**Subject:** WestPark Industrial estate Chemical storage facility - proposed MOD (SSD-4953 MOD 1)

---

Hello Andrew,

My comments on the documents sent with your letter dated 22/11/12 are:

1. The contents page of the Mckenzie report indicates 3 appendices. However, single title sheets up to appendix 10 have been included. Appendix 4 is supposed to be the PHA, but no text has been included.
2. There does not appear to be a statement on any increase in the truck loading and unloadings and also the number of forklift loadings/unloadings.
3. Additionally, there does not appear to be any statement of increases in the annual turnover /throughput quantity of dangerous goods.
4. However, section 6.5 of the modification document dated November 2012 by McKenzie Consulting group refers to site related traffic during the 10 pm to 6 am period.
5. It is necessary that the Applicant make clear statements to clarify the above.
6. If there is an increase in turnover or throughput, which would result in an increase in handling operations, the Hazard Analysis/risk assessment should be updated as the risk profile may change.

Regards
