

Re: Angus Place Mine Extension Project (SSD-5602)

Thank you for your follow up assistance in respect of this matter.

TransGrid has reviewed the title references provided in respect of this project, including the supplementary information pertaining to DP1188105. We confirm that none of the Lots are subject to TransGrid easements or infrastructure. In the event any additional land is to be added to this State Significant Development (SSD-5602), please notify TransGrid accordingly, so a revised assessment may be undertaken.

Lot 5 in DP829137 appears to be the closest parcel of land to TransGrid's infrastructure – please refer to the attached TAMIS plan. Any development proposed near TransGrid's infrastructure is subject to SEPP (Infrastructure) 2007, in particular regulation 45. Please also find attached a copy of the *TransGrid Easement Guidelines for Third Party Development*, a copy of which is attached for your reference.

Should you have any queries, please feel free to contact me per the details below.

Kind regards
Tim
