Re: Mt Owen Project Approval SSD-5850 – Historic Heritage Management Plan

Dear Lauren,

Please find enclosed the Mt Owen Mine Historic Heritage Management Plan. This plan is required to be prepared to the satisfaction of the Secretary as per Schedule 3, Condition 35 of Project Approval SSD-5850. This plan was last approved in May 2018 by the Secretary, however, SSD-5850 modification (MOCO Mod 2) was approved 4 September 2019. This approval provides an extension to the mining area at North Pit to enable access to an additional approximately 35Mt of ROM coal extending the Mount Owen Mine life by an additional 6 years to 2037.

As per Schedule 5, Condition 6 of SSD-5850 (as modified) the revision of this plan must be completed within 3 months of any modification to the consent. For ease of review the word version provided has track-changes throughout to distinguish those updates from the currently approved version.

Please note, this plan is also a requirement as per Schedule 3, Condition 45 of Project Approval DA 80/952 (Glendell Open Cut).

If you have any questions regarding the review and subsequent changes to this plan, please don't hesitate to contact myself.

Kind regards,

Melanie Dillon
