Rocky Hill Coal Project – Application No SSD-5156
Stratford Coal Extension Project – Application No SSD - 4966 MOD1

Dear Sir/Madam

I oppose the Rocky Hill Coal Project and Stratford Mine modification on the following grounds

1. Proximity to residential areas

The mine is proposed only 900metres from the residential area of Forbesdale. These residents will carry an unacceptable burden and will be impacted by dust, noise and loss of amenity, resulting in risks to their health and loss of property value.

2. Impacts on Health

Health impacts from open-cut coalmines are well documented. With most of Gloucester township, including the hospital and schools, falling within the 5km health impact zone of the Rocky Hill mine, this places a large percentage of the population at risk. Those most affected by the health impacts are the very young, the elderly and the sick.

3. Impact on Tourism, worth \$51M per annum to the Gloucester economy

An open-cut coalmine within 5km of Gloucester and within sight of the Bucketts Way will have an impact on the visual amenity of the area. The mine will risk the jobs of hundreds employed in the tourism industry.

4. Environment

The proposed mine is on the Avon River floodplain and in the catchment area of the Manning River, which supplies drinking water to over 80,000 people. The Avon River has flooded 5 times in 4 years, with 2 floods occurring in 2013. There is definite potential for contamination of the water in the catchment.

This mine should not be approved

Yours faithfully

I have not made a reportable political donation

An open-cut coalmine within 5km of Gloucester and within sight of the Bucketts Way will have an impact on the visual amenity of the area. The mine will risk the jobs of hundreds employed in the tourism industry.

4. Environment

The proposed mine is in the Avon Valley which is the catchment area of the Manning River. This supplies drinking water to over 80,000 people. There is definite potential for contamination of the water in the catchment.

This mine should not be approved

Yours faithfully

I. Lewis

I have not made a reportable political donation

I was born in Gloucester and grew up here with my family. I do not want to see the air quality suffer as my parents and grandmother still live there. I would like to bring my children here one day to enjoy the fresh air and scenery.
p.s. Coal mines just look ugly. :)

Rocky Hill Coal Project – Application No SSD-5156
Stratford Coal Extension Project – Application No SSD - 4966 MOD 1

Dear Sir/Madam

I oppose the Rocky Hill Coal Project and Stratford Mine modification on the following grounds

1. Proximity to residential areas

The mine is proposed only 900metres from the residential area of Forbesdale. These residents will carry an unacceptable burden and will be impacted by dust, noise and loss of amenity, resulting in risks to their health and loss of property value.

2. Impacts on Health

Health impacts from open-cut coalmines are well documented. With most of Gloucester township, including the hospital and schools, falling within the 5km health impact zone of the Rocky Hill mine, this places a large percentage of the population at risk. Those most affected by the health impacts are the very young, the elderly and the sick.

3. Impact on Tourism, worth \$51M per annum to the Gloucester economy

An open-cut coalmine within 5km of Gloucester and within sight of the Bucketts Way will have an impact on the visual amenity of the area. The mine will risk the jobs of hundreds employed in the tourism industry.

4. Environment

The proposed mine is in the Avon Valley and in the catchment area of the Manning River. This supplies drinking water to over 80,000 people. There is definite potential for contamination of the water in the catchment.

This mine should not be approved

Yours faithfully

Philip Smart

Having lived in Gloucester for 57 years, I am very concerned with the devastating impact & long term pollution, to our town & to local farmers land. Observing the destruction to our landscape from previous & ongoing mining. Working in the Health Department my concerns for all residents young & old is a priority. The pollution is very evident to me when I wipe my glass outdoor table twice a week & black residue is on the cloth!!!

I have not made a reportable political donation

I strongly oppose to the Rocky Hill & Stratford projects.

Rocky Hill Coal Project – Application No SSD-5156
Stratford Coal Extension Project – Application No SSD - 4966 MOD 1

Dear Sir/Madam

I oppose the Rocky Hill Coal Project and Stratford Mine modification on the following grounds

1. Proximity to residential areas

The mine is proposed only 900metres from the residential area of Forbesdale. These residents will carry an unacceptable burden and will be impacted by dust, noise and loss of amenity, resulting in risks to their health and loss of property value.

2. Impacts on Health

Health impacts from open-cut coalmines are well documented. With most of Gloucester township, including the hospital and schools, falling within the 5km health impact zone of the Rocky Hill mine, this places a large percentage of the population at risk. Those most affected by the health impacts are the very young, the elderly and the sick.

3. Impact on Tourism, worth \$51M per annum to the Gloucester economy

An open-cut coalmine within 5km of Gloucester and within sight of the Bucketts Way will have an impact on the visual amenity of the area. The mine will risk the jobs of hundreds employed in the tourism industry.

4. Environment

The proposed mine is on the Avon River floodplain and in the catchment area of the Manning River, which supplies drinking water to over 80,000 people. The Avon River has flooded 5 times in 4 years, with 2 floods occurring in 2013. There is definite potential for contamination of the water in the catchment.

This mine should not be approved

Yours faithfully

I have not made a reportable political donation

In addition to the above, it is a much repeated fact that the burning of coal is the #1 source of human produced greenhouse gasses. We should be moving out of coal production not opening new mines.

I do personally do not want to see another Mrs Wellbrook, and we would plan to leave if the mine comes to fruition

Submission for the Rocky Hill Coal Project – Application No SSD-5156
Stratford Coal Extension Project – Application No SSD-4966 MOD 1

Dear Sir/Madam

I oppose the Rocky Hill Coal Project and the Stratford Modification

One would have to ask, why would the NSW Government justify a green field coal mine just 900metres from a residential area. Gloucester is an area of rural beauty, with sustainable industries of tourism, dairies and cattle farming. Not the place for a coal mine.

Even coking coal is not in demand around the world. There is enough stockpiled to adequately supply the steel making industry. Coal mining is not a sustainable industry, with fluctuating prices and worker layoffs.

The benefit to the NSW Government and the people of NSW is debatable. GRL will pay \$63M in revenue and \$60M in taxes. The life of the mine is 16 to 20 years. That means the company is paying just over \$3M a year for revenue and taxes. Most of the profit from this company will go overseas.

The NSW Government needs to invest in renewables, particularly in rural areas where employment is low. Towns, like Gloucester could be embracing the new world of solar, thermal solar, biomass, wind and hydro. So many options with huge benefits, like, reduced carbon emissions, lower power bills, regional economic development and stable job creation.

Gloucester could be the new renewables hub instead of following an out dated industry like coal. Isn't it about time we followed the rest of the world into the 21st century?

Yours faithfully

Those most affected by the health impacts are the very young, the elderly and the sick.

3. Impact on Tourism, worth \$51M per annum to the Gloucester economy

An open-cut coalmine within 5km of Gloucester and within sight of the Bucketts Way will have an impact on the visual amenity of the area. The mine will risk the jobs of hundreds employed in the tourism industry.

4. Environment

The proposed mine is on the Avon River floodplain and in the catchment area of the Manning River, which supplies drinking water to over 80,000 people. The Avon River has flooded 5 times in 4 years, with 2 floods occurring in 2013. There is definite potential for contamination of the water in the catchment.

This mine should not be approved.

Yours faithfully

Patsy Murrell

I have not made a reportable political donation

I have been over the Stratford mine years ago and the depth was frightening. Groundwater is certainly affected. So close to hospital and school - re dust and air pollution is the problem.

Rocky Hill Coal Project – Application No. SSD-5156

Dear Sir/Madam

I oppose the Rocky Hill Coal Project on the following grounds:

and Shattford Coal extension Application No. SSD 4966 MOD 1.

1. Proximity to residential areas

The mine is proposed only 900metres from the residential area of Forbesdale. These residents will carry an unacceptable burden and will be impacted by dust, noise and loss of amenity, resulting in risks to their health and loss of property value.

2. Impacts on Health

Health impacts from open-cut coalmines are well documented. With most of Gloucester township, including the hospital and schools, falling within the 5km health impact zone of the Rocky Hill mine, this places a large percentage of the population at risk. Those most affected by the health impacts are the very young, the elderly and the sick.

3. Impact on Tourism, worth \$51M per annum to the Gloucester economy

An open-cut coalmine within 5km of Gloucester and within sight of the Bucketts Way will have an impact on the visual amenity of the area. The mine will risk the jobs of hundreds employed in the tourism industry.

4. Environment

The proposed mine is on the Avon River floodplain and in the catchment area of the Manning River, which supplies drinking water to over 80,000 people. The Avon River has flooded 5 times in 4 years, with 2 floods occurring in 2013. There is definite potential for contamination of the water in the catchment.

This mine should not be approved.

Yours faithfully

Robyn Franks

*I find the thought of a coal mine abhorrent. No matter how close to town, the health impact from coal dust, noise & aesthetic pollution has already been proven in many areas previously. Gloucester is known far & wide for its country appeal, & healthy life style, & should never be spoilt by "the moon scape of a coal mine".
I don't approve this - Robyn*

Submission for the Rocky Hill Coal Project – Application No SSD-5156
Stratford Coal Extension Project – Application No SSD - 4966 MOD1

Dear Sir

I oppose the Rocky Hill Coal Project and Stratford Mine Modifications on the following grounds.

If the proposed mine goes ahead then the scenic beauty of the Gloucester valley will be irreparably damaged. This will lead to a dramatic drop in tourist numbers. Claims of financial benefit to the town will be lost by the decrease in visitors and the loss of jobs in tourism.

The Stratford mine boasted of increased employment for Gloucester locals when in fact 60% of the employees were drive in/drive out workers. These employees did not spend money in the town. The economic situation for Gloucester did not improve when Stratford was in operation and families of mine workers did not choose to live in the local area. Several businesses in Gloucester complained that they were training apprentices who then left and got employment at the Stratford mine, due to higher wages. Those businesses found the situation unsustainable.

When the Stratford mine slowed operations and eventually stopped production, many workers were laid off. This illustrates that mining is not a sustainable industry. When the price of coal goes down then mining companies have no responsibility to workers or the local areas. They just cease operations. This is not what we want for Gloucester.

Gloucester's clean, green image needs to thrive and grow. We want industries that enhance the rural area and promote our claim to fame of being the gateway to the Barrington Tops World Heritage area.

Yours sincerely

I oppose this mine & I
have become a member
of the community.

I have not made a reportable political donation

I am also concerned with the proximity of the mine in regards of the general prevailing winds that will direct dust a noise over the main town residential areas. This is aggravated by the North-South orientation of the valleys & surrounding hills.

Dear Sir/Madam

I oppose the Rocky Hill Coal Project and Stratford Mine modification on the following grounds

1. Proximity to residential areas

The mine is proposed only 900metres from the residential area of Forbesdale. These residents will carry an unacceptable burden and will be impacted by dust, noise and loss of amenity, resulting in risks to their health and loss of property value.

2. Impacts on Health

Health impacts from open-cut coalmines are well documented. With most of Gloucester township, including the hospital and schools, falling within the 5km health impact zone of the Rocky Hill mine, this places a large percentage of the population at risk. Those most affected by the health impacts are the very young, the elderly and the sick.

3. Impact on Tourism, worth \$51M per annum to the Gloucester economy

An open-cut coalmine within 5km of Gloucester and within sight of the Bucketts Way will have an impact on the visual amenity of the area. The mine will risk the jobs of hundreds employed in the tourism industry.

4. Environment

The proposed mine is on the Avon River floodplain and in the catchment area of the Manning River, which supplies drinking water to over 80,000 people. The Avon River has flooded 5 times in 4 years, with 2 floods occurring in 2013. There is definite potential for contamination of the water in the catchment.

This mine should not be approved. *I question any development that does not put people first. The health of people should be paramount.*

Yours faithfully
