BP, with subsequent occupation concentrating along the current coastlines and rivers (Attenbrow 2010). The archaeological record indicates that Aboriginal people were occupying the region around the subject area well before the arrival of the First Fleet in 1788.

Given the early contact with Aboriginal people in the Sydney region, more is known about these groups than those that inhabited regional areas. The Aboriginal population in the greater Sydney region is estimated to have been between around 4000 and 8000 people at the time of European contact (Attenbrow 2010). The present subject area was inhabited by the Gadigal (also Cadigal), belonging to the Eora people (Tench 1791). It is believed that the Gadigal people inhabited areas south of Port Jackson, from South Head in the east to Petersham in the west and the Cooks River in the south (Tindale 1974).

The archaeological record is limited to materials and objects that were able to withstand degradation and decay. As a result, the most common type of Aboriginal objects remaining in the archaeological record are stone artefacts. Flaked artefacts are typically the most common type of stone artefact encountered, in part due to their long and ubiquitous use, but also due to their high discard rate and the large amount of waste produced during manufacture. However, ground edged tools are also known to have been utilised by Aboriginal people in the Sydney region (Tench 1791). Stone technology and raw material utilisation changed over time. Until about 8,500 BP, stone tool technology remained fairly static with unifacial flaking being dominant and a preference for silicified tuff, quartz and some unheated silcrete. After about 4,000 BP, bipolar flaking and backed artefacts appear more frequently and ground stone axes are first observed (Attenbrow 2010:102; JMCHM 2006). From about 1,500 BP, there is evidence of a decline in stone tool manufacture, possibly due to an increase in the use of organic materials, changes in the way tools were made or changes in tool preferences (Attenbrow 2010). After European contact, Aboriginal people of the Sydney region continued to manufacture tools, sometimes with new materials such as bottle glass or ceramics (e.g., Ngara Consulting 2003).

Further Aboriginal sites that have been recorded in the vicinity of the subject area, include rock shelters, middens and stone artefacts which are found on the nearby Goat Island (AHIMS #45-6-0811; AHIMS #45-6-1857) as well as burials, rock art and middens on the north side of the harbour at Balls Head (AHIMS #45-6-0026; AHIMS #45-6-0027; AHIMS #45-6-1267).

Based on the above background, it is possible that similar evidence of Aboriginal occupation could also be present within original and/or intact topsoils throughout the Sydney urban area, including the region surrounding the present subject area.

4.1.2. Previous Archaeological Investigations

Previous archaeological investigations may provide invaluable information on the spatial distribution, nature and extent of archaeological resources in a given area. While no archaeological reports relating directly to the present subject area have been identified, a number of Aboriginal archaeological investigations have been undertaken in the surrounding area. Summaries of the most pertinent reports to the subject area are provided below.

Comber, 2013. Barangaroo South Block 4 Remediation Development, Aboriginal Archaeological and Cultural Heritage Assessment and heritage Impact Statement

Comber conducted an Aboriginal Archaeological assessment for a site at Barangaroo South, immediately south of the current subject area and with the northern portion of the 2013 assessment boundary overlapping the southern portion of the current subject area. The Barangaroo South site has been subject to the same land reclamation process as Central Barangaroo and has the same geographic relationship with the original shoreline. The assessment concluded that while surviving sub-surface deposits and objects may be located on the original shoreline, now on the east side of Hickson Road, any such archaeology that may have been present in the subject area has very likely been destroyed by the land reclamation and development processes. Given the proximity and contextual similarity of this site with the current Central Barangaroo subject area, it is likely that the same conclusions can be drawn.

GML, 2012. Barangaroo Central Waterfront Promenade and Interim Public Domain

In 2012 GML conducted an archaeological assessment of Central Barangaroo, with much of the 2012 assessment area overlapping with the current subject area. The site was assessed as having no to very low Aboriginal archaeological potential owing to the nature of the site as reclaimed land in a location that would have been inaccessible prior to European arrival in Australia. It is likely that the same conclusion can be drawn for the current subject area.

Austral Archaeology, 2017. Campbell's Promenade Aboriginal and Historical Archaeological Assessment, Statement of Heritage Impact and Research Design

Austral undertook an assessment of the potential for Aboriginal archaeology at the Campbell's Promenade site, approximately 750m to the north-east of the subject area and a site that exists in a similar context. The Campbell's Promenade site is on the western shoreline of Sydney Cove and consists mostly of historically reclaimed land, with only a small portion of the subject area potentially situated in proximity to or on the pre-historic shoreline and that portion considered heavily disturbed by historic development. Owing to this, the site was assessed as having low to no potential for Aboriginal archaeology. Given the similarity of context, it is likely that the same conclusion can be drawn for the current subject area.

The previous archaeological investigations discussed above address both the immediate subject area and similar contexts in proximity to the subject area. The reports show that the reclaimed nature of much of the land around Sydney Cove, including the current subject area, created areas which were not accessible to Aboriginal populations prior to this historic disturbance and as a result have no potential to contain in-situ Aboriginal objects or archaeologically relevant deposits. While there is a possibility that intact deposits with some archaeological potential may remain on the now sub-surface original shoreline, this shoreline is considered to have been heavily disturbed by historic development processes and this is likely to lower its archaeological potential. The current subject area is situated entirely on reclaimed land and does not overlap with the apparent location of the original shoreline, making it likely that the subject area has low to no potential for the retention of Aboriginal deposits or objects.

4.1.3. AHIMS Database

The Aboriginal Heritage Information Management System (AHIMS) database comprises previously registered Aboriginal archaeological objects and cultural heritage places in NSW and it is managed by the Department of Premier and Cabinet (DPC) under Section 90Q of the NPW Act. 'Aboriginal objects' is the official term used in AHIMS for Aboriginal archaeological sites. The terms 'Aboriginal sites', 'AHIMS sites' and 'sites' are used herein to describe the nature and spatial distribution of archaeological resources in relation to the subject area.

A search of the Aboriginal Heritage Information Management System (AHIMS) was carried out on 3 March 2022 (AHIMS Client Service ID: 664361) for an area of approximately 5km x 5km. A summary of all previously registered Aboriginal sites within the extensive search area is provided in Table 9 and their spatial distribution is shown in Figure 6. The Basic and Extensive AHIMS search results are included in **Appendix A**. The results of the search are discussed below.

Table 9 – Summary of extensive AHIMS search (AHIMS Client Service ID: 664361)

Site Type	Context	Number	Percentage
PAD	Open	15	27%
Shell Midden	Open	6	11%
Shelter with Shell Midden	Closed	6	11%
Shelter with Art	Closed	5	9%
Midden	Open	3	5%
Artefact Scatter with PAD	Open	2	4%
Rock Art	Open	2	4%
Shelter with Art and Midden	Closed	2	4%
Shelter with Midden	Closed	2	4%
Shelter with PAD	Closed	2	4%
Aboriginal Gathering Site with Artefact Scatter and Shell Midden	Open	1	2%
Artefact Scatter	Open	1	2%
Burial/s and Historic Place	Open	1	2%
Burial/s and Shelter with Art and Midden	Closed	1	2%
Contact Site	Open	1	2%
Contact Site with Midden	Closed	1	2%
Shell Midden with PAD	Open	1	2%
Shelter with Art, Artefact and Midden	Closed	1	2%
Shelter with Art and Shell Midden	Closed	1	2%
Shelter with PAD and Shell Midden	Closed	1	2%
Total		**55**	**100%**

The AHIMS search identified no Aboriginal sites and no Aboriginal places within the subject area. The AHIMS search identified at total of 63 Aboriginal objects and no Aboriginal places in the broader region of the subject area. Eight registered Aboriginal objects were identified in the AHIMS register as ‘destroyed’ or ‘not a site’, reducing the total number of sites to 55. The nearest Aboriginal site to the subject area is Lilyvale (AHIMS #45-6-1853) on Cumberland Street, The Rocks, where a heavily disturbed shell midden was recorded as having been likely impacted by 19th century construction.

It is evident from the AHIMS search results that there is a paucity of registered Aboriginal objects within the vicinity of the present subject area. While this may indicate low Aboriginal land use, it is important to note that the AHIMS register does not represent a comprehensive list of all Aboriginal objects or sites in a specified area as it lists only recorded sites identified during previous archaeological survey effort. The wider surroundings of the subject area and the region in general have been the subject of various levels and intensity of archaeological investigations during the last few decades. Most registered sites have been identified through targeted, pre-development surveys for infrastructure and maintenance works, with restrictions on the extent and scope of those developments. Additionally, the position of the subject area on reclaimed land significantly reduces the likelihood of Aboriginal objects being present

4.1.4. Conclusions Drawn from Archaeological Context

The following conclusions are drawn from the archaeological background information, including AHIMS results and pertinent regional archaeological investigations:

- No Aboriginal objects or Aboriginal places are registered within the subject area.
- Previous archaeological assessments that directly address the subject area found that the location has low to no potential for Aboriginal archaeology due to the nature of the land as historically reclaimed and significant historical disturbance to the original shoreline.
- Previous archaeological investigations from similar contexts near to the subject area found that the sites had low to no potential for Aboriginal archaeology due to the nature of the land as historically reclaimed and significant historical disturbance to the original shoreline.

Figure 6 – Map of AHIMS sites in extensive search area

4.2. ENVIRONMENTAL CONTEXT

The environmental context of a subject area is relevant to its potential for Aboriginal objects and places. Aboriginal objects may be associated with certain landscape features that played a part in the everyday lives and traditional cultural activities of Aboriginal people. Landscape features that are considered indicative of archaeological potential include rock shelters, sand dunes, waterways, waterholes and wetlands. Conversely, disturbance to the landscape after Aboriginal use may reduce the potential for Aboriginal objects and places. An analysis of the landscape within and near to the subject area is provided below. shows the soil landscapes and hydrology of the subject area. Figure 7 shows the soil landscapes and hydrology of the subject area.

4.2.1. Soil Landscape and Geology

Certain soil landscapes and geological features are associated with greater archaeological potential for Aboriginal objects and places. For example, sand dune systems are associated with the potential presence of burials and sandstone outcrops are associated with the potential presence of grinding grooves and rock art. The depth of natural soils is also relevant to the potential for archaeological materials to be present, especially in areas where disturbance is high. In general, as disturbance level increases, the integrity of any potential archaeological resource decreases. However, disturbance might not remove the archaeological potential even if it decreases integrity of the resources substantially.

The NSW Soil and Land Information System (SALIS) provides information on expected soil landscapes within NSW. Due to the subject area being artificially filled to extend the natural land into the harbour during the 1970s, the subject area is identified in SALIS as being within a Disturbed Terrain Soil Landscape (see Section 4.2.5). Disturbed Terrain soils potentially include dredged estuarine sand and mud, demolition rubble, industrial and household waste as well as rocks and local soil materials and are considered to have low to no potential for the retention of in-situ archaeology, as such there is little potential for archaeological deposits to be retained in the subject area.

4.2.2. Topography

Certain landform elements are associated with greater archaeological potential for Aboriginal objects and places. Areas that are located on a ridge top, ridge line or headland, located within 200m below or above a cliff face or within 20m of or in a cave, rock shelter or cave mouth are considered sensitive areas for Aboriginal objects and places.

The subject area has a generally flat topography and consists of reclaimed land. It is not associated with any topographic features that are considered to be archaeologically sensitive.

4.2.3. Vegetation

The presence of certain types of vegetation within in an area may be indicative of archaeological potential for certain site types, such as modified trees, or more generally of the habitability of an area for Aboriginal people.

As discussed in Section 4.2.5, the subject area is comprised of historically reclaimed land. There is therefore no possibility of culturally modified trees being retained within the subject area.

4.2.4. Hydrology

Proximity to a body of water is a factor in determining archaeological potential. Areas within 200m of the whole or any part of a river, stream, lake, lagoon, swamp, wetlands, natural watercourse or the high-tide mark of shorelines (including the sea) are considered sensitive areas for Aboriginal objects and places.

The subject area consists of reclaimed land on the eastern side of Darling Harbour and is bordered by the harbour to the immediate north and west. While the original shoreline is located to the immediate east of the subject area, on the eastern side of Hickson Road, this has now been buried and is outside the subject area. While this places the subject area within 200m of a former natural waterway, the nature of the site precludes the potential for the original shoreline to be impacted or for its proximity to affect archaeological potential, therefore the hydrology of the subject area is not considered to be archaeologically sensitive.

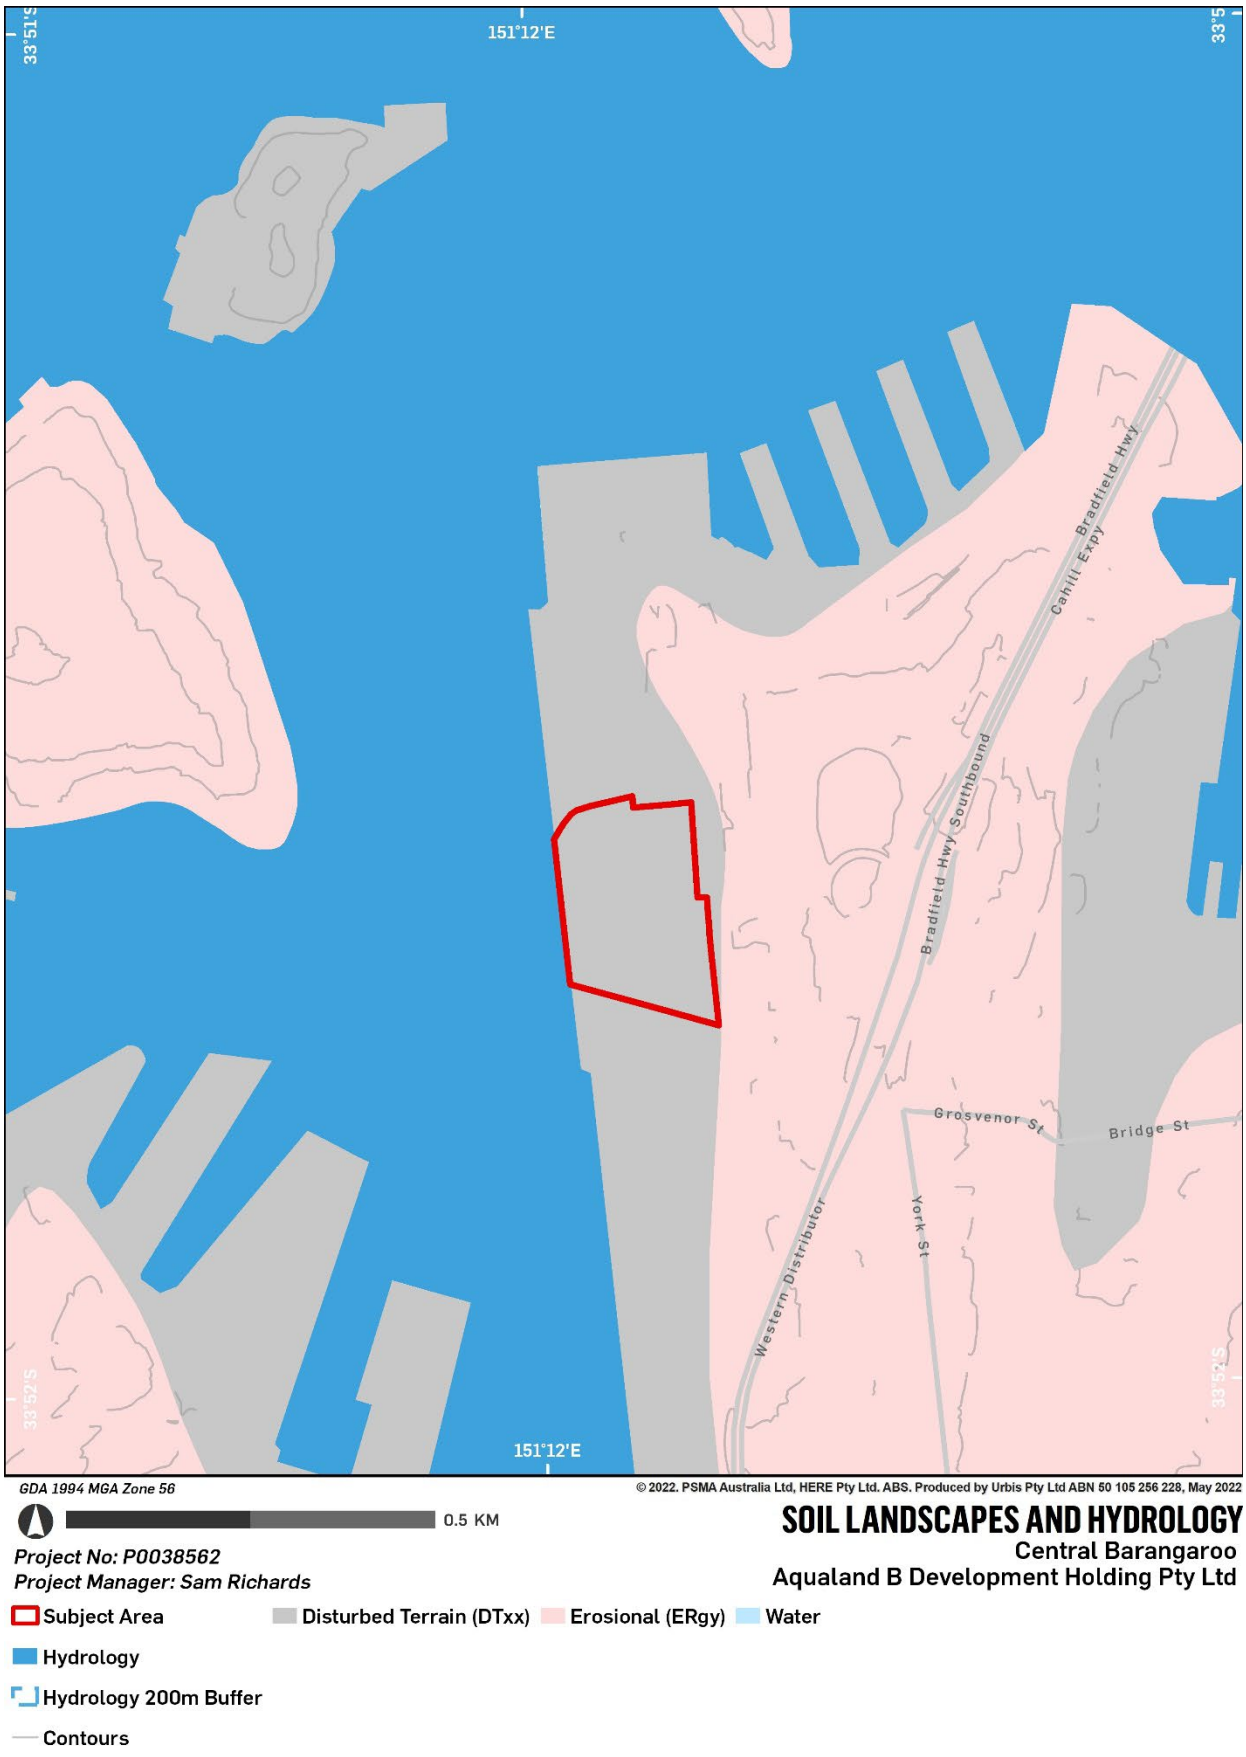

Figure 7 – Soil landscapes and hydrology.

4.2.5. Historical Ground Disturbance

Historical ground disturbance, either through human activity (e.g. soil ploughing, construction of buildings and clearing of vegetation) or natural processes (e.g. erosion) reduce the spatial and vertical integrity of archaeological resources within a subject area and expose sub-surface deposits. Ground disturbance can thus reduce the archaeological potential of a site.

Prior to historical land reclamation, the subject area was within Darling Harbour. The location of the subject area compared to the original shoreline is shown in Figure 8. Additionally, the plan marks the entire shoreline along the eastern boundary of the subject area with a string of '+' symbols, apparently indicating shallow water.

By 1822, only a handful of buildings were present to the immediate east of the subject area, located between Kent Street and the current location of Hickson Road (Figure 8). The original topography of the area east of the present subject area was rugged, rising steeply from Darling Harbour to Millers Point and Observatory Hill. It is likely these conditions disfavoured early settlement, delaying development of the area despite its proximity to the centre of the growing town of Sydney.

Due to its location and topography, significant activity is unlikely during this the early 19th century, with little to modification of the original shoreline. Use of the subject area was likely limited to casual visitation and incidental (potentially unintended) maritime activities.

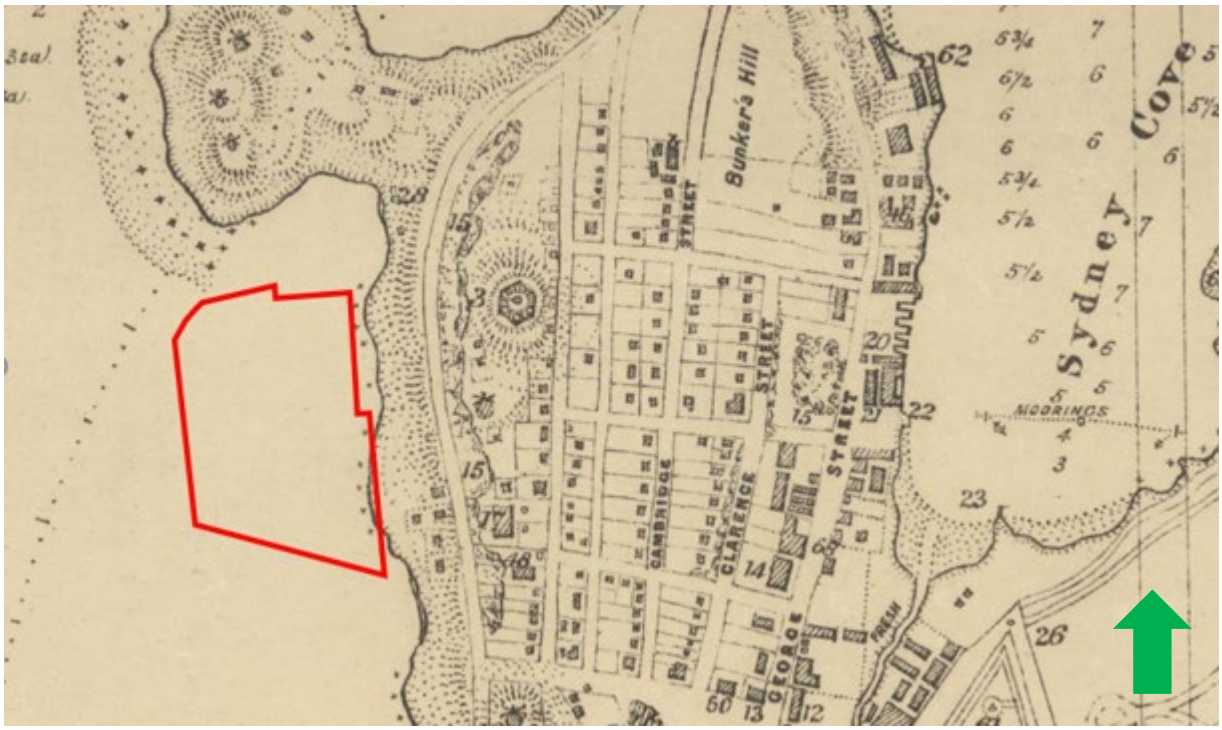

Figure 8 – Detail from of "Plan of the Town and Suburbs of Sydney August 1822", showing approximate location of subject area (red outline). The '+' symbols indicate shallow water. The north arrow is shown in green.

Source: National Library of Australia, Bib. ID 2674887

The mid-19th century saw the first commercial and industrial development of the subject area. Much of the development within the subject area during this phase was related to the maritime industry, with the appearance commercial wharves and ship-building operations. This phase also saw the establishment of Australia' first gasworks within the southern portion of the subject area.

The first modification of the original shoreline within the present subject appears to have occurred in the 1820s. A plan of Sydney from 1831 shows a spit of land extending westward into Darling Harbour from the south-eastern boundary of the subject area (Figure 9). The spit corresponds to the northern boundary of Lot 1 Section 93, which had been granted to James Jenkins. Jenkins operated a boat building business from the market wharf to the south of the subject area (Walsh 1969). The spit may have built for the purpose of land reclamation as the shoreline south of the spit can be seen to extend beyond the original shoreline north of the spit (New South Wales Government Gazette 1864) (Figure 10). By 1855, Jenkins' grant was owned by the shipwrights, Hely, Drake and Harper (The Sydney Morning Herald 1855). Later operating as Hely and Harper, they completed construction a floating dock at the site in 1862 (Hobbs 2017:54).

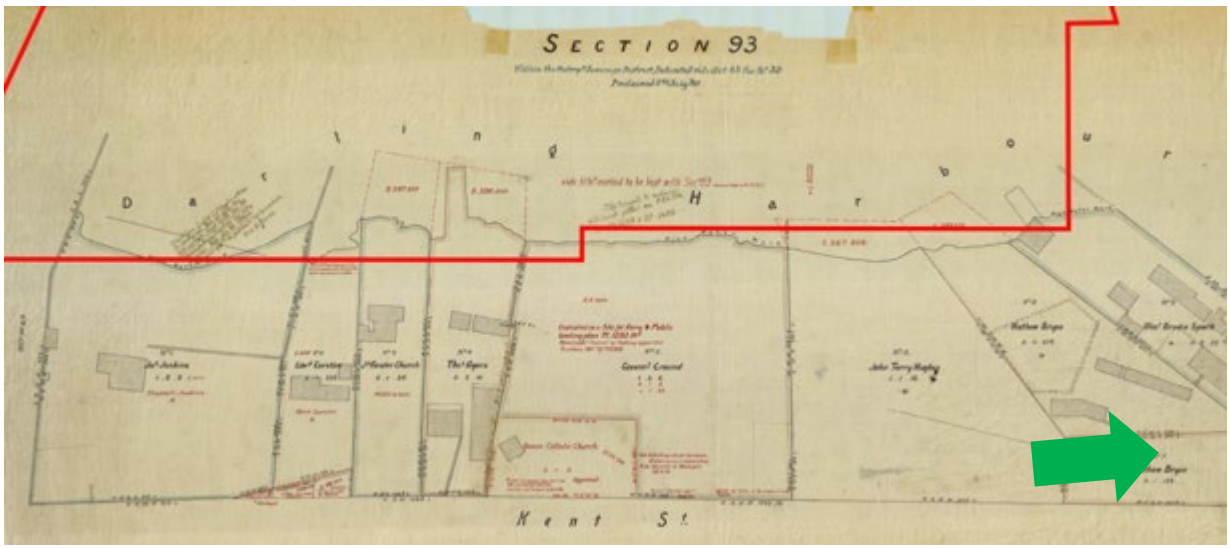

Figure 10 – Detail of plans of Section 93 of the City of Sydney, ca. 1841, showing the land encompassed by the eastern portion of the subject area (outlined in red). The north arrow is shown in green.

Source: City of Sydney Archives A-00880344

By the mid-19th century another spit had been extended into Darling Harbour further to the north from Thomas Agars' grant (Figure 10) a wharf south of Agar's wharf (New South Wales Government Gazette 1849, 1851). Further north, a wharf also extended into the north-eastern corner of the subject area from Alexander Brodie Spark's grant (Lot 9 Section 93) by ca. 1841 (Figure 10).

Two years after its formation in 1837, the Australian Gas Light Company (AGL) purchased Lots 15 and 16 of Section 67 of the City of Sydney and established Australia's first gasworks on the site (Casey & Lowe 2014). The original configuration of the gasworks, as shown in a plan from 1842 (Figure 11), included two buildings located within the present subject area with no further reclamation of land having been undertaken at this stage. By 1855, the gasworks site had been extended further westward into Darling Harbour and included several additional buildings within the subject area.

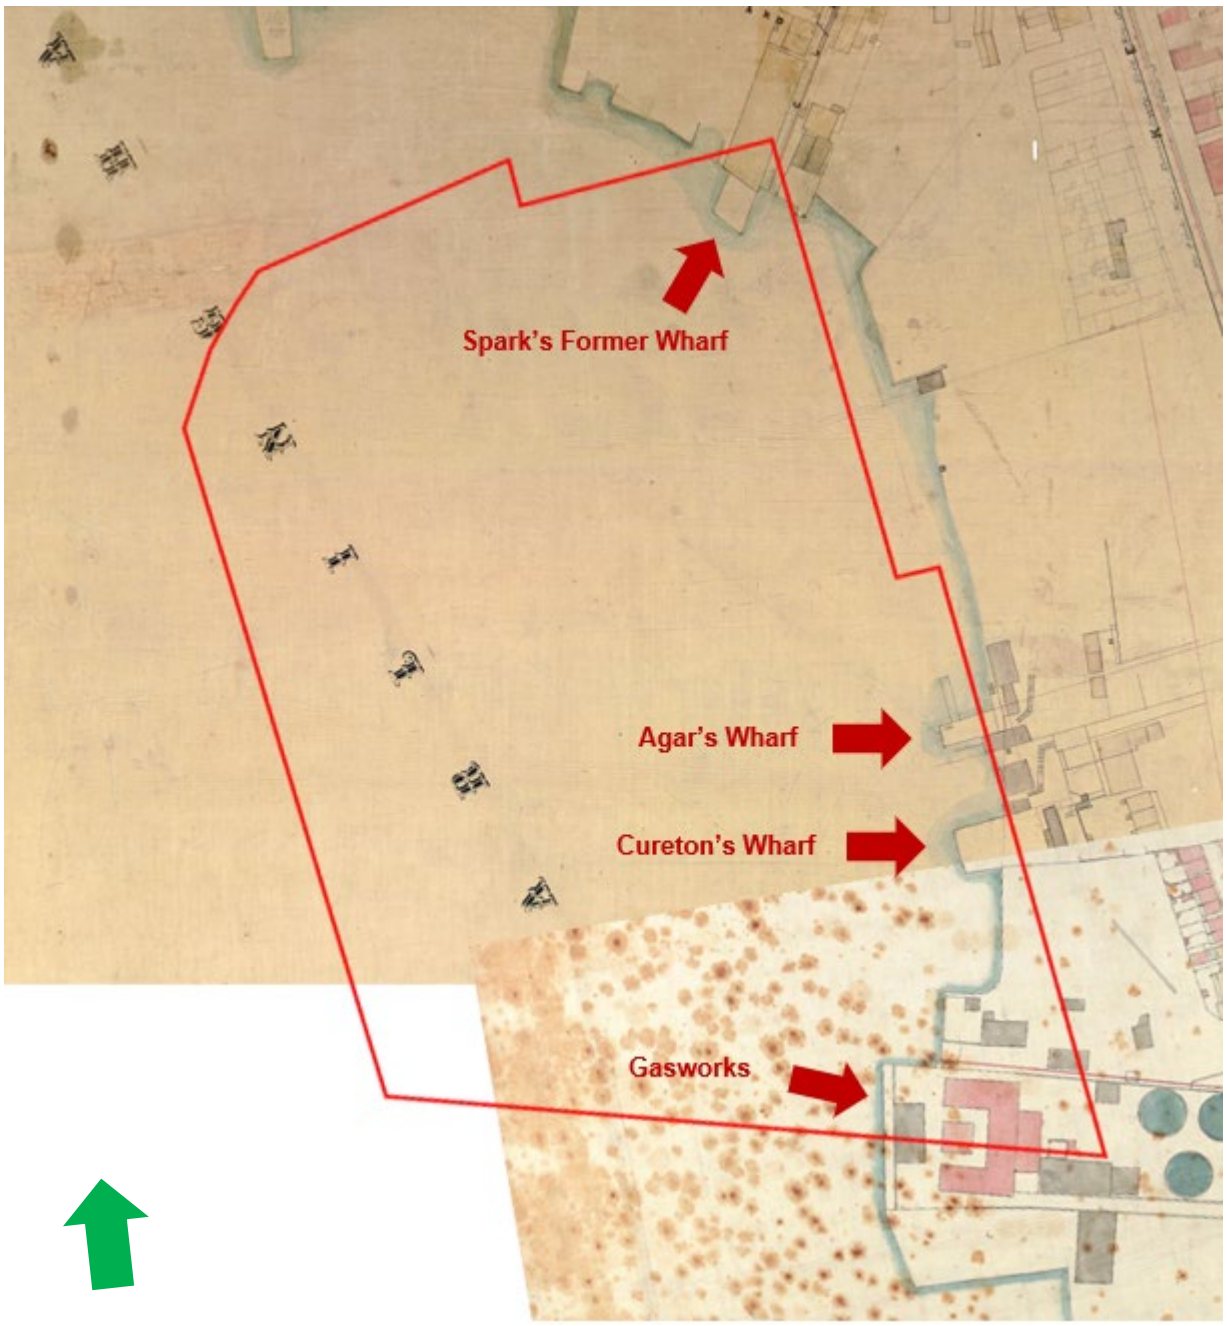

Figure 11 – Detail of trigonometric surveys of Sydney 1865 (subject area outlined in red). The north arrow is shown in green.

Source: City of Sydney Archives A-00880372 and A-00880379

The late 19th century saw the redevelopment of both the maritime industry in the northern portion of the subject area and the redevelopment and expansion of the gasworks in the southern portion of the subject area.

In the northern part of the subject area, Cuthbert's Ship-building Yard was purchased by TA Dibbs in the late 1870s (Austral 2010:26). By 1877, Dibb's had redeveloped the slips and yards of Cuthbert's former enterprise and built new jetties and warehouses (Hobbs 2017). Three of the new jetties to the west of Spark's former wharf now extended into the northern portion of the subject area (Figure 12). By 1888, McLean's wharf had been built to the south of Dibb's shipyard (The Sydney Morning Herald 1888). It also extended into the northern portion of the subject area (Figure 12).

In addition to expanding into the area formerly occupied by Rowntree's floating dock, the AGL gasworks underwent major redevelopment between 1869 and 1892 (Austral 2010:31). The redevelopment works included the demolition of earlier buildings within the subject area and construction of new buildings (Figure 12).

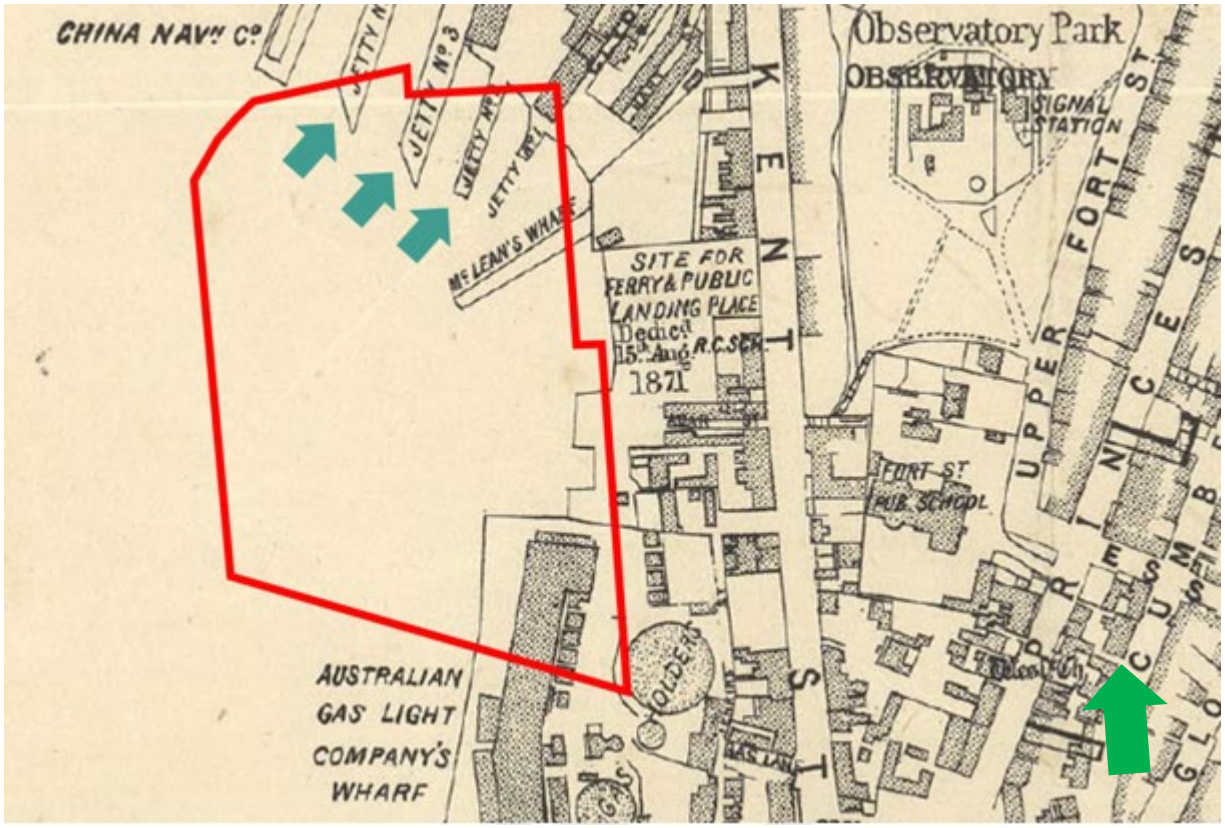

Figure 12 – Detail of plan of the City of Sydney, 1903 (subject area outlined in red), showing location of former the new wharves built by GR Dibbs (teal arrows). The north arrow is shown in green.

Source: City of Sydney Archives A-00880475

Following the outbreak of the bubonic plague in 1900, the NSW Government moved to resume the wharves of Darling Harbour to prevent spread of the disease (The Bulletin 1900). The Sydney Harbour Trust (SHT) was established in the same year to control and manage the improvement and preservation of the Port of Sydney (Austral 2010). The SHT's remit included demolition of old wharves, land reclamation, construction of new port facilities, dredging operations and removal of shipwrecks (Austral 2010).

As evidenced by aerial photographs of the subject area from 1930 (Figure 13) and 1961 (Figure 14), little further development occurred within for half a century following the construction of the finger wharves.

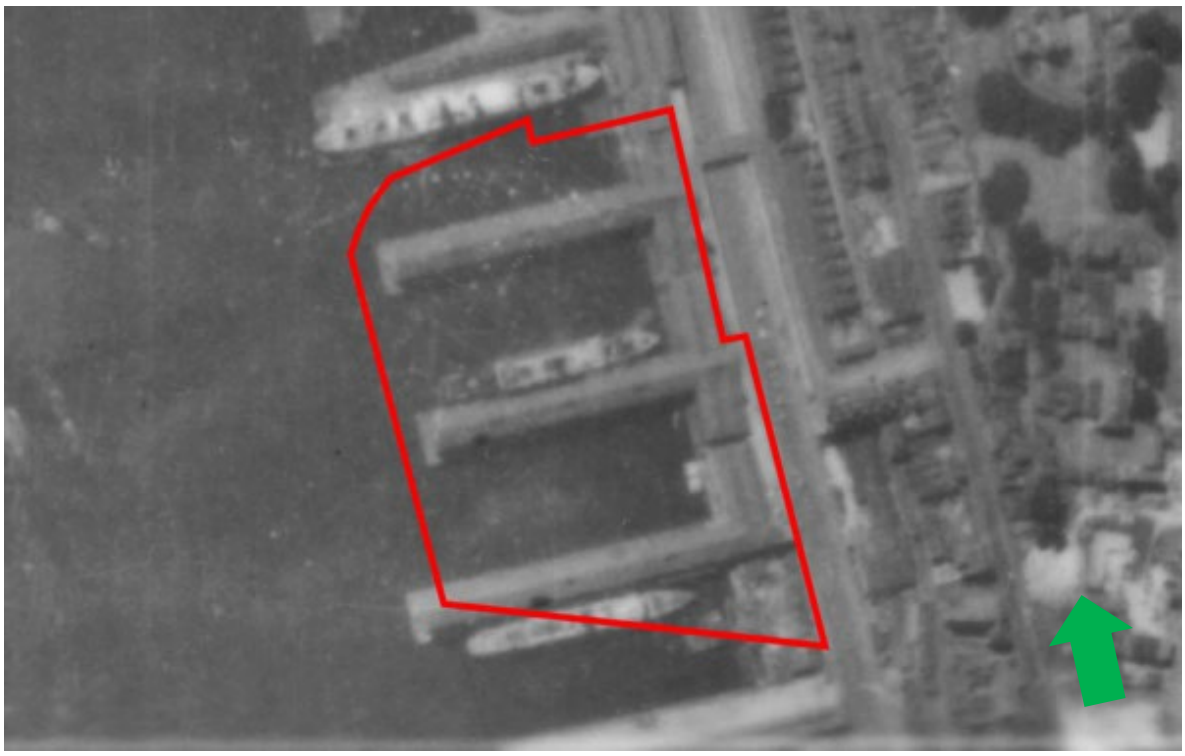

Figure 13 – Aerial photograph of the subject area (outlined in red), 1930. The north arrow is shown in green.

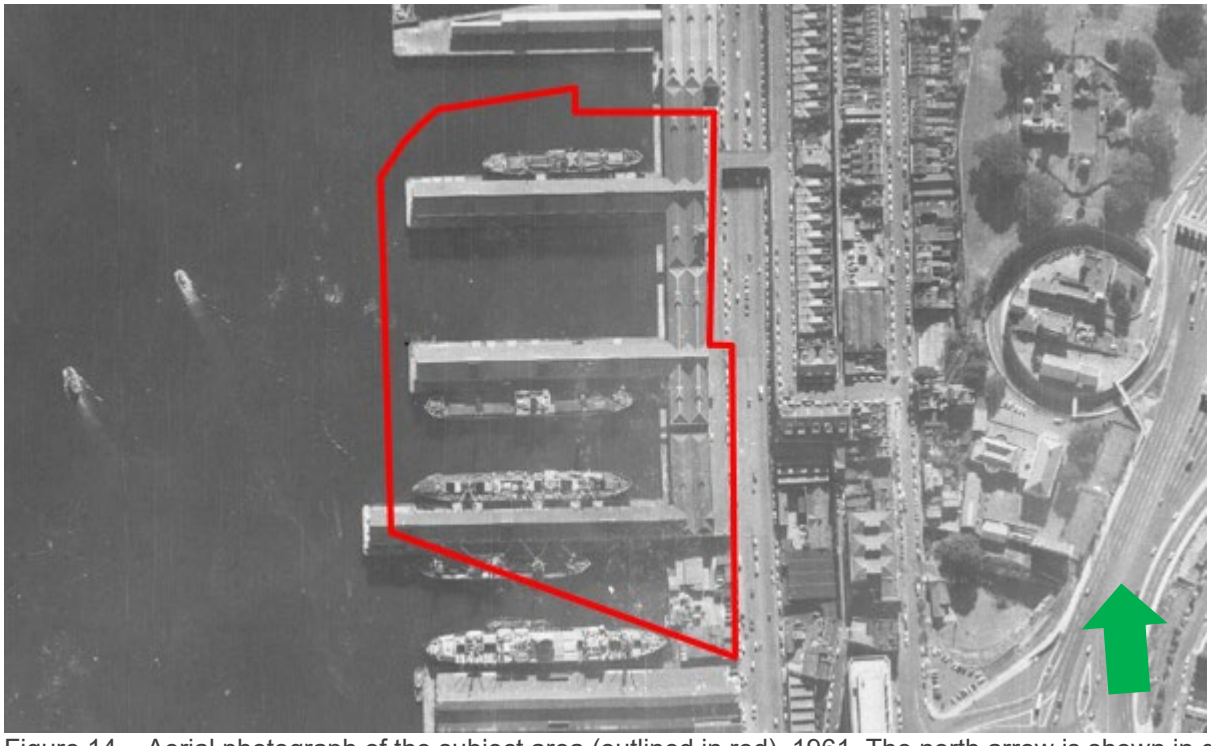

Figure 14 – Aerial photograph of the subject area (outlined in red), 1961. The north arrow is shown in green.

Source: NSW Government Spatial Services, Historical Imagery Viewer

During the 1970s, the area now encompassed by the subject area was infilled to reclaim the land, extending the coastline westward into Darling Harbour. Figure 15 shows the subject area in 1971, while the land reclamation process was underway. The fills used in land reclamation were likely to have included dredged

estuarine sand and mud, demolition rubble, industrial and household waste as well as rocks and local soil materials. While it is possible that disturbed Aboriginal objects may be present in these fills, the nature of the reclaimed land is likely to significantly reduce or nullify the potential for contextually secure Aboriginal objects to be retained.

Figure 15 – Aerial photograph of the subject area (outlined in red), 1971. The north arrow is shown in green.

Source: NSW Government Spatial Services, Historical Imagery Viewer

4.2.6. Conclusions Drawn from Environmental Context

The following conclusions are drawn from the above assessment of the environmental context of the subject area:

- The subject area consists entirely of reclaimed land.
- The reclaimed nature of the land is likely to significantly reduce or nullify the potential for contextually secure Aboriginal objects to be retained.

4.3. VISUAL INSPECTION

A visual inspection of the subject area was undertaken by Sam Richards (Urbis Senior Archaeologist) and Aaron Olsen (Urbis Consultant Archaeologist) on 14 June 2022, with Lana Wedgewood (Darug Custodian Aboriginal Corporation) and Lilly Carroll (Didge Ngunawal Clan). Additional participants include representatives from Aqualand and Infrastructure NSW.

The visual inspection was undertaken in sunny conditions. Visibility was nil across most of the subject area due to the presence of a hardstand flooring covering the extent of the subject area (Figure 14 to Figure 23). There were no areas of exposure present. Ground Surface Visibility (GSV) was estimated to be 0% across the entire subject area.

No Aboriginal objects were identified during the visual inspection.

While it is evident that the ground surface has been heavily impacted by historical activities, the visual inspection was unable to determine any subsurface disturbance within subsurface natural soils.

4.4. PREDICTIVE MODEL

A predictive model may be used to estimate the nature and distribution of evidence of Aboriginal land use in a subject area. A predictive model should consider variables that may influence the location, distribution and density of sites, features or artefacts within a subject area. Variables typically relate to the environment and topography, such as soils, landscape features, slope, landform and cultural resources.

The general process archaeologists employ to determine the likelihood of any particular site type (artefact scatter, shelter, midden etc) occurring within a given subject area requires the synthesis of information for general distribution of archaeological sites within the wider area including:

- Detailed analysis of previous archaeological investigations within the same region.
- Presence or absence of landscape features that present potential for archaeological resources (human occupation, use) such as raised terraces adjacent to permeant water.
- Analysis of the geology and soil landscape within the subject area which allows for a determination to be made of the type of raw material that would have been available for artefact production (silcrete, tuff, quartz etc) and the potential for the accumulation of archaeological resource within the subject area.
- Investigation of and determination of the level of disturbance/historical land use within the subject area which may impact on or remove entirely any potential archaeological material.

An indicative process of determining the likelihood of a given site occurring within a subject area is provided in Table 10 below.

Table 10 – Indicative process for determining the potential presence of a site

Likelihood	Indicative subject area context	Indicative action
High	Low level of ground disturbance in combination with at least one archaeologically sensitive landscape feature or Aboriginal object (either registered or newly identified) within the subject area.	Detailed archaeological investigation including but not limited to survey, test excavation and potentially (depending on density and/or significance of archaeological deposit) salvage excavation.
Moderate	Moderate level of ground disturbance in combination with at least one archaeologically sensitive landscape feature or Aboriginal object (either registered or newly identified) within the subject area.	Detailed archaeological investigation including but not limited to survey, test excavation and potentially (depending on density and/or significance of archaeological deposit) salvage excavation.
Low	High level of ground disturbance in combination with at least one archaeologically sensitive landscape feature or Aboriginal object (either registered or newly identified) within the subject area.	Employ chance finds procedure and works can continue without further archaeological investigation.
Nil	Complete ground disturbance (i.e. complete removal of natural soil landscape); or no archaeologically sensitive landscape features and no archaeological sites within subject area.	Employ chance finds procedure and works can continue without further archaeological investigation.

4.4.1. Typical Site Types

A range of Aboriginal site types are known to occur within New South Wales. Site types that are typically encountered in the Cumberland Plain are described below.

Art sites can occur in the form of rock engravings or pigment on sandstone outcrops or within shelters. An engraving is some form of image which has been pecked or carved into a rock surface. Engravings typically vary in size and nature, with small abstract geometric forms as well as anthropomorphic figures and animals also depicted. In the Sydney region engravings tend to be located on the tops of Hawkesbury Sandstone ridges where vistas occur. Pigment art is the result of the application of material to a stone to leave a distinct impression. Pigment types include ochre, charcoal and pipeclay. Pigment art within the Sydney region is usually located in areas associated with habitation and sustenance.

Artefact Scatters/Camp Sites represent past Aboriginal subsistence and stone knapping activities and include archaeological remains such as stone artefacts and hearths. This site type usually appears as surface scatters of stone artefacts in areas where vegetation is limited, and ground surface visibility increases. Such scatters of artefacts are also often exposed by erosion, agricultural events such as ploughing, and the creation of informal, unsealed vehicle access tracks and walking paths. These types of sites are often located on dry, relatively flat land along or adjacent to rivers and creeks. Camp sites containing surface or subsurface deposit from repeated or continued occupation are more likely to occur on elevated ground near the most permanent, reliable water sources. Flat, open areas associated with creeks and their resource-rich surrounds would have offered ideal camping areas to the Aboriginal inhabitants of the local area.

Bora / Ceremonial Sites are locations that have spiritual or ceremonial values to Aboriginal people. Aboriginal ceremonial sites may comprise natural landforms and, in some cases, will also have archaeological material. Bora grounds are a ceremonial site type, usually consisting of a cleared area around one or more raised earth circles, and often comprised of two circles of different sizes, connected by a pathway, and accompanied by ground drawings or mouldings of people, animals or deities, and geometrically carved designs on the surrounding trees.

Burials of the dead often took place relatively close to camp site locations. This is due to the fact that most people tended to die in or close to camp (unless killed in warfare or hunting accidents), and it is difficult to move a body long distance. Soft, sandy soils on, or close to, rivers and creeks allowed for easier movement of earth for burial; and burials may also occur within rock shelters or middens. Aboriginal burial sites may be marked by stone cairns, carved trees or a natural landmark. Burial sites may also be identified through historic records or oral histories.

Contact Sites are most likely to occur in locations of Aboriginal and settler interaction, such as on the edge of pastoral properties or towns. Artefacts located at such sites may involve the use of introduced materials such as glass or ceramics by Aboriginal people or be sites of Aboriginal occupation in the historical period.

Grinding Grooves are the physical evidence of tool making or food processing activities undertaken by Aboriginal people. The manual rubbing of stones against other stones creates grooves in the rock; these are usually found on flat areas of abrasive rock such as sandstone. They may be associated with creek beds, or water sources such as rock pools in creek beds and on platforms, as water enables wet-grinding to occur.

Isolated Finds represent artefactual material in singular, one-off occurrences. Isolated finds are generally indicative of stone tool production, although can also include contact sites. Isolated finds may represent a single item discard event or be the result of limited stone knapping activity. The presence of such isolated artefacts may indicate the presence of a more extensive, in situ buried archaeological deposit, or a larger deposit obscured by low ground visibility. Isolated artefacts are likely to be located on landforms associated with past Aboriginal activities, such as ridgelines that would have provided ease of movement through the area, and level areas with access to water, particularly creeks and rivers.

Middens are indicative of Aboriginal habitation, subsistence and resource extraction. Midden sites are expressed through the occurrence of shell deposits of edible shell species often associated with dark, ashy soil and charcoal. Middens often occur in shelters, or in eroded or collapsed sand dunes. Middens occur along the coast or in proximity to waterways, where edible resources were extracted. Midden may represent a single meal or an accumulation over a long period of time involving many different activities. They are also often associated with other artefact types.

Modified Trees are evidence of the utilisation of trees by Aboriginal people for various purposes, including the construction of shelters (huts), canoes, paddles, shields, baskets and bowls, fishing lines, cloaks, torches and bedding, as well as being beaten into fibre for string bags or ornaments. The removal of bark exposes the

heart wood of the tree, resulting in a scar. Trees may also have been scarred in order to gain access to food resources (e.g. cutting toeholds so as to climb the tree and catch possums or birds), or to mark locations such as tribal territories. Such scars, when they occur, are typically described as scarred trees. These sites most often occur in areas with mature, remnant native vegetation. The locations of scarred trees often reflect an absence of historical clearance of vegetation rather than the actual pattern of scarred trees. Carved trees are different from scarred trees, and the carved designs may indicate totemic affiliation; they may also have been carved for ceremonial purposes or as grave markers.

Potential Archaeological Deposits (PADs) are areas where there is no surface expression of stone artefacts, but due to a landscape feature there is a strong likelihood that the area will contain buried deposits of stone artefacts. Landscape features which may feature in PADs include proximity to waterways, particularly terraces and flats near third order streams and above; ridge lines, ridge tops and sand dune systems.

Shelters are places of Aboriginal habitation. They take the form of rock overhangs which provided shelter and safety to Aboriginal people. Suitable overhangs must be large and wide enough to have accommodated people with low flooding risk. Due to the nature of these sites, with generic rock over hangs common particularly in areas with an abundance of sandstone, their use by Aboriginal people is generally confirmed through the correlation of other site types including middens, art, PAD and/or artefactual deposits.

4.4.2. Assessment of Archaeological Potential

The likelihood of the site types described in 4.4.1 above occurring within the present subject area is assessed in Table 11 below.

Table 11 – Predictive Model

Site Type	Assessment	Potential
Art	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The subject area does not include any visible sandstone outcrops or rock overhangs that would be indicative of the potential for rock art (Section 4.2.2). The likelihood of any concealed rock overhangs or sandstone outcrops being present within the subject area is considered negligible.	**Nil**
Artefact Scatters / Campsites	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The likelihood of artefact scatters/campsites being retained is considered to be low.	**Nil - Low**
Bora / Ceremonial	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The likelihood of bora/ceremonial sites being retained is considered to be low.	**Nil - Low**
Burial	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The likelihood of the area being used for burial sites and for them have been retained is considered to be negligible.	**Nil**
Contact site	The location of the subject area within an area of early European settlement is indicative of the potential for contact sites (Section 4.2.5). The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The likelihood of contact sites being retained is considered to be low.	**Nil - Low**
Grinding Grooves	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The subject area does not include any visible	**Nil**

Site Type	Assessment	Potential
	sandstone outcrops that would be indicative of the potential for grinding grooves (Section 4.2.2). The likelihood of any concealed sandstone outcrops being present within the subject area is considered to be negligible.	
Isolated Finds	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The likelihood of isolated finds being retained is considered to be low.	**Nil - Low**
Midden	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The likelihood of middens being retained is considered to be low.	**Nil - Low**
Modified Trees	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, removing any potential for the presence of modified trees (Section 0).	**Nil**
PAD	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The likelihood of archaeological deposits being retained is considered to be low.	**Nil - Low**
Shelters	The subject area is located in a Disturbed Terrain landscape (Section 4.2.1) and consists of reclaimed land, significantly reducing the area's archaeological potential. The subject area does not include any rock overhangs that would be indicative of the potential for shelters (Section 4.2.2). The likelihood of any concealed rock overhangs being present within the subject area is considered to be negligible.	**Nil**

4.5. SUMMARY

The assessments of the archaeological and environmental contexts of the subject area are summarised as follows:

- No previously known Aboriginal objects or Aboriginal places have been identified within the subject area and no new Aboriginal objects or Aboriginal places have been identified.
- The subject area is located in a Disturbed Terrain landscape and consists of reclaimed land.
- As the subject area consists of reclaimed land, it is determined to have nil to low potential for the retention of Aboriginal objects.

5. SIGNIFICANCE ASSESSMENT

The following is an assessment and discussion of the cultural significance of the subject area, made in consultation with the RAPs. The assessment follows principles and procedures outlined in the Burra Charter the Assessment Guidelines.

The Burra Charter defines cultural significance as being derived from the following values: social or cultural value, historic value, scientific value and aesthetic value. Aesthetic, historic, scientific and social values are commonly interrelated. All assessments of heritage values occur within a social and historic context. Therefore, all potential heritage values will have a social component.

Assessment of each value should be graded in terms that allow the significance to be described and compared (e.g. high, moderate, or low). In applying these criteria, consideration should be given to:

- Research potential: *does the evidence suggest any potential to contribute to an understanding of the area and/or region and/or state's natural and cultural history?*
- Representativeness: *how much variability (outside and/or inside the subject area) exists, what is already conserved, how much connectivity is there?*
- Rarity: *is the subject area important in demonstrating a distinctive way of life, custom, process, land-use, function or design no longer practised? Is it in danger of being lost or of exceptional interest?*
- Education potential: *does the subject area contain teaching sites or sites that might have teaching potential?*

Heritage significance is assessed by considering each cultural or archaeological site against the significance criteria set out in the Assessment Guidelines. The Assessment Guidelines require that the assessment and justification in a statement of significance includes a discussion of whether any value meets the following criteria:

- Does the subject area have a strong or special association with a particular community or cultural group for social, cultural or spiritual reasons? – social value.
- Is the subject area important to the cultural or natural history of the local area and/or region and/or state? – historic value.
- Does the subject area have potential to yield information that will contribute to an understanding of the cultural or natural history of the local area and/or region and/or state? – scientific (archaeological) value.
- Is the subject area important in demonstrating aesthetic characteristics in the local area and/or region and/or state? – aesthetic value.

5.1. ASSESSMENT OF HERITAGE VALUES

The following assessment of the social or cultural, historic, scientific and aesthetic values of the subject area has been prepared in accordance with the Assessment Guidelines.

In acknowledgment that the Aboriginal community themselves are in the best position to identify heritage values, the assessment is informed by consultation with the Aboriginal community. Consultation with Aboriginal people should provide insight into past events. The RAPs were invited to provide comment and input into this ACHAR and to the assessment of cultural heritage values for the subject area, as documented in this report. Any culturally sensitive values identified have not been explicitly included in the report or made publicly available. Any such values would be documented and lodged with the knowledge holder providing the information.

5.1.1. Social or Cultural Value

Social or cultural value encompasses the qualities for which a place has become a focus of spiritual, political, national or other cultural sentiment for Aboriginal people. Social or cultural value is how people express their connection with a place and the meaning that place has for them. Places of social or cultural value have associations with contemporary community identity. These places can have associations with tragic or warmly remembered experiences, periods, or events. Communities can experience a sense of loss should a place of social or cultural value be damaged or destroyed. Social or cultural values can therefore only be identified through consultation with Aboriginal people.

Comments received by Darug Custodian Aboriginal Corporation (DCAC) during Stage 2/3 and Stage 4 noted that the location of the subject area is in proximity to a complex of significant sites, and that DCAC are connected to all of these sites.

Comments received by Didge Ngunawal Clan during Stage 2/3 of the consultation process identified their cultural connection to the region through Phillip Carroll from the Gadigal and Eora tribe.

Comments received by Kamilaroi Yankuntjatjara Working Group during Stage 2/3 and Stage 4 of the consultation process identified the region as being of high cultural significance (containing tangible and intangible values), and that the subject area is in proximity to Darling Harbour, which is an archaeologically sensitive landscape feature.

Generally, the RAPs identified a strong connection to the region.

Based on the evidence obtained during the consultation process, the subject area is determined to have social and cultural value to the Aboriginal community.

5.1.2. Historic Value

Historic value encompasses the history of aesthetics, science and society. A place may have historic value because it is associated with a historic figure, event, phase or activity in an Aboriginal community. The significance of a place will be greater where evidence of the association or event survives in situ, or where the settings are substantially intact, than where it has been changed or evidence does not survive. However, some events or associations may be so important that the place retains significance regardless of subsequent treatment. Places may also have 'shared' historic values with other (non-Aboriginal) communities.

Places of post-contact Aboriginal history have generally been poorly recognised in investigations of Aboriginal heritage. Consequently, the Aboriginal involvement and contribution to important regional historical themes is often missing from accepted historical narratives. For this reason, it is often necessary to collect oral histories along with archival or documentary research to gain a sufficient understanding of historic values.

No historical associations between Aboriginal people and the subject area have been identified and the potential for contact sites within the subject area is assessed to be nil to low. The subject area is therefore unlikely to have historic value insofar as it relates to Aboriginal cultural heritage.

5.1.3. Scientific (Archaeological) Value

Scientific value relates to the importance of a landscape, area, place or object because of its rarity, representativeness and the extent to which it may contribute to further understanding and information. Information about scientific value will be gathered through any archaeological investigation undertaken. Archaeological investigations must be carried out according to the Code of Practice.

The subject area consists of reclaimed land that has undergone significant disturbance. The archaeological potential of the subject area has therefore been assessed to be nil to low for Aboriginal archaeological deposits. Additional commentary was made by Didge Ngunawal Clan during the site inspection acknowledging that the subject area has been "destroyed" and consists of reclaimed land. Should any Aboriginal archaeological resources be retained within the subject, these are likely to be in disturbed contexts and of little research value. The subject area is therefore unlikely to have scientific value related to Aboriginal cultural heritage.

5.1.4. Aesthetic Value

Aesthetic value of a place relates to the sensory, scenic, architectural and creative aspects of a place. It may include visual aspects, such as form, scale, colour, texture and material of the fabric, and the smells and sounds associated with the place and its use.

It is evident that the subject area is highly disturbed due to phases of reclamation, the construction and demolition of buildings and its utilisation for industrial purposes. The present visual appearance and other sensory aspects of the subject area are unlikely to resemble those of the landscape of the local area as it existed prior to European contact. The subject area is therefore unlikely to have aesthetic value related to Aboriginal cultural heritage.

5.2. STATEMENT OF SIGNIFICANCE

The subject area is determined to have no scientific, historic or aesthetic value and therefore has no historic or aesthetic significance. However, based on the evidence obtained during the consultation process, the subject area is determined to have social and cultural value to the Aboriginal community because of its association with waterways in the broader area (Darling Harbour) and the location of other known sites in the broader area.

The social and cultural value of the subject area is graded as low because it consists of highly disturbed reclaimed land. The subject area therefore offers little research or education potential in relation to the cultural importance of waterways or other sites to Aboriginal people, nor is it a good representation of such cultural associations. Furthermore, the subject area is not a rare example of a cultural site associated with a waterway as many such sites are known in the Sydney region.

The subject area is therefore assessed as having no Aboriginal cultural significance.

6. IMPACT ASSESSMENT

The following is an assessment of the potential impact of the proposed development on any Aboriginal objects and/or Aboriginal places within the subject area and the possible strategies for avoiding or minimising harm to those Aboriginal objects and/or Aboriginal places.

The potential harm to Aboriginal objects and Aboriginal places that is likely to be caused by a proposed activity is the effect of that activity on the Aboriginal heritage values identified above. According to the NPW Act, "harm" to an object or place includes any act or omission that:

- Destroys, defaces, or damages the object or place.
- Moves the object from the land on which it had been situated.
- Causes or permits the object or place to be harmed.

Harm does not include something that is trivial or negligible, such as picking up and replacing a small stone artefact, breaking a small Aboriginal object below the surface when you are gardening, crushing a small Aboriginal object when you walk on or off a track, picnicking, camping or other similar recreational activities.

The Assessment Guidelines define harm to Aboriginal objects and Aboriginal places as being either direct or indirect:

- **Direct harm** may occur as the result of any activity which disturbs the ground including, but not limited to, site preparation activities, installation of services and infrastructure, roadworks, excavation, flood mitigation measures.
- **Indirect harm** may affect sites or features located immediately beyond or within the area of the proposed activity. Examples include, but are not limited to, increased impact on art in a shelter from increased visitation, destruction from increased erosion and changes in access to wild food resources.

The present assessment of potential harm follows the principles of ecologically sustainable development (ESD), in particular the precautionary principle and the principle of inter-generational equity:

- The **precautionary principle** states that full scientific certainty about the threat of harm should never be used as a reason for not taking measures to prevent harm from occurring.
- The **principle of inter-generational equity** holds that the present generation should make every effort to ensure the health, diversity and productivity of the environment, which includes cultural heritage, is available for the benefit of future generations. If a site type that was once common in an area becomes rare, the loss of that site (and site type) will result in an incomplete archaeological record and will negatively affect intergenerational equity.

Consideration of potential harm to Aboriginal objects and Aboriginal places according to ESD principles allows for an understanding of the cumulative impact of the proposed activity and an understanding of how harm can be avoided or minimised, if possible.

6.1. ASSESSMENT OF POTENTIAL HARM

The potential harm to Aboriginal objects or Aboriginal places arising from the proposed works relates to excavation and sinking of piles for the secant pile wall construction and site establishment works.

The desktop assessment undertaken as part of the present ACHA has determined that there are no known Aboriginal objects or Aboriginal places within the subject area. The archaeological potential of the subject area has assessed to be nil-low for artefact scatters/campsites, bore/ceremonial sites, contact sites, isolated finds, middens and PADs within intact natural soil. As such, there is low potential for harm to unknown Aboriginal objects.

6.2. AVOIDANCE & MINIMISATION OF HARM

All practicable measures must be taken to avoid harm and conserve any significant Aboriginal objects and/or Aboriginal places, along with their cultural heritage values. If harm to Aboriginal objects and/or Aboriginal places is unavoidable, management strategies must be considered to minimise the harm. The type of management strategies proposed must be appropriate to the significance of Aboriginal heritage values,

Aboriginal objects and/or Aboriginal places. Harm avoidance and minimisation measures must be feasible and within the financial viability of the proposed activity.

As there are no known Aboriginal objects within or near to the subject area, the proposed works inherently avoid harm to any known Aboriginal objects. Nevertheless, the precautionary principle requires measures to be taken to avoid or minimise any potential harm. The low possibility of harming any unknown objects in the subject area may be minimised by implementing the following unexpected finds procedures:

Archaeological Finds Procedure

Should any archaeological deposits be uncovered during any site works, the following steps must be followed:

1. All works within the vicinity of the find must immediately stop. The find must not be moved 'out of the way' without assessment.
2. The site supervisor or another nominated site representative must contact either the project archaeologist (if relevant) or Heritage NSW (Enviroline 131 555) to contact a suitably qualified archaeologist.
3. The nominated archaeologist must examine the find, provide a preliminary assessment of significance, record the item and decide on appropriate management measures. Such management may require further consultation with Heritage NSW, preparation of a research design and archaeological investigation/salvage methodology and registration of the find with the Aboriginal Heritage Information Management System (AHIMS).
4. Depending on the significance of the find, reassessment of the archaeological potential of the subject area may be required and further archaeological investigation undertaken.
5. Reporting may need to be prepared regarding the find and approved management strategies.
6. Works in the vicinity of the find can only recommence upon receipt of approval from Heritage NSW.

Human Remains Procedure

In the unlikely event that human remains are uncovered during the proposed works, the following steps must be followed:

1. All works within the vicinity of the find must immediately stop. The find must be cordoned-off and signage installed to avoid accidental impact.
2. The site supervisor or other nominated manager must notify the NSW Police and Heritage NSW (Enviroline 131 555).
3. The find must be assessed by the NSW Police, which may include the assistance of a qualified forensic anthropologist.
4. Management recommendations are to be formulated by the NSW Police, Heritage NSW and site representatives.
5. Works are not to recommence until the find has been appropriately managed.

7. CONCLUSIONS & RECOMMENDATIONS

The ACHA of Central Barangaroo, Hickson Road, Barangaroo, NSW, legally referred to as Lot 52 in DP1213772, concluded that:

- No previously known Aboriginal objects or Aboriginal places have been identified within the subject area and no new Aboriginal objects or Aboriginal places have been identified.
- The subject area is located in a Disturbed Terrain landscape and consists of reclaimed land.
- As the subject area consists of reclaimed land it is determined to have nil to low potential for the retention of Aboriginal objects. There is therefore little potential for harm to any Aboriginal objects due to the proposed works.
- The subject area is assessed as having no Aboriginal cultural significance.

Based on the above conclusions, Urbis recommends the following mitigation measures:

- Consultation with RAPs should continue until the finalisation of the proposed development to ensure the opportunity for community input.
- No further archaeological assessment of the subject area is required.
- In accordance with the Government Architect's guidelines, the Proponent should prepare a 'Connecting with Country Framework for Central Barangaroo' that informs and guides the concept design and detailed design stages of the project. This framework should include a Cultural Interpretation Plan (CIP), as recommended by the RAPs.
- The development may proceed with caution, subject to the following archaeological chance finds and human remains procedures being implemented and followed:

Archaeological Finds Procedure

Should any archaeological deposits be uncovered during any site works, the following steps must be followed:

1. All works within the vicinity of the find must immediately stop and the area should be cordoned-off and secured. The find must not be moved 'out of the way' without assessment.
2. The site supervisor or another nominated site representative must contact either the project archaeologist (if relevant) or Heritage NSW (Enviroline 131 555) to contact a suitably qualified archaeologist.
3. The nominated archaeologist must examine the find, provide a preliminary assessment of significance, record the item and decide on appropriate management measures. Such management may require further consultation with Heritage NSW, preparation of a research design and archaeological investigation/salvage methodology and registration of the find with the Aboriginal Heritage Information Management System (AHIMS).
4. Depending on the significance of the find, reassessment of the archaeological potential of the subject area may be required and further archaeological investigation undertaken.
5. Reporting may need to be prepared regarding the find and approved management strategies.
6. Works in the vicinity of the find can only recommence upon receipt of approval from Heritage NSW.

Human Remains Procedure

In the unlikely event that human remains are uncovered during the proposed works, the following steps must be followed:

1. All works within the vicinity of the find must immediately stop and the area should be cordoned-off and secured. The find must be cordoned-off and signage installed to avoid accidental impact.
2. The site supervisor or other nominated manager must notify the NSW Police and Heritage NSW (Enviroline 131 555).
3. The find must be assessed by the NSW Police, which may include the assistance of a qualified forensic anthropologist.

4. Management recommendations are to be formulated by the NSW Police, Heritage NSW and site representatives.
5. Works are not to recommence until the find has been appropriately managed.

APPENDIX B BASIC AND EXTENSIVE AHIMS SEARCH RESULTS

AHIMS Web Services (AWS)
Search Result

Your Ref/PO Number : Barangaroo 4km

Client Service ID : 664361

Urbis Pty Ltd - Angel Place L8 123 Pitt Street

Date: 03 March 2022

Level 8 123 Angel Street
Sydney New South Wales 2000

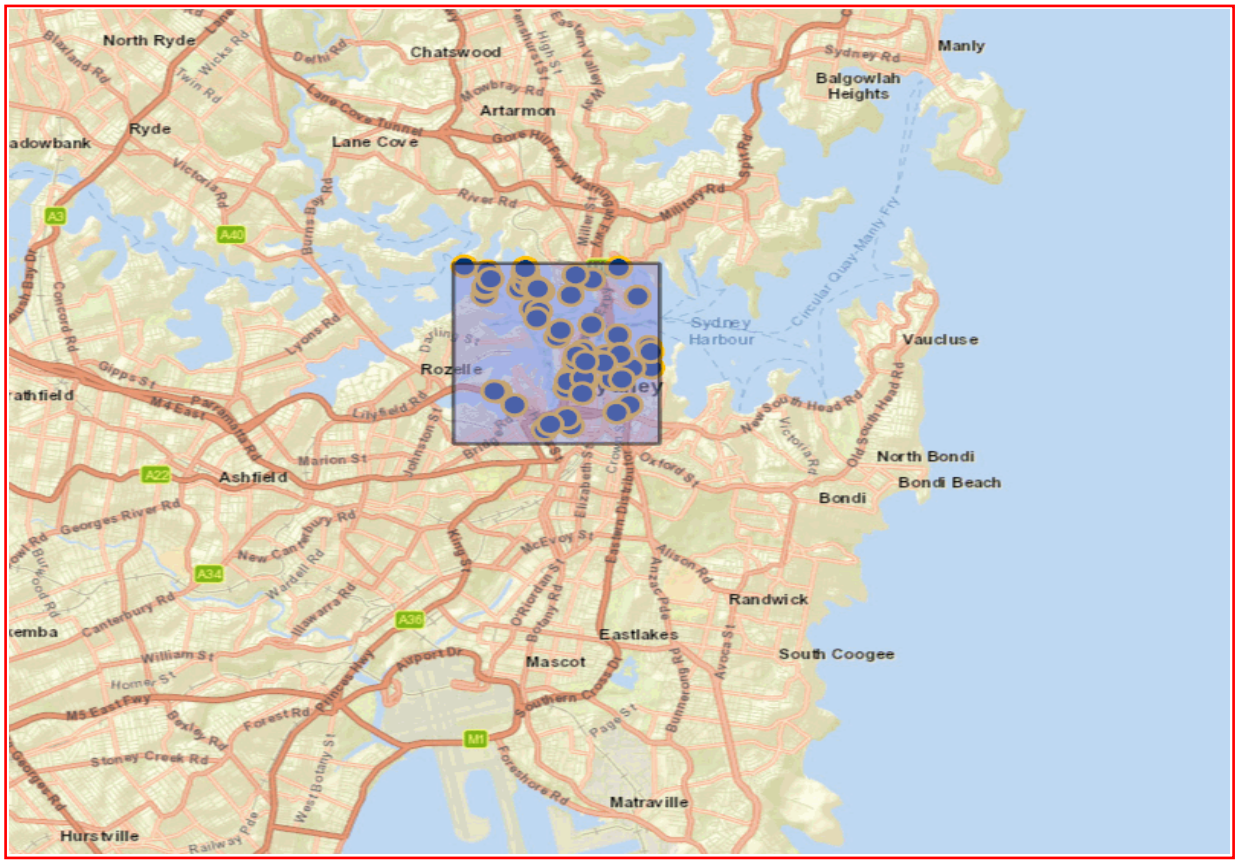

Attention: Therese Mccormick

Email: tmccormick@urbis.com.au

Dear Sir or Madam:

AHIMS Web Service search for the following area at Datum :GDA, Zone : 56, Eastings : 331523.0 - 335743.0, Northings : 6249663.0 - 6253979.0 with a Buffer of 0 meters, conducted by Therese Mccormick on 03 March 2022.

The context area of your search is shown in the map below. Please note that the map does not accurately display the exact boundaries of the search as defined in the paragraph above. The map is to be used for general reference purposes only.

A search of Heritage NSW AHIMS Web Services (Aboriginal Heritage Information Management System) has shown that:

63	**Aboriginal sites are recorded in or near the above location.**
0	**Aboriginal places have been declared in or near the above location. ***

If your search shows Aboriginal sites or places what should you do?

- You must do an extensive search if AHIMS has shown that there are Aboriginal sites or places recorded in the search area.
- If you are checking AHIMS as a part of your due diligence, refer to the next steps of the Due Diligence Code of practice.
- You can get further information about Aboriginal places by looking at the gazettal notice that declared it. Aboriginal places gazetted after 2001 are available on the NSW Government Gazette (https://www.legislation.nsw.gov.au/gazette) website. Gazettal notices published prior to 2001 can be obtained from Heritage NSW upon request

Important information about your AHIMS search

- The information derived from the AHIMS search is only to be used for the purpose for which it was requested. It is not be made available to the public.
- AHIMS records information about Aboriginal sites that have been provided to Heritage NSW and Aboriginal places that have been declared by the Minister;
- Information recorded on AHIMS may vary in its accuracy and may not be up to date. Location details are recorded as grid references and it is important to note that there may be errors or omissions in these recordings,
- Some parts of New South Wales have not been investigated in detail and there may be fewer records of Aboriginal sites in those areas. These areas may contain Aboriginal sites which are not recorded on AHIMS.
- Aboriginal objects are protected under the National Parks and Wildlife Act 1974 even if they are not recorded as a site on AHIMS.
- This search can form part of your due diligence and remains valid for 12 months.

**** Site Status**

Valid - The site has been recorded and accepted onto the system as valid

Destroyed - The site has been completely impacted or harmed usually as consequence of permit activity but sometimes also after natural events. There is nothing left of the site on the ground but proponents should proceed with caution.

Partially Destroyed - The site has been only partially impacted or harmed usually as consequence of permit activity but sometimes also after natural events. There might be parts or sections of the original site still present on the ground

Not a site - The site has been originally entered and accepted onto AHIMS as a valid site but after further investigations it was decided it is NOT an aboriginal site. Impact of this type of site does not require permit but Heritage NSW should be notified

Report generated by AHIMS Web Service on 03/03/2022 for Therese Mccormick for the following area at Datum :GDA, Zone : 56, Eastings : 331523.0 - 335743.0, Northings : 6249663.0 - 6253979.0 with a Buffer of 0 meters.. Number of Aboriginal sites and Aboriginal objects found is 63

OFFICIAL

Native title search – *NSW Parcel – Lot 54 on DP1213772*
Your ref: *P0037375* - **Our ref:** *SR22/218*

Dear Wade Goldwyer,

Thank you for your search request received on 23 February 2022 in relation to the above area, please find your results below.

Search Results
The results provided are based on the information you supplied and are derived from a search of the following Tribunal databases:

- Schedule of Native Title Determination Applications
- Register of Native Title Claims
- Native Title Determinations
- Indigenous Land Use Agreements (Registered and notified)

Feature ID	Tenure	As At	Feature Area SqKm	Overlapping Native Title Fe	
				NNTT File Number	Name
52//DP1213772	NSW GOVERNMENT	11/10/2021	0.1316	No overlap	

For more information about the Tribunal's registers or to search the registers yourself and obtain copies of relevant register extracts, please visit our website.

Information on native title claims and freehold land can also be found on the Tribunal's website here: Native title claims and freehold land .

Please note: There may be a delay between a native title determination application being lodged in the Federal Court and its transfer to the Tribunal. As a result, some native title determination applications recently filed with the Federal Court may not appear on the Tribunal's databases.

The search results are based on analysis against external boundaries of applications only. Native title applications commonly contain exclusions clauses which remove areas from within the external boundary. To determine whether the areas described are in fact subject to claim, you need to refer to the "Area covered by claim" section of the relevant Register Extract or Schedule Extract and any maps attached.

Search results and the existence of native title
Please note that the enclosed information from the Register of Native Title Claims and/or the Schedule of Applications is **not** confirmation of the existence of native title in this area. This cannot be confirmed until the Federal Court makes a determination that native title does or does not exist in relation to the area. Such determinations are registered on the National Native Title Register.

The Tribunal accepts no liability for reliance placed on enclosed information
The enclosed information has been provided in good faith. Use of this information is at your sole risk. The National Native Title Tribunal makes no representation, either express or implied, as to the accuracy or suitability of the information enclosed for any particular purpose and accepts no liability for use of the information or reliance placed on it.

Cultural Heritage Searches in NSW
The National Native Title Tribunal (the Tribunal) has undertaken steps to remove itself from the formal list of sources for information about indigenous groups in development areas. The existence or otherwise of native title is quite separate to any matters relating to Aboriginal cultural heritage. Information on native title claims, native title determinations and Indigenous Land Use Agreements is available on the Tribunal's website.

Interested parties are invited to use Native Title Vision (NTV) the Tribunal's online mapping system to discover native title matters in their area of interest. Access to NTV is available at
http://www.nntt.gov.au/assistance/Geospatial/Pages/NTV.aspx
Training and self-help documents are available on the NTV web page under "Training and help documents". For additional assistance or general advice on NTV please contact GeospatialSearch@NNTT.gov.au

Additional information can be extracted from the Registers available at
http://www.nntt.gov.au/searchRegApps/Pages/default.aspx

If you have any further queries, please do not hesitate to contact us via GeospatialSearch@NNTT.gov.au

STAGE 1.2 – ASCERTAINING LIST OF POTENTIAL RAPS

ANGEL PLACE
LEVEL 8, 123 PITT STREET
SYDNEY NSW 2000

URBIS.COM.AU
Urbis Pty Ltd
ABN 50 105 256 228

17 February 2022

To whom it may concern,

HICKSON ROAD, BARANGAROO – ABORIGINAL CULTURAL HERITAGE ASSESSMENT – ABORIGINAL COMMUNITY CONSULTATION STAGE 1.2

Urbis has been commissioned by Aqualand Pty Ltd ('the Proponent') to conduct an Aboriginal Cultural Heritage Assessment (ACHA) of the Barangaroo Central site at Hickson Road, Barangaroo, NSW, legally referred to as Part Lot 54 in DP 1213772 (see attached figure). The subject area is within the City of Sydney Local Government Area, and on the traditional lands of the Gadigal.

The ACHA will form part of a staged State Significant Development Application under Division 4.7 of the NSW *Environmental Planning and Assessment Act 1979* for the subject area. The proposal is to facilitate the future development for Barangaroo Central, including a variety of works.

The Proponent can be contacted via:

Jeremy Deale
Design Director – Central Barangaroo Development
Aqualand Pty Ltd
E: Jeremy.deale@aqualand.com.au

The ACHA is to be carried out in accordance with relevant guidelines under the NSW *National Parks and Wildlife Act 1974* (NPW Act). The assessment will detail the nature, extent and significance of any Aboriginal cultural heritage resources that may exist within the subject area and provide recommendations regarding management of those resources.

As part of the ACHA, Urbis will conduct a community consultation process with registered Aboriginal parties. The community consultation will be conducted in accordance with Section 4 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (Department of Environment, Climate Change and Water).

In accordance with Section 4.1.2 of the Consultation Requirements, Urbis seeks to compile a list of Aboriginal people and organisations who may hold cultural knowledge relevant to determining the significance of Aboriginal objects and/or places that may exist within the subject area.

If you are aware of any Aboriginal persons and/or organisations that may hold an interest in the project, we request that you please provide their details at your earliest convenience and preferably by **4 March 2022,** to:

Sam Richards
Senior Consultant
Urbis Pty Ltd
Level 8 ,123 Pitt Street
Sydney NSW 2000
E: sam.richards@urbis.com.au

Urbis, on behalf of the Proponent, will write to each Aboriginal person or group whose details are provided to notify them of the proposed project and invite them to register an interest in the community consultation process.

If you have any questions in relation to the foregoing, please do not hesitate to contact us.

Yours sincerely,

Samuel Richards

---

Dear Mr Richards

Thank you for your recent letter seeking assistance to identify Aboriginal stakeholder organisations and persons who may hold an interest in Country at the project area designated in your correspondence.

Greater Sydney Local Land Services (GS LLS) acknowledges that Local Land Services (formerly as Catchment Management Authorities) has been listed in Section 4.1.3.(g) of the Aboriginal Cultural Heritage Consultation requirements for proponents 2010, to support Part 6, of the NSW National Parks and Wildlife Act 1974 as a source of information to obtain the 'names of Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects and/or places'.

GS LLS understands and respects the significant role and values that tangible and intangible Aboriginal Cultural Heritage holds for First Nations/Aboriginal people with Country. GS LLS also partners with many First Nations communities on Caring for Country projects that aim to protect and enhance those tangible and intangible values in Country including Aboriginal Cultural Heritage. GS LLS considers Aboriginal Cultural Heritage matters in relation to its role in land management and considers cultural heritage issues in the context of Natural Resource Management.

However, GS LLS feels that it is not a primary source of contact for First Nations (Aboriginal) communities or persons that may inform or provide comment on development or planning issues.

GS LLS strongly recommends you contact Heritage NSW to seek their advice on all-inclusive contact lists of persons and organisations who 'speak for Country' and that may assist with your investigation.

Regards

Customer Service Team

22/02/2022

Dear Sam,

WRITTEN NOTIFICATION OF PROPOSAL AS REQUIRED UNDER DECCW ABORIGINAL CULTURAL HERITAGE CONSULTATION REQUIREMENTS FOR PROPONENTS 2010

Subject: Part Lot 54 in DP 1213772, Barangaroo Central site at Hickson Road, Barangaroo.

Thank you for your correspondence dated 17 February 2022 to Heritage NSW (Department of Premier and Cabinet) regarding the above project.

Attached is a list of known Aboriginal parties for the proposed development at City of Sydney local Government Area that Heritage NSW considers likely to have an interest in the activity.

Please note this list is not necessarily an exhaustive list of all interested Aboriginal parties.

Receipt of this list does not remove the requirement of a proponent/ consultant to advertise in local print media and contact other bodies seeking interested Aboriginal parties, in accordance with the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (April 2010).

Under Section 4.1.6. of the Consultation Requirements, you must also provide a copy of the names of each Aboriginal person who registered an interest to the relevant Heritage NSW office and Local Aboriginal Land Council (LALC) within 28 days from the closing date for registering an interest.

Please note that the contact details in the list provided by Heritage NSW may be out of date as it relies on Aboriginal parties advising Heritage NSW when their details need changing. If individuals/companies undertaking consultation are aware that any groups contact details are out of date, or letters are returned unopened, please contact either the relevant stakeholder group (if you know their more current details) and/or Heritage NSW. AHIP applicants should make a note of any group they are unable to contact as part of their consultation record.

If you have any questions about this advice, please email:
heritagemailbox@environment.nsw.gov.au or contact (02) 9873 8500.

Yours sincerely

Barry Gunther
Aboriginal Heritage Planner
Aboriginal Heritage Regulation Branch – South Heritage NSW

Attachment A: Registered Aboriginal Interests DPC RAP List for the City of Sydney Local Government Area

LIST OF ABORIGINAL STAKEHOLDERS FOR THE DEPARTMENT of PREMIER and CABINET (DPC) SOUTHERN REGION HELD BY DPC FOR THE PURPOSES OF THE OEH *ABORIGINAL CULTURAL HERITAGE CONSULTATION REQUIREMENTS FOR PROPONENTS 2010*

These lists are provided to proponents in accordance with section 4.1.2 of the *Aboriginal Cultural Heritage Consultation Requirements* for *Proponents 2010* (the "Consultation Requirements") which commenced on 12 April 2010.

The consultation process involves getting the views of, and information from, Aboriginal people and reporting on these. It is not to be confused with other field assessment processes involved in preparing a proposal and an application. Consultation does not include the employment of Aboriginal people to assist in field assessment and/or site monitoring. Aboriginal people may provide services to proponents through a contractual arrangement however, this is separate from consultation. The proponent is not obliged to employ those Aboriginal people registered for consultation. Consultation as per these requirements will continue irrespective of potential or actual employment opportunities for Aboriginal people.

A copy of the Consultation Requirements can be found on the OEH website at:
http://www.environment.nsw.gov.au/resources/cultureheritage/commconsultation/09781ACHconsultreq.pdf.

Under the Consultation Requirements; a proponent is required to provide Aboriginal people who may hold cultural knowledge relevant to determining the cultural significance of Aboriginal objects and/or places as relevant to the proposed project area, with an opportunity to be involved in consultation. Section 3.3.1 of the Consultation Requirements states that Aboriginal people who can provide this information are, based on Aboriginal lore and custom, the traditional owners or custodians of the land that is the subject of the proposed project.

The Consultation Requirements also state that:

> *Traditional owners or custodians with appropriate cultural heritage knowledge to inform decision making who seek to register their interest as an Aboriginal party are those people who:*
> - *continue to maintain a deep respect for their ancestral belief system, traditional lore and custom*
> - *recognise their responsibilities and obligations to protect and conserve their culture and heritage and care for their traditional lands or Country*
> - *have the trust of their community, knowledge and understanding of their culture, and permission to speak about it.*

Please note: the placement of an organisation's name on any OEH Aboriginal stakeholder list for the Consultation Requirements does not override a proponent's requirement to also advertise in the local newspaper and to seek from other sources the names of any other Aboriginal people who may hold cultural knowledge as required under clause 60 of the National Parks and Wildlife Regulation 2019.

How to use this list

1. **Contact the organisations/individuals who have indicated an interest in the relevant LGA/s and invite them to register an interest in your project**

Do not reproduce the attached list in publicly available reports and other documents. Your report should only contain the names of the organisations and individuals who you have invited to register an interest in your project and those who have registered as stakeholders for your project.

STAGE 1.3 – INVITATION TO POTENTIAL RAPS

URBIS

ANGEL PLACE
LEVEL 8, 123 PITT STREET
SYDNEY NSW 2000

URBIS.COM.AU
Urbis Pty Ltd
ABN 50 105 256 228

20 April 2022

To whom it may concern,

HICKSON ROAD, BARANGAROO– ABORIGINAL CULTURAL HERITAGE ASSESSMENT – ABORIGINAL COMMUNITY CONSULTATION STAGE 1.3 – INVITATION TO REGISTER

Please be advised that your contact details have been provided to us by Heritage NSW as an Aboriginal person or party who may have an interest in registering for the above project.

Urbis has been commissioned by Aqualand Pty Ltd ('the Proponent') to conduct an Aboriginal Cultural Heritage Assessment (ACHA) of the Barangaroo Central site at Hickson Road, Barangaroo, NSW, legally referred to as Part Lot 52 in DP 1213772 (the 'subject area'). The subject area is within the City of Sydney Local Government Area.

The ACHA will form part of a staged State Significant Development Application under Division 4.7 of the NSW *Environmental Planning and Assessment Act 1979* for the subject area. The proposal is to facilitate the future development for Barangaroo Central, including a variety of works.

The Proponent can be contacted via:

Jeremy Deale
Design Director – Central Barangaroo Development
Aqualand Pty Ltd
E: jeremy.deale@aqualand.com.au

The ACHA will be conducted in accordance with the relevant guidelines under the *NSW National Parks and Wildlife Act 1974*, including the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW, 2010) (the Consultation Requirements). The ACHA will include a community consultation process with registered Aboriginal parties.

The Proponent is seeking the registration of Aboriginal persons or groups who may hold cultural knowledge relevant to determining the significance of Aboriginal object(s) and/or place(s) that may be present in the subject area. Urbis, on behalf of the Proponent, hereby invites you to register an interest in the community consultation process for the above project.

If you wish to register your interest, please respond in writing (preferably by email) by clearly stating your interest and nominating a contact person by **5.00pm 5 May 2022**. Please send responses to:

Sam Richards
Senior Consultant
Urbis Pty Ltd
Level 8 ,123 Pitt Street
Sydney NSW 2000
P: +61 2 8424 5136
E: sam.richards@urbis.com.au

Following confirmation of your registration, Urbis will forward your name and contact details to Heritage NSW and Metropolitan Local Aboriginal Land Council, as required under the Consultation Requirements. If you do not want your details released, please advise us accordingly when registering your interest.

Please note that inclusion in the consultation process does not automatically result in paid site assessment, per Section 3.4 of the Consultation Requirements. Engagement for delivery of any services will be decided by the Proponent based on a range of considerations including skills, relevant experience and provision of certificates of currency.

If you have any questions in relation to the foregoing, please do not hesitate to contact us.

Yours sincerely,

Samuel Richards
Senior Consultant

Attention: **Urbis** **Date:** 20/04/22

Subject: Barangaroo Central site at Hickson Road, Barangaroo, NSW,

Dear Wade

Our group is a non- profit organisation that has been active for over forty years in Western Sydney, we are a Darug community group with over three hundred members. The main aim in our constitution is the care of Darug sites, places, wildlife and to promote our culture and provide education on the Darug history.

The Barangaroo area is an area that our group has a vast knowledge of, we have worked and lived in for many years, this area is significant to the Darug people due to the connection of sites and the continued occupation. Our group has been involved in all previous assessments and works in this area as a traditional owner Darug group for the past 40 plus years.

People from other mobs should be respectful of our country and people if they are not respectful that the Darug are the knowledge holders then they are not cultural, therefore should not be involved on cultural heritage on Darug land.

Therefore, we would like to register our interest for full consultation and involvement in the above project area.

Please contact us with all further enquiries on the above contacts.

Regards

Justine Coplin

We acknowledge and pay respect to the Darug people,the traditional Aboriginal custodians of this land.

Subject: P0038562_Stage 1.3 Invitation to Register- Barangaroo Central - Aboriginal Cultural Heritage Assessment

Good afternoon,

Urbis has been commissioned by Aqualand Pty Ltd to conduct an Aboriginal Cultural Heritage Assessment (ACHA) of the Central Barangaroo site at Hickson Road, Barangaroo, NSW, legally referred to as Part Lot 52 in DP 1213772.

In accordance with Section 4.1.3 of the Consultation Requirements Urbis proposes to invite Aboriginal people and/or organisations who may hold cultural knowledge relevant to determining the significance of Aboriginal objects and/or places that may exist within the subject area.

Please find attached the official invitation letter with further information.

If you would like to register your interest in this project, please respond in writing by clearly stating your interest and nominating a contact person by **5th May 2022**.

Please send responses to the following:

Hi,

Thank you for your email, I would like to register in being involved in all levels of consultation for this project.

Including, Meetings, Reports, Sharing Cultural Information, and available Field Work.

About the founder Carolyn Hickey

I am a Traditional Owner and Custodian with over 20 years experience in helping preserve Aboriginal cultural heritage on projects.

I hold cultural knowledge relevant to determining the cultural significance of Aboriginal objects and values that exist in the project area.

I have attached A1 Indigenous Services Insurances.

We would like you to consider including **A1's employee's, the Kawalkan workforce and the Women's Circle Employees** for all future field work.

The Kawalkan workforce Program is a designed program created to employ young indigenous youths between the ages of (18-29) years of age.

The Women's Circle was created with the need to always have Experienced Indigenous Women present in all field work.

To aim for not only gender equality in the workplace but, to help identify and protect any women's sacred places.

Please feel free to contact me on details supplied

Kind Regards,

Carolyn Hickey

Managing Director

A1 INDIGENOUS SERVICES PTY LTD is now a member of the NSW INDIGENOUS CHAMBER OF COMMERCE

A business or enterprise carrying the NSWICC Assured logo has met National Policy requirements as upheld by the First Australians Chamber of Commerce and Industry (FACCI) for being identified as a First Nations Business Owner or Entrepreneur and the business must demonstrate compliance with Government and Industry Regulators.

(Certificate attached) A certificate confirms that the Enterprise listed above has met all requirements of the NSWICC's Assured Program , operating as a100% Aboriginal Owned, Operated and Controlled Business. The NSW Indigenous Chamber of Commerce (NSWICC) is the Peak body for Aboriginal Business in New South Wales and a member of the First Australians Chamber of Commerce and Industry (FACCI)

A1 Indigenous Services is 100%, Indigenous Owned Australian Company which offers a range of services to the construction industry.

It is our mission to commit to an innovative approach to a better future for Indigenous employment and community.

While improving ways to close the gap in Aboriginal participation in the construction Industry.

Building strength in aboriginal communities and our Indigenous labour force.

Dear Sam

Please register Corroboree Aboriginal Corporation. We have worked on projects as Cultural Heritage Officers in the project area. My family and other family members have lived in the area and family currently reside in the surrounding areas. We are registering in a full capacity. We are aboriginal people who are culturally & heritage aware. We have the necessary ability,

experience, skills, insight and the knowledge to identify artefacts on field work. And as Aboriginal People we connect thru the land, thru our ancestors and our heritage. Therefore we are able participate on all levels. We have worked with many archaeologists across a broad landscape. We have consulted with most archeological companies over many years on projects. We have all the relevant insurances and safety gear. We are all fit, capable and adapt to a vast landscape. Contact is preferred via email: ***corroboreecorp@bigpond.com.*** *The* contact number, email and contact person is also listed in the signature.
Please do not disclose any of our details to LALC. We have responded for inclusion, to participate on all levels. Thanks.

Kind regards

Hi Wade,

Thank you for informing us that **Urbis** will be involved in an Aboriginal Cultural Heritage Assessment at **Central Barangaroo site at Hickson Road, Barangaroo, NSW, legally referred to as Part Lot 52 in DP 1213772** &,that you are inviting Aboriginal organisations to register, if they wish too be involved in the community consultation process.

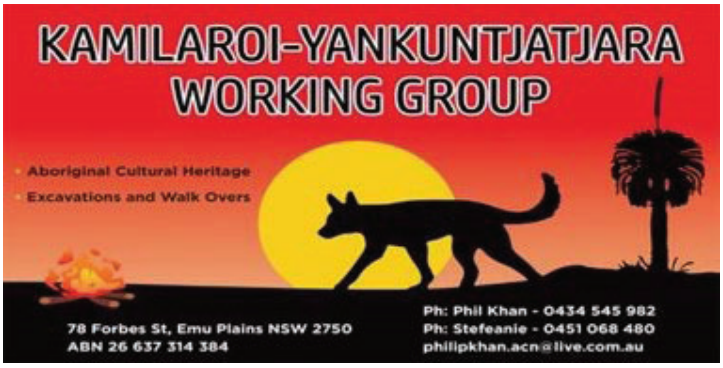

As a senior Aboriginal person for the past 50yrs, I actively participate in the protection of the Aboriginal Cultural Heritage throughout the Sydney Basin, & particularly throughout Western Sydney, on behalf of Kamilaroi Yankuntjatjara Working Group I wish to provide to you my organisation's registration of interest.

I wish to be involved & participate in all levels of consultation/project involvement. I wish to attend all meetings, participate in available field work & receive a copy of the report.

I have attached a copy of Kamilaroi Yankuntjatjara Working group's Public Liability Insurance & Workers Compensation certificate.
Our Rates - $112.50 per hour, $450 half day & $900 full day (Exc. GST)
Our RAPS have up to 15yrs Cultural Heritage experience in – field work which involves manual excavation (digging), sieving , identifying artefacts, setting up transits, setting up equipment, packing equipment, site surveys & attending meetings.

Should you wish me to provide further information, please do not hesitate to contact me on 0434545982 or Stefeanie on 0451068480.

Kind Regards
Phil Khan

To: Sam Richards <sam.richards@urbis.com.au>
Subject: Central Barangaroo - Hickson Road, Barangaroo, NSW ACHA Stage 2/3 Project Information and Methodology

Good afternoon,

Thank you for registering your interest in the Aboriginal Cultural Heritage Assessment of Central Barangaroo, Hickson Road, Barangaroo, NSW.

In accordance with Section 4.2 and 4.3 of the *Aboriginal cultural heritage consultation requirements for proponents 2010*, we attach a letter which provides information on the project and the methodology proposed to be employed.

You will note that we have included a request for specific information in the form of a questionnaire (Appendix 2). We would appreciate your response to that questionnaire as soon as possible. If you wish to provide any comments in relation to the attached document, please do so in writing, preferably by email, by 3 June 2022, to:

URBIS

ANGEL PLACE
LEVEL 8, 123 PITT STREET
SYDNEY NSW 2000

URBIS.COM.AU
Urbis Pty Ltd
ABN 50 105 256 228

6 May 2022

To whom it may concern,

CENTRAL BARANGAROO – HICKSON ROAD, BARANGAROO, NSW – ABORIGINAL CULTURAL HERITAGE ASSESSMENT – ABORIGINAL COMMUNITY CONSULTATION STAGES 2 & 3 – PRESENTING & GATHERING INFORMATION

Thank you for registering your interest in the Aboriginal Cultural Heritage Assessment (ACHA) for the proposed early works at Central Barangaroo at Hickson Road, Barangaroo, NSW, legally referred to as Part Lot 52 in DP 1213772 ('the subject area').

As previously advised, Urbis has been commissioned by Aqualand B Development Holding Pty Ltd ('the Proponent') to conduct an ACHA, which will form part of a staged State Significant Development Application under Division 4.7 of the *NSW Environmental Planning and Assessment Act 1979* for the subject area. The proposal is to facilitate future development for Central Barangaroo, including a variety of works.

In accordance with Section 4.2 and 4.3 of the *Aboriginal cultural heritage consultation requirements for proponents 2010* (Department of Environment, Climate Change and Water NSW) ('the Consultation Requirements') this present communication aims to provide all registered Aboriginal parties (RAPs) with the proposed project information and a process to facilitate the following:

- Contribute to culturally appropriate information gathering and the research methodology
- Provide information that will enable the cultural significance of Aboriginal objects and/or places within or near the proposed project to be determined.
- Have input into the development of any cultural heritage management options

SUBJECT AREA

The subject area is located within the City of Sydney Local Government Area, on the traditional lands of the Gadigal people and within the catchment of the Metropolitan Local Aboriginal Land Council (see Figure 1 and Figure 2). The subject area is approximately 5.8ha and is located within the Sydney CBD, on the east side of Darling Harbour, approximately 300m south of Millers Point and 620m west of Circular Quay. The subject area primarily comprises reclaimed land resulting from an extension into the harbour in the 1970s. It is bordered by the harbour to the west and north and by Hickson Road and Barton Street to the east and south respectively. The subject area is currently zoned B4 – Mixed Use and RE1 – Public Recreation.

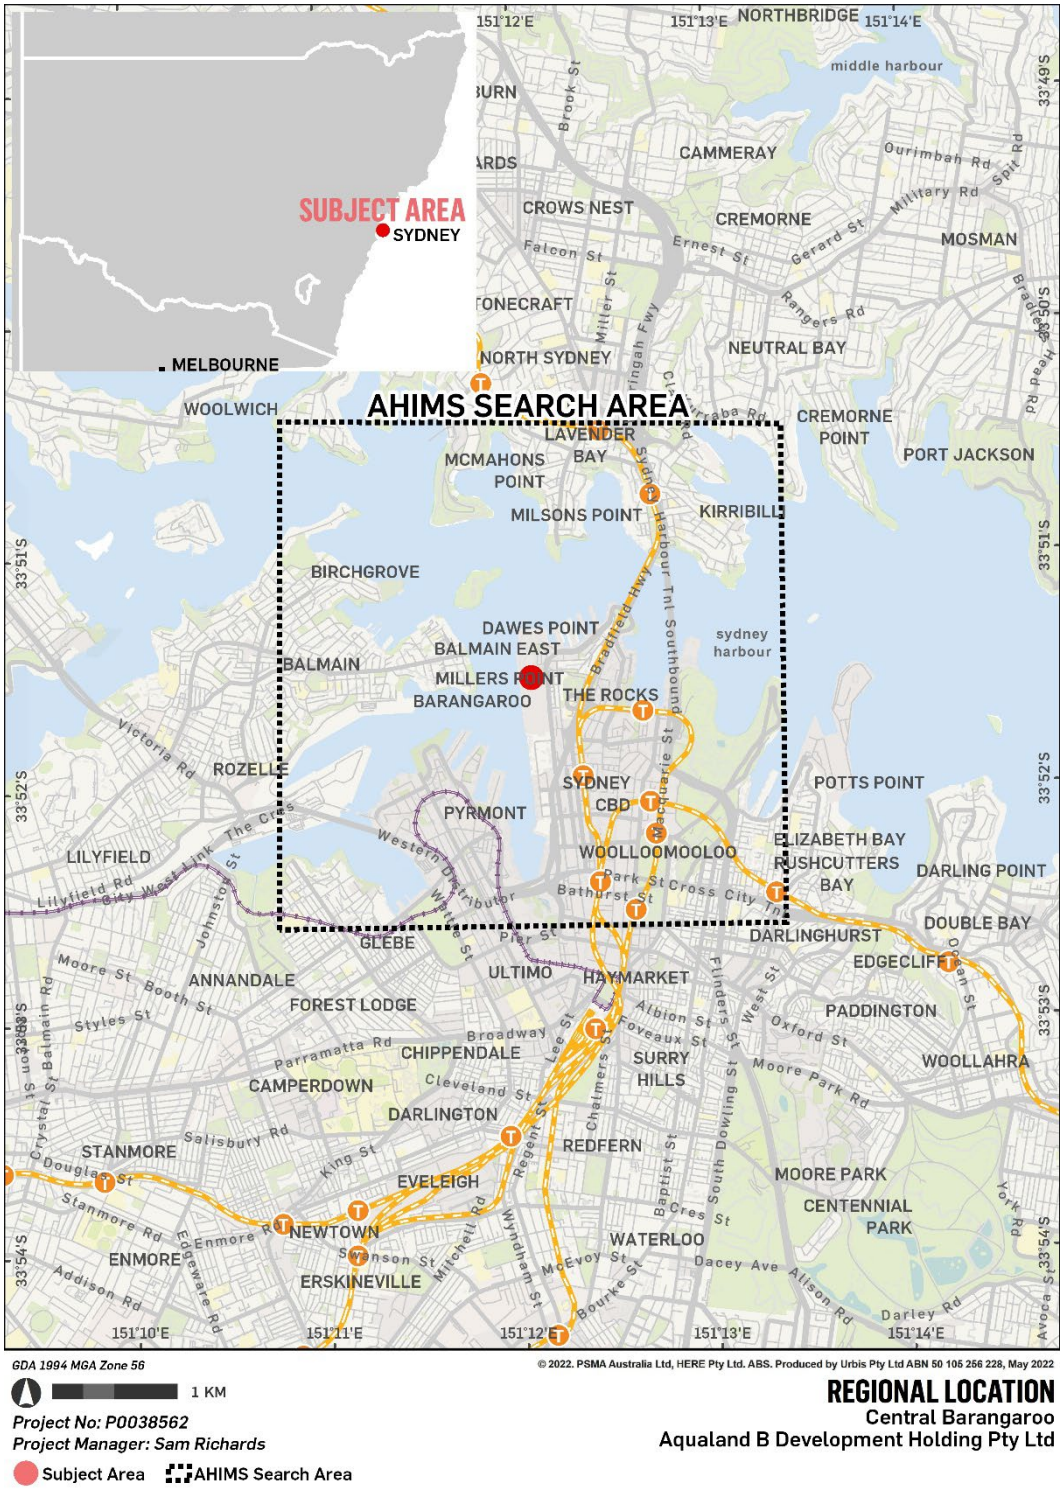

Figure 1 – Regional location of the subject area

Figure 2 – Location of the subject area

URBIS

PROPOSED WORKS

The proposal is to facilitate future development for Central Barangaroo, including a variety of works. The ACHA will assess impacts to the entire site as outlined in Figure 2 and multiple stages of works.

The beginning stages of the project will consist of early works comprising the construction of a secant pile retention wall along the Hickson Road interface with the Central Barangaroo precinct and site establishment works including excavation for the provision of a future basement and the construction of perimeter retaining walls. The proposed construction of the secant pile retention wall along Hickson Road comprises the following works (Figure 3):

- Construction of a secant pile retention wall;
- Excavation of land related to with the secant pile retention wall;
- Localised remediation related to the secant pile retention wall;
- Associated Archaeological Investigations in the area of excavation and works; and
- Sydney Metro / Hickson Road interfaces – perimeter retention wall interface works and Hickson Road public domain interface works.

This ACHA will not be limited to the early works as and will continue for the length of the project and stages of works.

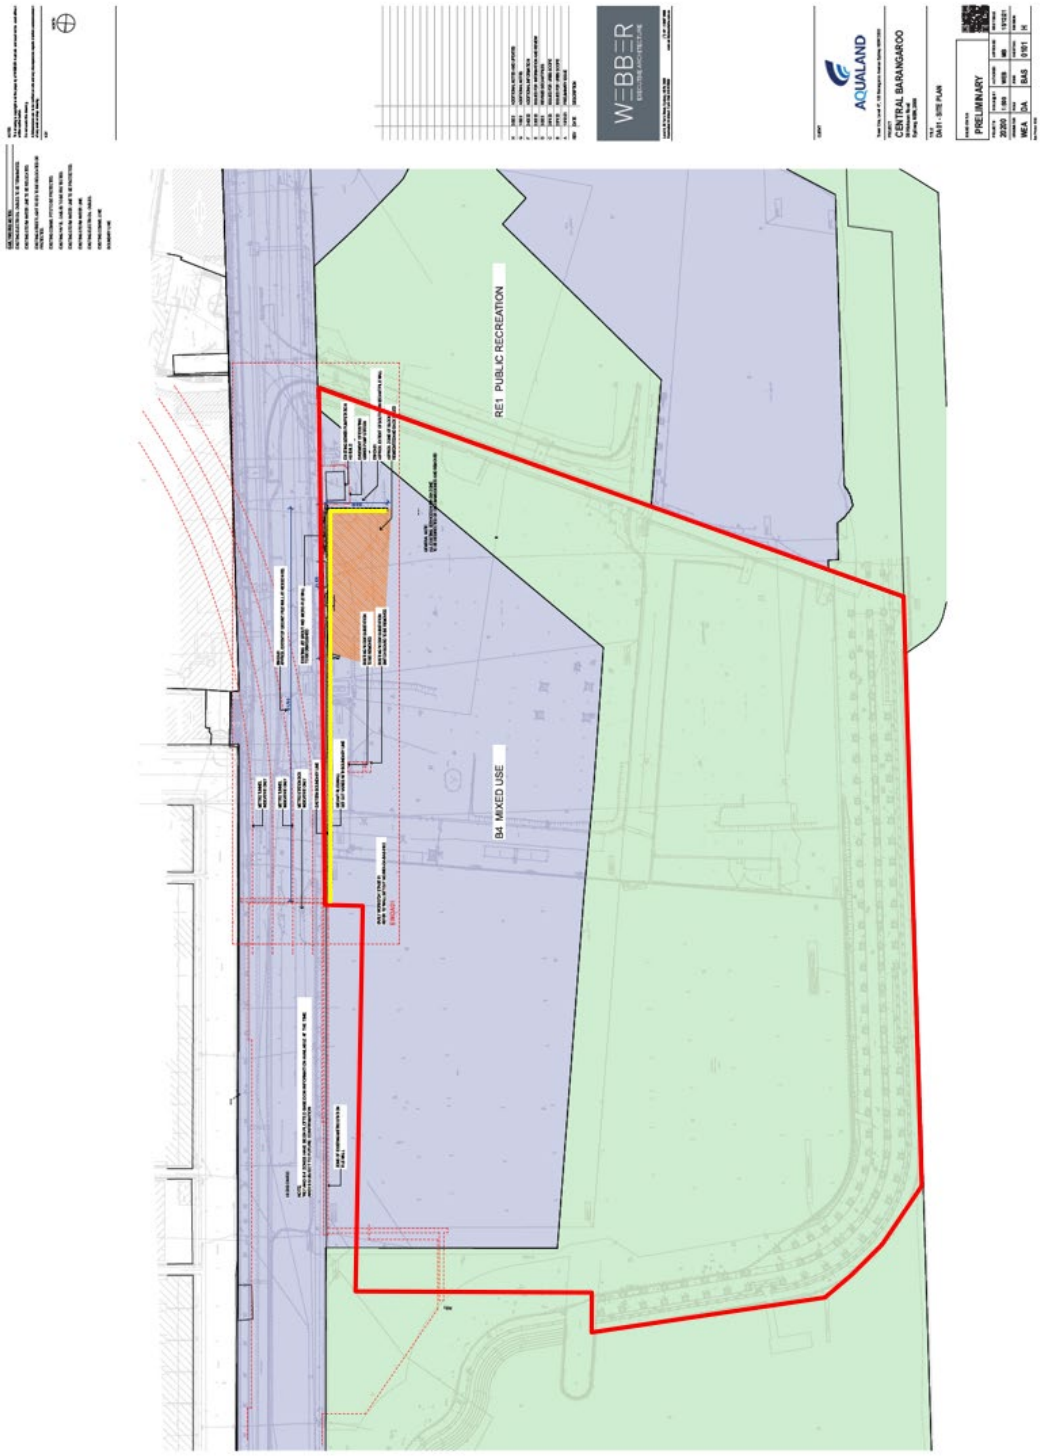

Figure 3 - Location of proposed secant pile wall (yellow line) within subject area (red polygon)

URBIS

ARCHAEOLOGICAL CONTEXT

This section comprises the summary of the Aboriginal archaeological background research completed to date including the search of the Aboriginal Heritage Information Management System (AHIMS) and environmental context.

ABORIGINAL HERITAGE INFORMATION MANAGEMENT SYSTEM (AHIMS)

The Aboriginal Heritage Information Management System (AHIMS) database comprises previously registered Aboriginal archaeological objects and cultural heritage places in NSW and is managed by the Department of Premier and Cabinet (DPC) under Section 90Q of the *National Parks and Wildlife Act* (NPW Act).

A search of the AHIMS database was carried out on 3 March 2022 (AHIMS Client Service ID: 664361) for an area of approximately 4 km by 4 km. The basic and extensive AHIMS search results are provided in Appendix 1.

The AHIMS search identified at total of 63 Aboriginal objects and no Aboriginal places within or near the subject area. Three registered Aboriginal objects were identified in the AHIMS register as 'not a site', reducing the total number of sites to 60. A summary of the identified Aboriginal objects is provided in Table 1 and their spatial distribution is shown in Figure 4.

The relevance of any Aboriginal objects in the extensive search area to the archaeological potential of the subject area will be considered during the ACHA process.

Table 1 – Summary of extensive AHIMS search results (AHIMS Client Service ID: 664361)

Figure 5 – Registered Aboriginal sites in extensive area

URBIS

ENVIRONMENTAL CONTEXT

The environmental context of the subject area is summarised below:

- The subject area is located within 200m of water bordered by a natural harbour to the immediate north and west.
- The subject area has been entirely cleared of natural vegetation.
- The subject area is identified in the NSW Soil and Land Information System (SALIS) as being within a Disturbed Terrain Soil Landscape (see Figure 6).
- The subject area was artificially filled to extend the natural land into the harbour during the 1970s.
- Prior to the artificial extension of the land area, wharves were situated on the former harbour coastline on what is now the east side of the subject area.
- Since the land reclamation the subject area has been subject to urban and intensive uses.

The relevance of the environmental context to the archaeological potential of the subject area will be considered during the ACHA process.

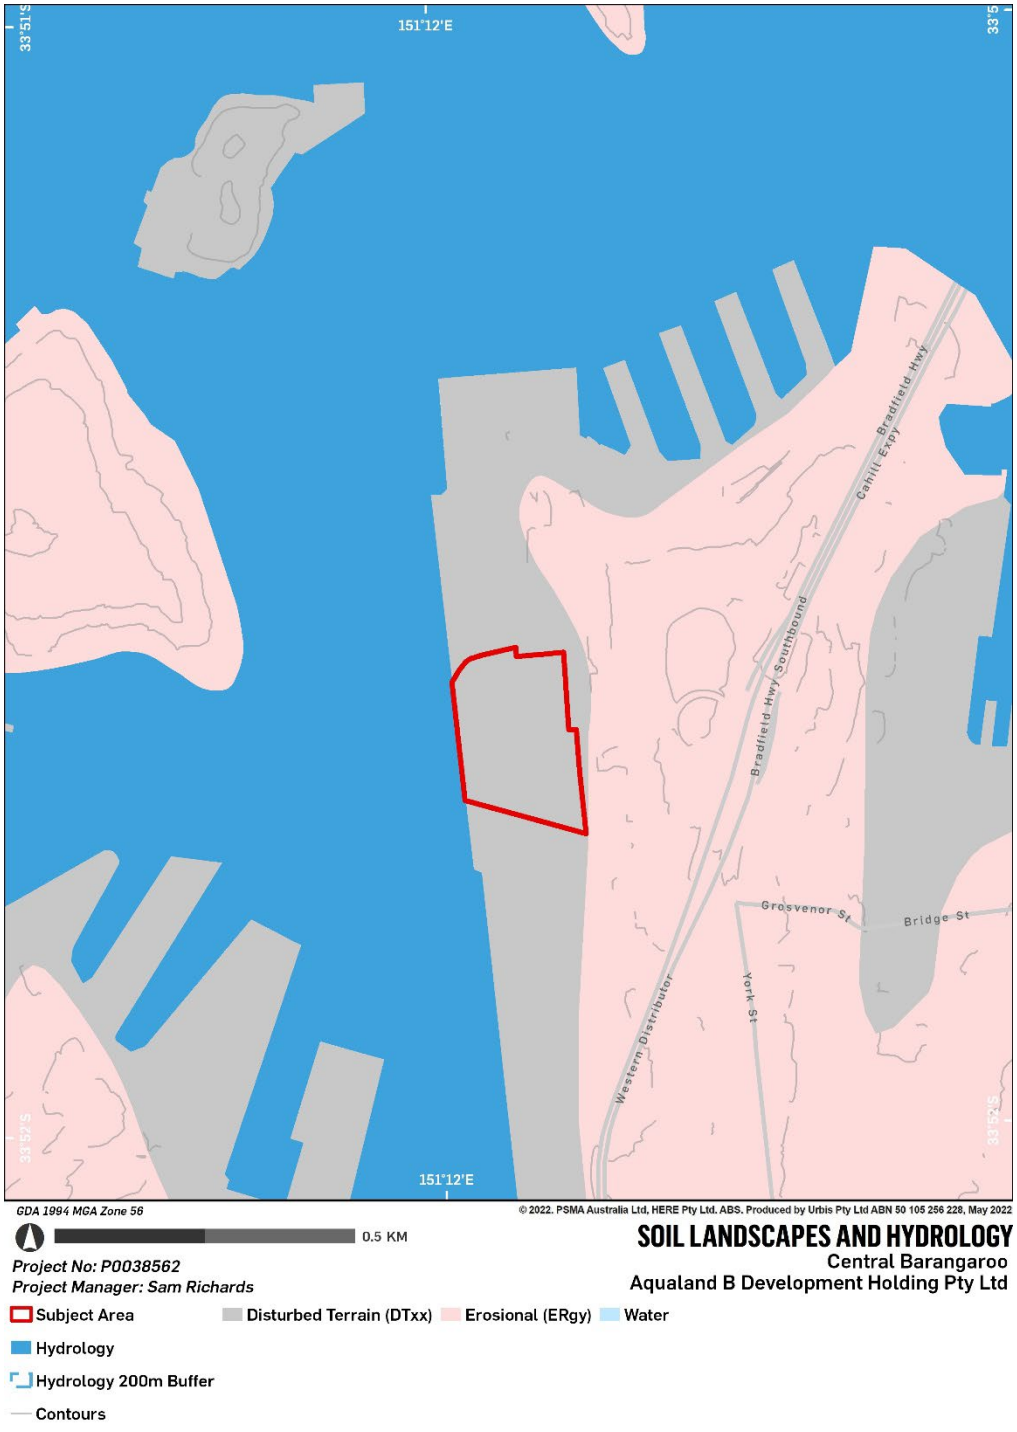

Figure 6 – Soil landscapes and hydrology

METHODOLOGY

The proposed impact assessment process for the ACHA, including the input points into the investigation and assessment activities for RAPs, is outlined below, in accordance with Section 4.2.2(b) of the Consultation Requirements.

The ACHA will be conducted in accordance with Part 6 of the *NSW National Parks and Wildlife Act 1974* ('NPW Act'), Part 5 of the *NSW National Parks and Wildlife Regulation 2019* ('NPW Reg') and will adhere to the following guidelines:

- *Aboriginal cultural heritage consultation requirements for proponents 2010* (DECCW, 2010);
- *Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales* (DECCW, 2010);
- *Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in New South Wales* (OEH, 2011); and
- *The Burra Charter: The Australia ICOMOS Charter for Places of Cultural Significance,* 2013.

The ACHA will follow the general methodology described in Table 2 below.

Table 2 – Aboriginal cultural heritage assessment methodology

Process Method	Description
Desktop assessment	Collection and evaluation of background information, including archaeological and historical resources and environmental conditions, to develop a predictive model for archaeological potential.
Consultation with RAPs	Providing information on the project to RAPs and gathering information about the proposed methodology and the Aboriginal cultural heritage values and significance of the subject area.
Site inspection with RAPs	On-site meeting including site inspection of the subject area with the RAPs to allow further opportunity for cultural information to be provided and for the RAPs to familiarise themselves with the subject area and discuss the archaeological approach.
Preparation of draft ACHA report	Synthesis of all information collected during the ACHA process to prepare a draft assessment report and provision of the draft report to the Proponent and the RAPs for comments. The report will include an assessment of significance of any Aboriginal objects or Aboriginal cultural heritage values that may exist within the subject area, an impact assessment and provide management and

Process Method	Description
	mitigation measures. The draft will be provided to all RAPs for comments.
Finalisation of ACHA report	Incorporation of all comments from the Proponent and RAPs into ACHA report and finalisation.

Urbis welcomes input and information from the RAPs at any stage throughout the entire process of the ACHA. Consistent with the Consultation Requirements, the formal input points for the consultation are the following:

- During Stage 2 and 3 – Following review of the current communication, which presents information about the proposed project and ACHA methodology.
- During Stage 2 and 3 – During or following the site visit and meeting.
- During Stage 4 – Following review of the draft ACHA.

CRITICAL TIMELINES

The critical timelines and milestones for the completion of the ACHA and delivery of reports are presented in Table 3 below, in accordance with Section 4.2.2(c) of the Consultation Requirements. Please note that the presented timeframes are estimates only and are intended as a guide to allow forward planning of personnel and resources.

Table 3 – Critical timelines

Consultation Stage	Timing
Stage 2 and 3: Provision of comments on the provided project information and proposed methodology (this document) by RAPs.	Within 28 days of the release date of this document.
Stage 2 and 3: Site inspection and meeting.	Within one week following the cut-off date of this letter.
Stage 4: Provision of the draft ACHA report (including the proposed management and mitigation measures) to the RAPs.	Within two weeks of the site inspection.
Stage 4: Provision of comments on draft ACHA report by RAPs.	Within 28 days of delivery of the draft ACHA report to RAPs
Stage 4: Finalisation of the ACHA report including the consideration of all comments and feedback.	Within two weeks of the close of the Stage 4 consultation process.

URBIS

ROLES, FUNCTIONS AND RESPONSIBILITIES

The roles, functions and responsibilities of the proponent and RAPs are defined below, in accordance with Section 4.2.2(d) of the Consultation Requirements.

The roles, functions and responsibilities of the Proponent, Urbis (acting on behalf of the Proponent), RAPs and any other parties involved in the consultation process are those defined in Section 5 of the Consultation Requirements.

Please note that, in accordance with Section 3.4 of the Consultation Requirements, consultation does not include the employment of Aboriginal people to assist in field assessment and/or site monitoring. Furthermore, there is no obligation on the Proponent to employ Aboriginal people registered for consultation. Aboriginal people may provide services to the Proponent through a contractual arrangement separate to the consultation process. Consultation will continue irrespective of potential or actual employment opportunities for Aboriginal people.

GATHERING CULTURAL INFORMATION

Urbis is providing the opportunity for RAPs to identify, raise and discuss their cultural concerns, perspectives and assessment requirements (if any), in accordance with Section 4.2.2(e) of the Consultation Requirements.

Urbis is actively seeking information on the cultural heritage and cultural significance of the subject area. Such information includes the existence of any Aboriginal objects of cultural value to Aboriginal people in or near the subject area (whether declared under s.84 of the NPW Act or not), including places of social, spiritual and cultural value, historic places with cultural significance and potential places/areas of historic, social, spiritual and/or cultural significance.

Please also consider the following when providing information:

- Do you have information on any Aboriginal objects within or near the subject area?
- Do you or somebody you know have information of cultural values, stories in relation to the subject area and if that information can be shared?

If you or your organisation has sensitive or restricted public access information for determining or managing the heritage values of the subject area, it is proposed that the proponent will manage this information (if provided by the Aboriginal community) in accordance with a sensitive cultural information management protocol. It is anticipated that the protocol will include making note of and managing the material in accordance with the following key limitations as advised by Aboriginal people at the time of the information being provided:

- Any restrictions on access of the material.
- Any restrictions on communication of the material (confidentiality).
- Any restrictions on the location/storage of the material.
- Any cultural recommendations on handling the material.
- Any names and contact details of persons authorised within the relevant Aboriginal group to make decisions concerning the Aboriginal material and degree of authorisation.
- Any details of any consent given in accordance with customary law.

- Any access and use by the RAPs of the cultural information in the material.

Please consider the above list when providing your recommendations regarding any culturally sensitive information.

QUESTONNAIRE

To streamline information gathering during Stage 2 and 3, and to inform the proponent for any field inspection component, Urbis requests the following information from you:

Cultural connection: Please describe the nature of your cultural connection to the country on which the subject area is situated. Please include any relevant cultural knowledge or knowledge of Aboriginal objects or places within the subject area. Have you ever lived in or near the subject area? If you are a Traditional Owner, please state this clearly.

Representing your community members: Please state who you or your organisation represents. Do you or your organisation represent other members of the Aboriginal community? If so, please describe how information is provided to the other members, and how their information and knowledge may be provided back to the proponent and Urbis.

Previous experience: Please list your relevant (for example, in the area of the proposed project) previous experience in providing cultural heritage advice and survey participation.

Schedule of Rates: Please provide your Certificate of Currency including Product and Public Liability Insurance and Worker's Compensation. Please also include a schedule of rates (hourly/half day/day) for fieldwork participation, and include any expenses you may expect to incur, and these will be sought to be reimbursed. Please note that it is for the discretion for the proponent to decide if they invite RAPs for site works and the consultation process does not guarantee paid employment.

The above questions are provided as a questionnaire in Appendix 2, for your convenience. Please complete the questionnaire and return it to:

Sam Richards
Senior Consultant, Archaeology
Urbis Pty Ltd
Level 8, 123 Pitt Street, Sydney, 2000
E: sam.richards@urbis.com.au

APPENDIX 1 AHIMS BASIC AND EXTENSIVE RESULTS

AHIMS Web Services (AWS)
Search Result

Your Ref/PO Number : Barangaroo 4km

Client Service ID : 664361

Urbis Pty Ltd - Angel Place L8 123 Pitt Street

Date: 03 March 2022

Level 8 123 Angel Street
Sydney New South Wales 2000

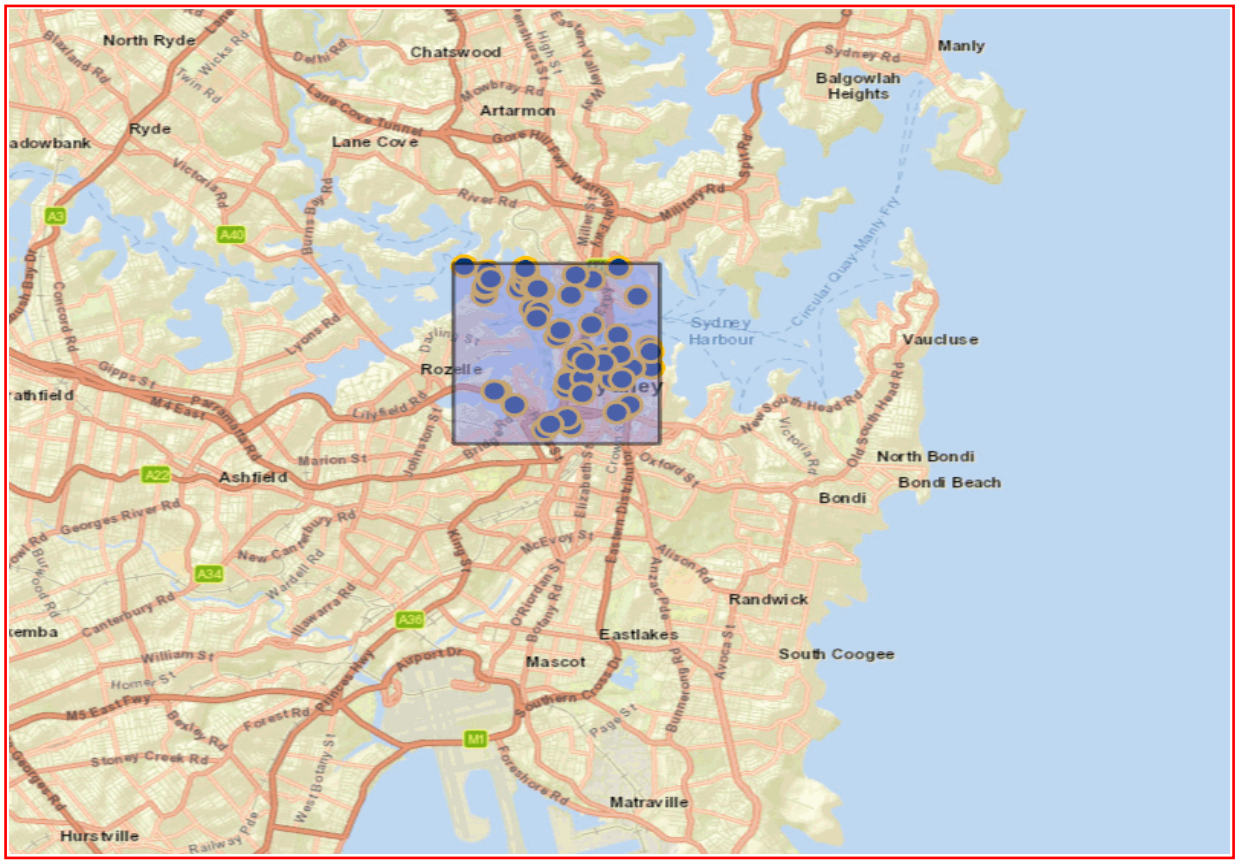

Attention: Therese Mccormick

Email: tmccormick@urbis.com.au

Dear Sir or Madam:

AHIMS Web Service search for the following area at Datum :GDA, Zone : 56, Eastings : 331523.0 - 335743.0, Northings : 6249663.0 - 6253979.0 with a Buffer of 0 meters, conducted by Therese Mccormick on 03 March 2022.

The context area of your search is shown in the map below. Please note that the map does not accurately display the exact boundaries of the search as defined in the paragraph above. The map is to be used for general reference purposes only.

A search of Heritage NSW AHIMS Web Services (Aboriginal Heritage Information Management System) has shown that:

63	**Aboriginal sites are recorded in or near the above location.**
0	**Aboriginal places have been declared in or near the above location. ***

If your search shows Aboriginal sites or places what should you do?

- You must do an extensive search if AHIMS has shown that there are Aboriginal sites or places recorded in the search area.
- If you are checking AHIMS as a part of your due diligence, refer to the next steps of the Due Diligence Code of practice.
- You can get further information about Aboriginal places by looking at the gazettal notice that declared it. Aboriginal places gazetted after 2001 are available on the NSW Government Gazette (https://www.legislation.nsw.gov.au/gazette) website. Gazettal notices published prior to 2001 can be obtained from Heritage NSW upon request

Important information about your AHIMS search

- The information derived from the AHIMS search is only to be used for the purpose for which it was requested. It is not be made available to the public.
- AHIMS records information about Aboriginal sites that have been provided to Heritage NSW and Aboriginal places that have been declared by the Minister;
- Information recorded on AHIMS may vary in its accuracy and may not be up to date. Location details are recorded as grid references and it is important to note that there may be errors or omissions in these recordings,
- Some parts of New South Wales have not been investigated in detail and there may be fewer records of Aboriginal sites in those areas. These areas may contain Aboriginal sites which are not recorded on AHIMS.
- Aboriginal objects are protected under the National Parks and Wildlife Act 1974 even if they are not recorded as a site on AHIMS.
- This search can form part of your due diligence and remains valid for 12 months.

**** Site Status**

Valid - The site has been recorded and accepted onto the system as valid

Destroyed - The site has been completely impacted or harmed usually as consequence of permit activity but sometimes also after natural events. There is nothing left of the site on the ground but proponents should proceed with caution.

Partially Destroyed - The site has been only partially impacted or harmed usually as consequence of permit activity but sometimes also after natural events. There might be parts or sections of the original site still present on the ground

Not a site - The site has been originally entered and accepted onto AHIMS as a valid site but after further investigations it was decided it is NOT an aboriginal site. Impact of this type of site does not require permit but Heritage NSW should be notified

APPENDIX 2 ACHA QUESTIONNAIRE

1. Cultural connection:

Please describe the nature of your cultural connection to the country on which the subject area is situated. Please include any relevant cultural knowledge or knowledge of Aboriginal objects or places within the subject area. Have you ever lived in or near the subject area? If you are a Traditional Owner, please state this clearly.

2. Representing your community members:

Please state who you or your organisation represents. Do you or your organisation represent other members of the Aboriginal community? If so, please describe how information is provided to the other members, and how their information and knowledge may be provided back to the Proponent and Urbis.

3. Previous experience:

Please list your relevant (for example, in the area of the proposed project) previous experience in providing cultural heritage advice and survey participation.

4. Schedule of Rates:

Please provide your Certificate of Currency including Product and Public Liability Insurance and Worker's Compensation. Please also schedule of rates (hourly/half day/day) for fieldwork participation, and include any expenses you may expect to incur, and these will be sought to be reimbursed. Please note that it is for the discretion for the Proponent to decide if they invite RAPs for site works and the consultation process does not guarantee paid employment.

Subject: Hickson Road, Barangaroo, NSW

Dear Therese

Our group is a non- profit organisation that has been active for over forty years in Western Sydney, we are a Darug community group with over three hundred members. The main aim in our constitution is the care of Darug sites, places, wildlife and to promote our culture and provide education on the Darug history.

Our group promotes Darug Culture and works on numerous projects that are culturally based as a proud and diverse group. It has been discussed by our group and with many consultants and researches that our history is generic and is usually from an early colonists perspective or solely based on archaeology and sites. These histories are adequate but they lack the people's stories and parts of important events and connections of the Darug people and also other Aboriginal people that now call this area home and have done so for numerous generations.

This area is significant to the Darug people due to the evidence of continued occupation, within close proximity to this project site there is a complex of significant sites.

Landscapes and landforms are significant to us for the information that they hold and the connection to Darug people. Aboriginal people (Darug) had a complex lifestyle that was based on respect and belonging to the land, all aspects of life and survival did not impact on

the land but helped to care for and conserve land and the sustenance that the land provided. As Darug people moved through the land there were no impacts left, although there was evidence of movement and lifestyle, the people moved through areas with knowledge of their areas

and followed signs that were left in the landscape. Darug people knew which areas were not to be entered and respected the areas that were sacred.

Knowledge of culture, lifestyle and lore have been part of Darug people's lives for thousands of years, this was passed down to the next generations and this started with birth and continued for a lifetime. Darug people spent a lifetime learning and as people grew older they passed through stages of knowledge, elders became elders with the learning of stages of knowledge not by their age, being an elder is part of the kinship system this was a very complicated system based on respect.

Darug sites are all connected, our country has a complex of sites that hold our heritage and past history, evidence of the Darug lifestyle and occupation are all across our country, due to the rapid development of Sydney many of our sites have been destroyed, our sites are thousands of years old and within the short period of time that Australia has been developed pre contact our sites have disappeared.

The *Aboriginal cultural heritage consultation requirements for proponents* Section 4.1.8 refers to "Aboriginal organisations representing Aboriginal people who hold cultural knowledge". Recent consultation meetings have revealed that many of these Aboriginal organisations and individuals do not hold cultural knowledge of the Western Sydney area. The increasing involvement of such parties in cultural heritage management means that genuine local Aboriginal organisations are unable to properly care for our cultural heritage.

Many Aboriginal organisations listed in the OEH response letter do not contribute to the Aboriginal community of Western Sydney. Individuals listed in the OEH response letter do not represent the community and while they may be consulted with, should not be employed for their own personal financial benefit.

Our organisation is committed to providing benefits back to our local Aboriginal community through such measures as funding the local Aboriginal juniors' touch football team, painting classes for the local children and donating money to various charities. Employment in cultural heritage activities is source of income that organisations such as ours can use to contribute to beneficial activities and support within the community.

Darug custodian Aboriginal Corporation's site officers have knowledge of Darug land, Darug Culture,Oral histories, landforms, sites, Darug history, wildlife, flora and legislative requirements. We have worked with consultants and developers for many years in Western

Sydney (Darug Land) for conservation, site works, developments and interpretation/education strategie.

Darug Custodian Aboriginal Corporation have received and reviewed the report for Hickson Road, Barangaroo, NSW.

We support the recommendations set out in this report.

Please contact us with all further enquiries on the above contacts.

Regards

Justine Coplin

Leanne Watson
DARUG CUSTODIAN ABORIGINAL CORPORATION
PO Box 81
WINDSOR NSW 2756

Issue date:
27/04/2022

Print date:
27/04/2022

Dear Leanne

Statement of coverage

The following policy of insurance covers the full amount of the employer's liability under the *Workers Compensation Act 1987 (NSW).*

Employer name:	Policy number:	Valid:
DARUG CUSTODIAN ABORIGINAL CORPORATION	127892101	31/03/2022-31/03/2023

Trading name:	ABN:	ACN:

Industry classification number (WIC)[3]	Number of workers[1]	Wages/units[2]
782920 Technical Services nec	4	$300,607.72

1. Number of workers includes contractors/deemed workers
2. Total wages/units estimated for the current period
3. The policy covers all workers employed by the entity named on this certificate in the course of its primary business activity or any other activities ancillary to its primary business activity as required.

Important information

Principals relying on this certificate should ensure it is accompanied by a statement under section 175B of the *Workers Compensation Act 1987 (NSW)*. Principals should also check and satisfy themselves that the information is correct and ensure that the proper workers compensation insurance is in place, i.e. compare the number of employees on site to the average number of employees estimated; ensure that the wages are reasonable to cover the labour component of the work being performed; and confirm that the description of the industry/industries noted is appropriate. A principal contractor may become liable for any outstanding premium of the sub-contractor if the principal has failed to obtain a statement or has accepted a statement where there was reason to believe it was false.

Yours faithfully,

Peter Meighan

Subject: Re: Central Barangaroo - Hickson Road, Barangaroo, NSW ACHA Stage 2/3 Project Information and Methodology

Dear Sam,

Thank you for your Methodology at CENTRAL BARANGAROO – HICKSON ROAD, BARANGAROO, NSW. Here at KYWG we thrive on community engagement, conservation, and land management, within cultural heritage for over 50 years within the Sydney basin and wider area. Are aim being to protect sacred sites and country from urban development and it's in our best interest to pass on knowledge of the area to the best of our ability. For tens of thousands of years Aboriginal people have walked this land. Passing down oral history from generation to generation. This way of life is known to many indigenous people throughout the world, Aboriginal Australia is the oldest living culture to date. For this reason, we must grab hold of any cultural heritage as a last chance to unearth our rich history.

As Aboriginal people we have a strong connection to mother earth, sky, water, and fire, we are spiritual beings who believe in a higher power of biamie. It is the ancient stories of how the earth and life was created long ago, the dreaming and how we continue to dream like our ancestors. This brings me to the importance of the intangible and the astatic aspects of country. Aboriginal people were good at giving back to mother earth, hence why not much is left behind. But the spiritual energy that country holds deep onto stains the land and can never be lost. This feeling we get when stepping foot on an Aboriginal site is aweing of emotions and energy this is intangible to us.

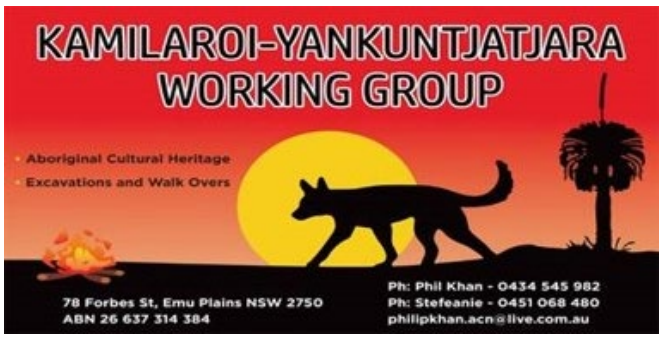

The sky reflects the land, for thousands of years Aboriginal people navigated across the land reading the sky like a map, we can be considered the first astronomers. There are many dreaming story's connecting the sky and the land and how mother earth was made. We believe we come from the sky our spirts lived in the sky before coming to care for mother earth. A story that many Aboriginal language groups are connected to is the emu in the sky, better known as the milky way. The story gives us sessional knowledge of what occurs throughout the year when to go hunting and the weather for instance.

The area is known to for the abundance saltwater resources allowing room for midden sites to be located possibly with in the area. Aboriginal people utilised natural resources to create tools and craft such as shellfish hooks for fishing. Aboriginal people utilised canoes to cross the water and to fish out at sea. Before colonisation there would have been fresh water sources available to Aboriginal people, along with wells that were dug and claypans could have been utilised for fresh water.

KYWG agree to your methodology and support your report, we highly recommend you have a interruption plan following connecting with county framework. We look forward to working alongside you on this project.

Kind Regards

Marbuck Khan

Attention Urbis **Date**: 05/07/22

Subject: Central Barangaroo

Dear Wade

Our group is a non- profit organisation that has been active for over forty years in Western Sydney, we are a Darug community group with over three hundred members. The main aim in our constitution is the care of Darug sites, places, wildlife and to promote our culture and provide education on the Darug history.

This area is an area our group has a vast knowledge of, we have worked and lived in for many years, this area is highly significant to the Darug people due to the connection of sites and the continued occupation. Our group has been involved in all previous assessments and works in this area as a traditional owner Darug group for the past 40 plus years.

Our Darug land can only be assessed by Darug people, we have our song lines and creation places that only our people can identify, our connection to our nura is part of us and our country.

Our histories are held by our people and places, when we are looking for cultural aspects of an area they are not only seen but felt, our spiritual connections are our culture and heritage that connect us to our old people through the evidence that we see on our site visits.

People from other mobs should be respectful of our country and people if they are not respectful that the Darug are the knowledge holders then they are not cultural, therefore should not be involved on cultural heritage on Darug land.

Darug Custodians have reviewed the report and support the recommendations.

Please contact us with all further enquiries on the above contacts.

Regards

Justine Coplin

We acknowledge and pay respect to the Darug people,the traditional Aboriginal custodians of this land.

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Wade,

Thank you for your ACHAR for Central Barangaroo project. Aboriginal people of this land for tens of thousands of years walked and cared for the land and still do today, we follow the land, sky and everything in between. Mother earth a giver of life and provides an abundance of natural resources that provided for my people. We practice lore, kinship, customs and have rich culture that is unique to each and every clan or tribe with similarities across the continent, made up of many countries having several languages and dialects.

We have a spiritual believe system which we know today as the Dreaming which is continuance and passed down verbally and kinesthetically. It is known that we were the first astronomers, bakers, scientists, doctors, craftsman and the lists go on. It is the ancient knowledge that our people passed on to generation to generation for tens of thousands of years practicing our rich culture that benefited the environment around us. The rich culture is a reflection of the people we are and why we were brought to mother earth through the dreaming, we are here to protect mother earth and all she holds the tangible an intangible.

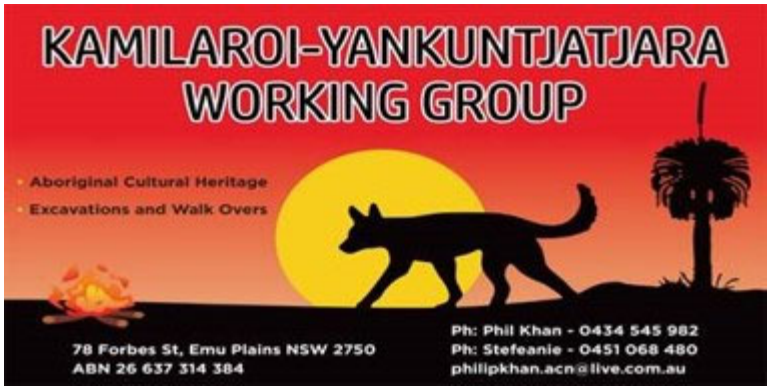

The study area is significant to our people the tangible and intangible aspects that come with the site we must consider this deep connection to country that we have as Aboriginal peoples. For this reason, we recommend interpretation as a chance to regain our cultural identity on country. When thinking about interpretation within the Sydney basin to acknowledge the many tribes and clans that make this area up its important to recognise that they can be different and therefore recognising many rather than just one. This shows that we are divers, resilient and civilised peoples.

It is our understanding that in the Sydney basin the original peoples were moved around due to escaping battles between the first fleet, the stolen generation and being pushed of country forced to move to other tribes, clans or elsewhere that was not yet known to the first fleet. This in turn has had major effects on our people, causing generational trauma.

It is for this reason here at KYWG we intent to raise awareness and acknowledge all Aboriginal people with in the community and educating the wider community about the struggle our people are facing. It is for this reason we ask for monitoring of any works and or cultural training to be conducted to any contractors working at the site to be carried out by Aboriginal people. With this in mid we would like to agree to your recommendations and we support your report.

Kind Regards

Kadibulla Khan
