Subject: Royal Prince Alfred Hospital Redevelopment (SSD-47662959) – Planning Secretary’s Environmental Assessment Requirements – Industry Specific

Dear Ms Muir

Please find attached a copy of the Planning Secretary’s environmental assessment requirements (SEARs) for the Royal Prince Alfred Hospital Redevelopment (SSD-47662959). Based on the information provided in your application, industry-specific SEARs have been issued for your project.

Please contact the Department of Planning and Environment (the Department) as soon as possible if your project changes, such that consultation is required with public authorities under Part 8 of the Environmental Planning and Assessment Regulation 2021 (EP&A Regulation). Your SEARs may need to be reissued and a scoping report may also be required.

If required, the Planning Secretary may modify your SEARs to ensure the environmental assessment of the project covers all relevant matters and is consistent with contemporary assessment practice.

Your SEARs will expire two years from the date of issue (or the date they were last modified) unless the Planning Secretary has granted an extension. If you would like to seek an extension, you should contact the department at least three months prior to the expiry date.

If your application and EIS is not submitted by the date of expiry (or by the agreed extension date), you will need to make a new application for SEARs to progress your project.

Additional assessment requirements

The Department has identified assessment requirements additional to those attached. These requirements, in addition to the industry-specific SEARs, are provided below and should be taken to be the collective SEARs for the project.

Contamination

- In relation to Contamination and Remediation, if required, provide a Remediation Action Plan (RAP) including Interim Audit Advice from an EPA-accredited Site Auditor certifying the RAP as appropriate.

Flooding

- Provide a flood impact and risk assessment prepared in accordance with the NSW

Floodplain Development Manual, and existing councils and government studies and guidance.

- Identify flood behaviour, flood constraints and risks on the site and its surrounding, including the potential impacts of climate change for the full range of events, i.e. up to and including the probable maximum event (PMF).
- Assess the impacts of the development, including any changes to flood behaviour and risk, impacts of flooding on the development and its future community and on the existing community for the full range of events.
- Propose management measures required to minimise the impacts of flooding on the development and minimise flood risks to the community, including an Emergency Management Plan considering access to and from the site, and evacuation issues during significant flood events including the PMF, from both local catchments and/or regional catchments.

If the site is in a flood catchment, or flood affected, you must undertake consultation with the NSW State Emergency Service (as a relevant agency) prior to lodgement of the EIS.

Hazards and Risks

- If the development is adjacent to or on land in a pipeline corridor, report on consultation outcomes with the operator of the pipeline and prepare a hazard analysis (pipeline).

Preparing your EIS

Your environmental impact statement (EIS) must be prepared having regard to the department's *State Significant Development Guidelines*, including the *Preparing an Environmental Impact Statement Guideline*. All relevant guides for State significant projects that are referenced in the SEARs are available at www.planning.nsw.gov.au/Policy-and-Legislation/Planning-reforms/Rapid-Assessment-Framework.

During the preparation of your EIS, you are required to consult with various parties, including the Department and any relevant agencies, in accordance with *the Undertaking Engagement Guidelines for State Significant Projects*. For more information, please visit the [Prepare EIS page](http://www.planningportal.nsw.gov.au/major-projects/assessment/guide-agency-directory) on the NSW planning portal. Agency contact details can be found at <https://www.planningportal.nsw.gov.au/major-projects/assessment/guide-agency-directory>.

You will need a Registered Environmental Assessment Practitioner to declare that your EIS meets certain standards in relation to its completeness, accuracy, quality and clarity before it is submitted to the Department, as per Division 5 of Part 8 of the EP&A Regulation. A pro forma declaration can be found in [Appendix B of the *Preparing an Environmental Impact Statement Guideline*](#).

Lodging your development application (DA)

Once you submit your EIS, we will check it for completeness to confirm it addresses the requirements in Part 8 of the EP&A Regulation. We will also notify you of the DA fee for your project.

Please note that **your DA is not taken to be lodged until the DA fee has been paid.**

To minimise delays, **please contact the department at least two weeks before you submit your EIS** to confirm fee determination information and payment arrangements. This will give us sufficient time to ensure your DA fee can be determined quickly.

Information needed to determine the DA fee

Your application will need to be accompanied by a Quantity Surveyor's Report supporting the estimated cost of works for your project. You must ensure that the information in the report is consistent with the information provided in your DA form.

If your project involves marinas, extractive industries or any subdivision of land, you must also ensure that your report includes a breakdown of estimated costs for any other component of your project.

Public exhibition requirements

When you contact us regarding the applicable DA fee, we will also advise whether hard and/or electronic copies of the DA and EIS will be required for public exhibition.

Matters of National Environmental Significance

Any development likely to have a significant impact on matters of National Environmental Significance will require approval under the Commonwealth *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act). This approval is in addition to approvals required under NSW legislation.

It is your responsibility to contact the Commonwealth Department of Climate Change, Energy, the Environment and Water to determine if you need approval under the EPBC Act (<https://www.dcceew.gov.au/> or 6274 1111).

If you have any questions, please contact Megan Fu on 9274 6531 or via email at megan.fu@planning.nsw.gov.au.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Karen Harragon".
