(Name withheld), of Spearwood WA, made the following submission on the project:

Atlas-Campaspe Mineral Sands Project

Supports this project

The corporation applying for this project has an excellent track record in mining and rehabilitation; an example being Ludlow in Western Australia. This means, for this project one can safely focus on the benefits the operation will have for the community, directly, and the Australian economy, on the whole.

As a direct consequence of the project, jobs will be created, and the minerals to be extracted will make an important if not crucial contribution to a whole range of products, be that domestically or on the export market.
