Re: Mt Owen Continuation Project

We wish to lodge a submission of objection to the Mt Owen Continuation Project. We are Identified in the EA as 10.

We are objecting on three grounds.

1; Property Values

Our property has already been devalued because of mining activity. As this has been our home for over forty years this seems very unfair as in this EA there is no new requisition zone.

2; Noise

This has been an ongoing concern already so as the mine moves closer it is going to be more of a problem.

3; Air Quality

This is a big concern for it is not only the air we breath but as the dust settles on the roof top it then pollutes the water in our only drinking water tanks. We rely on tank water for drinking and cooking so this is not a good outcome.

Yours faithfully
