

SUBMISSION J

Hi Guys,

Hope you've had a good week, attached is a spreadsheet that Steve Kuhen has drawn up, he said he woke up early the other morning and decided the job had to be done.

He has recorded all of the truck movements on cabbage tree road, yes it is anecdotal however I'm sure you'll think it's interesting and backs up exactly what we were discussing the other week.

It's important to note too that we do hear trucks at all hours of the night and ones that have let of exhaust breaks at 2am. The only reason I notice is when I'm awake after the kids have woken me and I'm trying to get back to sleep.

Have a good night.

Cheers
