Content:

I am opposed to the continuation of the Mt Owen Continued Operations Project because it cannot be offset and the impact will be felt initially by endangered species such as the Swift Parrot and the Spotted-tailed Quoll, but medium and long term by all of us via climate change, which has not been considered. Increasing the footprint of the mine by 485 Ha will inevitably result in an increased dust problem, particularly in periods of drought. The permanent impact on ground water systems, which has not been considered and the increase in noise for the duration of mining are cumulative degradation for neighbours and the environment.
