I am currently employed at mt owen as a heavy plant mechanic and have been there for 7years now. I love my job, I love the outstanding attitude and actions towards safety at work and absolutely would love for the continuation project of mt owen mine operations project to continue SSD 5850. My job is my life and my families life, life is pretty grim at the moment for the minning industry at the moment and I don't know hc:w many more punches we can take, the workers their families the towns the businesses the families of those businesses and so on and so on. We clearly witnessed over the last 15months that cuts in minning not only stops just there. It makes a huge snowball effect all the way down to the small business owner. It's not just us workers that need the continuation of mt owen but all those people and businesses I mentioned earlier in my statement. People always talk about how bad mining is on the environment but they have an outstanding rehabilitation policies, protection of flora and fauna and constantly listening and informing the community to keep them up to date and informed with what's happening in their back yard. Minning is my life and my kids life. Without it I'm up the creek without a paddle. I strongly support the mt owen continuation projects SSD 5850.
