Subject: Request to increase the approved capacity of the battery energy storage system

Dear Mr Hoban

I refer to your letter of 1 February 2024, seeking the Planning Secretary's approval to increase the delivery capacity of the battery energy storage system from 400 MW to 415 MW, in accordance with Condition A5 of Schedule 2.

The Department considers that the increase can be reasonably accommodated within the area considered in the Environmental Impact Statement (including the Preliminary Hazard Analysis) and would not result in any additional impacts beyond has been approved.

Accordingly, as nominee of the Planning Secretary, I approve the 15 MW increase to the development's total delivery capacity prescribed in Condition A5 of Schedule 2, to a total of 415 MW.

Please ensure that a document notifying the approved capacity increase is made publicly available on the project website at the earliest convenience.

If you wish to discuss the matter further, please contact Elisha Dunn on 9995 6629.

Yours sincerely

Iwan Davies
Director
Energy Assessments

As nominee of the Planning Secretary
