gpo box 39
sydney nsw 2001

i am an employee at mount owen mine in the hunter valley and a resident of singleton
i have worked in the mining industry for the past ten years and i am growing increasingly frustrated with the ongoing
uncertainties in the planning approval process wich has resulted in many reductions recently
mount owen mine is currently in that process and i make this submisson in the positive for its approval
mount owen is not a green feild site we have never had any major environmental or resident complaints the subision is not to
increase productivity levels but to extend life of mine, it provides much needed infrastruture upgrades in the area wich are
attached to north pit acceptance, sure up jobs and flow income back into the community
we have seen a recent down turn in the industry and we have seen our local communities decline the closure of any more pits
could severally affect the future of singleton and other local communities

in summary all environmental concerns have been adressed in the EIS with a strong history of performance on site in this area
i strongly support the continuation project
