Content:

I wish to object to the Mt Owen Continued Operations Project (20kms nw Singleton)

This mine has caused significant environmental impacts over the last 20 years and this proposal will disturb another 485ha including 136.3ha of endangered ecological communities and habitat of 29 threatened species.

The proposed biodiversity offset area are entirely inadequate. There is an 84.6ha deficit for impacted EECs.

The cumulative impacts of this project have not been adequately addressed.

Air quality will further deteriorate. Current operations exceed the national standards for PM10 emissions. this proposal will increase these exceedances.

More than 20 properties will be affected by this project.

Cumulative impacts on waterways associated with Glennies Creek and the Hunter River have not been assessed.

The final landform will leave 3 voids.

This project is unacceptable to the health of the residents and the flora and fauna.

It must be rejected.
