Modification Description

Veolia is applying to modify State significant development consent SSD 5855 under Section 4.55(1A) of the NSW Environmental Planning and Assessment Act 1979 to enable:

- an increased proportion of putrescible waste to be received and transferred, within the existing approved total waste limit.
- an increase in the amount of food organic and garden organic (FOGO) waste transported by road.
- road transport of FOGO and non-putrescible waste to a broader choice of resource recovery facilities.

How is the modification substantially the same as the original development?

No change is proposed to the total amount of waste approved to be received at and transferred from the BTT each year (500,000 tonnes), only change to the proportions of putrescible and non-putrescible waste within that limit is proposed.

The modification will not require any construction activities and will not impact any built or operational aspects of the BTT.
