**Subject:** Fwd: Modification application (SSD 4972), Sheraton Hotel Expansion, 161 Sussex Street Sydney

---

Hi Teille,

Can you please save this down for me.

Thanks,

Kate

Dear Kate,

I am writing to you in regard to the modification application, SSD4972 for the site located at 161 Sussex Street, Sydney (site). The site is located within the future CBD Rail Link corridor.

The application states that the the proposed amendments are a result of detailed design of the development. It also states that the proposal includes changes to the structural support system in parts of the development. As such, it is unclear whether these changes impact on the loading system and structural support system below ground. As such, Transport for NSW require additional information to properly assess the proposal. Given this, we request that the Department of Planning and Infrastructure (DP&I) place a 'stop the clock' on the assessment the application in order to seek additional information from the applicant on the proposed foundation system and also provide us with relevant design calculations for loading on the foundations.

Should you have any queries, please do not hesitate to contact me on 0419 265659.

Regards,

Michael Gheorghiu
