I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I strongly objected the use of public funds in a private project like this

The local community suffers unnecessary extra stress with no immediate nor long-term benefit.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It is an unsuitable location as there is already enough traffic congestion as it is. This intermodal will not only create even more traffic congestion but also air pollution therefore infecting the clean air that the residential families living in the area will be harmed by. There are primary schools, high school and day cares located in various spots around Wattle Grove, Holsworthy, Hamondville and Moorebank.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It is not where industry should be in a residential area filled with families children and near by schools causing traffic chaos pollution etc, and the cost to the company to build a white elephant is mind blowing itself. I don't understand why they would want to destroy a growing region and build a polluted dust cloud which would be shown around the world and destroy tourism as well as make Australia a dirty place to visit and a traffic nightmare to drive in. WRONG FOR THE WEST WRONG FOR AUSTRALIA WRONG WRONG WRONG!!!

**From:** Andrew McDonald <campaigns@good.do>  
**Sent:** Wednesday, 22 February 2017 8:40 PM  
**To:** DPE CSE Information Planning Mailbox; Craig Kelly; Anne Stanley; Lee Rhiannon; Gladys Berejiklian; Anoulack Chanthivong; Melanie Gibbons; Paul Lynch; Melinda Pavey; Mehreen Faruqi  
**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

As a local resident, and a concerned member of the Wattle Grove community I strongly object to the proposed Moorebank Intermodal Terminal.

I have watched local roads become more and more choked over the many years I have lived in Wattle Grove. There is clearly no capacity in the road network for the obscene number of trucks and other vehicles SIMTA intends to add to the already overburdened network.

SIMTA brushes off concerns about congestion raised by the community, and makes no meaningful response to the insistence of the DPE and PAC that it prepare a plan for how to accommodate the additional traffic.

There is a pattern of behaviour here. SIMTA consistently acts in its interest without regard for the community, the people of South-West Sydney, their elected representatives, and the legally established planning process. SIMTA forcing three separate approvals on the department and the PAC is intended to overwhelm the department's resources and most especially to ensure that resident's can't hope to give a meaningful response to one of the most significant issues that could affect the local area.

SIMTA claims that local residents are not opposed to their development and this is another thread in the relationship between the community and SIMTA. SIMTA consistently "informs" the community of what is "going to happen". They tell the community that their concerns are invalid. They brush off complaints (like the complaint about dust pollution I raised with them) with a high handed tone and a firm denial. They treat residents like wayward children. They talk down to us and demean us and threaten our livelihood and lifestyle. We don't like being treated this way. It is no surprise that we don't respond to their occasional newsletters with their mention of their information line. They do not want to hear from us and we don't respond to them because they aren't listening.

The PAC has raised a number of conditions that SIMTA must meet and I do not believe they intend to keep them, at least none that they can avoid. They have a habit of brushing genuine concerns aside and making light of serious impacts.

There are many other genuine concerns – noise, light spill, pollution such as PM2.5, health concerns and environmental damage. It is extremely significant that a gravely endangered plant species has been "discovered" so recently when SIMTA has claimed that it has undertaken surveys of the affected areas. Did they know these extremely rare plants were there? Did they intend to tell anyone? Did they already bulldoze all of the surviving specimens hoping no-one would notice? SIMTA have shown that they can't be trusted with the environmental protection of such a relatively undisturbed area.

A truly independent investigation of the traffic, noise and environmental factors (as a bare minimum) is needed before SIMTA is allowed to lift a shovel again.

Andrew McDonald Wattle Grove

PS: The issue of fill needs to be considered carefully. SIMTA estimated the amount of fill they needed. Now they need an order of magnitude more. This is no accident. They want to turn our local area into a rubbish dump, presumably to line their pockets disposing of fill someone else needs to get rid of. I will not be satisfied that they need this fill until they account for where they intend to put every single cubic metre.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. this facility in the middle of a Residential area is detrimental to the health and well being of the residents o this community. the important of huge amounts of fill should have been mentioned in the original application if the proponent had carried out exhaustive examination of the area to confirm its suitability.

this importation will create excessive dust in the area as well as unnecessary traffic to service this importation. in addition the vehicles importing this fill will be exhausting Diesel fumes which are know to contain cancer causing Particulate 2.5

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

This development hasn't been totally assessed. The proponents continually claim the the level of noise will not impact on the residents living in the suburbs that surround the sites. The proponents are continually requesting modification approvals that will increase the impact of noise on the surrounding suburbs, including but not yet made public, to divert Moorebank Avenue around the eastern side of the MPE site resulting in the current through traffic flow to virtually run along the western fence line of Wattle Grove. I'm extremely concerned that the proponents are being allowed to do what they want. Continual modification requests must be minimised.

**From:** David Mawer <campaigns@good.do>  
**Sent:** Thursday, 23 February 2017 5:54 PM  
**To:** DPE CSE Information Planning Mailbox; Craig Kelly; Anne Stanley; Lee Rhiannon; Gladys Berejiklian; Anoulack Chanthivong; Melanie Gibbons; Paul Lynch; Melinda Pavey; Mehreen Faruqi  
**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Letter of objection.

Firstly, I am absolutely confused with the presentation of the project, the application process, the staged release of applications, the changing of the configuration, infrastructure layout and design, project magnitude, site structure, inconsistent metrics for statistical reference, timing of EIS data release, detail of project and yet lack of detail of project, to name a few. Overall transparency is inherently murky, and deceptive to any interested party wanting to assess this project for its merit or otherwise. The goalposts are regularly moving, making it difficult to; a) know what you are up against or how the design/purpose/amenity/rehabilitation of the land is to be enacted, and b) trust and comprehend the proponent's intentions and their integrity.

I congratulate the proponent for making weary those who have a vested interest in this project, and have tried to maintain the strength and fortitude to assess this plan. I have a full time job with a young family. It is unacceptable to be held to ransom over the utilisation of land proximal to where myself and my community reside. It is exhausting to be confronted with thousands of pages, then an amended thousands more pages, and construct a thorough review on the precinct. I am baffled that logical assertion and the concept of placing infrastructure where infrastructure should be placed with an ethic of balance between state, community and commercial need is not the answer in this circumstance. I am not keen to have my valuable sleep impacted, my travel times compromised, my amenity of open spaces I regularly use impacted, my land value eroded, as this will negatively affect my quality of life and those in the community who rejoice in the ultimate value of what we hold dear

our liberties and lives.

Responses to the proposals comprise: Moorebank Precinct West (MPW): RtS Concept Plan Modification – SSD 5066 MOD1

Hours of operation Definitely offended with the hours of operation being 0600 – 2200 Monday to Friday and 0700 to 1800 Saturdays. This is most intrusive with maximum 8 hour break during the week! The National Sleep Foundation recommends teenagers (aged 14-17 years) to obtain 8-10 hours of sleep per night. This figures are greater for younger persons. With this 8 hour window for the absence of pollution – dust, gas, light and mostly noise generation – newborns, infants, toddlers, pre-schoolers and school age children who may be sensitive to pollution in its many sources, or live nearby the construction zone (and in finality the operational areas of the completed hub itself) will be deprived the opportunity for a healthy, life sustaining sleep. What effects of human health will this create? It will only be negative. The ill effects of sleep deprivation can increase blood pressure, heart disease and stroke at the very minimum! This construction window of operation must be closed from 16 h

ours to 10 to encompass requirements of humans who are affected by this development who happen to live proximal to where this is proposed. No fault of their own. This is a fundamental human need.

**Hydrography** With the increased area for construction footprint, I have concerns about the hydrographical implications regarding volumes and quality of runoff in a wet weather event due to the proposed area of hardstand, and the modelled flood events based on channel and drain dimensions. I note that the number of drains that have volume constraints during some wet weather events. I ask is it sufficient to have the proportion of inefficient drains on the site, and are these inefficiencies based on the inlet point alone, or the interaction with other channels and drains? This may implicate a design inefficiency as either a localised or systemic issue, indicating design or engineering improvements.

Are the inlet pits screened for protection, and if so, what measures for blockage minimisation are implicated? As blockages of these systems can increase a flood risk, what approach to maintenance of structures exists? Were design blockages accounted for in the model by consideration (or design) to ensure adequate system performance?

To the west of the site, there appears to be an approximate 66 ha squared bulk earthworks area that intends to be grassed at completion of works. Would not the soil erosivity be higher with this intended type of vegetation and have a higher mobility potential and transportation to the Georges River? Is there intention to utilise geotechnical fabrics to minimise erosion at this location, or try another type of vegetative cover? Overland runoff from this area and flooding from the site in general can affect estuary sunlight penetration, its impact on the Georges River through bank erosion and bank scouring, and turbidity creation within the river column, and affect aquatic grasses, herbs (vegetation), macroinvertebrates, fish and birds.

Another concern is the artificial gradient that will be created for runoff given the intended extra elevation of the site to adjacent land and the added kinetic energy of the runoff at and beyond the boundaries and to the east of the site. How will the additional gradient effect vegetative surrounds and the Georges River?

I am unable to gauge whether the six or so weirs on site will collect all site flows in order to filter and manage runoff and facilitate its appropriate and engineered release into the surrounding environment.

### Subdivision and plan amendment

“Modify the staging future of applications” is a vague statement that does not instil confidence that the proponents are satisfied with their own plans or know truly what the plan is for the site. “Subdivision” sets off alarm bells for the potential sale of the subdivided plot for further developments that may not be bound by this application for purpose or time frame. Yet again, this instils the sentiment that the proponent does not know what to do with the parcel. What sentiment of trust or faith is the public given regarding this plan? What applications further to this will be made that alters the function or purpose of this precinct?

### Building heights

“Increase to building heights” Ensure that these heights does not interfere with the visual amenity of the site, and does not comply to Liverpool Local Environmental Plan 2008. The 21 metre height of structures such as the workshop is uncharacteristically elevated, and will sit atop increased elevation from imported fill.

### Air Quality

I am encouraged that the conclusion of the regional and local air quality results in the conclusion that “adverse impact on the surrounding environment from air pollutants generated by the project would be very low.” This statement is fraught with vague use of the English language. Whatever the “very low” effects of the project, it does not make any logical sense to negatively impact, punish and make ill thousands of residents who reside adjacent this development. Thankfully, Table 5 and Table 6 of the PB EIS dated

20/04/2016 has an annualised emission quantification and qualification which in my opinion does not resemble “very low.” There are many papers that indicate that there are increased health risks for populations residing adjacent source points of diesel fuel, (One being Matsuoka M, Hricko A, Gottlieb, R, and De Lara J Global Trade Impacts: Addressing the Health, Social and Environmental Consequences of Moving International Freight through Our Communitie

s. Occidental College and University of Southern California (Los Angeles, forthcoming, 2011)). There is scientific correlation of health risk within proximity to freeways, rail yards, and diesel emission sources, and sadly health considerations typically are not integrated into land use decision-making.

### Rail terminal amendments

The curvature of the SSFL required to access site has too tight a radius. Whatever mitigation measures (greasing of tracks) may be suggested, it does not change the fact that the line is proposed to be engineered with the intended geometry, and this unacceptably tight curvature is not designed to mitigate wheel squeal. With rail being a fundamental and expensive draw card for the project to take the trucks off the road, the hierarchy of controls leads us to the only two options left for this blunder – administrative control, then PPE. This most risky element in the hierarchy of control is ending up being borne by the hapless resident who will suffer immeasurably due to the design which cannot be changed. PPE will be needed by everyone within kilometres of the arc of the track’s access to site, and it will be needed regularly 24 hours a day.

Noise monitoring on the rail line is to be reviewed by the Secretary of the PAC (NSW) after five years of operation. This seems a little infrequent, especially at the initium. Surely there is a model that demonstrates the genesis and projection and affected areas of the noise emission.

I am confused by the acceptance of inter- intra- and Port shuttled freight. Does this mean westerly access connection from the Glenfield direction coupled with easterly access via the SSFL? I cannot see the indicated plan for this if this is the case.

**Subject:** MOOREBANK PRECINCT WEST [MPW]: Rts Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

If this amount of modification is required to the application then the initial application was flawed and should be thrown out.

If 600000 tonnes of fill is required then the site is not suitable and the original application was not carried out correctly. This is not a modification but a whole new development.

The movement of the amount of trucks required to move such a large amount of fill will have detrimental effects on traffic and air quality in the surrounding areas.

Since the original plan for this facility was mooted the area around it has undergone a lot of change. Large parts of the surrounding suburbs have been rezoned to medium and high density increasing the load on local roads and infrastructure which is already at saturation point.

Thirty story apartment blocks have been or are being built within 1.5km of this proposed facility and will have a wonderful view of this outrageous proposal as well as being adjacent to the freight rail line with an almost continuous line of trains passing them 24 hours a day.

This facility is within two km of Liverpool station and shopping centre and is far to close to an important business growth centre and will only stifle growth.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Having to import 1.6 million cubic metres of fill really says it all – this is the wrong site for such a development and having to increase the ground levels is asking for trouble in the future.

You start off with one concept and then keep on wanting to increase/change things as you please along the way without any thought whatsoever for the residents of the area. Our roads are already filled to capacity without the extra trucks that will be coming and going 24/7 creating air, noise and visual pollution. We do not have the capacity to carry those extra vehicles, and for you to want to create a ‘freight village’ is scandalous.

I am lodging my strongest objection to this entire proposal and am hoping that common sense takes over from corruption and greed.

**Subject:** MOOREBANK PRECINCT WEST [MPW]: Rts Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The reason for my objection is because an independent study has not been done on the effects of the thousands of extra truck movements everyday on the local roads including the M5 motorway. The increase in congestion will absolutely paralise the area and this will have a detrimental effect on everyone and everything. The destruction of this pristine area of riverland is going to happen without any doubt. There is a plant species thought to be extinct that has been found in this area. This project must not be allowed to proceed in order to preserve this beautiful area.

I would like an independent body to make the appropriate decision on whether this project is allowed to proceed. As I understand it a government department has so far approved this project that is in fact a government project. This sounds like it is corrupt and must not proceed. There is a conflict of interest here and I cannot believe it has progressed this far.

I believe this is completely wrong because there has been no transparency and honesty in this process at all. A government agency approving a government project? There is something wrong here. Putting in these modifications over the Christmas holiday period is proof of this dishonesty and lack of transparency.

Please do not let this project proceed at this location.

Attn: Director  
GPO Box 39, Sydney NSW 2001  
Social & Other Infrastructure Assessments, Department of Planning

I would like to submit my objection to the following Development Applications:

**MOOREBANK PRECINCT WEST (MPW): RtS Concept Plan Modification- SSD 5506 MOD1**

The Amended Modification Proposal seeks:

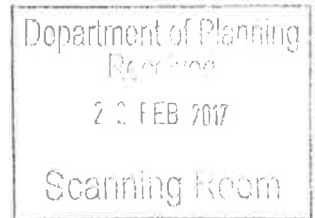

- 1 • Importation of 1.6million cubic metres of fill.
  - Altered Construction footprint including additional land parcels.
- 2 • Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
  - Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
  - Modify the staging of future applications
- 4 • Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- 3 • Increase to building heights and ground levels.
  - Subdivision.

I object to this modification:

1 - 2 - 3 - & 4

Name: G. FORCONI Dated: 16-2-17  
Address: 3 MONASH AVE WHITE GROVE

Do you wish your name to be withheld from publication. (Please circle)  No / Yes  
Have you made any Political donations (please circle)  No / Yes  
I agree that RAID Moorebank is also acting on my behalf and that of the community

**Moorebank Precinct East (MPE): Concept Plan Modification – MP10 0193 MOD 2**

The Amended Modification Proposal seeks:

- 1 • Increase the site area to include works proposed within the Moorebank Avenue road corridor
  - Avenue road corridor
- 2 • Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres widening the road and upgrading infrastructure such as stormwater drainage
  - Provide interim site access to warehousing from the Moorebank Avenue upgrade
- 3 • Reconfigure the internal road network and combine use of internal road network for both light and heavy vehicles
- 4 • Importation of 600,000 cubic metres of fill
- 5 • Re-arrange the locations of land uses such as the freight village, warehouses and intermodal facility
  - Modify the staging of future applications

I object to this modification:

1 - 2 - 3 - 4 & 5

Name: G. FORCONI Dated: 16/2/17  
Address: 3 MONASH AVE WHITE GROVE

Do you wish your name to be withheld from publication. (Please circle)  No / Yes  
Have you made any Political donations (please circle)  No / Yes  
I agree that RAID Moorebank is also acting on my behalf and that of the community

**Moorebank Precinct East (MPE): Stage 2 Application – SSD7628**

- 1 • Construction of Approximately 300,000 square metres of warehousing and distribution facilities
- 2 • Construction of a freight village comprising 8,000 square metres of retail, commercial and light industrial uses
- 3 • Construction of the internal road network and its connection to the public road network
- 4 • Construction of ancillary infrastructure such as drainage infrastructure and utilities relocation and installation
- 5 • Clearing of vegetation earthworks, remediation, landscaping and signage
- 6 • Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres, widening the road and upgrading infrastructure such as stormwater drainage
- 7 • Upgrading of intersections along Moorebank Avenue
- 8 • Subdivision to facilitate long term leases for future tenants.

I object to this application:

1-2-3-4-5-6-7-8 (OR ALL THE ABOVE)

Name: G. FORCONI Dated: 10/2/17

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. This monstrosity does not belong amongst residential communities that already struggle with massive traffic congestion. This monstrosity will further impede our environment adding more pollution and diesel emissions amongst schools, major state nursing homes and major public hospital of the state. This monstrosity will not aid the delivery and storage of containers for the country. Users will be bottlenecked. The location of the intermodal at this location is extraordinary and out of touch with the vicinity of it's environment. It will cost corporate and governments millions of dollars and the project will have a limited shelf life. Think for the future and locate this in an area that supports industry growth, isn't impeded or surrounded by residential and can be expanded to support the growing population of the country. Make a sustainable wise long term solution and relocate this outside of the residentia

l area of Moorebank and surrounding suburbs. You fail to do this. You fail the community and you fail as a representative of the community. you will cost tax payers millions of dollars and you will need to answer for it.

View this video of the M5 at Moorebank in the link at <https://www.youtube.com/watch?v=1RQ7SRcEJDE> . Now imagine an extra 8160 trucks and 5724 light commercial and staff vehicles (equal to 30,000 passenger cars) daily added to this traffic blackspot 40 times RMS guidelines. Instead of pulling 2700 trucks off the road from Port Botany which the proponents claim, the proposed terminal will simply move the problem to an area where they think the public don't have the knowledge and power to stand up for what is right.

**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

My primary concern relates to air quality for nearby residences. I am encouraged that the conclusion of the regional and local air quality results in the conclusion that “adverse impact on the surrounding environment from air pollutants generated by the project would be very low.” This statement is fraught with vague use of the English language. Whatever the “very low” effects of the project, it does not make any logical sense to negatively impact, punish and make ill thousands of residents who reside adjacent this development.

Thankfully, Table 5 and Table 6 of the PB EIS dated 20/04/2016 has an annualised emission quantification and qualification which in my opinion does not resemble “very low.” There are many papers that indicate that there are increased health risks for populations residing adjacent source points of diesel fuel, (One being Matsuoka M, Hricko A, Gottlieb, R, and De Lara J Global Trade Impacts: Addressing the Health, Social and Environmental Consequences of Moving International Freight through Our Communities

. Occidental College and University of Southern California (Los Angeles, forthcoming, 2011)). There is scientific correlation of health risk within proximity to freeways, rail yards, and diesel emission sources, and sadly health considerations typically are not integrated into land use decision-making.

**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. The Health issues it will bring to the area, the area is a very young person's community & has several schools & day care centres in the area. The M5 is a mess already day & night with very limited space to even improve it along the stretch from Port Botany to Moorebank, especially Foreshore Drive & leading onto the M5. It makes no sense to have it here when you have warehouse after warehouse with no residential anywhere near it at Eastern Creek. Most major company chains are in that area & makes a lot more sense than Liverpool that has zero major warehouses in the area. Then you also have the Georges river that comes into play, it is a major water way for the area that leads out to the main water ways & pollution would cause a major impact on the whole water way from Liverpool out to Botany Bay. This is a selfish decision with no concern, thought or respect for the community at all. Pull your head out of

the sand & put people & not money first.

Disgusted community member

I object to this application and the entire project at this location.

As the freight line already causes late night noise we do not need something like this to be around residential area working 24/7. We need a good quality of life. Also the amount of trees that need to be cleared to make way for this it would be better of treating this as a national park and create public areas for us to enjoy.

I object to this application and the entire project at this location.

There should be a comprehensive study of Aboriginal artifacts on this land, before there is any consideration of it being buried under two metres of dirt. Further, consideration has not been given to Aboriginal heritage sightlines from an important heritage site identified by National Parks and Wildlife on a plaque, located on the escarpment overlooking the spur line (near view) and also overlooking the Intermodal site (distant view), in Leacock Regional Park. The consideration of Aboriginal heritage issues and artifacts is manifestly inadequate.

**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I object on the grounds:

- 1) excessive noise that cannot be satisfactorily ameliorated.
- 2) there will be major traffic problems in SW Sydney due to the vast increase in truck movements to and from the site.
- 3) The raising of the site by ~2 metres due to huge amounts of fill will cause major issues to the flood plain which cannot be mitigated. Flood waters will be diverted onto surrounding and downstream residences.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. This area with new estates along and off Brickmakers Dve are pushing more traffic onto Nuwarra Rd which is now a peak times a car park due to the fact it is a one lane each way. Along with new medium high rise apartments that are being built around the same area more traffic on these roads is just ridiculous !! Then comes the increased pollution with all this extra traffic which becomes even worse with trucks being added to that !! Any new traffic along surrounding roads is not needed in this residential area !!!!!

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

This facility is in the wrong place It is a gross waste of taxpayers money whilst imposing a health and safety juggernaut on the local community There is absolutely no consideration or care for the families living in this area which will be subject to Pollution, noise, light spill and road chaos. There will be detrimental effects on the local families in so many ways Indigenous artefacts and scar trees will be subject to ignorant in difference of cultural importance. Local native fauna and the newly discovered recently thought to be extinct flora will be without regard destroyed denying future generations their splendour. And lastly the importation of 1.6m3 fill says this area is not suitable. This riverside land should be used for a university/tafe combination facility to provide first class education to the south west

**From:** Kelly O'Donnell <campaigns@good.do>  
**Sent:** Thursday, 23 February 2017 7:41 PM  
**To:** DPE CSE Information Planning Mailbox; Craig Kelly; Anne Stanley; Lee Rhiannon; Gladys Berejiklian; Anoulack Chanthivong; Melanie Gibbons; Paul Lynch; Melinda Pavey; Mehreen Faruqi  
**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The reason behind my objection is as follows:-

1. The amount of traffic on Moorebank Avenue
2. Noise and vibration from the trucks running back and forth 24/7

3 Emissions from truck exhausts

1. Noise from continuous breaking and shunting around the site
2. Contaminated land fill
3. Concept Plan was submitted knowing full well their would be modifications once submitted
4. Health Issues for Residents such as Asthma, Cancer, insomnia, depression etc
5. Proposed Site Access – Moorebank Avenue will be congested and cannot take the numerous trucks required to move the land
6. Drainage and Flooding issues
7. Widening of Moorebank Avenue to bring the existing road upto current design standards
8. Massive warehouse required to house all the vehicles
9. Construction Traffic impacting the area
10. Construction noise, out of hours work
11. Destroying native vegetation
12. Contamination issues
13. Stormwater and flooding issues
14. Air quality – emissions from construction
15. Lighting 24/7 annoying residents
16. An import/export terminal operating 24/7 with a capacity to handle up to 250,000 20ft vehicles in an area not suitable to do so.
17. Heritage – four isolated artefacts (Aboriginal Sites) will be destroyed.

Enough is enough now you want to extend the land. We do not want this terminal on our door steps. Period. Leave Moorebank alone!

**From:** Lauren Adams <campaigns@good.do>  
**Sent:** Friday, 24 February 2017 9:16 AM  
**To:** DPE CSE Information Planning Mailbox; Craig Kelly; Anne Stanley; Lee Rhiannon; Gladys Berejiklian; Anoulack Chanthivong; Melanie Gibbons; Paul Lynch; Melinda Pavey; Mehreen Faruqi  
**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Letter of objection.

Firstly, I am absolutely confused with the presentation of the project, the application process, the staged release of applications, the changing of the configuration, infrastructure layout and design, project magnitude, site structure, inconsistent metrics for statistical reference, timing of EIS data release, detail of project and yet lack of detail of project, to name a few. Overall transparency is inherently murky, and deceptive to any interested party wanting to assess this project for its merit or otherwise. The goalposts are regularly moving, making it difficult to; a) know what you are up against or how the design/purpose/amenity/rehabilitation of the land is to be enacted, and b) trust and comprehend the proponent's intentions and their integrity.

I congratulate the proponent for making weary those who have a vested interest in this project, and have tried to maintain the strength and fortitude to assess this plan. I have a full time job with a young family. It is unacceptable to be held to ransom over the utilisation of land proximal to where myself and my community reside. It is exhausting to be confronted with thousands of pages, then an amended thousands more pages, and construct a thorough review on the precinct. I am baffled that logical assertion and the concept of placing infrastructure where infrastructure should be placed with an ethic of balance between state, community and commercial need is not the answer in this circumstance. I am not keen to have my valuable sleep impacted, my travel times compromised, my amenity of open spaces I regularly use impacted, my land value eroded, as this will negatively affect my quality of life and those in the community who rejoice in the ultimate value of what we hold dear

our liberties and lives.

Responses to the proposals comprise: Moorebank Precinct West (MPW): RtS Concept Plan Modification – SSD 5066 MOD1

Hours of operation Definitely offended with the hours of operation being 0600 – 2200 Monday to Friday and 0700 to 1800 Saturdays. This is most intrusive with maximum 8 hour break during the week! The National Sleep Foundation recommends teenagers (aged 14-17 years) to obtain 8-10 hours of sleep per night. This figures are greater for younger persons. With this 8 hour window for the absence of pollution – dust, gas, light and mostly noise generation – newborns, infants, toddlers, pre-schoolers and school age children who may be sensitive to pollution in its many sources, or live nearby the construction zone (and in finality the operational areas of the completed hub itself) will be deprived the opportunity for a healthy, life sustaining sleep. What effects of human health will this create? It will only be negative. The ill effects of sleep deprivation can increase blood pressure, heart disease and stroke at the very minimum! This construction window of operation must be closed from 16 h

ours to 10<sup>6</sup> to encompass requirements of humans who are affected by this development who happen to live proximal to where this is proposed. No fault of their own. This is a fundamental human need.

**Hydrography** With the increased area for construction footprint, I have concerns about the hydrographical implications regarding volumes and quality of runoff in a wet weather event due to the proposed area of hardstand, and the modelled flood events based on channel and drain dimensions. I note that the number of drains that have volume constraints during some wet weather events. I ask is it sufficient to have the proportion of inefficient drains on the site, and are these inefficiencies based on the inlet point alone, or the interaction with other channels and drains? This may implicate a design inefficiency as either a localised or systemic issue, indicating design or engineering improvements.

Are the inlet pits screened for protection, and if so, what measures for blockage minimisation are implicated? As blockages of these systems can increase a flood risk, what approach to maintenance of structures exists? Were design blockages accounted for in the model by consideration (or design) to ensure adequate system performance?

To the west of the site, there appears to be an approximate 66 ha squared bulk earthworks area that intends to be grassed at completion of works. Would not the soil erosivity be higher with this intended type of vegetation and have a higher mobility potential and transportation to the Georges River? Is there intention to utilise geotechnical fabrics to minimise erosion at this location, or try another type of vegetative cover? Overland runoff from this area and flooding from the site in general can affect estuary sunlight penetration, its impact on the Georges River through bank erosion and bank scouring, and turbidity creation within the river column, and affect aquatic grasses, herbs (vegetation), macroinvertebrates, fish and birds.

Another concern is the artificial gradient that will be created for runoff given the intended extra elevation of the site to adjacent land and the added kinetic energy of the runoff at and beyond the boundaries and to the east of the site. How will the additional gradient effect vegetative surrounds and the Georges River?

I am unable to gauge whether the six or so weirs on site will collect all site flows in order to filter and manage runoff and facilitate its appropriate and engineered release into the surrounding environment.

#### Subdivision and plan amendment

“Modify the staging future of applications” is a vague statement that does not instil confidence that the proponents are satisfied with their own plans or know truly what the plan is for the site. “Subdivision” sets off alarm bells for the potential sale of the subdivided plot for further developments that may not be bound by this application for purpose or time frame. Yet again, this instils the sentiment that the proponent does not know what to do with the parcel. What sentiment of trust or faith is the public given regarding this plan? What applications further to this will be made that alters the function or purpose of this precinct?

#### Building heights

“Increase to building heights” Ensure that these heights does not interfere with the visual amenity of the site, and does not comply to Liverpool Local Environmental Plan 2008. The 21 metre height of structures such as the workshop is uncharacteristically elevated, and will sit atop increased elevation from imported fill.

#### Air Quality

I am encouraged that the conclusion of the regional and local air quality results in the conclusion that “adverse impact on the surrounding environment from air pollutants generated by the project would be very low.” This statement is fraught with vague use of the English language. Whatever the “very low” effects of the project, it does not make any logical sense to negatively impact, punish and make ill thousands of residents who reside adjacent this development. Thankfully, Table 5 and Table 6 of the PB EIS dated

20/04/2016 has an annualised emission quantification and qualification which in my opinion does not resemble “very low.” There are many papers that indicate that there are increased health risks for populations residing adjacent source points of diesel fuel, (One being Matsuoka M, Hricko A, Gottlieb, R, and De Lara J Global Trade Impacts: Addressing the Health, Social and Environmental Consequences of Moving International Freight through Our Communities

s. Occidental College and University of Southern California (Los Angeles, forthcoming, 2011)). There is scientific correlation of health risk within proximity to freeways, rail yards, and diesel emission sources, and sadly health considerations typically are not integrated into land use decision-making.

#### Rail terminal amendments

The curvature of the SSFL required to access site has too tight a radius. Whatever mitigation measures (greasing of tracks) may be suggested, it does not change the fact that the line is proposed to be engineered with the intended geometry, and this unacceptably tight curvature is not designed to mitigate wheel squeal. With rail being a fundamental and expensive draw card for the project to take the trucks off the road, the hierarchy of controls leads us to the only two options left for this blunder – administrative control, then PPE. This most risky element in the hierarchy of control is ending up being borne by the hapless resident who will suffer immeasurably due to the design which cannot be changed. PPE will be needed by everyone within kilometres of the arc of the track’s access to site, and it will be needed regularly 24 hours a day.

Noise monitoring on the rail line is to be reviewed by the Secretary of the PAC (NSW) after five years of operation. This seems a little infrequent, especially at the initiation. Surely there is a model that demonstrates the genesis and projection and affected areas of the noise emission.

I am confused by the acceptance of inter- intra- and Port shuttled freight. Does this mean westerly access connection from the Glenfield direction coupled with easterly access via the SSFL? I cannot see the indicated plan for this if this is the case.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

This project is completely unsuited to a growing residential area with road and transport links that are struggling to cope with the current numbers.

I am very concerned about the detrimental health effects on a community predominantly made up of young families.

The project was first proposed many years ago and the changing demographic and the approval of so many homes in the location makes the project untenable at the proposed site.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I object to this as I live in moorebank and I would never of lived here had I known this would be the future of moorebank. I have a huge mortgage and if my house lost value then I would end up bankrupt and unable to sell. I have 5 children and they go to school in this area. My 2 youngest have very bad asthma and this will only add to their illness. Already we have so much traffic and so many trucks in moorebank. Please don't allow this to happen. Think about the lives of all the people that live in this area. People matter more than making money, build the marina and make moorebank into a beautiful area. This is causing a lot of families anguish worrying about this terrible idea. This is not the place for it and it needs to be stopped.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Since the original plan for this facility was mooted the area around it has undergone a lot of change. Large parts of the surrounding suburbs have been rezoned to medium and high density increasing the load on local roads and infrastructure which is already at saturation point.

Thirty story apartment blocks have been or are being built within 1.5km of this proposed facility and will have a wonderful view of this outrageous proposal as well as being adjacent to the freight rail line with an almost continuous line of trains passing them 24 hours a day.

This facility is within two km of Liverpool station and shopping centre and is far to close to an important business growth centre and will only stifle growth.

It has been proven time and again that there will be no reduction but an increase of trucks and general traffic in the area.

The original EIS did not allow for the amount of fill required or for retail, commercial or light industrial uses and therefore should be reassessed.

This type of facility should not be sited so close to an environmental sensitive area as the Georges River nor as close to residential areas.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

If this amount of modification is required to the application then the initial application was flawed and should be thrown out.

If 600000 tonnes of fill is required then the site is not suitable and the original application was not carried out correctly.

The movement of the amount of trucks required to move such a large amount of fill will have detrimental effects on traffic and air quality in the surrounding areas.

Since the original plan for this facility was mooted the area around it has undergone a lot of change. Large parts of the surrounding suburbs have been rezoned to medium and high density increasing the load on local roads and infrastructure which is already at saturation point.

**Subject:** MOOREBANK PRECINCT WEST [MPW]: Rts Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I have great concerns about the size of the Intermodal in the proposed location of Moorebank. It will cause massive traffic problems in an area already with overstretched roads, especially when the Sandy Point Quarry re opens in March this year, both of these operations will cause our local roads to be unusable.

I suggest that it would be a better idea to rail the containers to small Intermodals around various areas of Sydney, especially maybe at Eastern Creek, where many of the trucks from Moorebank will need to deliver. Botany Bay container depot requires trucks to line up 24 hours ahead of arrival time, these trucks line the roads around Botany streets in a queue so as they will be at the Botany Intermodal at their appointed time. How will Moorebank cope with this?

Moorebank can not accommodate this volume of trucks.

Please rethink this proposal carefully, even at this late stage, it is just not feasible.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

As a resident that lives backing onto Anzac Rd, I am in awe at how such a proposal was even let off the ground to start with. How can you put such a busy, heavy vehicle transport hub/freight terminal right in the middle of a residential area and already congested roads?? My home suffered greatly with construction pollution when the JLU-E was being built with noise, dust and truck movements all affecting my daily activities. Liverpool hospital is already slow to get to with the current traffic let alone increased truck movements. The Liverpool area sits in a basin which accounts for its high levels of asthma sufferers. I'm sure we do not need to add to the pollution that thousands of trucks and diesel freight trains will pump into the atmosphere. There are also no warehouses in the vicinity of Moorebank which means that all this freight will HAVE to go on trucks to get it over to the warehouses where it will be stored. It makes much more sense to put this intermodal over near Erskine Park, Eastern Creek or even closer to Badgery's Creek so that the freight is where it will be stored and not congesting the residential areas of Liverpool. I have not been able to find one valid reason as to why this huge project should be put in this area but can find many, many reasons as to why it shouldn't!!!

I agree that RAID Moorebank is also acting on my behalf and that of the community

I am distressed about SIMTA'S official report 'Operational Traffic and Transport Assessment' which states that at this point in time there is a 20 fold higher crash rate, than the RMS threshold for blackspots, on Moorebank Avenue and Cambridge Ave. Already the SIMTA EIS has reported two fatalities over a five year period. I am even more distressed about MICL's EIS, which states that currently there is a 40 fold higher crash rate, than the RMS threshold for blackspots, on the M5 between Heathcote Road and the Hume Highway. This is the current situation. In the future, the reports state that between 75% and 85% of the trucks from the intermodals will use this M5 current black spot and 100% will use Moorebank Ave and 25% will use Sydney's worst accident hot spot. This will result in more deaths due simply, to bad planning. I am therefore highly opposed to this project and its amendments. I cannot understand this total disregard for human safety.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

If you have to import 1.6 million cubic metres of fill to make this site viable, then this is the wrong site for such a development.

I also strongly object to to your proposed re-arrangement of approved uses should this development go ahead. There are too many residences close by and none of them have been given any consideration. Apart from the residents, there are a number of schools and aged care institutions who will be affected by this proposal.

I strongly object to any proposals and indeed, to this project going ahead at all.

Attn: Director  
 GPO Box 39, Sydney NSW 2001  
 Social & Other Infrastructure Assessments, Department of Planning and Environment

I would like to submit my objection to the following Development Applications:

**MOOREBANK PRECINCT WEST (MPW): R&S Concept Plan Modification- SSD 5506 MOD1**

The Amended Modification Proposal seeks:

- Importation of 1.6million cubic metres of fill.
- Altered Construction footprint including additional land parcels.
- Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
- Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
- **Modify the staging of future applications**
- Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- Increase to building heights and ground levels.
- Subdivision.

AND CONSTRUCTION

I object to this modification: AND TO ~~ALL~~ THE BUILDING<sup>A</sup> OF ALL OF THE INTERMODAL AT MOOREBANK AS THE TOTAL IMPACT ON THE RESIDENTS OF WATTLE GROVE 400M AWAY, ADJACENT TO THE SITE WILL BE UNBEARABLE I.E. POLLUTION, NOISE, HUGE INCREASE IN STREET TRAFFIC, HUGE INCREASED TRUCK TRAFFIC, LAND VALUE DECREASE ETC

Name: NOEL WILSON Dated: 23.2.2017  
 Address: 21 TORRENS CRT WATTLE GROVE 2173

Do you wish your name to be withheld from publication. (Please circle)  No / Yes  
 Have you made any Political donations (please circle)  No / Yes  
 I agree that RAID Moorebank is also acting on my behalf and that of the community

**Moorebank Precinct East (MPE): Concept Plan Modification – MP10 0193 MOD 2**

The Amended Modification Proposal seeks:

- Increase the site area to include works proposed within the Moorebank
- Avenue road corridor
- Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres widening the road and upgrading infrastructure such as stormwater drainage
- Provide interim site access to warehousing from the Moorebank Avenue upgrade
- Reconfigure the internal road network and combine use of internal road network for both light and heavy vehicles
- Importation of 600,000 cubic metres of fill
- Re-arrange the locations of land uses such as the freight village, warehouses and intermodal facility
- Modify the staging of future applications

AND CONSTRUCTION

I object to this modification: AND TO THE BUILDING<sup>A</sup> OF ALL OF THE INTERMODAL AT MOOREBANK AS THE TOTAL IMPACT ON THE RESIDENTS OF WATTLE GROVE, 400M AWAY, ADJACENT TO THE SITE WILL BE UNBEARABLE I.E. I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I bought land and built a home in Wattle Grove 20 years ago, when all I had to agree to and deal with was low impact Army Storage. For the last 6 or more years, my community, my family and friends have lived under the threat of this stupid and wasteful project.

Not only will it kill me, as a result of its many noxious impacts, it will now bury me under a huge pile of dirt. It is simply not good enough.

Had I been consulted at any stage I would have made it abundantly clear: I do not and will not ever accept one of the most polluting industries in the middle of a Residential area on the banks of the Georges River.

Pure Lunacy

**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The existing road network, even with the proposed upgrades, will NEVER be able to handle the sheer volume of traffic generated by this proposal and residential and commercial developments currently being built in this area.

If 2 metres of fill needs to be added to this site then the site must be basically unsuitable for this development. Noise and light filtration will be unbearable to nearby residential areas. The general health and well being of surrounding suburbs will be greatly affected.

Prime river frontage land which can be used for residential/recreational/social/commercial and other community uses will be lost forever.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The Importation of such a large amount of fill makes the previous EIS null and void and should be redone.

If such a large amount of fill is required then the site is not suitable in the first place.

The transport of this fill will increase traffic and pollution in the area.

The statement that this facility will reduce traffic on the N5 is a blatant lie, the traffic will increase many times over as has been proven previously.

Attn: Director  
 GPO Box 39, Sydney NSW 2001  
 Social & Other Infrastructure Assessments, Department of Planning and Environment

I would like to submit my objection to the following Development Applications:

**MOOREBANK PRECINCT WEST (MPW): Rts Concept Plan Modification- SSD 5506 MOD1**

The Amended Modification Proposal seeks:

- Importation of 1.6million cubic metres of fill.
- Altered Construction footprint including additional land parcels.
- Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
- Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
- Modify the staging of future applications
- Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- Increase to building heights and ground levels.
- Subdivision.

AND CONSTRUCTION

I object to this modification: AND TO THE BUILDING<sup>^</sup> OF ALL OF THE INTERMODAL AT MOOREBANK AS THE TOTAL IMPACT ON THE RESIDENTS OF WATTLE GROVE, 900M AWAY ADJACENT TO THE SITE WILL BE UNBEARABLE. I.E. POLLUTION, NOIZE, HUGE INCREASE IN TRAFFIC, HUGE INCREASE IN TRUCK TRAFFIC, LAND VALUE DECREASE, TRAIN NOIZE 24 HRS PER DAY ETC.

Name: ROBERT WILSON Dated: 23/2/2017  
 Address: 21 TORRENS COURT WATTLE GROVE 2173

Do you wish your name to be withheld from publication. (Please circle)  No / Yes  
 Have you made any Political donations (please circle)  No / Yes  
 I agree that RAID Moorebank is also acting on my behalf and that of the community

**Moorebank Precinct East (MPE): Concept Plan Modification – MP10 0193 MOD 2**

The Amended Modification Proposal seeks:

- Increase the site area to include works proposed within the Moorebank
- Avenue road corridor
- Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres widening the road and upgrading infrastructure such as stormwater drainage
- Provide interim site access to warehousing from the Moorebank Avenue upgrade
- Reconfigure the internal road network and combine use of internal road network for both light and heavy vehicles
- Importation of 600,000 cubic metres of fill
- Re-arrange the locations of land uses such as the freight village, warehouses and intermodal facility
- Modify the staging of future applications

AND CONSTRUCTION

I object to this modification: AND TO THE BUILDING<sup>^</sup> OF ALL OF THE INTERMODAL AT MOOREBANK AS THE TOTAL IMPACT ON THE RESIDENTS OF WATTLE GROVE 400M AWAY ADJACENT TO THE SITE WILL BE UNBEARABLE I.E. POLLUTION, NOIZE, HUGE INCREASE IN STREET TRAFFIC, HUGE INCREASE IN TRUCK TRAFFIC, LAND VALUE DECREASE, TRAIN NOIZE 24 HRS PER DAY

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It will affect thousands of family's and hundreds of thousands of commuters on a daily basis. Residents and young family's live in moorebank and surrounds because they like a quiet lifestyle. My home is my only asset, will the government reimburse me for any capital lost due to this development? Most politicians live on the northern suburbs, but I bet they wouldn't allow an intermodal to be built! Many residents have illnesses and a peaceful lifestyle with quiet and green surrounds aid recoveries and minimize symptoms. The government should think ahead to the future rather than coming up with bandaid solutions. Locate the intermodal closer to the new airport, in preparation for future growth instead of imposing it on existing residential areas. It is too close to family homes, meaning loud noise, dust, pollutants etc would affect residents. This would then lead to an increase in Medicare and hospital costs due to the increased number of people visiting the doctor with intermo

dal inflicted illnesses. Putting the intermodal in the moorebank will only COST the government money, and community lives. DO NOT BUILD the intermodal in moorebank.

Yours sincerely, Ross

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It is absurd that a development of this magnitude be based on the Georges river in such close proximity to residents, schools and communities. It is an abomination that information had been withheld until after the close of the EIS relating to previously thought extinct species and excluding the air quality impacts that will have devastating affects on the entire community into the distant future. That these impacts will also affect the provision of health services that will be left to the community to fund and the proposers walk free of cost while making enormous profits from those same health impacts.

Tens of thousands of dollars have already been spent by local councils to improve the quality of the river and enhance its enjoyment by said community only to be dismissed and potentially destroyed by run off from the concrete jungle this intermodal will provide. Let alone the number of jobs being offered are by far less than a more forward thinking and productive use of the site would bring.

I do not support this initiative

**Subject:** MOOREBANK PRECINCT WEST [MPW]: Rts Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The reasons behind my objection is as follows:-

1. The amount of traffic on Moorebank Avenue
2. Noise and vibration from the trucks running back and forth 24/7

3 Emissions from truck exhausts

1. Noise from continuous breaking and shunting around the site
2. Contaminated land fill
3. Concept Plan was submitted knowing full well there would be modifications once submitted
4. Health Issues for Residents such as Asthma, Cancer, insomnia, depression etc
5. Proposed Site Access – Moorebank Avenue will be congested and cannot take the numerous trucks required to move the land
6. Drainage and Flooding issues
7. Widening of Moorebank Avenue to bring the existing road upto current design standards
8. Massive warehouse required to house all the vehicles
9. Construction Traffic impacting the area
10. Construction noise, out of hours work
11. Destroying native vegetation
12. Contamination issues
13. Stormwater and flooding issues
14. Air quality – emissions from construction
15. Lighting 24/7 annoying residents
16. An import/export terminal operating 24/7 with a capacity to handle up to 250,000 20ft vehicles in an area not suitable to do so.
17. Heritage – four isolated artefacts (Aboriginal Sites) will be destroyed.

Enough is enough now you want to extend the land. We do not want this terminal on our door steps. Period. Leave Moorebank alone!

**Subject:** MOOREBANK PRECINCT WEST [MPW]: RfS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to being forced to manage three different modification at the same time. I work full time, study and have a family to look after and even though out this I'm expected to read and understand 81 documents and make considered objections to the issues that affect my community. If this is consultation than it is woefully inadequate.

To not even give the community adequate time between each submission put us at a disadvantage for having true and equal consideration in this process.

I object to this application and the entire project at this location. It is too close to home and schools.

I object to the failure of this proposal to truly consider the impact on local residents and the wider Sydney community in increased road congestion. The road around this project can not even support the current traffic levels during peak considering adding even more trucks to the mix is truly irresponsible.

Attn: Director  
GPO Box 39, Sydney NSW 2001  
Social & Other Infrastructure Assessments, Department of Planning

I would like to submit my objection to the following Development Applications:

**MOOREBANK PRECINCT WEST (MPW): R+S Concept Plan Modification- SSD 5506 MOD1**

The Amended Modification Proposal seeks:

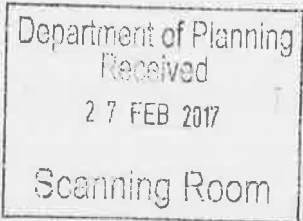

- Importation of 1.6million cubic metres of fill.
- Altered Construction footprint including additional land parcels.
- Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
- Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
- Modify the staging of future applications
- Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- Increase to building heights and ground levels.
- Subdivision.

I object to this modification:

It should never be near residential housing. The land fill will destroy the ecology of the area and the quality of water in the Georges River Basin.

Name: [redacted] Dated: 23-2-2017  
Address: [redacted]

Do you wish your name to be withheld from publication. (Please circle) No /  Yes  
Have you made any Political donations (please circle)  No / Yes  
I agree that RAID Moorebank is also acting on my behalf and that of the community

**Moorebank Precinct East (MPE): Concept Plan Modification – MP10 0193 MOD 2**

The Amended Modification Proposal seeks:

- Increase the site area to include works proposed within the Moorebank
- Avenue road corridor
- Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres widening the road and upgrading infrastructure such as stormwater drainage
- Provide interim site access to warehousing from the Moorebank Avenue upgrade
- Reconfigure the internal road network and combine use of internal road network for both light and heavy vehicles
- Importation of 600,000 cubic metres of fill
- Re-arrange the locations of land uses such as the freight village, warehouses and intermodal facility
- Modify the staging of future applications

I object to this modification: Moorebank Avenue is already congested. The area cannot cope with more traffic flow. The M5 is a car park most of the time. It would destroy the flood plain.

Name: [redacted] Dated: 23-2-2017  
Address: [redacted]

Do you wish your name to be withheld from publication. (Please circle) No /  Yes  
Have you made any Political donations (please circle)  No / Yes  
I agree that RAID Moorebank is also acting on my behalf and that of the community

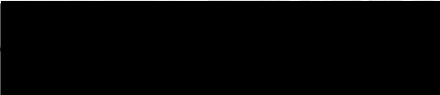

**Moorebank Precinct East (MPE): Stage 2 Application – SSD7628**

- Construction of Approximately 300,000 square metres of warehousing and distribution facilities
- Construction of a freight village comprising 8,000 square metres of retail, commercial and light industrial uses
- Construction of the internal road network and its connection to the public road network
- Construction of ancillary infrastructure such as drainage infrastructure and utilities relocation and installation
- Clearing of vegetation earthworks, remediation, landscaping and signage
- Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres, widening the road and upgrading infrastructure such as stormwater drainage
- Upgrading of intersections along Moorebank Avenue
- Subdivision to facilitate long term leases for future tenants.

I object to this application:

It is an abomination. Too many housing estates border  
this area. Are you going to rehouse everyone in Wattle Grove  
and the ne Glenfield Estate.

Name: ..  
Address ..

Dated: 23-2-2017.....

Do you wish your name to be withheld from publication. (Please circle) No /  Yes

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Letter of objection: Name: Vivienne Age: 9 Hi, my name is Vivienne and I am David's daughter, and I do not like how you are wanting to take over our precious area because trees help us to breathe and if we chop them down, that will be harsh for the environment. So people who are trying to stop putting stuff in precious natured areas is a waste of God's work. So I am trying to encourage you to stop knocking over precious land and putting in buildings and stuff that some people might not think is right for Moorebank.

So me and my family would like to stop this invasion of buildings and trucks. I would like to let nature run through so people can appreciate the work that God had done for us and the world, and could even appreciate you for building our houses. Me and my family think it's enough because there are too many houses and would love your help if you could switch your brain on and think about the future. If you have pets at home they will probably be extinct in the future because you are giving this man money and knock down all nature and put in buildings so people who would like to stop this nonsense would really appreciate if you did.

Thank you.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I particularly worried that the terminal will be built so close to the Liverpool CBD and surrounding housing areas including Wattle Grove and Moorebank. Children studying in local schools and people going about their lives around the area will be subjected to constant polluted air from increased transport and work. Their health will be impacted and they will increase needs for health care at local clinics and hospitals.

At the moment Wattle Grove residents have enjoyed clean and fresh air from the greens along its streets and park land. The intermodal project will change all these and potentially put off residents and drive people and investors away.

On the other hand, if these waterfront lands are developed into beautiful residential and commercial properties, it will do good to the Liverpool and CBD precinct.

I am appealing to politicians and policy makers to take a close look at the suitability of this project and consider the effects it will have if it continues this path and the opposite effects if residential development is pursued.

Yours sincerely Yow Wai Fong

**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community.

I object to this application and the entire project at this location.

Due to the fact there is no guarantee that 1.6 million cubic metres of untested land fill, soil, dirt or whatever will be toxic free. During 2016 it was brought to my attention that Liverpool Council workers delivered asbestos contaminated soil to Heathcote Road, opposite St Christopher's School and Church where they planted flowering trees, then had to dig them up and barricade the area off and removed the trees which was detrimental to our HEALTH (cancer) and cover the soil to try and stop contamination.

This project will just add more congestion to the M5 which is already stretched to the limit NOW let alone adding another 500,000 truck movements. Just trying to get out of Moorebank is a permanent nightmare now. We need a red light camera at the intersection of Nuwarra Road and Heatcote Road due to the time it takes semi trailers to take off. I use this intersection at least 3 times a week and without fail a truck or car goes through the red lights. Traffic incidents will occur.

Raising the Sites by 2 metres will add an eyesore to the area with flood lights affecting the residents that live in close proximity to the sites. What about our air pollution, it's already high at Moorebank (There are already way too many Cancer deaths due to the toxic emissions, these terminals should not be built in residential areas! Even in America they are saying they shouldn't be built in residential areas) What about our HEALTH????....Emmissions from Deisel, Dust, Contamination, Heritage, fauna let alone the Noise of Containers being dropped and moved on a daily basis with the site operating 24/7. Truck lights at night and the sound of the Deisel trucks coming and going non stop, changing gears and breaking..... Would you like that in your backyard, I THINK NOT.

This is a total waste of billions of taxpayers money. If this proposed freight terminal is such a great idea here at Moorebank why are the State and Federal Government contributing billions of dollars to it. Why are we subsidising private business? We do not want this in our backyard

This is not a well thought out plan, I'm convinced all the planning was done on paper in an office because if the planners lived in this area or spent time here they would see that the roads are congested at 5am everyday, just listen to the radio. Peak hour starts again at 2pm it's a nightmare. Let alone all the new housing estates that are developing at a rapid rate.

The residents have seriously had enough. Another 15,000 people moving into the area with the approval of affordable housing on Nuwarra Road. What a joke, more congestion, more pollution, and more traffic emmissions! The list goes on. Give Moorebank a break for gods sake!

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

Objection 1 : Moorebank Container Terminal – West – SSD 5506 MOD1

I am against the importation of 1.6million cubic metres of fill. I am concerned that the current land on the proposed site will not be remediated adequately enough and will just be covered over with the fill. This concerns me due to the high number of chemicals and materials left behind by The Defence Department. The area is known for floods and should a big flood occur it could cause irreparable damage to the environment, in particular The Georges River and the critically endangered, assumed extinct plant of the *hibbertia fumana* species.

I am against the increase to building heights and ground levels for similar reasons to the above eg flooding and run off. An increase in building heights will increase the noise, light and pollution to my home and nearby residents.  
I am against the altered Construction footprint including additional land parcels.

I am against the Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.

I am against the Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.

I am against Modifying the staging of future applications

I am against the Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.

I am against the Subdivision.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. We have lived here over 25 years and our family lives here, including seven grandchildren, I have noticed during this time the increase in the number of people as well as the congestion on our roads, to build this monstrous intermodal, will cause a disaster to our lives. There will be a huge Environmental disaster, we have much wildlife here, especially birds, cockatoos, kookaburras, parrots. All To be wiped out by this monstrosity. The noise will irritate this peaceful community, as will the pollution emitted from the trucks. Finally our homes will devalue, homes we have worked hard for, nearly died for when the interest rates were close to 20%! This is a vibrant community with numerous schools, aged care and working parents, this is not the place for it.

**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community.

I object to this application and the entire project at this location. The input of 2million tons of fill to raise the ground levels of the area above the flood plain will change the entire water flow and flood plain area. The re-direction of rainfall from the natural ground levels will cause Anzac and Harris Creeks to dry up. The natural water flows of the surrounding land and concreting with drainage towards Georges River means these creeks will die. There are no plans to create an alternate site for the backed up flood waters to retreat will mean other areas previously free from flooding could be endangered. The existing Concept plan submitted by SIMTA and MICL will be completely change by these new submissions and therefore all work should cease until there is a new PAC and community consultation. The three new submission make a joke of the Concept plan .

This was never planned years ago like all huge developments are. Its like someone woke up with an idea and put it into action.

Even Badgerys Creek Airport was in the planning stages in the early 80's, and still hasn't started.

This is a family area, it should remain free of any industry of this scale.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

As the existing road infrastructure is inadequate now, and adding the thousands of truck movements that this project will require, will make the roads in the area impossible. The much touted mantra that this project will remove thousand of trucks off the roads is utter fantasy, as this can only happen if the trains deliver and collect the shipping containers, directly to and from the end users. All it is doing is relocating trucks from Port Botany to Moorebank. But as this is a Federal Govt project they have no interest in roads which are a State and Local Govt responsibility, not theirs.

**Subject:** MOOREBANK PRECINCT WEST [MPW]: RtS Concept Plan Modification - SSD 5506 MOD1

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. The estimated levels of noise provided in the submission as being acceptable are contradicted by Transport for NSW and Sydney Trains Noise Logging reports of 2015. The non-reporting of the extinct flora until 4 days after the report points to this proponent doing anything it can to achieve its own interest and not the interest of the community. There is no community consultation. The raising of the site between 2 and four metres to get the site above the flood plain will cause a backup of water into areas upstream of the site possibly causing much more flooding into areas that were previously not subjected to flooding. An alternate flood mitigation area must be made of equal volume to the 2 million tons on infill. The raising of the site will cause more noise to be transmitted a longer distance and the light spill area will also increase. These must be mitigated before approval is granted. Three submissions being lodged at once is a planned strategy to limit the concerns of the community. It is blatant, conceived deception to deceive the community of a chance to review their plans and lodge objections. PAC could not have the resources to accurately review these submissions and give a well conceived justifiable response. The submissions provided for reviews do not meet the guidelines as provided by the Concept Plan approval. The conditions of consent are being ignored and the Proponents need to be held accountable for their neglect of duty. Where is the Duty of Care for the community. Additional truck movements required to import the fill will introduce much more pollution into the area than using the existing ground levels. Their plan to produce an Island above any possible floods should not be allowed. What happened to the concessions that will benefit the community. All have been eroded.
