State Significant Development Application – Mixed Use Development

I refer to correspondence from the Department of Planning & Infrastructure dated the 25 March, 2013 regarding the abovementioned project.

The site plan included in the EIS indicates the location of this project to be remote from any existing TransGrid infrastructure. Therefore, TransGrid will have no objections to this project.

I do suggest that if you have not already done so you contact Ausgrid as they may well have Underground Cables or some other form of infrastructure in this area.

If you have any queries then feel free to get back to me.

Regards

David
