

Thursday, 18 December 2025

Rita Hatem
Department Planning Housing & Infrastructure
4 Parramatta Square
Parramatta
NSW

Dear Rita

To outline and respond to our conversations today (18/12/2025), please see below information.

Health

Edify will align the health staffing, hours of coverage, and availability for the proposed accommodation camp with relevant NSW Health guidance and best-practice standards.

This will include determining the appropriate level of on-site health personnel, operating hours, and escalation pathways having regard to workforce numbers, site risk profile, distance to existing medical services, and consultation with NSW Health and local health providers.

Transport Route.

1) Dubbo-Burroway Rd

Edify acknowledges previous RFI during the RtS phase of the project and proposes that only the OSOM vehicles utilise Burroway Road to access the site, this reduces the volume of project-generated traffic on Burroway Road to only three OSOM vehicle movements in total across the construction period. All other construction and operational traffic will utilise alternate approved routes, thereby avoiding Burroway Road.

2) Confirmation of peak hour vehicles on Manildra Street – Mitchell Highway

Traffic surveys were not undertaken for this intersection, the nearby Warren Roar / Mitchell Road intersection was surveyed.

3) Updated Access Figure from Narromine (TIA Figure 18)

Edify confirms that vehicles will not use the southern portion of Manildra Street and therefore avoid crossing the rail crossing.

Kind Regards

Adam Smith
