**Wagga Wagga Health Services Redevelopment
Façade Reflectivity Design Statement**

The proposed Wagga Wagga Health Services Redevelopment will consist of a seven storey tower that will have a majority of the façade clad in a composite sheet metal cladding system. The reflectivity indices of the proposed façade will be below the 20% threshold range.

The façade design is based upon the Alucobond Metallic & Spectra & Sparkling colour ranges. Colour selections, including light reflectivity indices figures for each material are listed as follows:

Alucobond Metallic Range:

- Brilliant Metallic – 7.32%
- Bronze Metallic – 3.44%
- Smoke Silver Metallic – 3.61%
- Dark Grey Metallic – 2.65%

Spectra & Sparkling Range:

- Antique – 8.73%
- Autumn – 7.47%
- Amazon – 6.88%
- Anthracite Silver – N/A

Note: Light reflectivity data based on Alucobond architectural reflectivity colour palette.

Yours faithfully

Adam Muggleton
Senior Project Architect
