Environmental Assessment Requirements

State Significant Development

Section 4.12(8) of the Environmental Planning and Assessment Act 1979 Schedule 2 of the Environmental Planning and Assessment Regulation 2000

Application Number	SSD 5765
Development	 The Bowdens Silver Project, which includes: developing an open cut silver, lead and zinc mine and associated infrastructure, including a water supply pipeline; extracting and processing up to 2 million tonnes of ore a year for up to 17 years; transporting the processed ore from the mine via road; and rehabilitating the site.
Location	2.5 km northeast of Lue, in the Mid-Western Regional LGA
Applicant	Bowdens Silver Pty Limited
Date of Issue	21 June 2019
General Requirements	 The Environmental Impact Statement (EIS) for the development must comply with the requirements in Clauses 6 and 7 of Schedule 2 of the Environmental Planning and Assessment Regulation 2000. In particular, the EIS must include: a stand-alone executive summary; a full description of the development, including: the resource to be extracted, demonstrating efficient resource recovery within environmental constraints, and having regard to DRG/DRE's requirements (see Attachment 2A and 2B); the mine layout and scheduling; minerals processing; surface infrastructure and facilities (including any infrastructure that would be required for the development, but the subject of a separate approvals process); a waste (overburden, tailings, etc.) management strategy; a water management strategy, having regard to the EPA's and DPI's requirements (see Attachment 2A and 2B); a rehabilitation strategy, having regard to DRG/DRE's requirements (see Attachment 2A and 2B); a rehabilitation strategy, having regard to DRG/DRE's requirements (see Attachment 2A and 2B); a rehabilitation strategy, having regard to DRG/DRE's requirements (see Attachment 2A and 2B); a rehabilitation strategy in and the likely interactions between the development and any other existing, approved or proposed mining related development in the vicinity of the site; a list of any approvals that must be obtained before the development may commence; the terms of any proposed voluntary planning agreement with the relevant local council; an assessment of the likely impacts of the development on the environment, focusing on the specific issues identified below, including: a description of the existing environment likely to be affected by the development, using sufficient baseline data; an assessment of the likely impacts of all stages of the development, including any cu

	 whether these measures are consistent with industry best practice, and represent the full range of reasonable and feasible mitigation measures that could be implemented; the likely effectiveness of these measures, including performance measures where relevant; and whether contingency plans would be necessary to manage any residual risks; a description of the measures that would be implemented to monitor and report on the environmental performance of the development if it is approved; a consolidated summary of all the proposed environmental management and monitoring measures, identifying all the commitments in the EIS; consideration of the development against all relevant environmental planning instruments (including Part 3 of the <i>State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007);</i> a conclusion evaluating the merits of the project as a whole, having regard to the requirements in Section 4.15 of the <i>Environmental Planning and Assessment Act 1979;</i> and a signed statement from the author of the EIS, certifying that the information contained within the document is neither false nor misleading. While not exhaustive, Attachment 1 contains a list of some of the environmental planning instruments, guidelines, policies, and plans that may be relevant to the environmental assessment of this development. In addition to the matters set out in Schedule 1 of the <i>Environmental Planning and Assessment Regulation 2000</i>, the development application must be accompanied by a signed report from a suitably qualified and experienced person that includes an accurate estimate of the capital investment value (as defined in Clause 3 of the <i>Environmental Planning and Assessment Regulation 2000</i>, the development application must be accompanied by a signed report from a suitably qualified and experienced person that includes an accurate estimate of the capital i
	components from which the capital investment value calculation is derived.
Specific Issues	 The EIS must address the following specific issues: Land – including: an assessment of the likely impacts of the development on the soils and land capability of the site and surrounds; an assessment of the likely agricultural impacts of the development, including identification of any strategic agricultural land; an assessment of the likely impact of the development on landforms (topography), including the long term geotechnical stability of any new landforms on site; and an assessment of the compatibility of the development with other land uses in the vicinity of the development in accordance with the requirements of Clause 12 of <i>State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007</i>, paying particular attention to the agricultural land use in the region; Air Quality- including: an assessment of the likely air quality impacts of the development in accordance with the <i>Approved Methods and Guidance for the Modelling and Assessment of Air Pollutants in NSW</i>, having regard to the EPA's requirements (see Attachment 2A and 2B); and an assessment of the likely greenhouse gas impacts of the development's environmental impacts in relation to air quality (including heavy metals) and noise may impact on the health of the local community; and monitoring and management measures to reduce risk to human health; Water – including: an assessment of the likely impacts of the development's environmental impacts in relation to air quality (including heavy metals) and noise may impact on the health of the local community; and monitoring and management measures to reduce risk to human health;

	regard to the EPA's, DPI's and OEH's requirements (see Attachment 2A and 2B);
	- an assessment of the likely impacts of the development on aquifers, watercourses, riparian land, water-related infrastructure, and other water users, including:
	 a detailed site water balance, including an assessment of the reliability of water supply imported to the site, and management of excess water, supported by sensitivity analysis; and an assessment of the water quality and management of the
	 Noise and Blasting – including:
	 an assessment of the likely operational noise impacts of the development (including construction noise) under the Noise Policy for Industry (EPA), and the Voluntary Land Acquisition and Mitigation Policy, and having regard to the EPA's requirements (see Attachment 2A and 2B);
	- if a claim is made for specific construction noise criteria for certain activities, then this claim must be justified and accompanied by an assessment of the likely construction noise impacts of these activities under the <i>Interim Construction Noise Guideline</i> ;
	- an assessment of the likely road noise impacts of the development under the NSW Road Noise Policy; and
	 an assessment of the likely blasting impacts of the development on people, animals, buildings and infrastructure, and significant natural features, having regard to the relevant ANZECC guidelines; Biodiversity including:
	 Biodiversity – including: an assessment of the likely biodiversity impacts of the development, in accordance with the <i>Framework for Biodiversity Assessment</i>, and having regard to OEH's requirements (see Attachment 2A and 2B); and a strategy to offset any residual impacts of the development in accordance with the <i>NSW Biodiversity Offsets Policy for Major Projects</i>;
	• Heritage – including an assessment of the likely Aboriginal and historic heritage (cultural and archaeological) impacts of the development, having regard to OEH's requirements (including the Heritage Division) (see Attachment 2A and 2B);
•	development on the capacity, condition, safety and efficiency of the local and State road network, having regard to Mid-Western Regional Council's and RMS's requirements (see Attachment 2A and 2B);
	 Visual – including an assessment of the likely visual impacts of the development on private landowners in the vicinity of the development and key vantage points in the public domain, paying particular attention to the creation of any new landforms and minimising the lighting impacts of the development;
	 Hazards - including an assessment of the likely risks to public safety, paying particular attention to potential subsidence risks, bushfire risks, and the handling and use of any dangerous goods, having regard to the EPA's requirements (see Attachment 2A and 2B); and
	 Social & Economic – including: an assessment of the likely social impacts of the development on the local and regional community generally in accordance with the Social Impact Assessment Guidelines for State Significant Mining, Petroleum Production and Extractive Industry Development (2017), including the
	likely impacts of the development on the local community, cumulative impacts (considering other mining developments in the locality), and consideration of workforce accommodation; and
	 an assessment of the likely economic impacts of the development, paying particular attention to the: significance of the resource;
	 economic benefits of the development for the State and region; and demand for the provision of local infrastructure and services.

Consultation	During the preparation of the EIS and subsequent assessment process, you must establish and operate a Community Consultative Committee (CCC) for the development in accordance with the <i>Community Consultative Committee Guidelines: State Significant Projects</i> dated November 2016. You should also consult with relevant local, State or Commonwealth Government authorities, infrastructure and service providers, community groups and affected landowners. The EIS must describe the consultation that was carried out, identify the issues raised during this consultation (including by the CCC), and explain how these issues have been addressed in the EIS.
Further	If an EIS for the project is not lodged within 2 years of the issue date of these
consultation after	Environmental Assessment Requirements, the Applicant must consult further
2 years	with the Secretary in relation to the preparation of the EIS.
