Subject: Application no. SSD-4953 - Chemical Warehouse Proposal @ Erskine Park
Attachments: Chemical proposal 2.jpg; Chemical proposal 1.jpg

To the Project Manager,

My name is Pierre D'Cunha, and my family and I live at 26 Chameleon Drive, Erskine park, NSW 2759.

I have just returned from an overseas holiday and have just been made aware of this proposal for a Chemical warehouse to be built in close proximity to where thousands of us live. It is very disturbing to say the least, as the site backs on the block where we live and is surrounded by Erskine Park and St. Clair residents.

The fact that this warehouse will handle chemicals classified as Dangerous goods is even more threatening to all our families. There has already been a number of incidents near chemical plants due to leaks and mishandling issues. Irrespective of the precautions and infrastructure being put into creating this warehouse, *I strongly object to this proposal for the sake of our health and the health of our children.*

From an OH&S perspective, chemical warehouses should be located FAR away from residential areas and definitely not in such close proximity to all us residents who live just a stones throw away from the proposed site.

Please do not hesitate to contact me if you need to discuss this further. I am sure many of my neighbours share the same concerns and will be writing to oppose this proposal.

Kindly acknowledge this email and please STOP this proposal from going ahead?

Concerned resident,
Pierre & Beryl D'Cunha
