

Guidelines for preparing assessment documentation relevant to the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) for proposals being assessed under the NSW Assessment Bilateral

Yanco Delta Wind Farm (EPBC 2022/09214)

Introduction

1. On 28 June 2022, a delegate of the Federal Minister for the Department of Climate Change, Energy, the Environment and Water (formerly Department of Agriculture, Water and the Environment) determined Yanco Delta Wind Farm was a controlled action under section 75 of the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act). The EPBC Act controlling provisions for the proposed actions are:
 - i. listed threatened species and communities (sections 18 and 18A)
2. The proposed action will be assessed in accordance with the bilateral assessment agreement Amending Agreement No. 1, and as such, is required to be assessed in the manner specified in Schedule 1 to that Agreement, including, addressing the matters outlined in Schedule 4 of the *Environment Protection and Biodiversity Conservation Regulations 2000* (EPBC Regulations).
3. The proponent must undertake an assessment of all protected matters that may be impacted by the development under the controlling provision identified in paragraph 1. The Commonwealth Federal Minister for the Department of Climate Change, Energy, the Environment and Water considers that the proposed action is likely to have a significant impact on threatened species and communities and migratory species listed in **Appendix A**.
4. The proponent must consider each of the protected matters under the triggered controlling provisions that may be impacted by the action. Note that this may not be a complete list and it is the responsibility of the proponent to undertake an analysis of the relevant impacts and ensure all protected matters that are likely to be impacted are assessed for the Commonwealth Minister's consideration.

General Requirements

Relevant Regulations

5. The Environmental Impact Statement (EIS) must address all matters outlined in Schedule 4 of the EPBC Regulations and all matters outlined below in relation to the controlling provisions.

Project Description

6. The title of the action, background to the action and current status.
7. The precise location and description of all works to be undertaken (including associated offsite works and infrastructure), structures to be built or elements of the action that may have impacts on Matters of National Environmental Significance (MNES).
8. How the action relates to any other actions that have been, or are being taken in the region affected by the action.
9. How the works are to be undertaken and design parameters for those aspects of the structures or elements of the action that may have relevant impacts on MNES.

Impacts

10. The EIS must include an assessment of the relevant impacts of the action on the matters protected by the controlling provisions, including:
- i. a description and detailed assessment of the nature and extent of the likely direct, indirect and consequential impacts, including short term and long term relevant impacts;
 - ii. a statement whether any relevant impacts are likely to be unknown, unpredictable or irreversible;
 - iii. analysis of the significance of the relevant impacts; and
 - iv. any technical data and other information used or needed to make a detailed assessment of the relevant impacts.

Avoidance, mitigation and offsetting

11. For each of the relevant matters protected that are likely to be significantly impacted by the action, the EIS must provide information on proposed avoidance and mitigation measures to manage the relevant impacts of the action including:
- i. a description, and an assessment of the expected or predicted effectiveness of the mitigation measures,
 - ii. any statutory policy basis for the mitigation measures;
 - iii. the cost of the mitigation measures;
 - iv. an outline of an environmental management plan that sets out the framework for continuing management, mitigation and monitoring programs for the relevant impacts of the action, including any provisions for independent environmental auditing;
 - v. the name of the agency responsible for endorsing or approving each mitigation measure or monitoring program.
12. Where a significant residual adverse impact to a relevant protected matter is considered likely, the EIS must provide information on the proposed offset strategy, including discussion of the conservation benefit associated with the proposed offset strategy.
13. For each of the relevant matters likely to be impacted by the action the EIS must provide reference to, and consideration of, relevant Commonwealth guidelines and policy statements including any:
- i. conservation advice or recovery plan for the species or community;
 - ii. relevant threat abatement plan for the species or community;
 - iii. wildlife conservation plan for the species; and
 - iv. any strategic assessment.

Note: the relevant guidelines and policy statements for each species and community are available from the Department of Climate Change, Energy, the Environment and Water Species Profiles and Threats Database. <http://www.environment.gov.au/cgi-bin/sprat/public/sprat.pl>

14. In addition to the general requirements described above, specific information is required with respect to each of the determined controlling provisions. These requirements are outlined in paragraphs 15-18.

Key Issues

Biodiversity (threatened species and communities and migratory species)

Assessment Requirements

15. The EIS must identify each EPBC Act listed threatened species and community and migratory species likely to be impacted by the action. For any species and communities that are likely to be impacted, the proponent must provide a description of the nature, quantum and consequences of the impacts. For species and communities potentially located in the project area or in the vicinity that are not likely to be impacted, provide evidence why they are not likely to be impacted.
16. Further analysis of the impacts of the 2019-2020 bushfires on EPBC Act listed threatened species and communities should be undertaken during the assessment. Further assessment will determine whether the remaining habitat within the proposed action area is of substantially greater importance to the survival of the listed threatened species following the fires and/or whether the population of the species in the area is considered an important population. This information, once obtained, can be considered when determining avoidance, mitigation and offset measures for these species.
17. For each of the EPBC Act listed threatened species and communities and migratory species likely to be impacted by the action the EIS must provide a separate:
 - i. description of the habitat (including identification and mapping of suitable breeding habitat, suitable foraging habitat, important populations and habitat critical for survival), with consideration of, and reference to, any relevant Commonwealth guidelines and policy statements including listing advice, conservation advice and recovery plans;
 - ii. details of the scope, timing and methodology for studies or surveys used and how they are consistent with (or justification for divergence from) published Australian Government guidelines and policy statements;
 - iii. description of the relevant impacts of the action having regard to the full national extent of the species or community's range; and
 - iv. description of the specific proposed avoidance and mitigation measures to deal with relevant impacts of the action;
 - v. identification of significant residual adverse impacts likely to occur after the proposed activities to avoid and mitigate all impacts are taken into account;
 - vi. a description of any offsets proposed to address residual adverse significant impacts and how these offsets will be established;
 - vii. details of how the current published NSW Biodiversity Assessment Method (BAM) has been applied in accordance with the objects of the EPBC Act to offset significant residual adverse impacts; and
 - viii. details of the offset package to compensate for significant residual impacts including details of the credit profiles required to offset the action in accordance with the BAM and/or mapping and descriptions of the extent and condition of the relevant habitat and/or threatened communities occurring on proposed offset sites.

Note: For the purposes of approval under the EPBC Act, it is a requirement that offsets directly contribute to the ongoing viability of the specific protected matter impacted by a proposed action and deliver an overall conservation outcome that improves or maintains the viability of the MNES i.e. 'like for like'. In applying the BAM, residual impacts on EPBC Act listed threatened ecological communities must be offset with Plant Community Type(s) (PCT) that are ascribed to the specific EPBC listed ecological community. PCTs from a different vegetation class will not generally be acceptable as offsets for EPBC listed communities.

18. Any significant residual impacts not addressed by the BAM may need to be addressed in accordance with the EPBC Act 1999 Environmental Offset Policy.

<https://www.dcceew.gov.au/environment/epbc/publications/epbc-act-environmental-offsets-policy>.

Other approvals and conditions

19. Information in relation to any other approvals or conditions required must include the information prescribed in Schedule 4 Clause 5 (a) (b) (c) and (d) of the EPBC Regulations.

Environmental Record of person proposing to take the action

20. Information in relation to the environmental record of a person proposing to take the action must include details as prescribed in Schedule 4 Clause 6 of the EPBC Regulations.

Information Sources

21. For information given in an EIS, the EIS must state the source of the information, how recent the information is, how the reliability of the information was tested; and what uncertainties (if any) are in the information.

The international conventions, management plans and principles that must be considered in relation to this proposal include:

- Listed threatened species and communities
 - Australia's obligations under the:
 - Convention on Biological Diversity,
 - the Convention on Conservation of Nature in the South Pacific (Apia Convention),
 - the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).
 - Any relevant recovery plans or threat abatement plans.

The policies and plans that must be considered in relation to this proposal include:

- Relevant conservation advice/s: <http://www.environment.gov.au/cgi-bin/sprat/public/sprat.pl>
- Relevant strategic assessment reports.

Appendix A

Protected matters relevant to the Yanco Delta Wind Farm (EPBC 2022/09214) project

Specific risks

Key risks associated with the proposed action from the Commonwealth perspective include:

- Potential direct and indirect impacts to threatened species and ecological communities from vegetation clearing and construction and operation. This includes potential impacts associated with the perceived changes relating to wind turbine operations.
- The referral states that further assessment of potential impacts would be prepared as part of an Environmental Impact Statement. This should clearly identify the extent and condition of any matters of national environmental significance in, or adjacent to the project area, as well as all potential impacts.
- The referral mentions the possibility of haulage road upgrades and four different options for connecting to the Dinawan Terminal Station. The department considers detailed assessment of potential impacts from haulage road upgrades and installing transmission lines to the terminal station are required during the assessment stage.

Listed threatened species and communities

Based on the information in the referral documentation, the location of the action, species records and likely habitat present in the area, there are likely to be significant impacts to:

- Natural Grasslands of the Murray Valley Plains (NGM) – Critically Endangered
- Plains-wanderer (*Pedionomus torquatus*) – Critically Endangered
- Weeping Myall Woodlands (WMW) – Endangered
- Superb Parrot (*Polytelis swainsonii*) - Vulnerable
- Slender Darling Pea (*Swainsona murrayana*) – Vulnerable

Additionally, there is some risk that there may be significant impacts on the following matters and further assessment to determine if the communities and species listed below are present in the proposed action area and, if so, the extent to which they may be impacted by the proposed action, is required:

- Seasonal Herbaceous Wetlands (Freshwater) of the Temperate Lowland Plains – Critically Endangered
- Swift Parrot (*Lathamus discolor*) – Critically Endangered
- Flathead Galaxias (*Galaxias rostratus*) – Critically Endangered
- Australasian Bittern (*Botaurus poiciloptilus*) – Endangered
- Australian Painted Snipe (*Rostratula australis*) – Endangered
- Koala (combined populations of Queensland, New South Wales and the Australian Capital Territory) (*Phascolarctos cinereus* (combined populations of Qld, NSW and the ACT)) – Endangered
- Trout Cod (*Maccullochella macquariensis*) – Endangered
- Turnip Copperburr (*Sclerolaena napiformis*) – Endangered

- *Austrostipa wakoolica* – Endangered
- Winged Pepper-cress (*Lepidium monoplocoides*) – Endangered
- Murray Cod (*Maccullochella peelii*) – Vulnerable
- Grey Falcon (*Falco hypoleucos*) – Vulnerable
- Malleefowl (*Leipoa ocellata*) – Vulnerable
- Painted Honeyeater (*Grantiella picta*) – Vulnerable
- Corben's Long-eared Bat (*Nyctophilus corbeni*) – Vulnerable
- Growling Grass Frog (*Litoria raniformis*) – Vulnerable
- Red Darling-pea, Red Swainson-pea (*Swainsona plagiotropis*) – Vulnerable
- Mueller Daisy (*Brachyscome muelleroides*) – Vulnerable
- Mossgiel Daisy (*Brachyscome papillosa*) – Vulnerable

Further analysis of the impacts of the fires on those species and communities identified above should be undertaken during the assessment.

Note: uncertainty around the extent and number of protected matters that may be impacted will need to be resolved through the assessment process once final alignment and construction plans have been completed.

Note: this may not be a complete list and it is the responsibility of the proponent to ensure any protected matters under these controlling provisions are assessed for the Commonwealth decision-maker's consideration.
