Content:

The new facade and height onto Macpherson Street will adversely impact the environment and loom over the street. There should be no increase in height, or the facade's impact on the amenity of the street's users. The relocation of the pedestrian crossing, further from the roundabout significantly impacts people walking along Albion Street, especially those with strollers or who have challenges walking, who already have to walk a long way down Macpherson Street to use the crossing (or run the gauntlet of crossing near the roundabout, already a danger due to impatient drivers at this very busy intersection, many of them dropping off at the school)
