RE: Response to Submissions - SSD-39587022 Central Barangaroo Early Works (Hickson Road Interface)

Thank you for notifying Sydney Water of SSD-39587022 Central Barangaroo Early Works at Lot 52 DP1213772, which proposes to partially demolish the existing shoring wall capping beam, excavation of land around the secant pile retention wall and the construction of a new secant pile retention wall (approx. 150m long). Included in these works are archaeological investigations, perimeter retention wall interface works and relocation of the stormwater services.

Sydney Water has reviewed the application based on the information supplied and advises that we have no further comments as per that initially advised in response to the EIS on the 5 July 2023 (copy attached).

We acknowledge the proponent has engaged a WSC for and is currently carrying out options assessment of the proposed relocation of pump station SP1129 as advised, which will be finalised by INSW late 2023 and will be tabled with Sydney Water for review.

Should the Department of Planning and Environment require any further information, please contact name of the Growth Planning Team via urbangrowth@sydneywater.com.au.

Yours sincerely,

A handwritten signature in black ink, appearing to read "KL", with a long horizontal stroke extending to the right.
