Content:

I object to this further extension of the Mt Owen mine for the following reasons;

1. The mine has already had a significant impact over it's 20 year lifespan so further destruction of 136ha of Endangered ecological communities which is habitat for 29 threatened fauna species is completely unacceptable. For example, the Spotted tailed Quoll and the swift parrot will be impacted.
2. Endangered Ecological Communities must be offset by like communities and if this is not possible, then the project should not proceed
3. No mine should be able to leave a final void. If this makes the mine uneconomic, then it should not be allowed to proceed. This mine will leave three final voids which is unacceptable.
4. The mine will increase dust levels in the area which already beyond the national standard for PM10.
- 5 The greenhouse gas contribution for this project has not been considered. With clear indications already evident of global warming and sea level rises, this is simply suicidal.
6. There has been no assessment of effects on groundwater systems in the area. There may be effects on Glennies creek and the Hunter river.
