Re: Out of hours construction request, clause B24

Dear Shaun,

The construction at the MCL7 site in Western Sydney has been significantly impacted by unseasonably wet weather in the last 6 months.

BlueScope have discussed with the planning department and requested to conduct a limited range of construction activities on Sundays (a total of 15 Sundays prior to the end of calendar year 2024) and extend by 2 hours the permissible working hours on Saturdays for a total of 15 Saturdays. This is an attempt to recover the impact that the wet weather has had on our construction schedule.

BlueScope would like to propose the extended construction hours and nature of work to be carried out. The additional construction hours sought are:

For a total of 15 Saturdays prior to end December 2024, from 1pm to 3pm

For a total of 15 Sundays prior to end December 2024, from 8am to 3pm

The work proposed will be limited to work that is quiet relative to other construction work, comprising formwork, reo-fixing and metal roofing and cladding.

No deliveries will be made to the site during the extended hours on Saturday or on Sunday, with all materials required for use during extended construction hours to be delivered during already approved construction hours. This means that no semi-trailers will be arriving or departing the construction site after 1pm on Saturdays or at all on Sundays.

The only vehicles accessing the site after 1pm on Saturdays or on Sundays will be those used by the tradespeople carrying out the proposed work.

Could you please treat this correspondence to adjust the working hours as a request pursuant to condition B24 of the development consent to work outside of the hours currently approved for construction work, as outlined in more detail within the supporting documents (Construction Noise management Plan, Construction Traffic Management Plan and the SLR OOHW-Construction Noise and Vibration Assessment).

Yours sincerely
