Narrabri Coal Seam Gas Project

Dear Sir/Madam

This is a submission to the Narrabri Gas Environmental Impact Statement.

I oppose the Narrabri Coal Seam Gas Project and believe it should be rejected.

Santos' EIS is very short on detail. It does not provide maps indicating where these 850 wells and the lines and infrastructure that run between and around them will go. Santos is seeking a blank cheque consent for this gasfield on the promise that it will decide where the wells will go afterward using a "Field Development Protocol." No project has ever been assessed this way before in NSW and the constraints Santos propose are weak and subject to change later on. This is not an appropriate way to assess the largest development project ever undertaken under the Environmental Planning and Assessment Act and the Government must insist that Santos release details to the public about the placement of its wells, pipelines and some other infrastructure.

There are many valid reasons The Narrabri Coal Seam Gas project should be rejected including:

This project should not be approved.

Yours faithfully

I have not made a reportable political donation
