Australian Plants Society Northern Beaches , Freshwater NSW, made the following submission on the project:

[Narrabri Gas Project](#)

Objects to this project

This is a submission on behalf of the Australian Plants Society Northern Beaches Group.

We are opposed to the CSG proposal in the Pilliga for the following reasons:

- Up to 1000 ha of the Pilliga Forest could be cleared.
- Water extraction would reduce water resources for other flora and fauna and a large proportion would be polluted by the production of salt.

Our group is focussed on maintenance and propagation of Australian plants and their habitat as well as their ecological niche. Not only would this directly be annihilated also due to increased climate change gas production the habitat and ecological niches in other locations will be negatively impacted.
