These are my views on the controversial proposed sand mine on Cabbage Tree Rd Williamtown.

This proposed sand mine is directly opposite my home & property where I have lived for over 15 years for the nice rural lifestyle.

The amount of traffic on our road is already dangerous with the number of sand trucks from other mines to & from Sydney on a daily basis.

Getting onto the road from our driveway is a difficult thing to do.

No matter how early you indicate to turn right or left into our driveway traffic rarely slows down causing stress & worry of been rear ended or sideswiped as there is very little room to pass the turning vehicle coming into my driveway.

Even when I am collecting mail the rush of air from some passing trucks is quite unbelievable & sleep at night is also disturbed by trucks which my grandchildren comment on regularly when they stay the night.

Walking along the road which I & many of the neighbor's used to do is non existant now without more B Doubles coming & going outside my home.

Our home & neighborhood already gets black dust from the coal loader area on Kooragang Island & that is far far further away then this proposed sand mine which will also create sand silica dust & dirt dust from the internal roads. This is quite evident by looking at our fly screens, sails & awnings & trying to clean same with not much success, so that more dust over my property & in my house is not something I want.

Over the preceding years we have spent considerable money on improving our buildings fences sheds & gardens for the reason of adding value to our property & have something we are proud to sell when we have to downsize, at the moment with the proposed sand mine our properties are worthless.

If this proposed mine goes ahead NO WAY is anyone going to want to live directly opposite a sand mine

Thank you for your time
