

NOTICE OF AN APPLICATION FOR A STATE SIGNIFICANT DEVELOPMENT

An application has been made to the Minister for Planning and Public Spaces by Tritton Resources Pty Ltd, a wholly owned subsidiary of Aeris Resources Ltd (ABN 30 147 131 977) to develop a mineral mining operation (Constellation Mine) and associated infrastructure in accordance with Sections 4.12(1) and 4.38 of the Environmental Planning and Assessment Act 1979 (EP&A Act).

Aeris Resources hereby gives notice of the development application in accordance with Section 23(3)(b) of the Environmental Planning and Assessment Regulation (2021).

Application Details:

Application No.: SSD-41579871
 Applicant: Tritton Resources Pty Ltd
 LGA: Bogan Shire Council
 Site Location: The Project site is located approximately 20km north-east of the township of Girilambone and approximately 55km north-west of Nyngan (see included map).

Project description: The Project is proposed as a satellite site of Tritton Mine (owned and operated by Aeris Resources) where the processing facility is located. The Project would involve the extraction of up to 10 million tonnes of ore material over a mine life of approximately 10 years, followed by five years of rehabilitation. The development application is comprised of three main components:

- A mine site that includes the lands and infrastructure required for both open cut mining and processing of oxide ore by heap leach facility, as well as underground mining of ore to be transported to, and processed at, Tritton Mine. Management of water resources, waste rock, and heap leach material will also occur on the mine site.
- An infrastructure corridor, including water pipeline, aligned with the haul route. The water pipeline will provide make-up water and allow for the management of excess site water via transfers to / from Murrawombie Mine (owned and operated by Aeris Resources), as required.
- Project ore will be transported by existing public roads and private roads. There will be road upgrades between the mine site and the Mitchell Highway, including 2.85 km of new road. A new T intersection will be established linking the haul road to the Mitchell Highway (avoiding the township of Girilambone), and an upgrade to the intersection of the Mitchell Highway with Railway Road will also be undertaken. Dewatered tailings will be backhauled to the mine site for use in paste fill to support underground mining.

Environmental Impact Statement

The Environmental Impact Statement will be placed on public exhibition by the Department of Planning Housing and Infrastructure and may be accessed via the Major Projects website <https://www.planningportal.nsw.gov.au/major-projects>. During the exhibition period written submissions can be made directly to the Department.
