Dear Julia

**Subject: SSD-50725708 | Dinawan Wind Farm | EIS**

We refer to your invitation for comment on the Environmental Impact Statement (EIS) for the *Dinawan Wind Farm*.

In considering this proposal for a 1,200 MW wind farm near Jerilderie NSW, it is the role of the Murray-Darling Basin Authority (MDBA) to ensure the water quality of the River Murray is maintained or improved, contributing to the protection of the riverine and floodplain environment. We also ensure there is no impact on the flow, use, or control of the River Murray.

Based on the information provided, the MDBA has completed its assessment and concludes the EIS appears suitably comprehensive.

The MDBA notes no specific conditions or further EIS requirements are applicable to this proposal.

We look forward to further consultation on this proposal and request any further correspondence be addressed via [RiverMurrayHealth@mdba.gov.au](mailto:RiverMurrayHealth@mdba.gov.au).

Yours sincerely,

Craig Hardge (MDBA)  
Director (A/g)  
Water Quality & Salinity
