

## **Telstra – Communication Services**

Existing Telstra assets are located along Tathra Road. These include copper and fibre services.

A formal application for reticulation was made through the Telstra Smart Communities website on 5<sup>th</sup> Oct 2012 (reference No. 17317011)

Telstra have verbally advised that diverse copper and fibre services can be provided to the new site. Telstra have also advised that at this stage of the project a pit and pipe system shall be provided from the site boundary positions to the incoming communication room positions.

The Local Health District (LHD) will enter into an agreement with Telstra to bring the required services to site. This will form part of the overall communications package that the LHD sign up to.

Telstra have issued a Telecommunications Network Infrastructure Notification dated 5<sup>th</sup> Oct 2012 for the SERH project.
