

Finishes Schedule_ Room by Room

Issue: PRELIMINARY_Revision A

Date: 21 Oct. 2022

Proj no: 4293-00

Project name: Redfern North Eveleigh Chief Mechanical Engineer's Building

Abbreviations						
AG	Aluminium glazed	FSF	Structural particle board flooring			
AL	Aluminium	FVS	Floor – Vinyl sheeting (slip resistant)			
CB	Concrete block	FVS1	Floor- Anti static sheeting			
C-EX	Existing ceiling	G	Glass			
CFC	Compressed fibre cement	GR	Granolithic topping	PB	Plasterboard sheeting – flush set	
CFS	Clear floor sealer	HDG	Hot dipped galvanised	PB/FR	Plasterboard/ fire rated	
CFC	Compressed fibre cement	LVR	Louvre	PBM	Plasterboard moisture resistant	
CFS	Clear floor sealer	MDF	Medium density fibreboard	PC	Powdercoat	
CGFC	Concealed grid fibrous cement	MDS	Metal ducted skirting	PCT	Plasterboard ceiling tile	
CGC	Concealed grid suspended ceiling	M-EX	Existing masonry wall to be refurbished.	PMS	Plain metal skirting	
CT1	Timber cornice(350mm)	OFC	Off form concrete	SC	Steel column	
CT2	Timber cornice(300mm)	OW	Operable wall	SF	Steel furring channels	
CT3	Timber cornice(75mm)	P	Paint finish - All surfaces to be cleaned and prepared clean off marks, paint spots and stains and restore damaged surface to their original condition. (Paint shade to match original)			
CT4	Timber cornice(200mm)					
CT5	Timber cornice(100mm)					
CM	Pressed metal cornice (300mm)	PP	Paint finish on lime plaster - - All surfaces to be cleaned and prepared clean off marks, paint spots and stains and restore damaged surface to their original condition.	SST	Steel stud	
CONC	Concrete	<p>DOORS</p> <p>- Where scheduled paint finish-Paint in 3 coats of 100% gloss enamel; paint both sides of internal doors and internal face only of external doors. - Allow 3 colours per door leaf.</p> <p>Where scheduled French polish finish- Remove old French polish by methylated spirits, sanding and then apply two coats of traditional orange shellac and beeswax. (Specialist French- polisher to undertake this work.)</p> <p>WINDOW</p> <p>- Allow to supply new windows for 10% of existing numbers. Allow to install new windows, pre-primed. Paint all around with three coats 100% gloss enamel. Allow glazing to be clear 5.5mm toughened glass fixed with traditional linseed putty. - For all non- new windows (90% of all windows) allow restoration works as follows: - Strip lead paint from window frames, sashes and sills as per above general methodology for lead paint removal, as per AS/NZS 4361.2:2017 Allow to clean, prepare and repaint (internally only) all windows with 3 coats 100% gloss enamel. Check sash chords: windows are to be all in good working order with ease of operation. Allow replace 30% windows with new sash cords.</p> <p>LEAD PAINT REMOVAL</p> <p>- Remove all paint from the walls, ceilings, windows, doors and joinery using a proprietary paint stripping product such as Peel Away. - Allow for a sample test for window door joinery. The sample shall be used as a 'scrape test', removing a few coats of paint at a time so that a record can be obtained of the original colours. Liaise with the heritage architect - Provide a 1m x 1m sample of paint removal, located where directed, and obtain approval before proceeding. - Allow for heritage architect to inspect sample of wall on removal of paint to obtain record of early colour scheme and review workmanship.</p> <p>Strip lead paint from walls as per above general methodology for lead paint removal. Strip in accordance with above general methodology for lead paint removal as per AS/NZS 4361.1:2017</p> <ol style="list-style-type: none"> 1. Work will require employment of professional lead specialist (Item 1.4.18) 2. Preparation of appropriate waste management plan 3. Ensure Local Authority requirements for public safety and health are met as well as appropriate site preparation, waste management disposal and contamination control measures are addressed. 4. Externally, surrounding soils around the building and under floor areas are also tested for lead and asbestos contamination. 				
CONC-EX	Existing concrete floor					
CPB1	Ceiling – Set plasterboard				TFW-EX	Timber framed window
CPB2	Ceiling – Moisture resistant plasterboard (u/s Ex. Ceiling)					
CPB3	Ceiling – 120/120/120 Fire rated plasterboard (u/s Ex. Ceiling)				TW-EX	Existing timber framed wall PB lining
CR	Cement render				VFS	Vinyl floor sheeting
CTS	Ceramic Tile Skirting					
CPM	Ceiling – Pressed Metal				VS	Vinyl skirting
CBB1	Ceiling – T&G quirk beaded boarding(150mm)				WPN	Pinboard wall lining
CBB2	Ceiling – T&G quirk beaded boarding(125mm)				WBF	Face brickwork
CRI	Ceiling – Ripple iron				WBR	Wall – Brickwork render
FC1	Fibre cement sheeting – flush set joint				WCT	Wall – ceramic tiles
FC	Fibrous cement sheeting flush set joint					
FCP	Floor - Carpet					
FCT	New proposed floor ceramic tiles					
FCT1	Floor – ceramic tiles (Monocottura tiles)					
FCT2	Floor – ceramic tiles(Terracotta tiles)					
FCT3	Floor – New tessellated tiles					
FCO1	Flooring - Concrete					
FTB1	Floor – Timber Board(150mm)					
FTB2	Floor – Timber Board(100mm)
