Re: Mt Owen Project Approval SSD-5850 – Modification 5 (January 2021)

Dear Lauren,

On the 15th January 2021, SSD-5850 Modification 5 was approved. As per Schedule 5, Condition 6 of SSD-5850 (as modified) the revision of Strategies, Plans and Programs must be completed within 3 months of any modification to the consent.

As SSD-5850 modification (MOCO Mod 2) was approved 4 September 2019 as well as DA80/952 (Glendell Mod 4) was approved 4 March 2020, all revised plans have recently been reviewed by the Department via the online Planning Portal. Mt Owen would like confirmation that this revision of all associated Strategies, Plans and Programs is sufficient to satisfy Schedule 5, Condition 6 of SSD-5850 (as modified). Mt Owen would therefore continue to implement the existing management strategies, plans or programs.

The exception being the Biodiversity Offset Management Plan (BOMP) which requires review within the three month period. This plan is currently under a “stop clock” in the online Planning Portal in anticipation of MOCO Mod 5 being determined. We are currently revising this management plan in line with the recent MOCO Mod 5 approval.

If you have any questions regarding the review and subsequent changes to this plan, please don't hesitate to contact myself.

Kind regards,

Jason Desmond
